LETTER FROM THE EXECUTIVE DIRECTOR

2020 has been a very difficult year for many in our country. The COVID-19 pandemic and its impact on all aspects of our personal and professional lives is hard to calculate. As we reflect on the accomplishments that were achieved in 2020, we must also understand that the pandemic's effects will continue to be felt well into 2021 as well. However, despite the difficulties experienced during this most unusual year it is important to consider how much activity TRC was able to execute in the last year. The program continued to work in new and interesting ways to keep collecting mercury-containing thermostats and recycling every mercury thermostat every time.

While overall 2020 collections are down, data shows that the replacement of HVACR equipment continues to be the leading indicator to mercury thermostat replacement. The accelerated adoption of "smart-home" controls and the array of utility programs which encourage early thermostat replacements continue to be major drivers of collections. Looking ahead, TRC anticipates that the program will experience a rebound in 2021 collections as site visits can be utilized in a greater capacity to encourage the return of mercury containing thermostats. Due to the pandemic, most site visits were bunched in the first and fourth quarters, typically site visits are spread out throughout the year. However, it is important to remember that TRC collects and recycles a product that has not been sold in the marketplace since 2007; and as there is a decreasing number of mercury-containing thermostats in use, our collections will continue to decline over time.

TRC was able to fulfill state statutory requirements, agreements and other arrangements for regulatory and legislative compliance, despite the strain our country experienced in 2020. In 2021, TRC will continue to target mercury thermostat collections by engaging with utility energy efficiency programs while simultaneously maintaining the HVAC industry collections. TRC plans to work with its partners in industry, the waste sector, the energy sector and the regulatory community to achieve positive results.

The message around the importance of the proper disposal of mercury-containing devices is really a familiar message. As with any recycling program, our goal is to maintain awareness of the issue without becoming background noise lost in the constant stream of marketing information broadcast

each day. One exciting change coming to TRC in 2021 will be a redesigned website, built to better target individual recyclers and homeowners. In addition, the new website will have expanded mobility functions that allow for easy access to the site. To help further increase awareness during 2020, TRC participated in the California Resource Recycling Association's virtual conference. TRC was part of a panel discussion with other California stewardship programs.

For a program such as TRC's to be successful year after year, the coordinated effort of many parties is required. TRC is fortunate to have exceptional support from its industry members, collection partners, marketers, allied industries, regulatory agencies and staff. These strategic partnerships allow TRC's effectiveness to grow as it continues to move forward successfully in the collection and proper disposal of mercury-containing thermostats.

We are happy to provide you with this year's annual report. Please do not hesitate to contact us with comments or questions.

Ralph Vasami

Executive Director

CALIFORNIA

2020 Collections and Evaluation

The following analytical report details the annual program performance for mercury thermostat collection in the state of California in 2020. It is important to note that collections were most likely affected by the pandemic, whether it be fewer in-home replacements, a delay of dropping thermostats off for recycling or collection locations returning less recycling containers due to limited personnel. A few of the program highlights for 2020 are included below:

- **The charts below demonstrate the program's noticeable downward trend. The collection program peaked in California in 2013**. There is an unmistakable downward trend for the average thermostats in the bin over time, even though a greater number of containers are being returned for processing.
- In 2020 the program **collected 110.6 lbs. of mercury** in California, a **37% decrease from 2019**.
- The program collected **8,994 whole thermostats in 2020**. This was a 37% decrease over the number of thermostats collected in 2019.
- Since 2001, the average thermostat count per year in California is 10,689.
- The **number of whole thermostats collected per bin in 2020 was 23 thermostats,** a slight decrease from 25 in 2019, overall reflecting a downward trend in the number of thermostats per bin in California**.**
- The counties with the greatest bins and thermostats returned in 2020 were **Los Angeles County (118 bins, 2,797 thermostats), San Diego County (51 bins, 1,449 thermostats), and Orange County (39 bins, 940 thermostats). These returns parallel our focused efforts on highly populated regions.**
- In 2020, 32% of the partner locations returned at least one bin in California, which is the third highest return rate in the United States.

- **A total of 1,671 'Miss You' calls and 692 site visits were completed in 2020** which resulted in a positive relationship between activity and bin returns.

- In addition to 8,994 whole thermostats, **1,396 loose switches were collected, bringing the total number of "thermostat equivalents" returned in 2020 to 9,758**, a decrease of 40% from 2019.

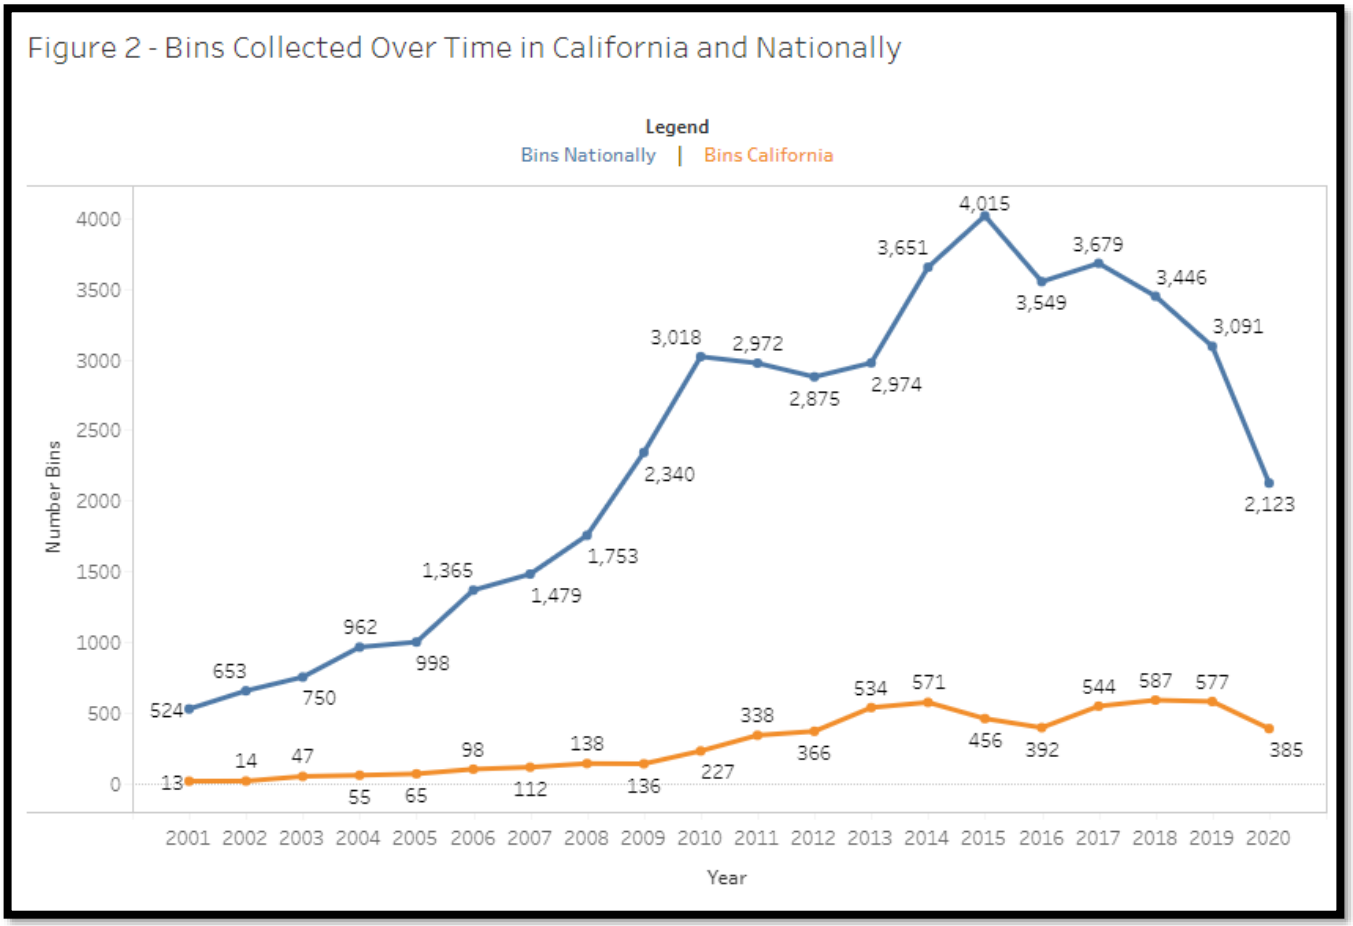
Section 1: Program Analytics

Section 1 of this report examines the annual performance of the thermostat collection recycling program in terms of bins, thermostats, and mercury collected as well as the year-over-year progression of the program. On average, the program has collected 139.2 lbs. of mercury and 10,689 whole thermostats per year since 2001. In 2020, the program collected 110.6 lbs. of mercury from 8,994 thermostats and 1,396 loose switches. Figure 1 below displays the total number of bins, the total number of thermostats, and the quantity of mercury collected in California since the beginning of the program.

Figure 1 - Program Performance Over Time

Year	Number Bins	Number Thermostats	Mercury (Lb)
2001	13	182	4.9
2002	14	702	10.5
2003	47	2,395	38.9
2004	55	3,025	36.6
2005	65	3,901	45.9
2006	98	5,110	77.4
2007	112	5,750	83.3
2008	138	7,007	104.8
2009	136	7,441	103.6
2010	227	13,340	185.8
2011	338	18,697	254.8
2012	366	16,353	219.7
2013	534	20,956	265.5
2014	571	20,178	266.9
2015	456	18,260	214.8
2016	392	15,501	184.6
2017	544	17,976	220.3
2018	587	13,710	179.7
2019	577	14,305	175.7
2020	385	8,994	110.6
Total	5,655	213,783	2,784.3
Average	283	10,689	139.2

Figure 2 displays the number of bins collected in California since the initiation of the collection program, as well as the total number of bins collected in the U.S. over the same period. The number of bins collected in California has generally increased from 2000 to 2014. In 2017, bin returns increased again, peaking with the highest number of bins returned in 2018 with 587 bins. While the program sees greater bin returns each year, that does not equate to greater thermostat returns.



The 110.6 lbs. of mercury collected in California in 2020 was 37% lower than the 175.7 lbs. collected in 2019. Figure 3 displays the quantity of mercury collected in California over time as well as the annual percent change in California and nationally.

Figure 3 - Quantity (Lb) of Mercury Collected in Program and Annual Changes to California and Nationally

Year	Mercury (Lb)	% Change California	% Change Nationally
2001	4.9		89%
2002	10.5	112%	14%
2003	38.9	271%	11%
2004	36.6	-6%	17%
2005	45.9	25%	11%
2006	77.4	69%	32%
2007	83.3	8%	2%
2008	104.8	26%	16%
2009	103.6	-1%	16%
2010	185.8	79%	26%
2011	254.8	37%	4%
2012	219.7	-14%	-5%
2013	265.5	21%	-5%
2014	266.9	1%	13%
2015	214.8	-20%	-1%
2016	184.6	-14%	-15%
2017	220.3	19%	-7%
2018	179.7	-18%	-42%
2019	175.7	-2%	5%
2020	110.6	-37%	-71%
Average	139.2		

California collected 8,994 thermostats in 2020. This was a decline of 37% over the number of thermostats collected in 2019. Figure 4 displays the total number of thermostats collected in California and nationally, and Figure 5 shares the underlying data as well as the calculated annual percent change.

Figure 4 - Number of Whole Thermostats Collected Over Time in California and Nationally

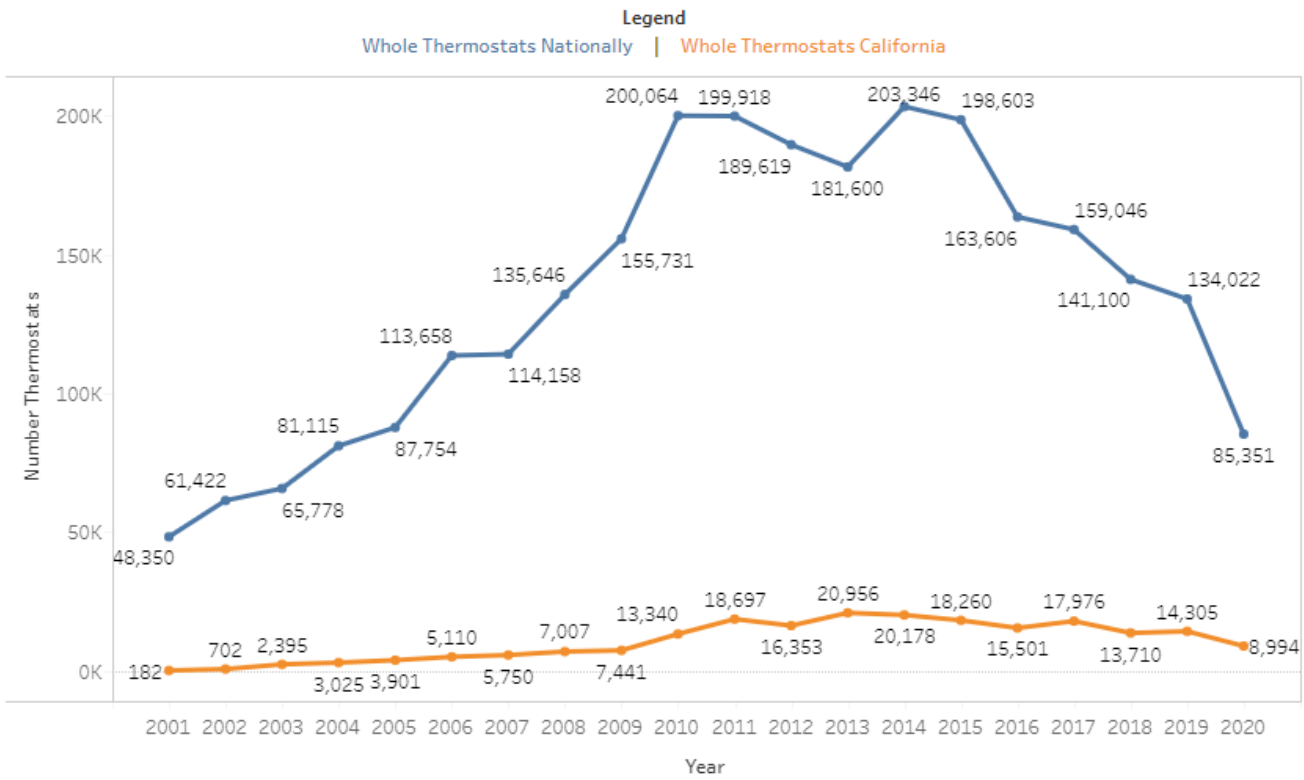


Figure 5 - Whole Thermostats Collected in California and Nationally Over Time and Annual Percent Change

Year	Number Thermostats California	% Change California	% Change Nationally
2001	182		
2002	702	286%	27%
2003	2,395	241%	7%
2004	3,025	26%	23%
2005	3,901	29%	8%
2006	5,110	31%	30%
2007	5,750	13%	0%
2008	7,007	22%	19%

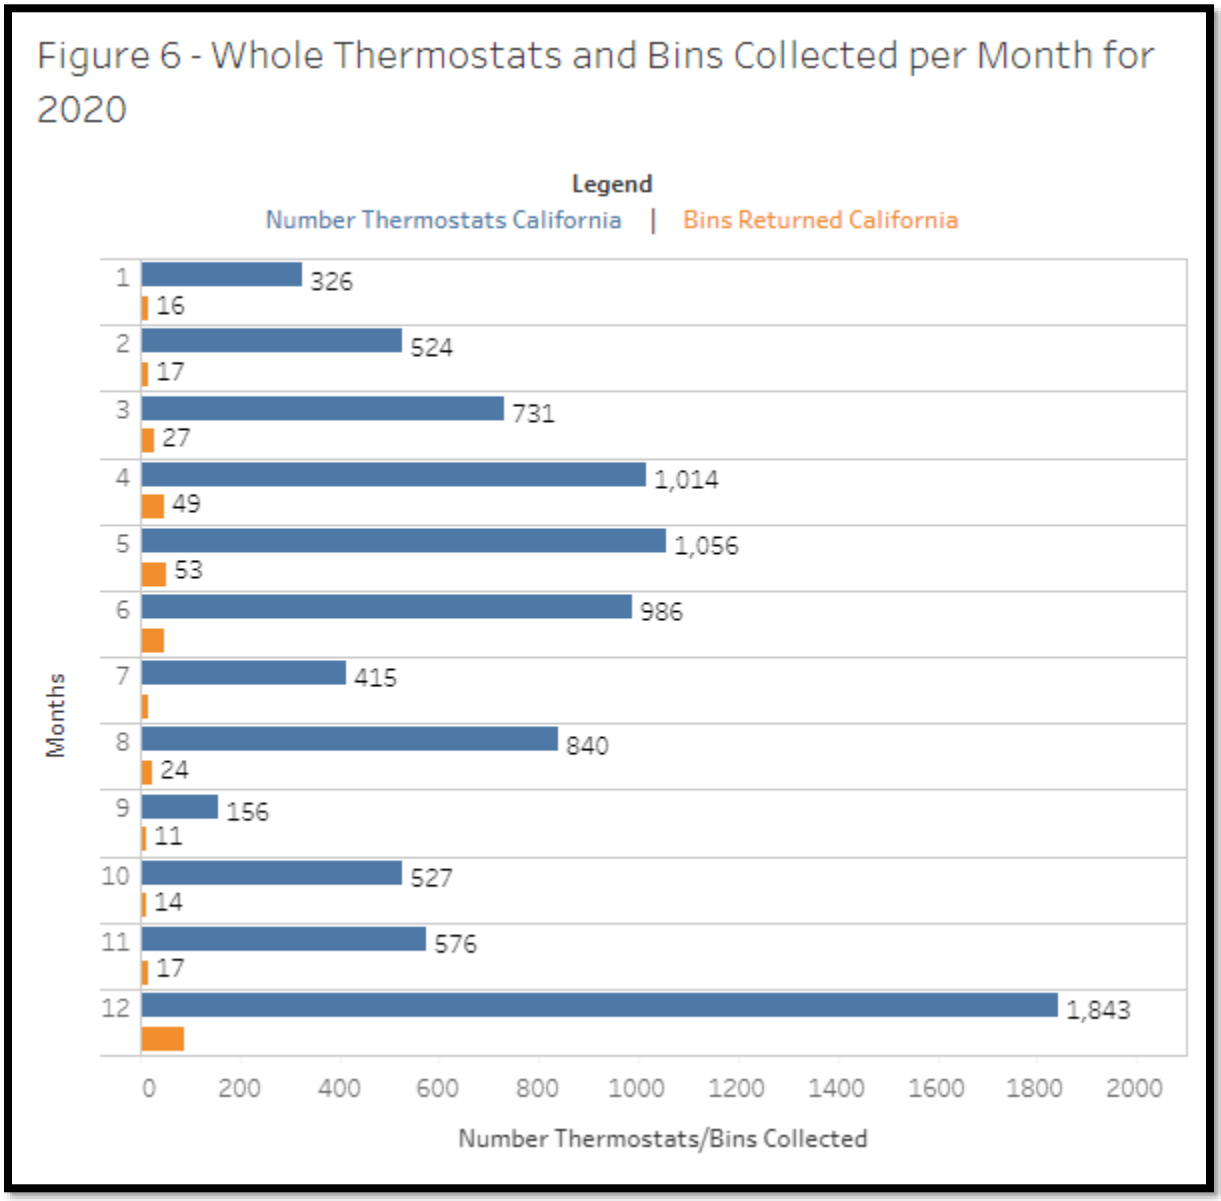
2018	13,710	-24%	-11%
2019	14,305	4%	-5%
2020	8,994	-37%	-36%
Average	10,689		

Figure 6 displays the monthly distribution of bins and thermostats collected in California in 2020. The months with the greatest number of thermostats returned were May (1,056 thermostats, 53 bins) and December (1,843 thermostats, 89 bins). The months with the greatest number of bins returned were also May (53 bins) and December (89 bins). Conversely, the months with the least activity in 2020 were January and September.



The highest number of thermostats per bin returned occurred in August and October (35 and 37.6 thermostats per bin each month, respectively). These figures tend to support the shoulder season (heating and air conditioning periods) months garner better returns. Figure 7 shows the average number of thermostats per bin returned per month for the year.

Figure 7 - Average Thermostats per Bin Returned per Month for 2020

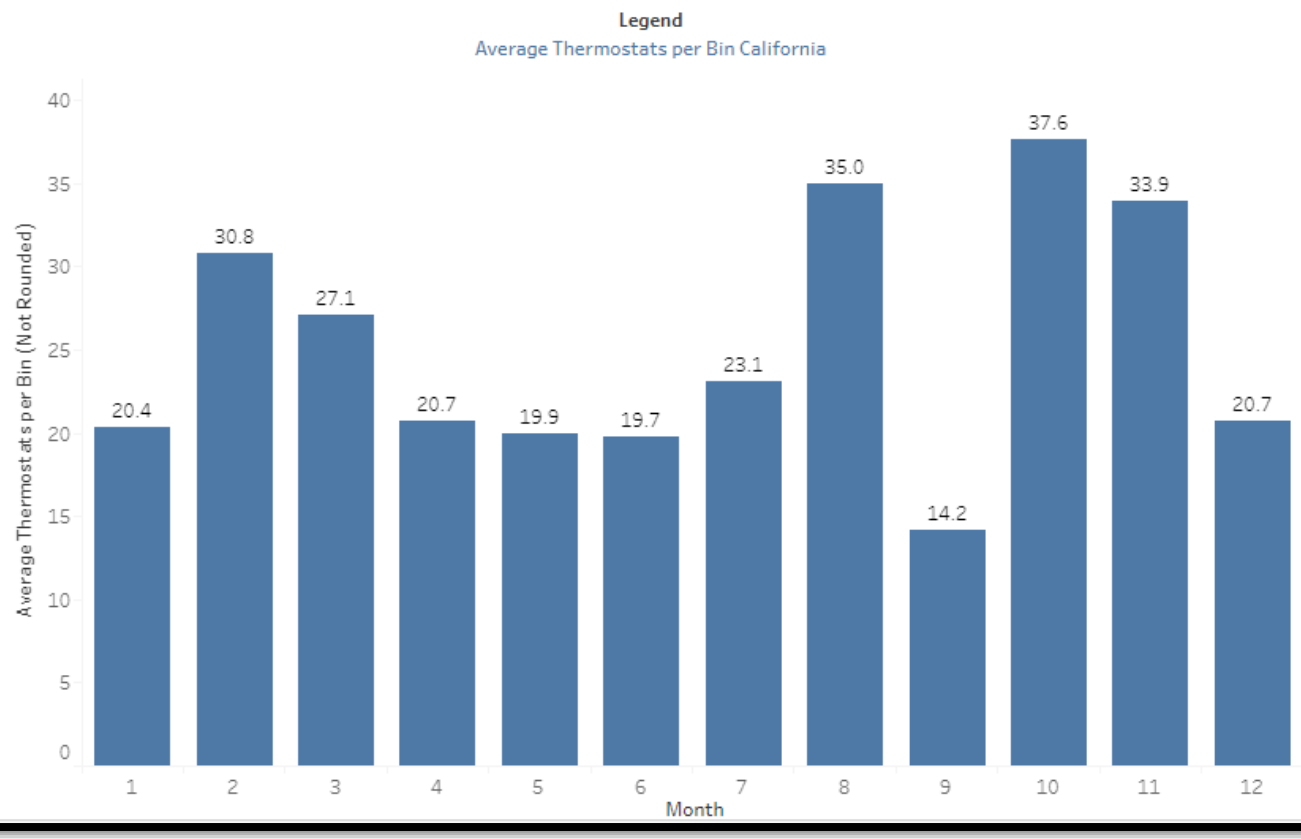


Figure 8 displays the average number of thermostats returned per bin in California and in the U.S. since the beginning of the California program. Nationally, the number of thermostats per bin has been decreasing annually since 2000. In California a similar pattern is observed, apart from a few years. The number of thermostats per bin in 2020 (23 thermostats per bin avg.) decreased slightly from 2019 (25 thermostats per bin avg.). The expectation is that the number of thermostats per bin will continue to decline, as we have greater bins distributed but see fewer thermostat returns overall. A lower average in California is the result of visiting every location every year and calling locations that have not shipped in the past 6 months, as required by the program modifications. Therefore, if a bin has one or more thermostats it is prepared for a return shipment. However, typically locations return bins only once a year or when they are full, on the national level.

Figure 8 - Average Number of Thermostats per Bin Returned Over Time in California and Nationally

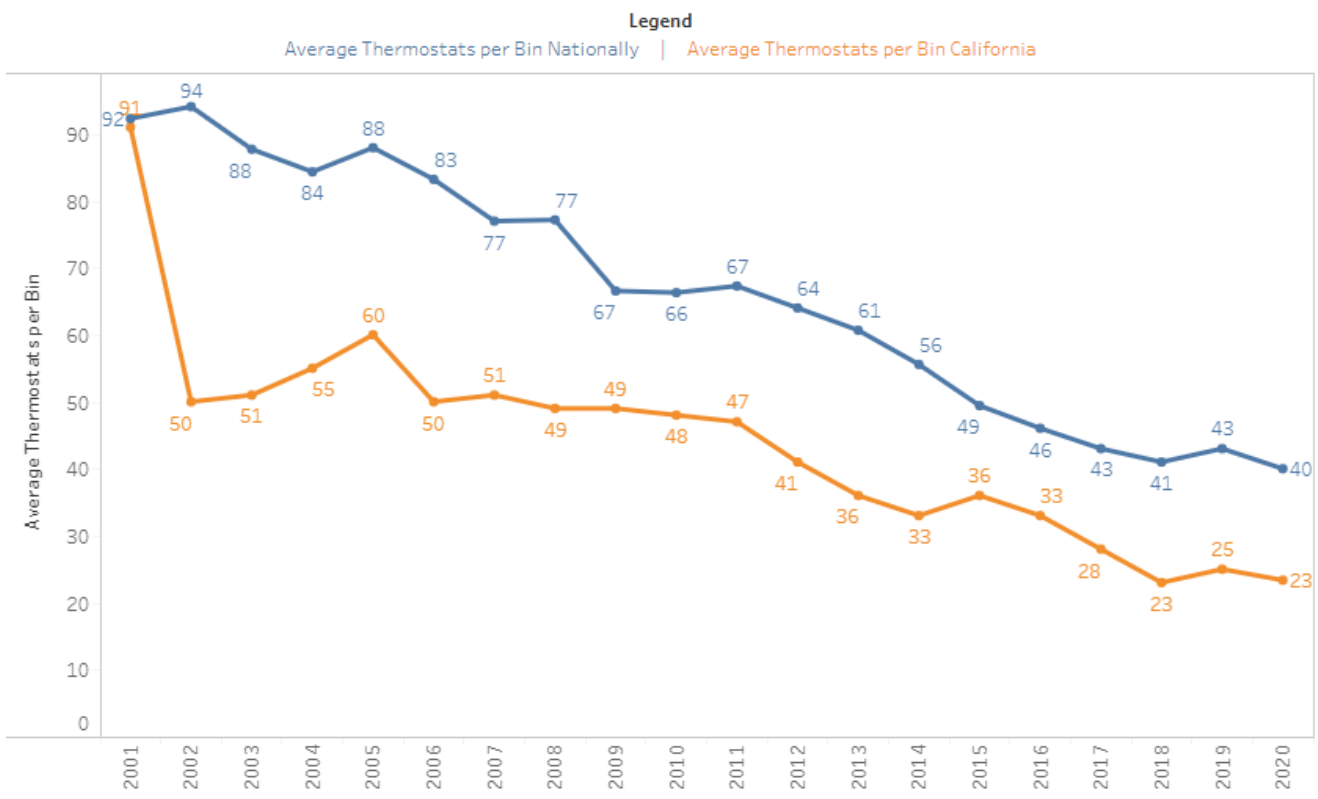

Figure 9 plots the total bins returned over time along with the average number of thermostats per bin over the same period. In general, the number of bins returned in California increased steadily for the most part from 2001 to 2018. At the same time, thermostats per bin have seen a downward trend. A negative correlation has been identified between the number of bins returned and the number of thermostats per bin.

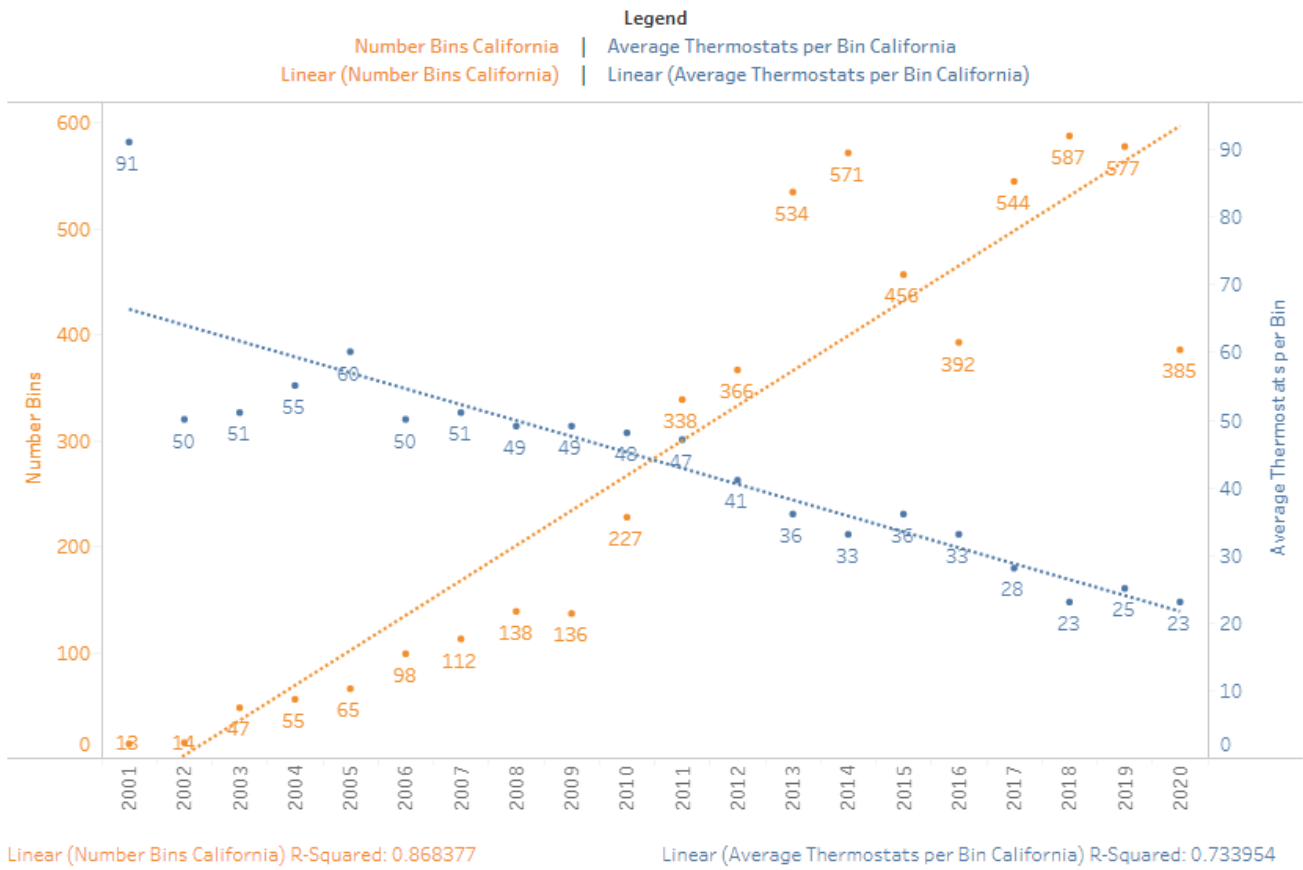
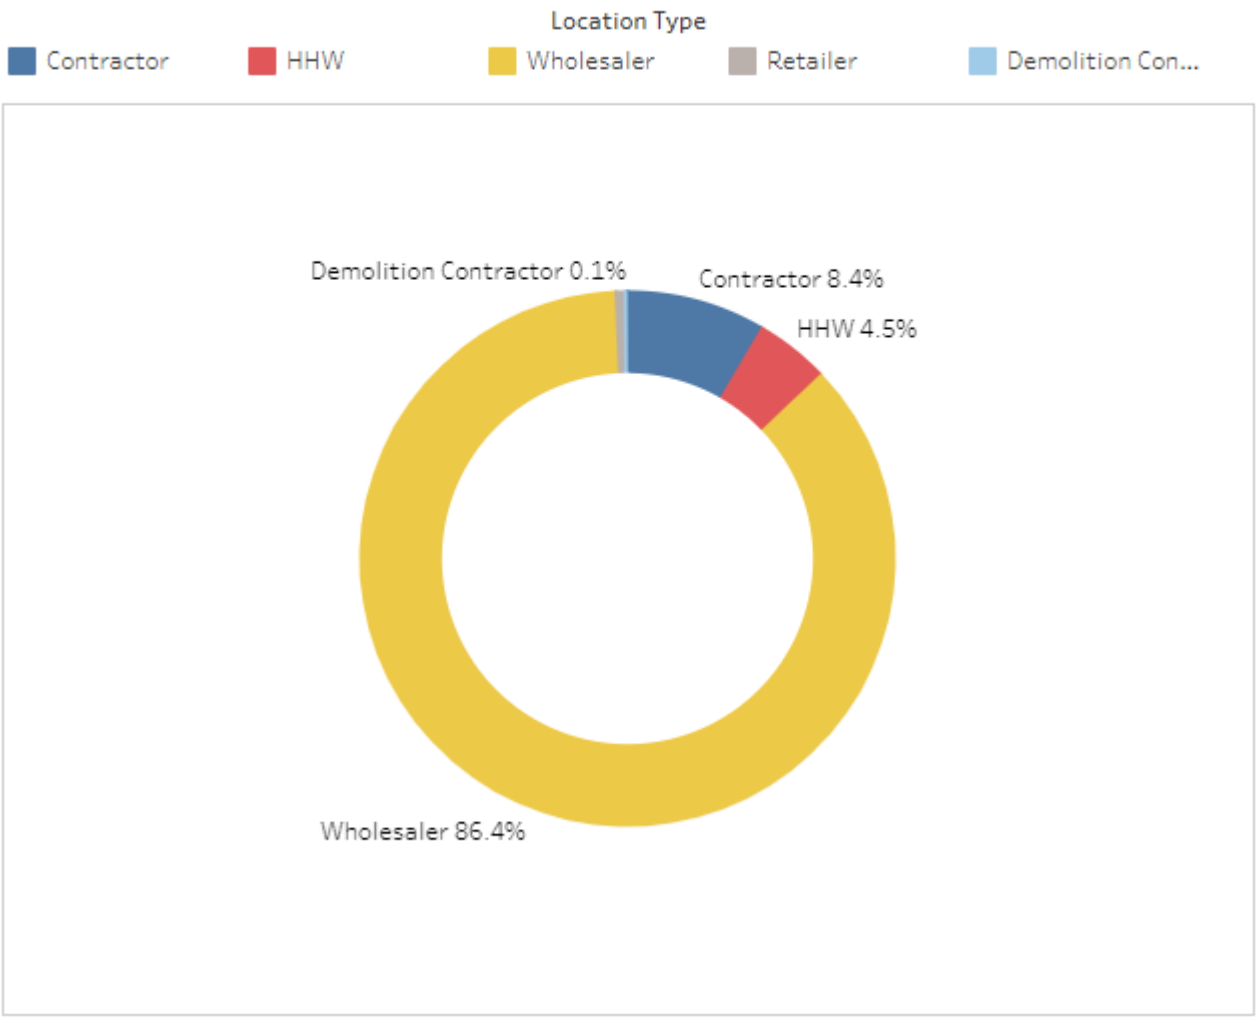
Figure 9 - Total Bins and Average Number of Thermostats per Bin over Time



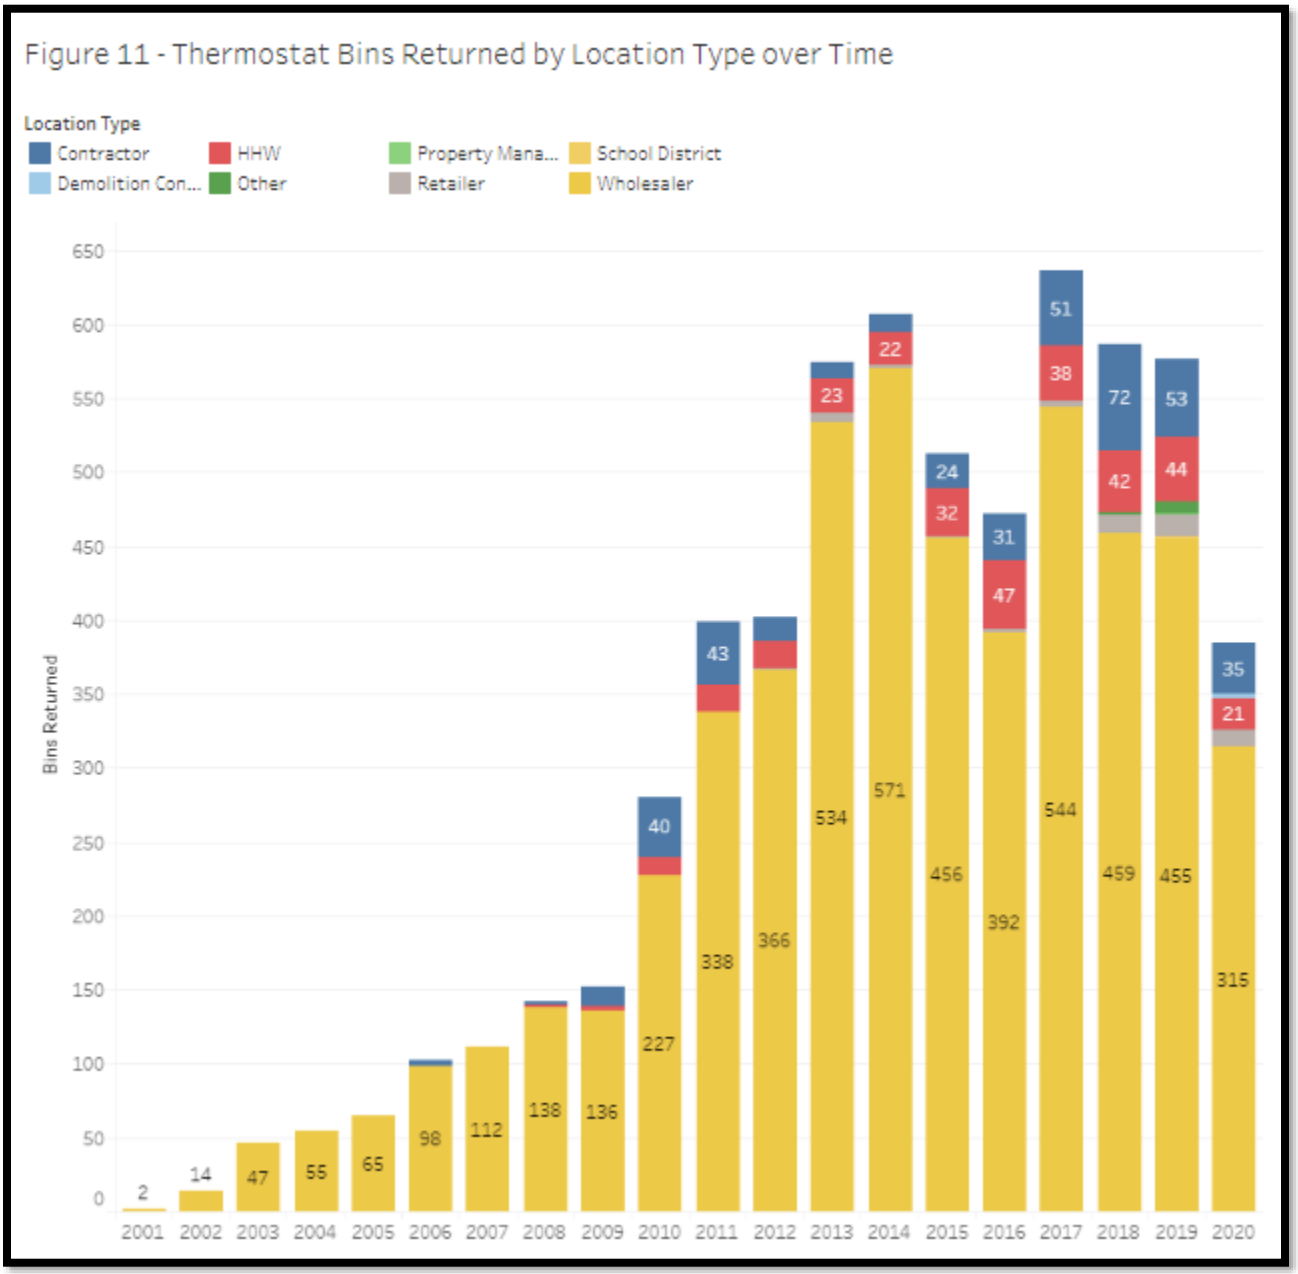
SECTION 2: Channel Partner Analysis

Section 2 of the report examines the partner locations in more detail. Most thermostats collected in California were through wholesalers (86.4%) with the majority of the remaining thermostats collected by household hazardous waste facilities (4.5%) and contractors (8.4%). Figure 10 shows the distribution of thermostats collected by location type in 2020. Wholesalers continue to collect the majority of mercury thermostats in California, even though TRC pursues all audience types required in the consent order.

Figure 10 - Thermostats Collected by Location Type in 2020



The number of bins returned in 2020 decreased from 2019 levels across all location types. Figure 11 displays the change in the number of bins returned by thermostat collection type over time in California. While the program has been greatly expanded in the past ten years, it has not garnered greater thermostat collections.



In 2020, 32% of California locations possessing a collection bin sent back at least one bin for recycling. The distribution is displayed in Figure 12. All locations received a site visit during the year, in which a TRC representative prepares the container for shipping. Those locations that do not return a bin typically do not have any mercury thermostats in their container.

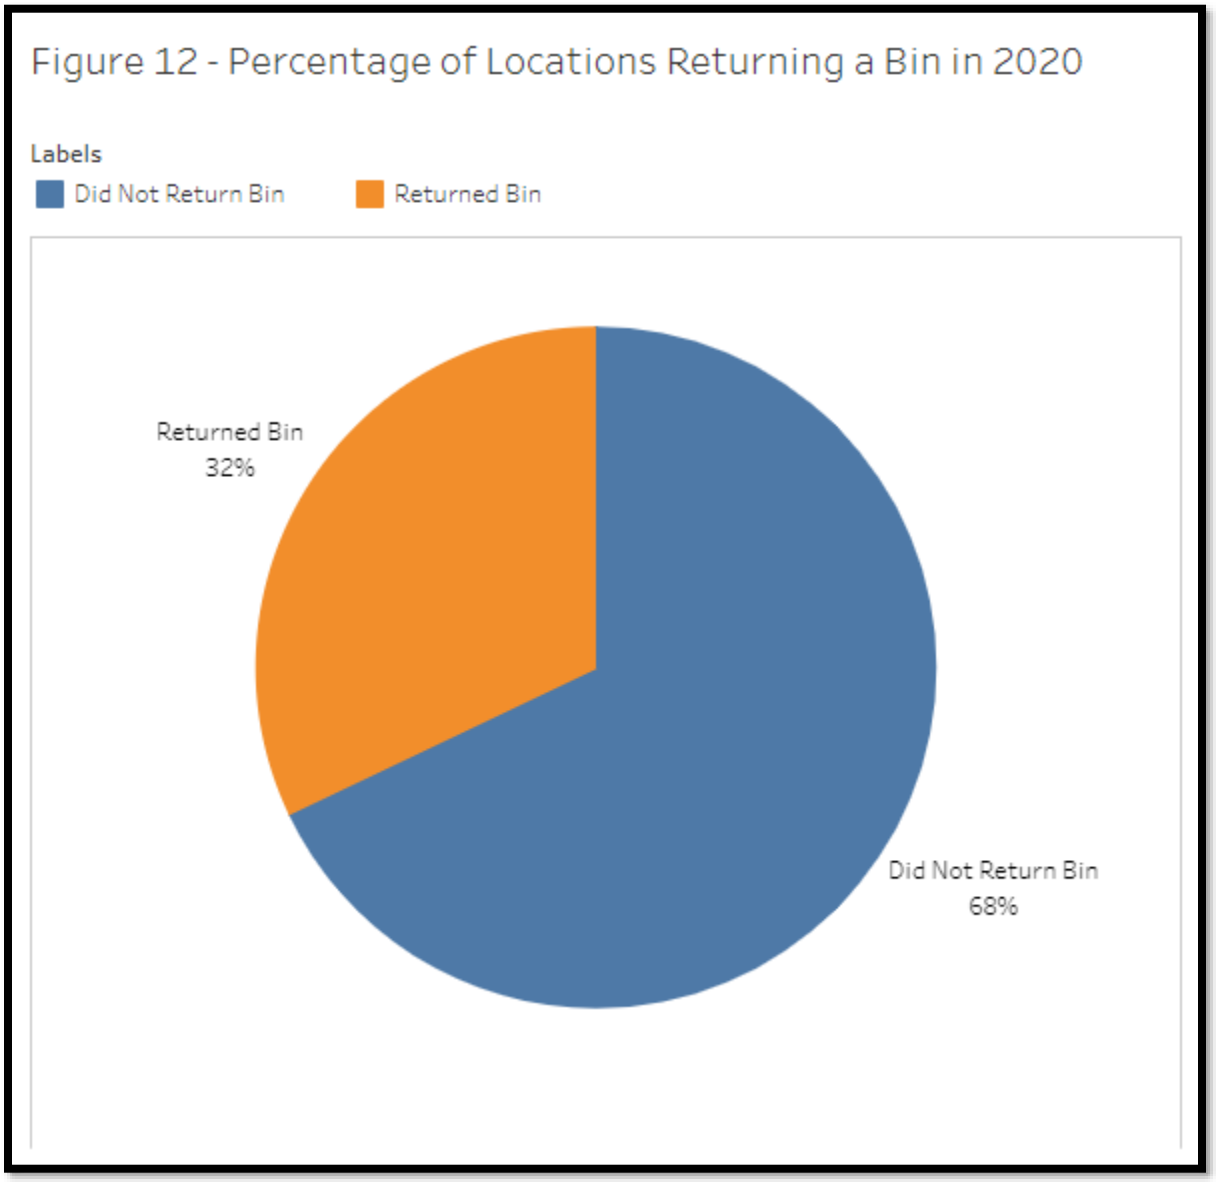


Figure 13 displays the total bins and thermostats returned by county in 2020. An analysis of the top performing counties revealed that Los Angeles County (118 bins, 2,797 thermostats), San Diego County (51 bins, 1,449 thermostats), and Orange County (39 bins, 940 thermostats) returned the greatest number of bins and thermostats in 2020.

Figure 13 - Bins Returned and Total Thermostats Returned 2020 by County

	Number Thermostats	Number Bins
Los Angeles	2,797	118
San Diego	1,449	51
Orange	940	39
Riverside	812	31

TRC partner US Air Conditioning Distributors (USACD) (1,851 thermostats) returned the highest number of thermostats in California in 2020, followed by Johnstone Supply (1,743 thermostats) and Refrigeration Supplies Distributor (RSD) (632 thermostats). Apart from these locations, five program partners returned more than 250 thermostats each. Figure 14 displays the top performers in terms of total thermostats returned in 2020.

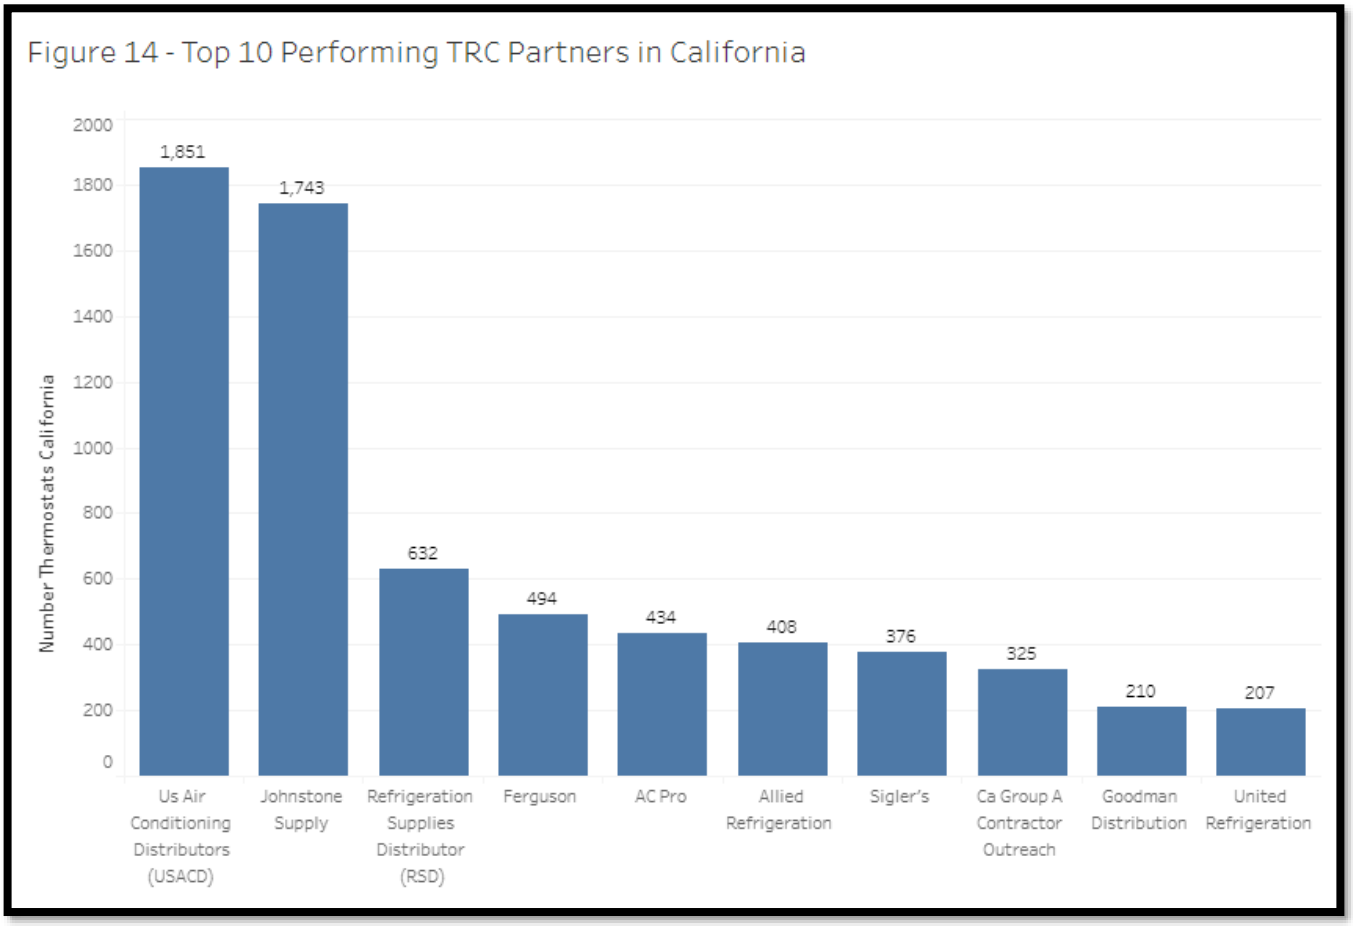

Figure 15 includes the top performers for 2020 by each of the following categories: total bins returned, total thermostats returned, and average number of thermostats per bin.

Figure 15 - Top 10 Performing Partners by Total Bins, Total Thermostats, and Average Thermostats per Bin

	Number Thermostats	Number Bins	Average Thermostats per Bin
Us Air Conditioning Distributors (USACD)	1,851	55	34
Johnstone Supply	1,743	48	36
Refrigeration Supplies Distributor (RSD)	632	29	22

AC Pro	434	16	27
Allied Refrigeration	408	15	27
Sigler's	376	15	25
Ca Group A Contractor Outreach	325	12	27
Goodman Distribution	210	22	10
United Refrigeration	207	14	15

TRC conducted several activities in 2020 to increase the number of bins and thermostats returned in California. These activities included site visits and 'miss you' calls to collection locations that may not have returned a bin recently. In 2020, 692 site visits were conducted in California, and a total of 1,671 'miss you' calls were placed. Figure 16 displays the relationship between the number of site visits per month, the bins returned per month, and the number of thermostats (in 100's) returned per month.

Figure 16: Relationship Between Site Visits and Bins and Thermostats Returned per Month in 2020

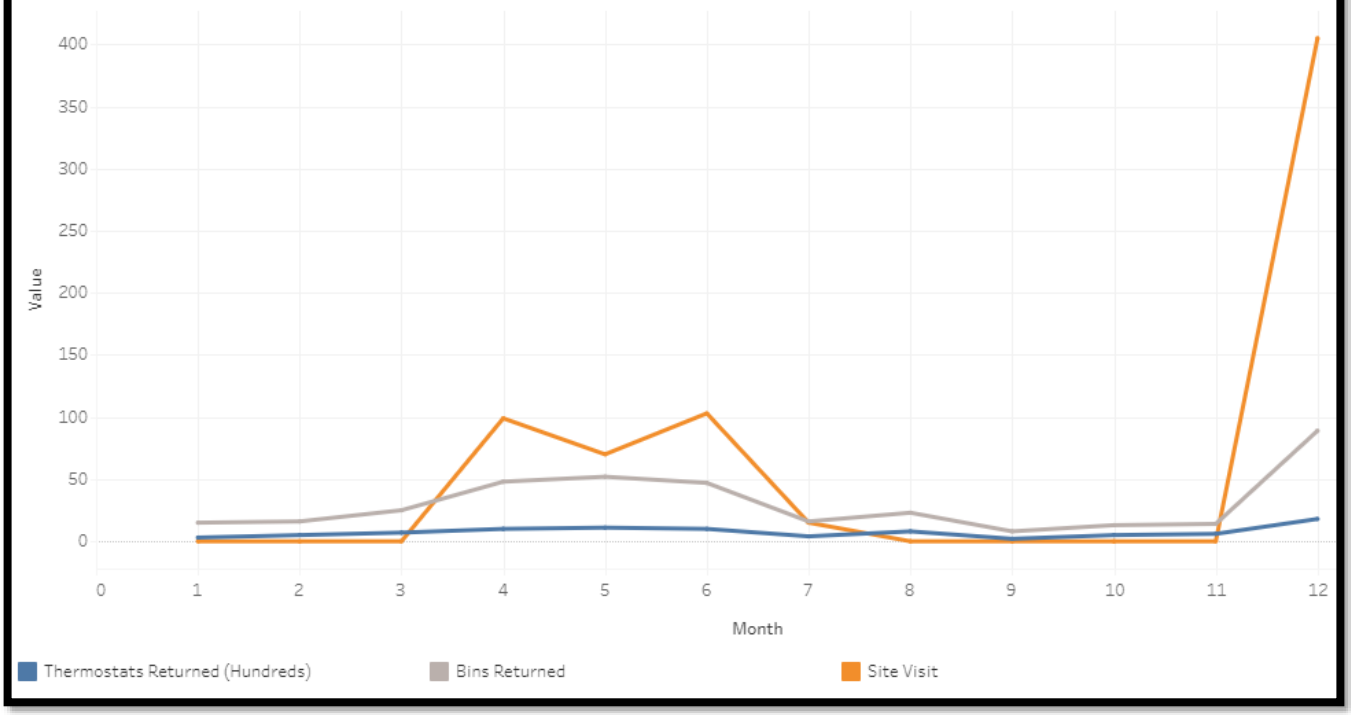

Figure 17 displays the relationship between the number of calls per month, the bins returned per month and the number of thermostats (by 100's) returned per month. Calls were placed in the months of March, June, October, and December.

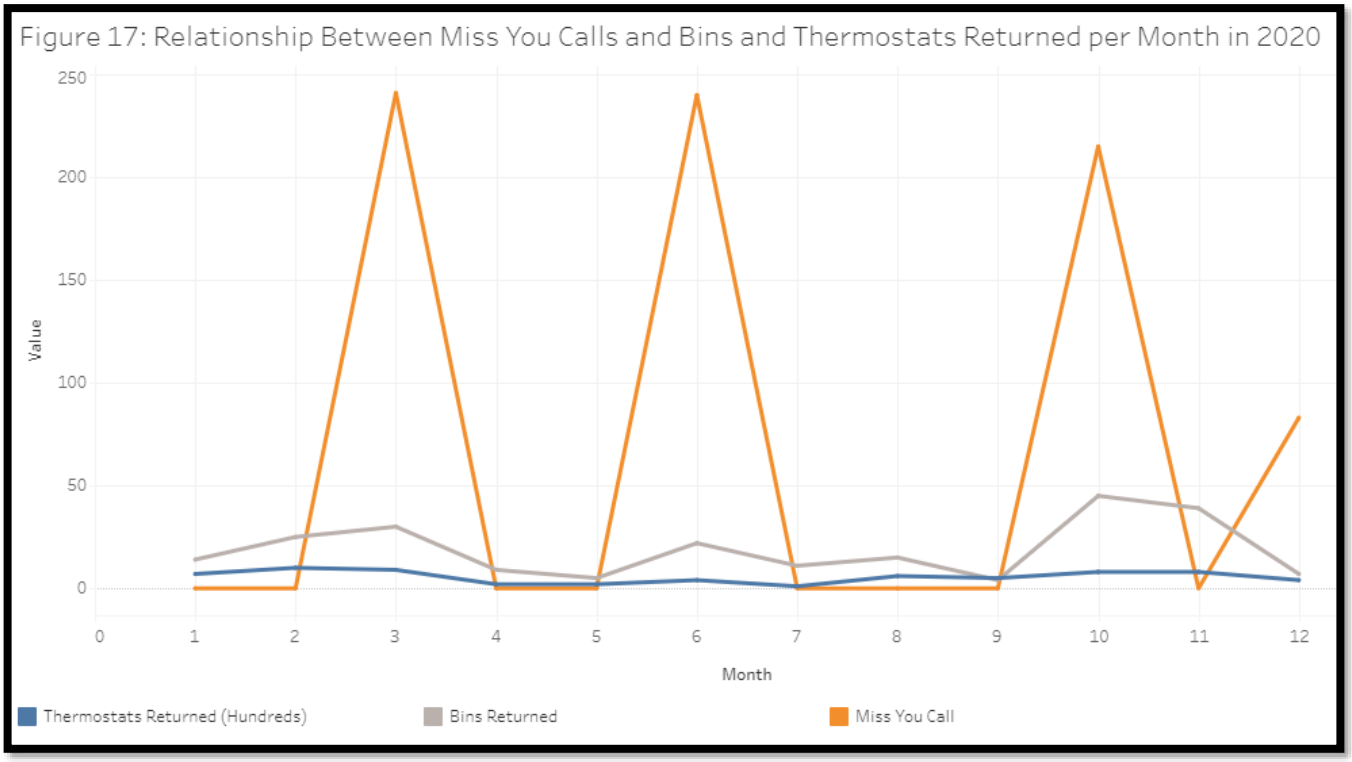

Figure 18 examines the return rates of four groups (if applicable) – locations that received at least one visit and locations that received both a call and visit. The rate of active participation (which refers to locations that returned at least one bin) in 2020 was 69% for locations that received a visit but only 31% for both visited and called locations.

Figure 18: Percent Change in Bins and Thermostat Returns for Locations that Received a Visit or Call Over Locations that did not Receive Either

	No Visit No Call	Visit	Call	Visit and Call
Rate of Active Participation *	12%	69%	15%	31%
Bins per Participating Location	1.35	1.6	1.21	1.68
Thermostats per Participating Location	30	62	27	27
Thermostats per Bin	22.3	38.72	21.94	22.71

** Locations that returned one or more bins during 2020*

SECTION 3: Comparisons to National and Other States' Data

To compare how the California collection partners performed in 2020, the national average for the number of bins returned per location that returned at least one bin was calculated and compared to the California average since 2012. The average number of bins does not include locations that did not return any bins in that year. It should be noted that when making comparisons each state has different regulations, a different mix of housing types, local policies, and incentives that may have a unique impact on returns. Overall, the average number of bins returned per location per year was higher in California than the U.S. average, as shown in Figure 19.

Figure 19 - Average Number of Bins Returned Per Location Per Year

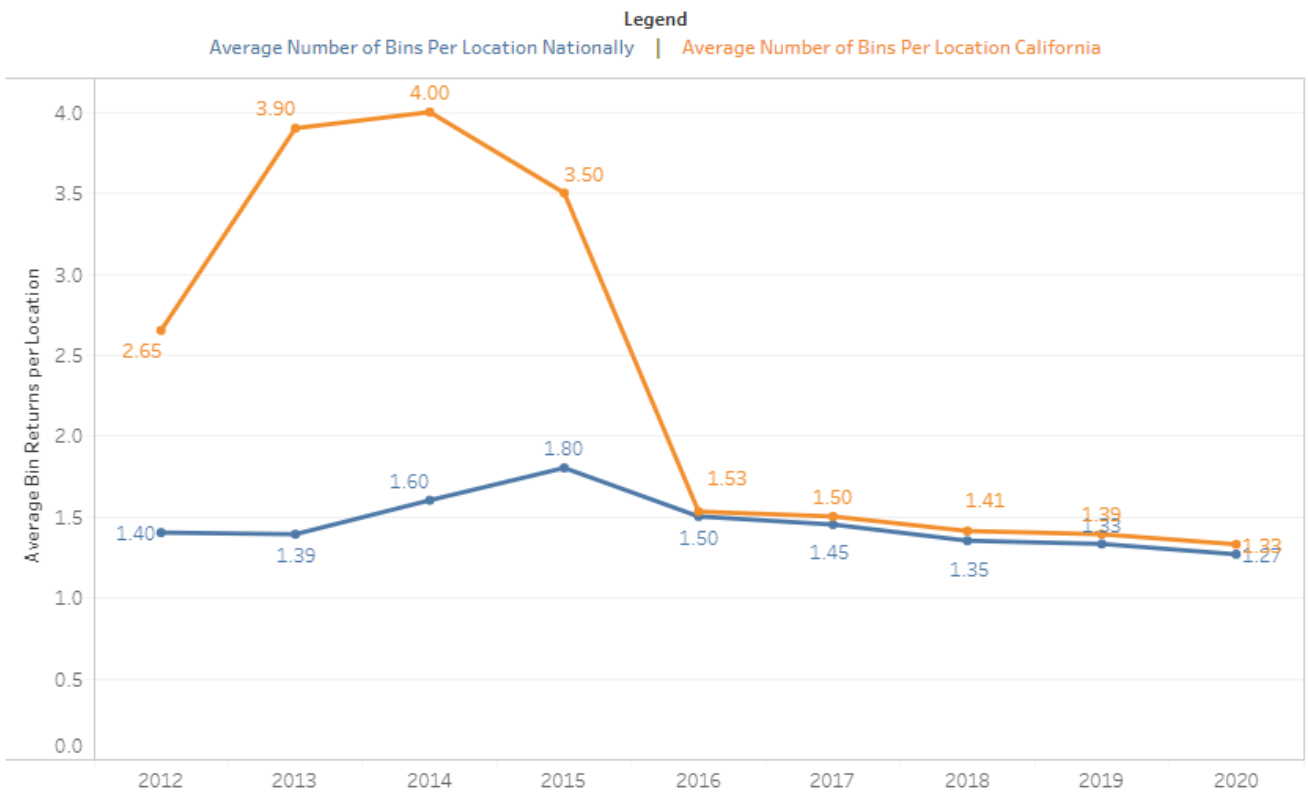

Figure 20 displays the locations in California that returned more than one bin in a given year since 2017, and Figure 21 displays the top 10 partners in the U.S. over the same period in terms of the number of bins returned. On the whole, these partners are returning less thermostats each year.

Refrigeration Supplies Distributor (RSD)	37

Figure 22 displays total percentage of locations that actively participated in the program (active participation defined as sending back at least one bin) in 2020, for all the states that mandate thermostat returns reporting as well as the U.S. national average for all states (reporting and non-reporting). In 2020, 32% of the locations in California returned at least one bin compared to a national average of 77%. The highest percentage of locations returning a bin in 2020 amongst states that mandate thermostat returns reporting was New Hampshire (82%).

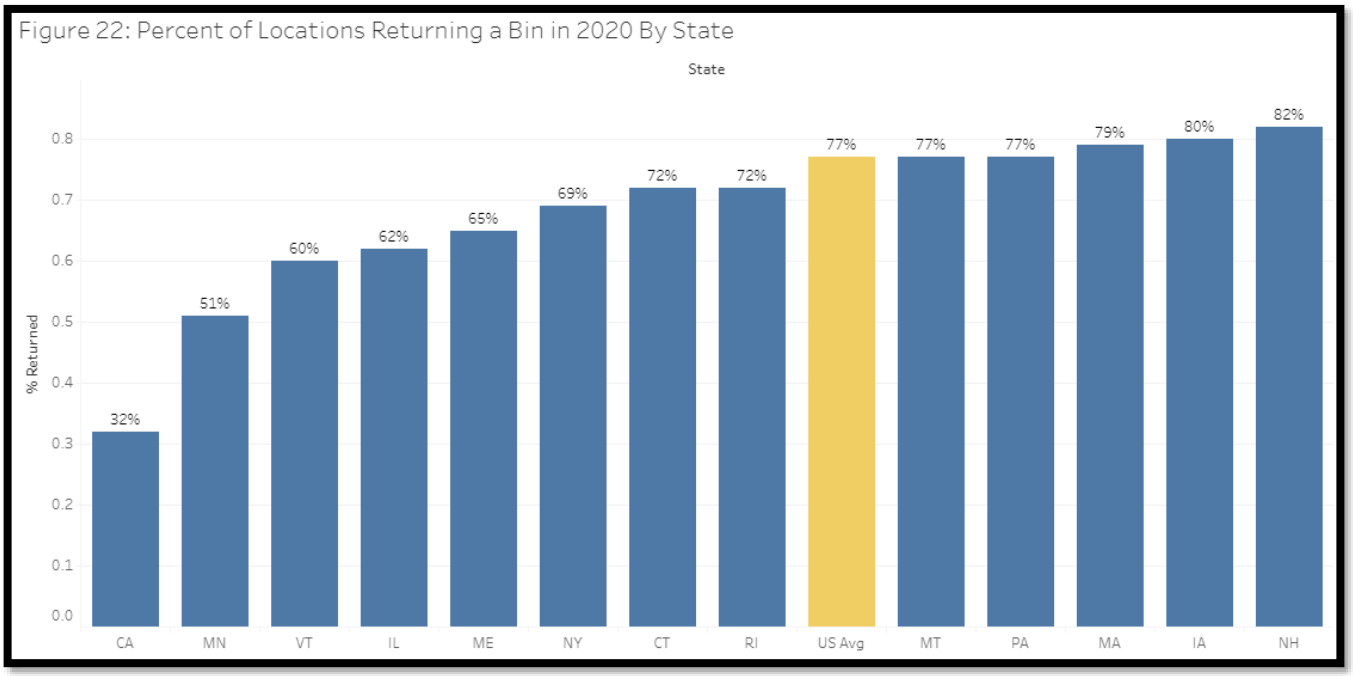

Figure 23 compares the California and national rates for several analytics. These include: total whole thermostats, bins, and loose switches collected, number of thermostats collected by total locations and per actively participating locations, number of thermostats per bin returned on average, equivalent average, number of mercury thermostat equivalents returned in 2020, and finally percent change in mercury thermostat conversion from 2019 to 2020. The equivalent average is an average of the number of switches in whole thermostats collected in California, and it is used to represent an equivalent number of thermostats from returned loose switches. The thermostat equivalent number includes the total of whole thermostats returned plus the number of thermostats estimated from loose switches. The states displayed are those that mandate thermostat returns reporting and the U.S. average is for all states that return bins (48).

Figure 23: Comparison of States and US Average Among Several Categories

State	Whole Thermostats	Bins	Loose Switches	Thermostats returned per total # of locations with bin	Average thermostats per bin	Avg thermostats collected per location that returned at least one bin in 2020	Equivalent Average	Thermostat equivalents in 2020	% change over previous year
CA	8,994	366	1,396	4	25	13	1.8282	9,758	-40%

US Avg	1,707	38	521	9	45	12	1.4398	2,069	-38%

Figure 24 further compares this state and national data by showing how each state ranked in each of these categories, from highest to lowest. California ranks top for thermostat collections and bin returns among the U.S. The states compared are those that mandate thermostat returns reporting and the U.S. average is for all states that return bins (reporting and non-reporting).

Figure 24: Comparison of States and US Average Among Several Categories, Rankings

State	Whole Thermostats	Bins	Loose Switches	Thermostats returned per total # of locations with bin	Average thermostats per bin	Avg thermostats collected per location that returned at least one bin in 2020	Equivalent Average	Thermostat equivalents in 2020	% change over previous year

2020 Collections by Brand

In California, Thermostat Recycling Corporation (TRC) recovered the equivalent of 9,758 mercury thermostats from 8,994 whole mercury thermostats plus 1,396 mercury switches removed from thermostats. A total of 110.6 pounds of mercury was diverted from solid waste. *Please note the explanation of the converted thermostats or thermostat equivalents below.[1] An example of the mercury ampoule is shown below.

As required by the state statute, a table of thermostat brand holders with their corresponding thermostats, the number of switches and the pounds of mercury recycled is below. It is important to note that there remain non-members whose thermostats the TRC collection program recycles. They are listed in the table as “Non-Member Brands”.

[1] A mercury thermostat contains a variable amount of mercury ampoules or “switches” attached to the subbase of the thermostat. These glass ampoules often are collected in the recycling container without the intact thermostat attached to them. TRC collects and counts these loose ampoules and recycles them. To derive the converted thermostat or thermostat equivalent, the program takes the following calculations to develop the converted thermostat or thermostat equivalent. First, TRC will count the total whole (intact) thermostats collected in the recycling bins. From these units, there is an intact ampoules count. TRC then takes the intact ampoules divided by the whole (intact) thermostats or otherwise known as the conversion ratio. After the conversion ratio is calculated, TRC will multiple the loose mercury switches by the conversion ratio. Lastly, we add this result to the whole (intact) thermostats to produce the converted thermostats or thermostat equivalents.

2020 Summary of the Program Expenses

Below is a summary of program expenses for the California collection program in 2020. 2020 program expenses (reported in the annual report) are unaudited and are for management purposes only. Prior to submittal of this annual report, the expenses were reviewed by Kellen Company.

Program Component	2019	2020	Difference
Direct Expense for Marketing & Outreach	$ 650,980.89	$ 626,064.04	$ (24,916.85)
Incentive/Promotional Payments	$ 5,298.80	$ 11,293.54	$ 5,994.74
Legal	$ 47,275.00	$ 164,300.00	$ 117,025.00
New Collection Containers	$ -	$ -	$ -
Recycling Costs	$ 72,145.27	$ 38,606.37	$ (33,538.90)
Travel	$ -	$ -	$ -
TRC Staff & Administration	$ 15,601.91	$ 39,825.00	$ 24,223.09
Total Expenses	**$ 791,301.87**	**$ 880,088.95**	**$ 88,787.08**

2020 Education and Outreach

Direct Marketing (Email, Mail, Other Communications)

Current Collection Locations

Small Pails and Green Bins

In 2020, TRC shipped 25 small pails to collection points around the country. We also shipped 159 new green bins. In comparison, the program shipped 291 new green bins in 2019 and 55 small pails[2]. Collection locations either requested the new pail when they signed up to participate in the program or chose to switch out their bin with a pail due to decreased collections. The large green bins which have been the staple of the program continued to be replenished as they were returned for processing. Because the containers are reused and bar coded, we anticipate that the request for new containers will continue to decrease as the program operates.

- Of the totals provided, TRC shipped 4 new small pails and 33 new large bins in the state.

Collection Location Outbound Phone Calls

Our outbound phone calls have been branded internally as the "Miss You Call" process. These calls promote collection container returns and serve as a reminder to locations that have not returned any thermostats. TRC allocates these "miss you calls" to collection sites that have not returned a container in over a year. These calls serve as a friendly customer service check to see if any of the program materials need to be replenished or if missing containers need to be replaced. In total, the program called 4,175 current collection locations in 2020, compared to 3,557 in 2019.

- Completed 1,671 calls to encourage shipping the recycling container compared to 1,283 a year prior. A copy of the locations called can be found in the Appendix.

Collection Location Postcards

TRC updated the reminder postcard design mid-2019 to encourage locations to heed the message. The postcards are sent to all locations that have not returned a container in the past year. In 2020,

[2] New bin orders coincide with accounts that open new stores, move or lose their existing containers.

TRC mailed 12,963 postcards. By updating the look of these postcards, TRC hoped to engage locations that were familiar with the old design and may have disregarded it in the past.

- Mailed 1,571 reminder postcards compared to 1,899 a year prior.

Collection Location Emails

TRC emailed locations three weeks after receiving a postcard to encourage them to directly ship the recycling container. These emails contain step-by-step instructions for shipping and direct contact information for missing shipping labels or further questions.

- Emailed 827 collection locations three weeks after receiving the reminder postcard to ship their container.

Collection Location Site Visits

Throughout the year, 1,781 site visits were completed in numerous states. The purpose of site visits is to inform the location of their requirements in participation, what the statute requires of them, shipment of the recycling container, and to answer any questions they may have. Often, valuable information is gathered during the site visit which is used to enhance TRC's outreach and update the database with current contact details. With the pandemic, TRC refrained from visiting locations in-person for a few months. For locations scheduled to receive a visit between March and August we "virtually visited" those locations via phone or meeting, rather than cancelling the visit altogether.

- Visited 692 collection locations compared to 747 in 2019. A copy of the sites visited can be found in the Appendix.

HVAC Industry

The HVAC industry is arguably still the best, most productive and most engaged channel for recycling mercury containing thermostats. We consider this industry to be the manufacturers, wholesale distributors, and contractors which are intimately involved with the recovery of mercury thermostats. However, even though this sector collects the largest amount of mercury thermostats in the program, they tell they continue to see fewer and fewer mercury thermostats. TRC took the following actions:

- TRC was spotlighted in HVAC Refrigeration Daily, a print magazine distributed at the International Air-Conditioning, Heating, Refrigerating Expo.
- Continued the "Banish Mercury Off the Planet" (BMOP) Competition encouraging all HARDI wholesalers to compete through collections. Included direct marketing to 2,714 HARDI HVAC members.
    - The annual competition recovered 222.95 pounds of mercury from 166 HVAC wholesalers. More than 350 branch locations returned collection bins during the contest period.

- TRC appeared on radio shows to promote the program and National Recycle Your Mercury Thermostat Day. Both Hammertime Radio in Buffalo, NY and The Future of Real Estate in Tulsa, OK featured TRC and our mission in October of 2020.
- TRC was featured on Season 2, episode 43 of the HVAC Jerks Podcast titled "Mercury in the Green Box, Please". The episode focused on TRC's history, program and what the future holds.
- Completed 2,117 calls to contractors to inform them of the program and available incentives and if interested, sign up for a collection container. Most contractors feel they do not see mercury thermostats anymore, and therefore do not want to sign up for a recycling container.

Utility Industry

In 2020, TRC continued its approach to engage the utility sector, specifically targeting actions toward the utility companies themselves and the installer/implementer. Each of these audiences have distinct messaging requirements and informational needs. Unfortunately, TRC has little leverage over utility companies. Any agreements or partnerships that may become established are subject to be put on hold or delayed by the utility companies, and contacts become unresponsive for long periods of time.

- Exhibited at two conferences targeting the utility industry before the pandemic halted in-person events.
- Sent 424 informational emails to known utility implementers on the program.
- Continued outreach to state utilities via email and phone to promote program with residents, offering marketing collateral (tear pads, letters, promotional emails, fliers, posters, bill inserts).

Waste Related Sector and Household Hazardous Waste (HHW) Industry

The waste-related sector remains an important sector for TRC to target individuals and those residents performing DIY thermostat installations. These attempts were to gain new collection locations, form better relationships with the audience and raise overall awareness of the TRC program. As a result of these learnings, TRC took the following actions:

- Scoured google alerts for HHW events to target phone call or email outreach to encourage them to use program. Sent 16 emails to facilities, offering a free container.

- Coordinated promotional campaigns with HHW facilities and promoted rebate program at HHWs in California.
- Advertised in the national North American Hazardous Materials Management Association (NAHMMA) News Brief, reallocating funds planned for the conference.

Schools and Universities

As part of the consent order, TRC continued to target schools and universities to participate in the collection program. Many schools and universities report that any replacement of mercury thermostats would be taken care of by a hired contractor. Numerous locations we contacted stated that mercury thermostats had been switched out years ago.

- Began conducting calls to district offices that were planning on wrapping up construction on prop 39 projects.
- Continued offering $5 per mercury thermostat for direct participation at schools.
- Continued conducting calls to small universities and community colleges that received Prop 39 grants.

Property Managers, Building Departments and Hotels/Motels

Both commercial and residential property managers, as well as building departments and hotels/motels have proven a tough sector to connect with. TRC continues to pursue these sectors

based on the consent order but finds little to no interaction. These audiences report that they do not see mercury thermostats.

- Continued outreach via phone and email to property managers and respective associations, building departments and hotels/motels associations.
- Created universal waste checklist to include mercury thermostats, although partnerships remain disinterested. Previous requirements did not contain direct mention of mercury thermostats from the California Building Standards Commission.
- TRC was unable to place articles in trade publications or association newsletters in 2020, despite numerous attempts.

Retail and Local Hardware Stores

Retailers are an important sector for TRC to target individuals and those residents performing DIY thermostat installations. However, retailers are not required to participate in TRC's program and gaining participation has proven difficult. Large retailers refuse to participate because of a concern for the liability of mercury. Even smaller retailer stores that offer to collect, eventually return the container empty no longer wanting to participate due to lack of collections.

- Visited and or called locations to confirm promotional materials are appropriately placed to best promote the program.
- Continued monetary rebates to recyclers at retail locations. Promotional material depicted below.

Advertising and Awareness

Website

In 2020, TRC updated the zip code locator on the website to provide information regarding pandemic protocols. While most collection locations remained open, certain operations were most likely adjusted to accommodate for social distancing. Therefore, we recommended all recyclers should contact the collection location beforehand.

In the fall of 2020, TRC began a website redesign project that will enhance mobile accessibility and better navigation for website users. TRC expects to launch the updated website in the spring of 2021.

Digital Advertising Campaign

Digital advertising remained the focus of TRC's 2020 California campaign. The 2020 digital advertising campaign ran from July 15, 2020 to December 31, 2020. The exception to this is the Google Search Ads, which began in January.

Campaign Components

Google Search Ads

Google Search Ads is a digital advertising platform where advertisers bid on search terms (or keywords) in order to have informational ads displayed, where ads appear alongside search results. This campaign targets people searching for relevant search key terms by driving traffic to various pages on the TRC website. TRC has developed a search campaign to align with terms searched by individuals related to thermostats, mercury, mercury recycling, thermostat replacement, etc.

TRC invested $68 per day Google Ads, which started in January. In 2020, we received 1,288 conversions which is counted when someone clicks the zip code finder page to find a recycling location.

Social Media and Traditional Media Ads

Facebook, the country's most visited social media network, is an ideal avenue for TRC messaging, as Facebook users look to share advice with their friends. TRC ads appear just as regular posts from friends, with an image, text and links that click back to the TRC website.

YouTube's mix of advice video pages along with comedy, drama, home movies and other entertainment is another great place to communicate to homeowners about the need to recycle their thermostats. Many do-it-yourselfers look to YouTube when making home improvements. Those searching for how to change a thermostat, in addition to seeing videos from others, would see our TRC video ad prior to viewing their searched video, encouraging them to recycle their mercury thermostats.

LinkedIn's network includes individuals in the fields of HVAC, contracting, compliance, regulatory and business owners. Our goal with these ads was to educate people in three of our target audiences on the importance of recycling mercury thermostats. We focused on messaging for the ads tailored to each audience and took them to a relevant page on TRC's website.

Online News Websites such as Health.com, Foxnews.com, CNN.com and many others along with other information sites provides a credible format where consumers get news and information. By placing our TRC ads on the same webpage where people get their news, our messaging in our ads appears in the form of news article teasers in a "From around the Web" section (which typically follows just after their own news sections). By appealing to viewers in a newsworthy way, with an image, headline and website address (such as "3 Reasons you should change your old thermostat"), our TRC ads placed through Outbrain and Taboola (two popular ad networks) click over to the TRC page.

Results

Audience	Platform	Impressions	Clicks	CTR
Consumer	YouTube	5,603	724 views	n/a
Consumer	Facebook	1,362,690	6,399	0.47%

TOTAL		**10,257,078**	**54,902**	**0.54%**

Notes

Impressions: Number of times ads were served to viewers.

Clicks: Number of viewers who clicked on ads

CTR: Click Through Rate (clicks/impressions)

Analysis

In 2020, our advertising efforts in California resulted in over 10 million impressions and almost 55,000 clicks to TRC's website. These campaigns resulted in 100,258 pageviews and 40,317 users which represents 30% of users who went TRC's website in 2020.

Consumers received 87% of the overall impressions and 74% of the overall clicks since it had the largest audience and budget. Users who came to our site from Taboola or Outbrain ads were more likely to spend more time on website pages compared to other consumer ad types. The Taboola and Outbrain ads resulted in over 23,300 pageviews with an average of 58 seconds on a page. This is more than triple the website's average.

To help increase the number of clicks and impressions for contractors, we ran Facebook ads to reach contractors who are not on LinkedIn. These Facebook ads received the most clicks and second highest CTR compared to all other ads ran. However, those who came to our site from our LinkedIn contractor ads were more likely to visit more pages and spend more time on a page compared to our Facebook contractor ads.

We expected a lower CTR for retailers since we were targeting mom & pop hardware stores in California. This is a smaller audience that is less likely to click on our ads. When users clicked on our ads, they visit more pages on the site than any other ad group did. We hope to educate this audience by exposing them to our ad copy. The wholesalers & manufacturers audience had the lowest number of clicks since it is the smallest audience of our traffic-producing ads. There are only a limited number of thermostat wholesalers & manufacturers in California.

Barriers

The unprecedented nature of 2020 with the coronavirus, civil unrest and the presidential election likely changed Internet browsing habits, especially the use of Facebook, as some may have stayed away due to the philosophical differences Americans had with these issues. These events could've potentially prevented the ads from performing at its full potential. During parts of these events, our team made the decision to pause ads in order to prevent TRC's important messaging from getting lost

in the weeds. Making the decision to pause the ads during different parts of the year, prevented TRC from spending ad money when our audiences were less likely to respond. This gave us more money to spend post presidential election when our audience was more likely to engage.

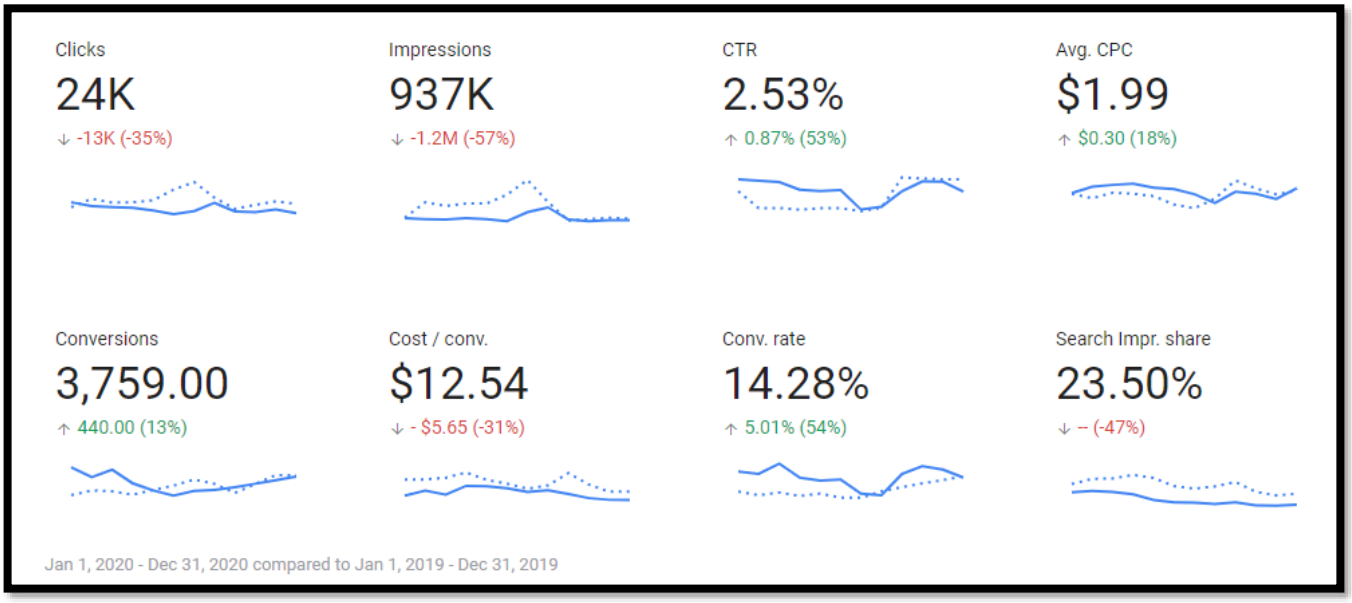
Search Engine Marketing (SEM)

Search Engine Marketing (also SEM or pay per click—PPC) is the process of buying a paid position on the search engine results page. TRC refined its strategy for SEM in 2020 with very promising results.

Impressions and clicks went down when compared to 2019, but the overall click-through-rate went up, which means a higher percentage of people are engaging with TRC's ads and that TRC is reaching the right audience.

The focus for TRC's SEM strategy is conversions, which are counted when someone navigates to the Find a Thermostat Collection Site page on the TRC website. In this area, there was very positive improvement for 2020 in the number of conversions, the cost per conversion, and the conversion rate.

In summary, overall, more qualified leads came to the TRC website in 2020.



Search Engine Optimization (SEO)

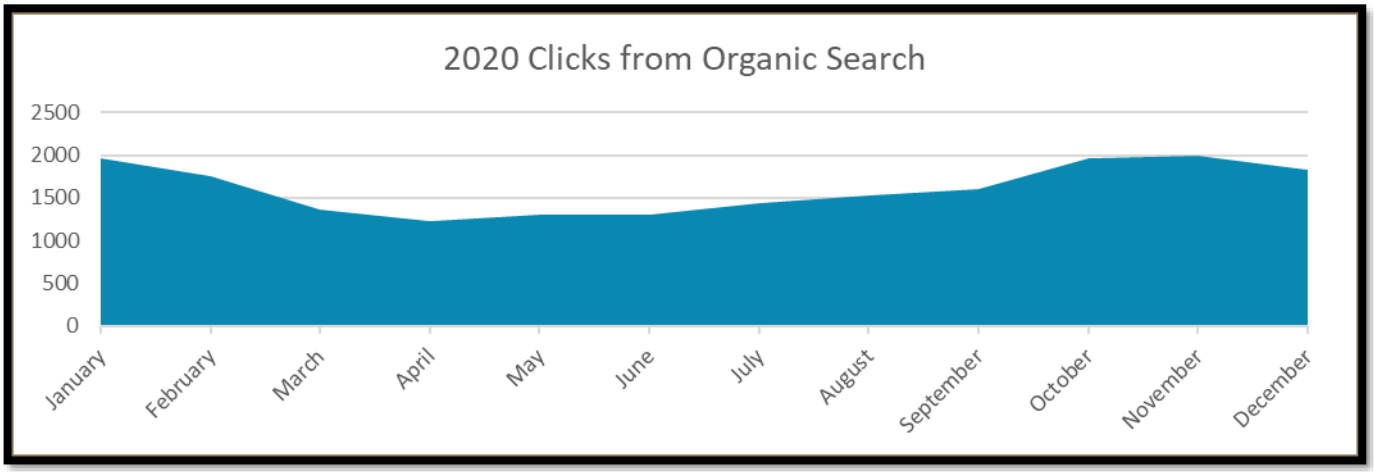
Search Engine Optimization (SEO) is the process whereby a website is optimized through original content and on-site coding tactics to increase its chances of appearing near the top of "organic searches." An organic search is one that appears "naturally" in a search engine like Google or Bing. In other words, an organic listing is not ranked through paid search.

Organic traffic to a website typically brings visitors who stay longer, and visit more pages, on average.

Two key measures were identified as a baseline for growth. They are:

- Clicks from organic search
- Page-one organic terms

In 2020, organic search traffic yielded 7,460 clicks to the TRC website. By comparison, there were 6,427 clicks from organic search over the same time period in 2019.



In 2020 TRC had 298 organic search terms ranked on page one of a Google search, a small decrease compared to 334 page-one keywords in 2019. As TRC goes through a website redesign in Q1 of 2021, SEO is being refreshed for enhanced performance moving forward.

This data was provided by *Google Analytics Reporting*.

2021 Program Modifications

Thermostat Recycling Corporation's 2021 Goals

TRC continues to set high-level annual goals for the organization. These goals assist in decision making and prioritization of activities. For the calendar year 2021, TRC plans to focus on:

- Continuing to fulfill state statutory requirements, agreements and other arrangements for regulatory compliance.
- Targeting mercury thermostat collections from utility programs. Maintain the HVAC industry collections. Other key audiences vary by state and requirements.
- Focusing on education and awareness tactics geared toward homeowners and HVAC industry professionals.

Thermostat Recycling Corporation's Planned Tasks

In addition to the above goals, TRC set specific tasks which we plan to focus on. Completion of these tasks aid in the overall organization's goals.

- Attend and integrate learnings from other EPR products after the biannual Product Stewardship in-person meetings.
- Roll-out public releases throughout the year.
- Continue the program's operational activities such as outbound phone calls, mailing reminder postcards, and visiting sites. Use collection data trends to target these initiatives.
- Attend trade shows and conferences[3]. Look for speaking opportunities at attended events.
- Review Google AdWords funding and reallocate funds to other platforms where it makes sense.
- Launch redesigned TRC website in Spring 2021.

[3] Due to COVID-19, many tradeshows have continued to be postponed or cancelled. When events can resume in-person, TRC plans to take part and in the meantime attends virtually if applicable.

HOW MERCURY THERMOSTAT WASTE IS HANDLED

WASTE MERCURY-ADDED THERMOSTAT MANAGEMENT THROUGH VEOLIA ES TECHNICAL SOLUTIONS, LLC.

TRC containers with waste mercury-switch thermostats are received at a fulfillment/ inventory center in Port Washington, Wisconsin (WIR000130591). The facility is owned and operated by Veolia ES Technical Solutions, L.L.C. (Veolia) under contract with TRC.

All recycling containers, including pails and bins are received at the loading dock and sent to the TRC inventory room. The container and plastic liner are opened and the contents are identified, sorted, and tallied. The following data is recorded for each bin returned and processed: bin number, business name (location name), city, state, zip code, date returned, number of thermostats and mercury switches by manufacturer and any non-conforming material.

The containers are returned to the location that sent it in with a new prepaid address label within 3 weeks of receipt. The thermostats are stored and staged in a plastic lined carton in a storage area for final processing. The containers are dated and processed in order received, first in-first out.

The thermostats and any loose bulbs collected from the containers are consolidated into a special 55-gallon drum which is labeled and dated according to regulations. The drum is sealed with a band and is only opened when contents are being added to it. Special negative pressure venting assures any fumes are captured and vented when the drum is opened.

The 55-gallon drum is then shipped to Veolia's mercury recovery facility (WID988566543) for final processing of the mercury ampules (switches). Veolia Environmental Services meets or exceeds all local, state, federal and EPA regulations for the management of the product.

The containers are returned from the storage area to the mercury recovery processing area to have the mercury bulbs removed from the plastic housing. Universal Waste Regulations require the recycling and disposal of waste within 12 months of acceptance at the processing facility.

Small quantities of thermostats are removed from the container, which is then closed again. The bulbs are removed from the thermostats and placed into processing vessel at the work station. Once the processing vessel is full, the vessel is loaded into the mercury recovery retort oven.

If a bulb breaks and the mercury spills, the work area is designed to contain the spillage and the operators are trained in the clean-up and disposal of mercury. The TRC inventory

and processing areas are equipped with special mercury vacuum cleaners and the work area is vacuumed at the end of the work day to ensure that any spillage is cleaned up and not left to evaporate.

Veolia meets or exceeds all local, state, federal and EPA regulations for the management of the product. The mercury recovery facility and process are permitted by the Wisconsin Department of Natural Resources. Veolia's approvals for mercury recovery/recycling include:

- EPA - identification WID988566543
- Hazardous Waste Storage License #6008
- Hazardous Waste Treatment License (Mercury Recovery Operations) #4585
- Air Operation Permit #246076050-S01
- Storm Water General Permit #WI-S067857-4

In addition to the regulatory permits, both Veolia Port Washington facilities have developed and maintain management systems in accordance with ISO 14001-2004, OHSAS 18001-2007, and Responsible Recycling (R2:2013) Practice. All persons who handle mercury thermostats as part of the TRC operation receive training in the handling of Hazardous Waste and Universal Waste.

The mercury containing ampules are retorted at Veolia's Port Washington Mineral Springs facility. The mercury is removed during the retort process. The post retort debris consists of broken glass ampules. The debris is tested for residual mercury to document the removal of the mercury to levels below the US EPA Land Disposal Restriction (LDR) levels. The debris is then disposal of as a non-hazardous solid waste at Advanced Disposal Glacier Ridge Landfill, LLC in Horicon, Wisconsin.

A site evaluation of the Veolia Processing Center in Port Washington, WI was conducted by TRC's operations and compliance manager, Danielle Myers, in late October 2019. An audit is scheduled to be completed every two years.

Department of the Treasury
Internal Revenue Service

IRS e-file Signature Authorization for an Exempt Organization

For calendar year 2019, or fiscal year beginning _____, 2019, and ending _____, 20____

▶ **Do not send to the IRS. Keep for your records.**

▶ **Go to www.irs.gov/Form8879EO for the latest information.**

OMB No. 1545-1878

2019

Name of exempt organization: THERMOSTAT RECYCLING CORPORATION

Employer identification number: 54-1830284

Name and title of officer
DANIELLE MYERS
OPERATIONS AND COMPLIANCE MANAGER

Part I Type of Return and Return Information (Whole Dollars Only)

Check the box for the return for which you are using this Form 8879-EO and enter the applicable amount, if any, from the return. If you check the box on line **1a, 2a, 3a, 4a,** or **5a,** below, and the amount on that line for the return being filed with this form was blank, then leave line **1b, 2b, 3b, 4b,** or **5b,** whichever is applicable, blank (do not enter -0-). But, if you entered -0- on the return, then enter -0- on the applicable line below. **Do not** complete more than one line in Part I.

1a Form 990 check here ▶ [X]	**b Total revenue,** if any (Form 990, Part VIII, column (A), line 12)	**1b**	2,759,811.
2a Form 990-EZ check here ▶ [ ]	**b Total revenue,** if any (Form 990-EZ, line 9)	**2b**	
3a Form 1120-POL check here ▶ [ ]	**b Total tax** (Form 1120-POL, line 22)	**3b**	
4a Form 990-PF check here ▶ [ ]	**b Tax based on investment income** (Form 990-PF, Part VI, line 5)	**4b**	
5a Form 8868 check here ▶ [ ]	**b Balance Due** (Form 8868, line 3c)	**5b**	

Part II Declaration and Signature Authorization of Officer

Under penalties of perjury, I declare that I am an officer of the above organization and that I have examined a copy of the organization's 2019 electronic return and accompanying schedules and statements and to the best of my knowledge and belief, they are true, correct, and complete. I further declare that the amount in Part I above is the amount shown on the copy of the organization's electronic return. I consent to allow my intermediate service provider, transmitter, or electronic return originator (ERO) to send the organization's return to the IRS and to receive from the IRS **(a)** an acknowledgement of receipt or reason for rejection of the transmission, **(b)** the reason for any delay in processing the return or refund, and **(c)** the date of any refund. If applicable, I authorize the U.S. Treasury and its designated Financial Agent to initiate an electronic funds withdrawal (direct debit) entry to the financial institution account indicated in the tax preparation software for payment of the organization's federal taxes owed on this return, and the financial institution to debit the entry to this account. To revoke a payment, I must contact the U.S. Treasury Financial Agent at 1-888-353-4537 no later than 2 business days prior to the payment (settlement) date. I also authorize the financial institutions involved in the processing of the electronic payment of taxes to receive confidential information necessary to answer inquiries and resolve issues related to the payment. I have selected a personal identification number (PIN) as my signature for the organization's electronic return and, if applicable, the organization's consent to electronic funds withdrawal.

Officer's PIN: check one box only

[X] I authorize BURDETTE SMITH & BISH LLC (**ERO firm name**) to enter my PIN 22314 (**Enter five numbers, but do not enter all zeros**)

as my signature on the organization's tax year 2019 electronically filed return. If I have indicated within this return that a copy of the return is being filed with a state agency(ies) regulating charities as part of the IRS Fed/State program, I also authorize the aforementioned ERO to enter my PIN on the return's disclosure consent screen.

[ ] As an officer of the organization, I will enter my PIN as my signature on the organization's tax year 2019 electronically filed return. If I have indicated within this return that a copy of the return is being filed with a state agency(ies) regulating charities as part of the IRS Fed/State program, I will enter my PIN on the return's disclosure consent screen.

Officer's signature ▶ _____ Date ▶ _____

Part III Certification and Authentication

ERO's EFIN/PIN. Enter your six-digit electronic filing identification number (EFIN) followed by your five-digit self-selected PIN. 54409522030 (**Do not enter all zeros**)

I certify that the above numeric entry is my PIN, which is my signature on the 2019 electronically filed return for the organization indicated above. I confirm that I am submitting this return in accordance with the requirements of **Pub. 4163,** Modernized e-File (MeF) Information for Authorized IRS *e-file* Providers for Business Returns.

ERO's signature ▶ _____ Date ▶ _____

ERO Must Retain This Form - See Instructions
Do Not Submit This Form to the IRS Unless Requested To Do So

LHA **For Paperwork Reduction Act Notice, see instructions.**
