625 Broadway, 9th Floor
Albany, NY 12233-7253

Subject: Thermostat Recycling Corporation's 2014 Annual Report

Dear Mr. Moroukian:

Attached is TRC's annual collection report for calendar year 2014. A copy of this report is posted on TRC's website at: www.thermostat-recycle.org/resources/media_center.

TRC would like to highlight some aspects of the 2014 program:

- Nationally TRC recovered more than 203,000 whole thermostats in 2014, a 12 percent increase over 2013. This is the most thermostats TRC has recovered in one year since the program's inception in 1998.
- TRC added two full-time employees in 2014. Ryan Kiscaden, Director of National Accounts, joined the staff in January and Alex Monie, Marketing and Operations Coordinator, joined the staff in September. Beyond additional labor, TRC continued to expand the scope and sophistication of its marketing and promotion efforts.
- The recovery of whole thermostats increased in New York by **108%** in 2014. Our analysis indicates TRC increased the number of thermostats recovered last year by increasing both contractor and wholesale collection location participation.

Program data from New York and other states continues to indicate that access remains the most critical component of the program. Meaningful increases in collections will most likely occur if additional wholesalers and/or HVAC contractors participate, or if current low-performing locations substantially improve performance. With TRC's aggressive program launch in 2014, we are now employing tactics to affect a high return rate of TRC containers this year.

TRC welcomes the opportunity to review this report with you and discuss our plans for 2015. I may be reached at 571-447-4315 or by email at mark.tibbetts@thermostat-recycle.org.

Sincere Regards,

A handwritten signature in black ink, appearing to read 'Mark Tibbetts', with a stylized flourish at the end.

Mark Tibbetts
Executive Director

TRC Annual Report on Mercury-added Thermostat Collection and Recycling in New York Calendar Year 2014 Activities

TOTAL	4,786	6,472	40.13

In New York, TRC recovered the equivalent of **4,890** mercury thermostats from 4,786 whole mercury thermostats plus 138 mercury switches removed from thermostats. A total of 40.13 pounds of mercury was diverted from solid waste.

TRC recovered approximately 30% of all thermostats from HVAC contractors, 9% from HHW locations, and 61% from HVAC wholesale distributor collection locations.

Waste Mercury-Added Thermostat Management

Bins with waste mercury-switch thermostats are received at the fulfillment/processing center in Golden Valley, Minnesota. The facility is owned and operated by Honeywell International under contract with TRC.

Bins are received at the loading dock and sent to the TRC processing area. The bin and plastic liner are opened and the contents are identified, sorted, and tallied. The following data is recorded for each bin returned and processed: bin number, business name (location name), city, state, zip code, date returned, number of thermostats and mercury switches by manufacturer and any non-conforming material.

The bin is returned to the location that sent it in with a new prepaid address label within 72 hours of receipt. The thermostats are stored and staged in a plastic lined carton in a storage area for final processing. The containers are dated and processed in order received, first in-first out.

The containers are returned from the storage area to the TRC processing area to have the mercury bulbs removed from the plastic housing. Universal Waste Regulations require the disposal of waste

TRC Annual Report on Mercury-added Thermostat Collection and Recycling in New York Calendar Year 2014 Activities

within 12 months of generation. TRC's processor requires that the disposal occur within 6 months of generation and TRC follows the more stringent requirement. Small quantities of thermostats are removed from the container, which is then closed again, and placed at the bulb removal workstation on a tray that contains any potential mercury spillage. The bulbs are removed from the thermostats and placed into a 2 quart container at the work station. If a bulb breaks and the mercury spills, the work area is designed to contain the spillage and the operators are trained in the clean-up and disposal of mercury. The TRC processing area is equipped with special mercury vacuum cleaners and the work area is vacuumed at the end of the work day to assure that any spillage is cleaned up and not left to evaporate.

The 2 quart container is emptied into a special 55 gallon drum which is labeled and dated according to regulations. The drum is sealed with a band and is only opened when contents are being added to it. Special negative pressure venting assures any fumes are drawn away and vented when the drum is opened.

The 55 gallon drum is then shipped to Veolia Environmental Services in Port Washington, Wisconsin for final processing of the mercury ampoules (switches) Veolia Environmental Services meets or exceeds all local, state, federal and EPA regulations for the management of the product. Veolia's approvals for mercury recovery/recycling include:

- EPA - identification WIR000130591 (Veolia Environmental Services, Inc.)
- EPA BDAT Requirement - satisfied by all recovery operations
- CERCLA (Comprehensive Environmental Response Compensation and Liability Act)
- Wisconsin Department of Natural Resources

All facilities processing thermostats shipped to TRC follow all EPA guidelines and regulations. TRC has a facility license from Hennepin County Minnesota for the operation of the TRC. Honeywell, Inc. has a Hazardous Waste Generator license from Hennepin County. All persons who handle mercury thermostats as part of the TRC operation receive training in the handling of Hazardous Waste and Universal Waste.

Program Education and Outreach

Direct Mail

TRC utilized direct mail, targeting both collection locations and HVAC contractors/technicians.

Collection Locations—

- To encourage collection point participation and to stimulate timely return of TRC collection containers, TRC periodically mailed postcards (Exhibit 2) to collection points that had not returned a TRC container within the last 12 months (in accordance with New York's Universal Waste Regulations). In September TRC revised the postcard and the art file now includes an

TRC Annual Report on Mercury-added Thermostat Collection and Recycling in New York Calendar Year 2014 Activities

image of the TRC recycling container and updated guidance on how to return the bin or request new materials. Revisions to the postcard art improved the response rate of these mailings. TRC mailed 110 reminders to New York collection points in December.

Exhibit 2: New Postcard

HVAC Contractors/Technicians—

- TRC developed an oversized 9x6 full-color postcard targeting larger contractors with more than 10 employees. TRC mailed this postcard twice in July to 903 contacts in New York and repeated the mailing two more times in August.

The postcard reminded HVAC contractors of their legal obligation to recycle mercury thermostats. The postcard also included a link to an online survey for an opportunity to win a 42" flat screen TV for completing the survey (Exhibit 3).

TRC received **no requests for free recycling containers** from New York contractors or survey responses.

Exhibit 3: 9x6 Summer Postcard

TRC Annual Report on Mercury-added Thermostat Collection and Recycling in New York Calendar Year 2014 Activities

- In December TRC developed a 4x6 full-color postcard. It was holiday themed and the messaging centered on the gift of free mercury recycling (Exhibit 4). It was mailed to 8,854 HVAC contracting business contacts in New York.

Exhibit 4: Holiday Postcard

- Mouse Pad Mailing—TRC developed a branded mouse pad to mail with no envelope to garner a higher open rate (Exhibit 5). The mousepad was mailed in October to 463 HVAC contracting businesses in New York with more than 10 employees. The mouse pad included a sticker with a limited-time offer to order a free TRC recycling container. It served as an awareness piece and TRC received **one request** for a container from a New York contractor.

Exhibit 5: Mouse Pad Mailing

Advertising

TRC's primary target remains HVAC contractors/technicians and HVAC wholesale distributors. For the contractors/technicians segment, TRC focuses on residential and light commercial contractors. The second segment is HVAC wholesale distributor locations, as they remain the most convenient location for the majority of New York-based technicians/contractors to purchase replacement thermostats and recycle waste mercury thermostats.

TRC Annual Report on Mercury-added Thermostat Collection and Recycling in New York Calendar Year 2014 Activities

Homeowners remain a secondary market as they represent a small segment of the market (+/- 10%). Since replacing a mercury thermostat is a rare event (if ever) for a consumer, TRC derives the greatest impact/value from its marketing activities by concentrating on the channel segment that conducts the vast majority of repeat thermostat replacements.

TRC's 2014 advertising campaign continued to focus mostly on "easy and free" and "It's the law" messaging (where applicable, as only a limited number of states ban the disposal of mercury thermostats in solid waste and/or require HVAC contractors to recycle all mercury thermostats removed from service).

The purpose of TRC's advertisements were two-fold: 1) continue to build brand/program awareness and 2) increase program participation by raising awareness of specific legal obligations to recycle and the ease of recycling.

Print-based advertising — TRC again emphasized frequency of its 2014 advertising campaign and expanded the scope of the advertising campaign.

New advertising in 2014 included:

- **HVAC Insider Empire**, which has a monthly subscription of more than **6,090 in New York**. TRC ran a **full page**, 2-color advertisement in the June issue to announce the law going into effect for HVAC contractors (Exhibit 6). TRC also ran a 2-color 1/2pg advertisement in the July, August and September issues (Exhibit 7).
- Johnstone Supply Flyer, a printed version of their online catalogue that is mailed to more than 300,000 HVAC contractors nationwide. The flyer featured a TRC advertisement in their August and December issues (Exhibit 8). Johnstone Supply has 15 locations in New York. Johnstone Supply provided this insertion at no-cost to TRC.

Exhibit 6: HVAC Insider Empire Full pg. Ad

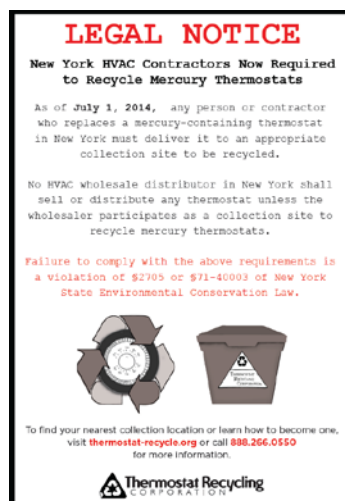

Exhibit 7: HVAC Insider Empire 1/2 pg. Ad

TRC Annual Report on Mercury-added Thermostat Collection and Recycling in New York Calendar Year 2014 Activities

Exhibit 8: Johnstone Supply Flyer Ad

TRC continued print-based advertisements in the following national/regional HVAC trade publications:

- **Distribution Center Magazine**, the exclusive publication of Heating, Air Conditioning & Refrigeration Distributors International (HARDI) with more than 11,000 bi-monthly subscribers. TRC ran a full-color 1/4 page advertisement in May and December promoting the Big Man on Planet competition. (Exhibit 9)
- **HVACR Business Magazine**, a national publication with approximately 34,000 qualified subscribers, of which approximately 1,580 are in New York. TRC ran a 2-color 1/4 page advertisement January – March. (Exhibit 10)

Exhibit 9: Distribution Center Ad

Exhibit 10: HVACR Business Magazine Ad

Web-based advertising — TRC continued the use of rotating banner advertisements in 2014, with changes in scheduling and scope and the addition of new outlets.

TRC's web-based ads gained a cumulative total of more than 906,000 impressions, and email ads were sent to more than 19,000 subscribers. An impression is a measure of the number of times an ad is displayed, and a CTR is the number of times a click is made on the advertisement divided by the total impressions. Exhibit 11 presents benchmark data from Google's Display Benchmarks tool on average CTR's in the U.S. by year. As seen below, the highest average CTR was 0.2%, so TRC's CTR performance exceeded the national average.

TRC Annual Report on Mercury-added Thermostat Collection and Recycling in New York Calendar Year 2014 Activities

Exhibit 11: Google's Display Benchmarks Tool

New advertising this year included:

- ***OESP Dedicated Eblast***, emailed to 1,921 oil and energy service professionals predominantly from New York, Connecticut, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, Pennsylvania, Rhode Island, Vermont and Virginia. The email was exclusively about TRC's program and offered a limited-time offer to sign-up for a free TRC bin. The email was sent in April and received 658 impressions and 33 website link clicks. (Exhibit 12)
- ***HVACR Business "Ahead of the Curve" Enewsletter***, a monthly newsletter that reaches approximately 9,000 opt in readers each month. TRC ran a rotating banner ad in February, March and April. (Exhibit 13)
- ***ACHR News How-To Video***, TRC's program training video was featured in the "how to" section of ACHRNews.com in July. The video received 148 views. The video was also featured on their YouTube page for the remainder of the year where it received an additional 352 views.
- ***Contracting Business Magazine dedicated Email blast***, sent twice to 5,989 subscribers in states with disposal bans, including 1,046 in New York (Exhibit 14). The July mailing received 944 opens and a 16% CTR, and the September mailing received 775 opens and a 13% CTR, which the publisher indicated was a high open rate for them.

Thermostat Recycling CORPORATION
an industry-funded non-profit

Would you Throw 1,000 CFL Bulbs Into the Trash?

Mercury thermostats contain over 1,000x more mercury than a CFL bulb. Think about that every time you replace a mercury thermostat. Would you throw 1,000 CFL bulbs in the trash?

Not only is it bad for the environment, but disposing of mercury thermostats in the trash is also against the law.* Regulated as hazardous waste, failure to recycle could lead to fines up to \$25,000 per violation.

As an industry-funded non-profit, Thermostat Recycling Corporation's (TRC) mercury thermostat recycling program provides an easy way for your contractors and customers to comply with state law. HVAC contracting firms with seven or more technicians are eligible to participate in TRC's program directly. **Sign up your firm by 6/31/14 and TRC will provide your location a FREE reusable recycling container that holds up to 100 thermostats at a time.**** Simply fill out this [PDE](#) and fax or email it to the address indicated to take advantage of this limited-time offer. Locations may then ship their recycling containers as many times as necessary at TRC's expense.

Don't want to sign up? HVAC wholesale locations also participate in TRC's program. Simply drop off mercury thermostats at your nearest location. And if they don't participate in TRC's program - ask them to start. It's easy, and it's the law in many states for them to participate.

Visit www.thermostat-recycle.org to find out more.

*Disposal bans apply in the following states: CA, CT, FL, IL, IN, ME, MA, MN, NY, RI, OR, PA, RI, and VT.
**New York contractors with seven or more technicians can receive one bin at no cost at any time.

Exhibit 13: HVACR Business Enewsletter Ad

Recycling mercury thermostats has never been easier.

To order recycling bins, call us at 888.266.0550.

Exhibit 14: Contracting Business Magazine Dedicated Email Blast

Are You Breaking the Law?

TRC Offers Free Recycling Container

Your state prohibits the disposal of all mercury thermostats in solid waste*. Many states go further by requiring all HVAC contractors to recycle every mercury thermostat removed from service — prohibiting them to leave them at the customer's premise. Violations can result in fines up to \$25,000 per day, depending on your state.

Thermostat Recycling Corporation (TRC) offers a program to help HVAC contractors comply with the law. As a non-profit, TRC provides mercury thermostat recycling containers to your local HVAC wholesalers to collect them at no cost to you.

If you are an HVAC wholesale distributor or contracting business with seven or more technicians, you may participate directly in TRC's program by ordering a collection container. Sign up by 10/31 and enter **Promo Code CB5MAY** to receive a free recycling container that holds approximately 100 mercury thermostats and contains all necessary materials to return the container to TRC at no cost to you.

Visit www.thermostat-recycle.org to learn more about how easy it is to take advantage of the program.

*Disposal bans apply in the following states: CA, CT, FL, IL, IN, ME, MA, MN, NY, RI, OR, PA, RI, and VT.

TRC Annual Report on Mercury-added Thermostat Collection and Recycling in New York Calendar Year 2014 Activities

TRC also continued web-based advertisements on the following HVAC industry websites below:

- **ACHRNews.com**, a website that assists the decision-makers from all branches of the air HVAC industry including contractors, manufacturers, distributors, parts and supply wholesalers, and service companies. More than 181,000 HVACR professionals visit the website every month, totaling more than 218,000 monthly website visits. TRC ran a banner ad January – March and October – December that resulted in 165,904 combined impressions and an average CTR of 0.1%. (Exhibit 15)
- **ACHR Newsletter**, a weekly email blast with more than 12,000 subscribers. TRC ran a banner ad for 4 issues in March with a total open rate of 11,740 and a CTR of 0.4%. (Exhibit 16)
- **HVACRBusiness.com**: TRC ran a banner ad in July that resulted in 6,638 impressions and a CTR of 0.32%. (Exhibit 17)
- **HVAC-Talk.com**, an online forum that averages 310,000 monthly visitors. TRC ran a rotating banner ad February – March and September – October which resulted in 283,397 total impressions and an average CTR of .06%. (Exhibit 18)
- **OESP Advantage Enewsletter**, a weekly email with 3,000 subscribers predominantly from New York, Connecticut, Maine, Maryland, Massachusetts, New Jersey, Pennsylvania, Rhode Island, Vermont and Virginia. TRC ran a banner ad for 12 consecutive weeks August – November which resulted in 11,365 total impressions and an average CTR of 0.2%. (Exhibit 19)

Exhibit 17: HVAC Business.com

Exhibit 18: HVAC-Talk.com

Exhibit 19: OESP Advantage Enewsletter

Google AdWords — Since 2011 TRC has deployed a Google AdWord campaign that geo-targets contractors/technicians and consumers (homeowners) in states with mercury thermostat disposal bans, including New York. Advertisements appear on Google search results pages after an individual searches terms related to TRC's mission (E.g. thermostat replacement, contracting recycling regulations, mercury thermostat recycling, programmable thermostats, etc.).

TRC Annual Report on Mercury-added Thermostat Collection and Recycling in New York Calendar Year 2014 Activities

TRC continued this campaign in 2014 with enhancements to New York's landing page that included a direct link to the New York's state laws page (Exhibit 20). TRC launched the campaign in March, coinciding with the launch of the updated website, and ran it through the calendar year. This is TRC's preferred option to reach consumers because of the campaign's extensive and targeted reach.

The New York campaign yielded **827,318** impressions with an average CTR of **0.36%**.

New York Mercury Thermostat Recycling

Recycling mercury thermostats made easy.
Compliance with state law made even easier.
Find the nearest recycling location to you.

Enter Zip Code Submit

Find out more about New York's mercury thermostat laws and collection programs.

It's important to do everything we can to protect our environment. So when it comes to replacing a thermostat, it should be easy to recycle the old mercury one. Because the last thing you need in your day is a hassle to do the right thing.

The fact is, disposing of mercury thermostats in the trash is against the law in your state. Luckily, we make it easy for you to recycle them.

Just enter your zip code in the search tool above to find a Thermostat Recycling Corporation collection location near you. Then drop it off for free and you're done. That's it – it's that simple.

We're an industry-funded non-profit here to help prevent mercury pollution.

TRC's Website

In March, TRC launched a new website with enhanced functionality. Changes include:

- **Find a Site page:** updated to direct people to active collection sites within the program that have returned a TRC bin within 14 months. This assists homeowners and contractors/technicians in identifying convenient collection sites who are actively participating in the program. It also assists TRC in filtering out closed, consolidated or moved locations from search results. A new feedback form allows visitors to inform TRC if a site is no longer participating. This was the second most visited page on TRC's website after the homepage.
- **State Recycling Programs:** features a clickable map of the United States to easily view different state laws and regulations. This supports easier navigation and lists state-specific

TRC Annual Report on Mercury-added Thermostat Collection and Recycling in New York Calendar Year 2014 Activities

information about mercury thermostat disposal. This is the 3rd most visited page. The New York program page's language was revised and includes a link to the NY Department of Environmental Conservation.

- **Become a Collection Site:** now supports an online application to become a collection site and PDF versions remain available. It is the fourth most visited page and accounted for more than 70 bin sign-ups last year.
- **Collection Partners:** a new section that lists collection partner locations that have committed to offering TRC's mercury thermostat collection program at all of their locations within the continental U.S. This highlights information about each company and directs visitors to their websites to find out more. This provides TRC a marketing value-add to participating companies.
- **Blog:** provides updates about TRC travels to trade shows, HVAC industry commentary, tips, etc.
- **Highlights:** shows select program accomplishments and offers factoids, testimonials and more
- **Contact Us:** a new online form to submit an inquiry directly to TRC. This was added to offer better communication with the TRC team and to assist with answering questions in a timely manner.
- **Veolia:** a partnership to assist visitors in recycling mercury-containing products other than thermostats.

Website traffic continued to grow in 2014. TRC increased its total annual visitors by 50% compared to 2013. There was a **34% increase of visitors from New York** to TRC's website and the state **ranked 2nd** among the country in terms of its share of visitors to the website. The increase in traffic reflects the new redesign/enhancements, impact of paid trade channel advertising, Google Ad-word campaign, and search engine optimization efforts.

TRC's social media presence increased as well. The TRC Twitter account saw a 15% increase in number of followers in 2014, and its Facebook page enjoyed a 21% increase of page "Likes."

Earned Media

In 2014 TRC continued to enjoy positive and frequent coverage within the industry trade press, appearing more than 25 times through a variety of publications. TRC issued a number of media releases and most were picked up generating additional exposure for the program.

Notably, TRC continued to receive coverage and editorial pieces in industry leading publications such as *The Air Conditioning and Refrigeration News* (110,000 circulation), *Distribution Center Magazine* (circulation 11,000), *Indoor Environment & Energy Efficiency Magazine* (mailed to every ACCA member who specializes in residential, commercial, and industrial applications), and *RSES Journal* (239,640 Web visitors).

TRC Annual Report on Mercury-added Thermostat Collection and Recycling in New York Calendar Year 2014 Activities

Additionally, TRC created an opinion editorial titled “*A Simple Question to Help Keep Mercury out of New York’s Environment.*” The intent was to raise consumer awareness of mercury thermostat recycling and its importance. The editorial was submitted to eight daily and weekly publications throughout New York in early October, to coincide with the start of heating season. It was published by the *Riverdale Press* on 10/16 (Appendix A).

Trade Shows, Conferences & Presentations

TRC attended and/or exhibited at the following trade shows:

January 21 – 23: AHR Expo

New York City, NY

The AHR Expo is the largest national trade show for the HVACR industry. TRC staff exhibited and promoted the program to HVAC contractors, manufacturers and distributors. The show had a total registered attendance of over 42,887 from 1,942 companies. Specifically, 17,317 attendees were from the Mid Atlantic.

March 3 – 5: Johnstone Supply Member Meeting

Nashville, TN

Johnstone Supply is a cooperative wholesaler distributor of HVAC parts and equipment with 350 locations nationwide, including 15 in New York. Johnstone’s Annual Membership meeting is invitation only and TRC once again attended and exhibited as part of an ongoing effort with Johnstone to encourage and expand the cooperative’s members’ participation. The event is well attended by owners and senior staff and remains a unique opportunity to engage directly with key decision makers.

March 17 – 19: The Indoor Environment & Energy Expo

Nashville, TN

Co-presented by ACCA, this expo is the largest marketplace for the indoor environmental and energy services contracting industry. TRC staff exhibited and promoted the program to attending HVAC contractors.

March 31 – April 2: HVACR Excellence Educators & Training Expo

Las Vegas, NV

The nation’s largest conference that is dedicated to providing professional development exclusively for HVACR educators and trainers. TRC staff exhibited and promoted the program to educators to include information on mercury thermostat recycling in their trainings.

April 28 – May 1: ACI National Home Performance Show (New)

Detroit, MI

Affordable Comfort, Inc. (ACI) is the leading educational resource for the home performance

TRC Annual Report on Mercury-added Thermostat Collection and Recycling in New York Calendar Year 2014 Activities

industry. ACI trade shows feature product manufacturers and distributors, educational institutions, utilities, nonprofits, government agencies, industry media, trade associations, energy consultants, and more. TRC staff exhibited at this show.

May 12 - 13: National Association of Oil and Energy Service Professionals

Mohegan Sun, CT

This was OESP's annual convention and trade show part one, with over 2,500 attendees representing close to 300 companies across New England. TRC staff again exhibited at this show.

June 10 – 11: New England Fuel Institute (NEFI) (New)

Worcester, MA

New England Fuel Institute (NEFI) is a nationally recognized organization of over 1,100 independent Oil, heat, propane, biofuel and motor fuel dealers and associated companies. TRC staff exhibited at this show.

August 4 – 6: Association for Energy Service Providers (AESP) Summer Conference (New)

San Francisco, CA

AESP is the premier organization for professionals in the energy efficiency industry. Over 300 industry professionals attend the event including utility professionals and industry advisors/implementers. TRC staff attended this show.

September 17 – 18: International Facility Management Association (IFMA) World Workplace Conference & Expo 2014 (New)

New Orleans, LA

Held annually, IFMA's World Workplace meets the educational and networking needs of professionals who support the built environment. IFMA promotes World Workplace year-round to more than 23,000 members in 85 countries; plus an additional 200,000 workplace professionals. TRC attended the show.

September 22 – 23: Oil and Energy Service Professionals Road Show

Gettysburg, PA

This was OESP's annual convention and trade show part two, with over 2,500 attendees representing close to 300 companies across New England. TRC staff again exhibited at the show.

November 6 – 7: New York State Association for Reduction, Reuse & Recycling, Inc. (NYSAR3) Annual Conference

Cooperstown, NY

The New York State Association of Reduction, Reuse and Recycling (NYSAR3) represent recycling professionals in New York State, including public officials, business professionals and individuals. TRC staff exhibited and also presented.

December 6-9: Heating Air-conditioning and Refrigeration Distributors International (HARDI)

San Antonio, TX

TRC Annual Report on Mercury-added Thermostat Collection and Recycling in New York Calendar Year 2014 Activities

TRC staff again exhibited and participated in the “Booth Program,” which provides for 1-on-1 sessions with senior executive staff from HARDI member companies. This event targeted representatives of approximately 80% of the wholesale market for HVACR products. TRC also presented its annual “Big Man on the Planet Award.”

HVAC Wholesale Distributor Outreach

Summer “Surge” to Accelerate Program Adoption

TRC retained two independent contractors to assist with the program launch. Both contractors had significant HVAC industry experience. TRC split New York into “eastern” and “western” territories roughly divided by Route 81 (see Appendix B for a full list of locations visited). TRC’s representatives visited more than 300 HVAC wholesale branch locations not participating in TRC’s collection program.

Visits were unscheduled and took approximately 15 minutes. TRC representatives requested to speak with the location manager or another responsible staff person and reviewed the following items with location staff:

- The legal obligation to act as a collection point for waste mercury thermostats and penalties associated with non-compliance.
- The TRC program and how participating in the program facilitated compliance with New York law. TRC representatives also made a TRC bin available during the visit.
- TRC policies and procedures and how to prepare the bin for shipment.
- In store promotional collateral and provided assistance with posting these items.
- Confirmed the visit in writing and requested a signature from the location’s staff confirming the visit (and if the location refused to participate).

TRC staff visited 20 additional wholesale locations in 2014. The visits were concentrated in the Long Island market and were intended to assess location participation following the surge.

Dump Bin Displays

In July distributed branded displays to showcase the TRC container to select HVAC wholesale distributor collection locations in New York, included Johnstone Supply and R.E. Michel locations (Exhibit 21). The purpose was to enhance the visibility of the program at HVAC wholesale locations. These displays were provided at no-cost to distributors.

Big Man on Planet Competition

TRC partnered with Heating Air-conditioning and Refrigeration Distributors International (HARDI) for the third annual Big Man on Planet (BMOP) competition in 2014. In April TRC sent an invitation to the executives of 320 HARDI members to encourage participation in the program. (Exhibit 22).

TRC Annual Report on Mercury-added Thermostat Collection and Recycling in New York Calendar Year 2014 Activities

In 2014 TRC restructured the program to allow for multiple winners and included a \$500-\$1,000 employee incentive for the top three branch locations within each tier. Participation increased 67% over 2013, with 21 distributors competing with more than 1,000 locations nationwide. The competition ran May 1st – October 31st and yielded 55,912 mercury thermostats.

National Program Expenses

Table 1: 2014 Program Administrative Expenses

Program Component	2013	2014	% Change
TRC Staff and Administration [†]	\$ 417,656	\$ 593,631	42%
Recycling Costs	\$ 317,874	\$ 356,043	12%
Incentive/Promotional Payments	\$ 23,955	\$ 47,712	99%
New Collection Containers	\$ 21,936	\$ 15,108	-31%
Travel	\$ 32,608	\$ 70,120	115%
Legal	\$ 27,696	\$ 40,373	46%
Direct Expense for Marketing & Outreach	\$ 194,761	\$ 289,347	49%
Total (expenses)	\$ 1,036,485	\$ 1,412,333	36%

There was significant variance in many expense categories from 2012 to 2013. Causes for changes include:

- TRC staff and administration increased by 42% in 2013. TRC added a full-time national account manager in January 2014 and one more full-time operations coordinator in September 2014, effectively adding three full-time positions since January 2013.

TRC Annual Report on Mercury-added Thermostat Collection and Recycling in New York Calendar Year 2014 Activities

- Incentive/Promotional Payments: Incentive payments in Maine and Vermont continue to decline, but TRC ran a variety of promotional campaigns, including the promotion with R.E. Michel, in 2014 leading to increased expense.
- Travel: The national account manager spends about 60% of his time on travel, primarily visiting collection locations and attending industry events.
- Direct Expense for Marketing/Outreach: Marketing expense increased by nearly 49%. This reflects increases in advertising, printing and the production/distribution costs of the bin display which cost over \$28,000.

2015 Program Plans

In 2014 TRC's priorities were to 1) place bins in as many HVAC wholesale locations as possible and 2) build program awareness within the HVAC channel. In 2015 TRC's focus is to stimulate returns from collection points. TRC's goal is to have at least 50% of the collection points return a bin by the end of the year¹. To achieve the above objectives TRC will employ the following tactics in New York in 2015:

1. Collection Location Visits: TRC has scheduled approximately six weeks of field work in New York in 2015. Either TRC staff or an independent consultant will attempt to visit upwards of 80% of participating wholesale locations by year's end. This effort is to a) encourage active promotion/participation by wholesalers and b) to facilitate the timely return of TRC containers.
2. Regular Location Contact: TRC plans to mail reminders to all locations not returning a bin within the previous 12 months. Locations will be contacted approximately every 4 months; the first mailed contact was timed to arrive the first week of January 2015. TRC has used this tactic in other states and found it highly successful. TRC will augment field visits and mailed reminders with targeted outbound calls to collection locations not returning bins. TRC will also contact the senior management of New York based wholesalers and provide them with updates on their store's performance.
3. Targeted promotions with select wholesalers/contractors: TRC has approached two wholesale distributors with locations in most New York markets and offered to support a raffle type promotion. Preliminary plans are to offer an entry into raffle for the return of a mercury thermostat to a participating location. TRC is looking to run a multi-month promotion and offer a prize of significant value. TRC has also developed a program with a major HVAC service contractor in the state where TRC is supporting direct participation in the program.
4. Continued efforts to raise program awareness among HVAC contractors with a particular emphasis on larger contractors. TRC plans to use direct mail to promote direct participation in the TRC program among larger HVAC contractors throughout the state. TRC is also looking to retain a consultant to directly provide TRC containers to HVAC contractors in

¹ There is a strong correlation between program participation and returns. States with over 50% of bins returning each year post higher collection numbers.

TRC Annual Report on Mercury-added Thermostat Collection and Recycling in New York Calendar Year 2014 Activities

select New York markets. This consultant would also facilitate the recovery of waste thermostats at contracting businesses.

5. Continuing to raise the visibility of the program at wholesalers. TRC is continuing to promote the availability of bin displays among New York. TRC has ordered displays for nearly 70 additional New York locations in 2015. TRC is also actively encouraging distributors to directly promote the program to their customers.
6. Continue to promote the availability of the program to New York HHW locations. TRC will utilize a combination of direct mail, phone and email to encourage HHW participation in the program. TRC staff will also attend relevant trade shows.

Keep New York mercury-free

By Mark Tibbetts
Posted 10/16/14

Are you aware that many thermostats manufactured prior to 2006 contain mercury? Are you aware that a mercury thermostat contains at least 1,000 times more mercury than today's standard compact fluorescent light bulb (CFL)? Are you aware that mercury thermostats are likely the largest remaining reservoir of mercury in homes today, and thousands end up in the trash each year?

Similar to a CFL bulb, the mercury in a thermostat is safely contained within the device when in use. However, it becomes an issue when the thermostat is replaced and the old one becomes waste.

In its various forms, mercury can be harmful to human health and the environment. When mercury from thermostats or light bulbs ends up in the trash it could wind up in landfills and waste incinerators. From there it may enter our rivers, lakes and streams, where it converts into an even more toxic form that enters the food chain.

While thermostats are not a significant source of mercury pollution, they should be an easy one to control.

In 2006 New York prohibited the disposal of mercury thermostats in the trash. Last year, New York went further and required contractors to recycle every mercury thermostat they remove from service.

However, recycling data indicates that some contractors or their employees continue to disregard the law and thermostats continue to be thrown into the trash. This is despite the fact that there is a free and universally accessible recycling program for mercury thermostats available to contractors.

With fall's arrival, you are likely to schedule your annual system maintenance check. When the technician comes to your home, do New York's environment a favor and ask him what his company's policy is regarding the disposal of mercury thermostats and how they monitor compliance. Hopefully you will like the answer. But if you don't, let the technician know you expect your contractor to follow New York law and properly dispose of any thermostats they remove.

While one inquiry from a customer may seem insignificant, the more contractors hear from their customers that this is an issue they care about, the better. In a highly competitive industry that values repeat and referral business like heating and cooling contractors, you can make a real difference. So, ask the question and ensure your heating contractor is doing the right thing for New York's environment.

Mark Tibbetts is the executive director of Thermostat Recycling Corporation, a non-profit stewardship organization that operates and promotes the national recycling program for mercury thermostats.
