WE SHARE THE GOOD NEWS – 2018 WAS AN EXCEPTIONAL YEAR

As I began writing the 2018 annual reports, it dawned on me how much activity the program accomplished in the last year. Even as legacy mercury thermostats became less prevalent, the program continued to work in new and interesting ways to keep collecting these units. Not surprisingly, the replacement of HVACR equipment continued to be the leading indicator to mercury thermostat replacement. But there has been a remarkable shift occurring with energy efficiency programs. We have been the direct beneficiary of smart thermostat's rapid user adoption and utility programs which encourage thermostat replacements. In some cases, thermostats are being replaced prior to the death of the HVACR system they control. This replacement activity couldn't have been predicted several years ago.

Looking ahead, I anticipate that the program will continue to fulfill Illinois statutory requirements, agreements and other arrangements for regulatory and legislative compliance. But we will target mercury thermostat collections at utility energy efficiency programs while simultaneously maintaining the HVAC industry collections. We will do both hand-in-hand with the regulatory community.

IT'S ALL ABOUT (NEW) MARKETING

The message around the importance of properly disposing mercury-containing devices is really an old message, and it's hard to keep redressing up the same thing. The awareness is always there, but we don't want to become noise by marketing too much, which is a challenge any recycler faces.

One of our enhancements was to create the "Ten Bin Club," which publicly identifies members every month who have sent us 10 bins since they joined TRC. In 2018, we had 68 companies who qualified for this unique accomplishment. In addition, we had 22 who returned their twentieth bin during our twentieth year. For the visually oriented, we created a wallpaper advertising theme that explains what we do, too. It's the kind of retro artwork that continues to highlight the T87 mercury-containing thermostat as one of the most iconic brands in the last century.

In the utility space, TRC issued a letter (in conjunction with the Air Conditioning and Cooling Contractors of America) to utility stakeholders on the importance of collecting mercury-containing thermostats while developing, deploying and incentivizing thermostat replacement programs. Our

letter demonstrated our intent and commitment and offered suggestions related to future incentive practices. We also made progress and will continue to strive toward a memorandum of understanding with the federal Environmental Protection Agency's *Smart Sectors*¹ program.

We also put a timestamp on an important day. October 24th was the day of TRC's founding twenty years prior. The day served as a mouthpiece of awareness. While recycling the devices is important, it's just as important that consumers and contractors don't treat thermostats like other household waste, such as batteries and paint. We are really excited to now have the national day, and it's really a pretty significant thing for our membership to celebrate into the future.

This past year, we incorporated Tableau software (an add-on to our Salesforce database) for immediate updates on our results. This technology helps in our marketing efforts and targeting using business intelligence tools such as GIS mapping. We established auto-emails to collection locations which provide timely contact and also added real-time data on the TRC website which we trained users through a video on our YouTube channel. We also gave special attention to search engine optimization. It's simple, if we drive up our position on search engines, with Google as the primary target, TRC is more likely among the first choices for people searching for recycling thermostats.

RELATIONSHIPS STILL MATTER

We say it hundreds of times during the year because it's true: Relationships matter. No man, woman, or organization is an island to themselves. A building block of our success certainly has been our relationships with our financial supporters but also finding unanimity on industry issues. For example, we are working with the Product Stewardship Institute on their U.S. Dept. of Agriculture grant again and continued attending joint EPR Executive Director group meetings which share programmatic best practices.

We continued as active participants with trade associations and added new partnerships such as the Midwest Energy Efficiency Alliance, the Northeast Energy Efficiency Partnerships and recently the Air Conditioning Association of New England. Additionally, our seasoned government relations consultant, Tom Murray, gave a well-received presentation at the federal EPA's Energy Star products partner meeting.

¹ a partnership that provides a platform to collaborate with regulated sectors and develop sensible approaches that better protect the environment and public health

One thing I'm very proud of is that TRC contributed \$5,000 to the Fort Washington Business Alliance, where we are headquartered. TRC also sponsored the Polar Bear International's "Thermostat Setback Challenge." This event, held every Feb. 27, *"drew attention to the challenges polar bears face in a warming Arctic climate —and how we can help."* We used both these vehicles to communicate our positioning as a consciousness nonprofit citizen to our neighbors, schools and businesses. These activities demonstrate our engagement with a range of organizations that have disparate individual goals. Yet all of us are united in a collective effort with the goal of ensuring that our environment is safe.

Please enjoy this year's annual report. If you should have any questions, please feel free to contact us.

ILLINOIS

2018 Collections and Evaluation

The following analytical report details the annual program performance for mercury thermostat collection in the state of Illinois in 2018. A few of the program highlights for 2018 are included below:

- In 2018 the program **collected 65.1 lbs. of mercury** in Illinois. Since 2000, the annual quantity of mercury collected in Illinois has an average of 54.1 lbs.
- The program collected **8,722 whole thermostats in 2018**. This was a 18% decrease over the number of thermostats collected in 2017. Since 2000, the average thermostat count per year is 6,721.
- The **number of whole thermostats collected per bin in 2018 was 32 thermostats**, a decrease from 38 in 2017.
- The counties with the most bins and thermostats returned in 2018 were **Cook County (76 bins, 3,013 thermostats), Dupage County (39 bins, 880 thermostats), and Winnebago County (12 bins, 691 thermostats)**.
- In 2018, **45% of the partner locations returned at least one bin**.
- **A total of 384 'Miss You' calls were placed and 192 site visits in 2018** which resulted in a positive relationship of activity to bin returns.
- In addition to 8,722 whole thermostats, **117 loose switches were collected, bringing the total number of "thermostat equivalents" returned in 2018 to 8,822**, a decrease of 24% from 2017.

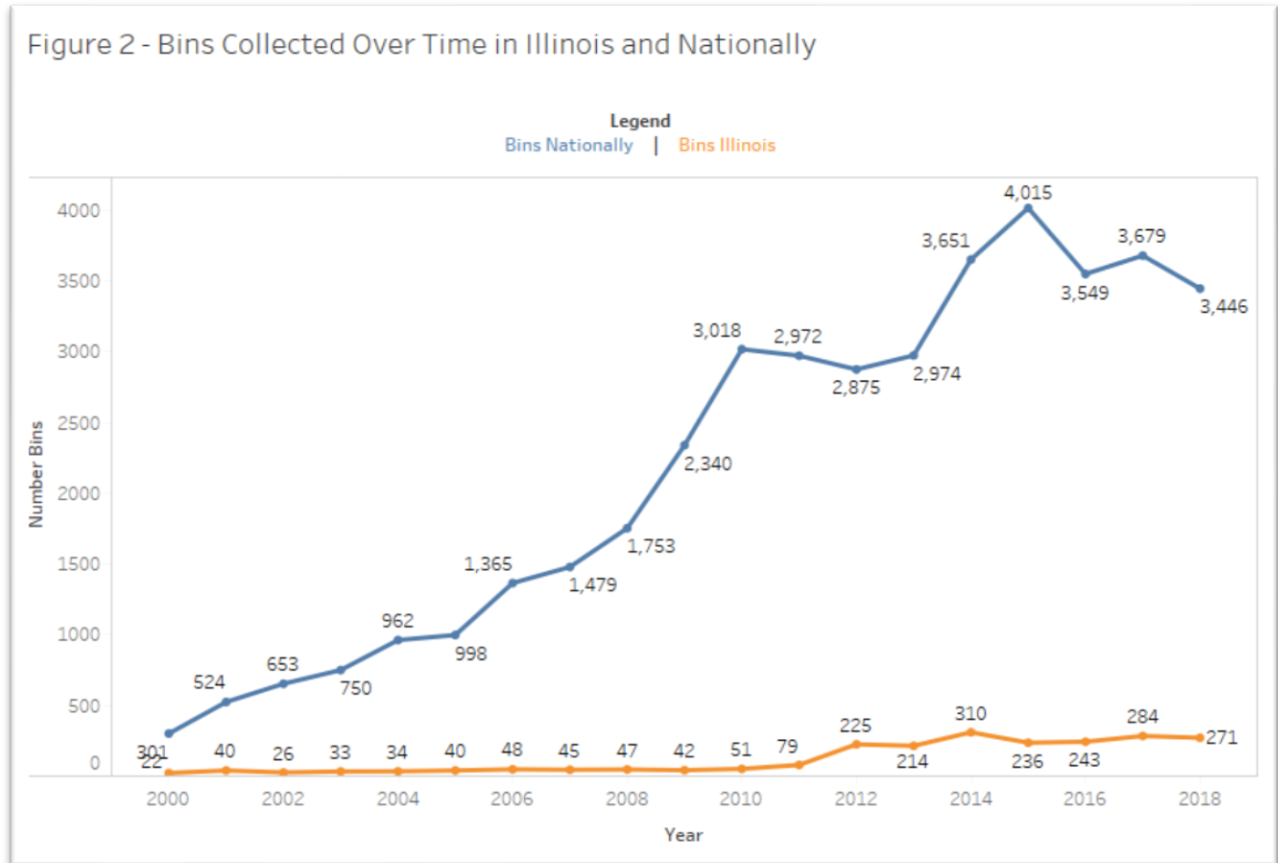

Section 1: Program Analytics

Section 1 of this report examines the annual performance of the thermostat collection recycling program in terms of bins, thermostats, and mercury collected as well as the year-over-year progression of the program. On average, the program has collected 54.1 lbs. of mercury and 6,721 whole thermostats per year since 2000. In 2018, the program collected 65.1 lbs. of mercury from 8,722 thermostats and 117 loose switches. Figure 1 displays the total number of bins, the total number of thermostats, and the quantity of mercury collected in the Illinois since the beginning of the program.

Figure 2 displays the number of bins collected in the Illinois since the initiation of the collection program, as well as the total number of bins collected in the U.S. over the same period. The number of bins collected in Illinois has generally increased from 2000 to 2012. In 2014, bin returns increased again, peaking with highest number of bins returned in 2014 with 310 bins.

The 65.1 lbs. of mercury collected in Illinois in 2018 was 22% lower than the 83.9 lbs. collected in 2017. Figure 3 displays the quantity of mercury collected in the Illinois over time as well as the annual percent change in the Illinois and nationally.

Figure 6 displays the monthly distribution of bins and thermostats collected in the Illinois in 2018. The months with the greatest number of thermostats returned were October (1,731 thermostats, 65 bins), and November (893 thermostats, 33 bins). The months with the greatest number of bins returned were also October (65 bins), and November (33 bins). Conversely, the months with the least activity in 2018 were July and August.

The highest number of thermostats per bin returned occurred in August and September (59 and 76 thermostats per bin each month, respectively). Figure 7 shows the average number of thermostats per bin returned per month for the year.

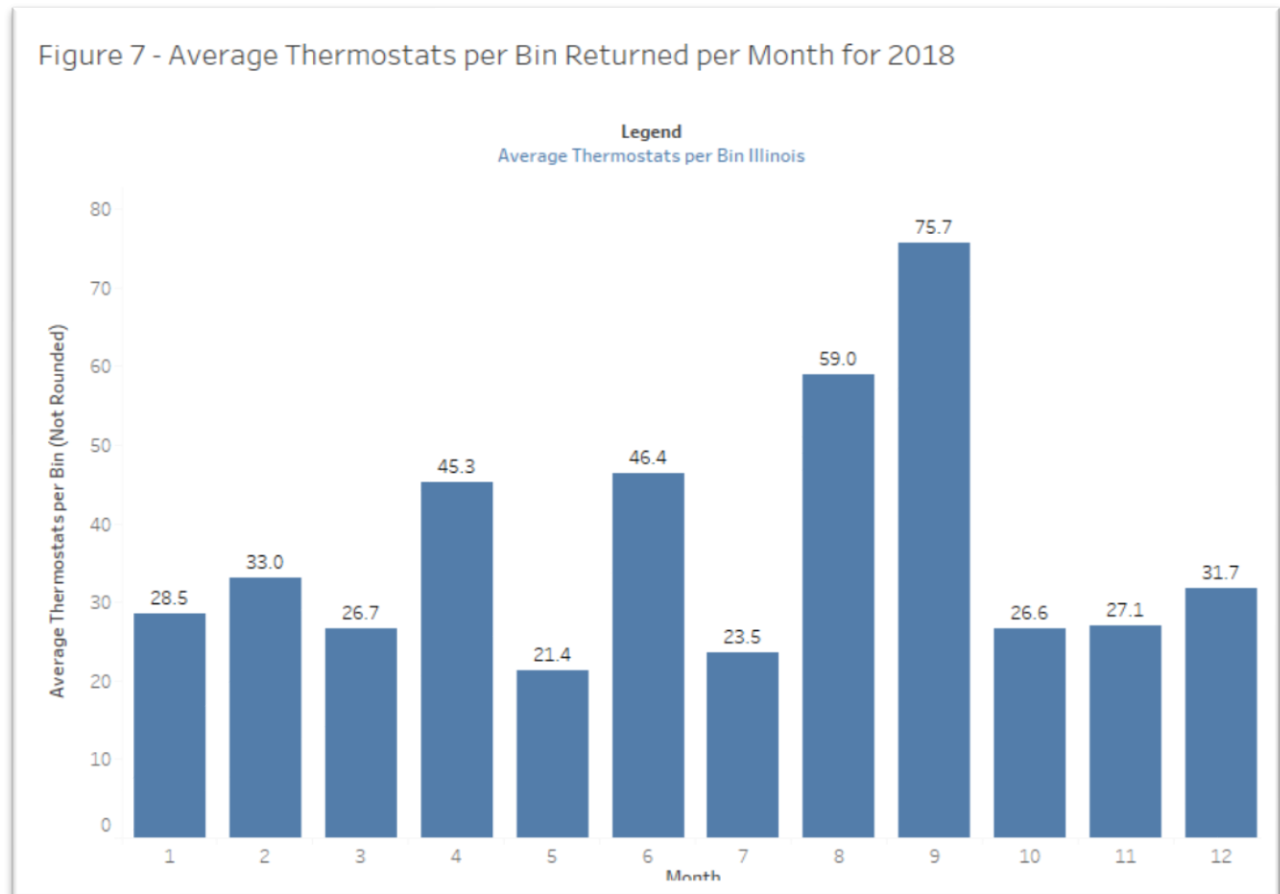

Figure 8 displays the average number of thermostats returned per bin in the Illinois and in the U.S. since the beginning of the Illinois program. Nationally, the number of thermostats per bin has been decreasing annually since 2000. In Illinois a similar pattern is observed after 2009, with the exception of a few years. The number of thermostats per bin in 2018 (32 thermostats per bin avg.) decreased from 2017 (38 thermostats per bin avg.).

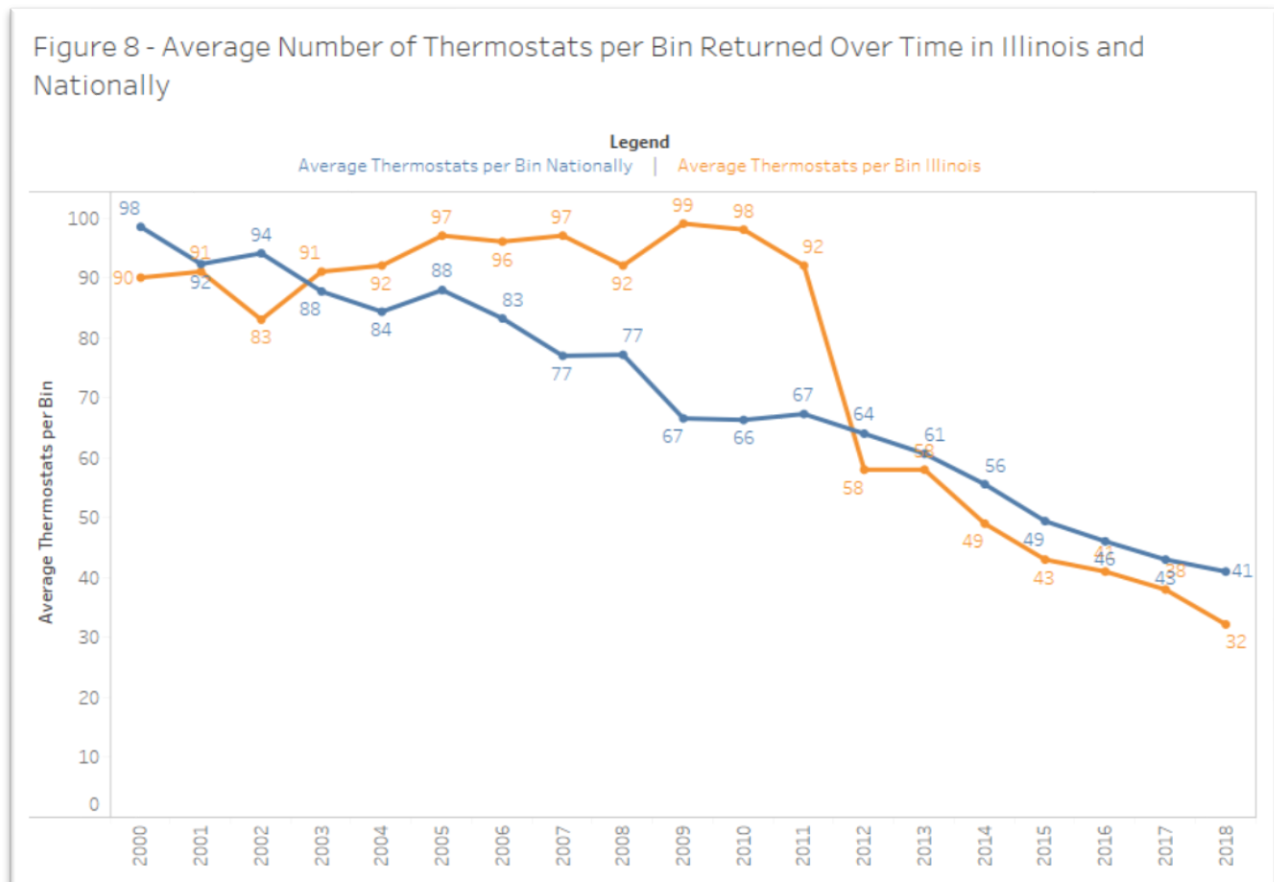

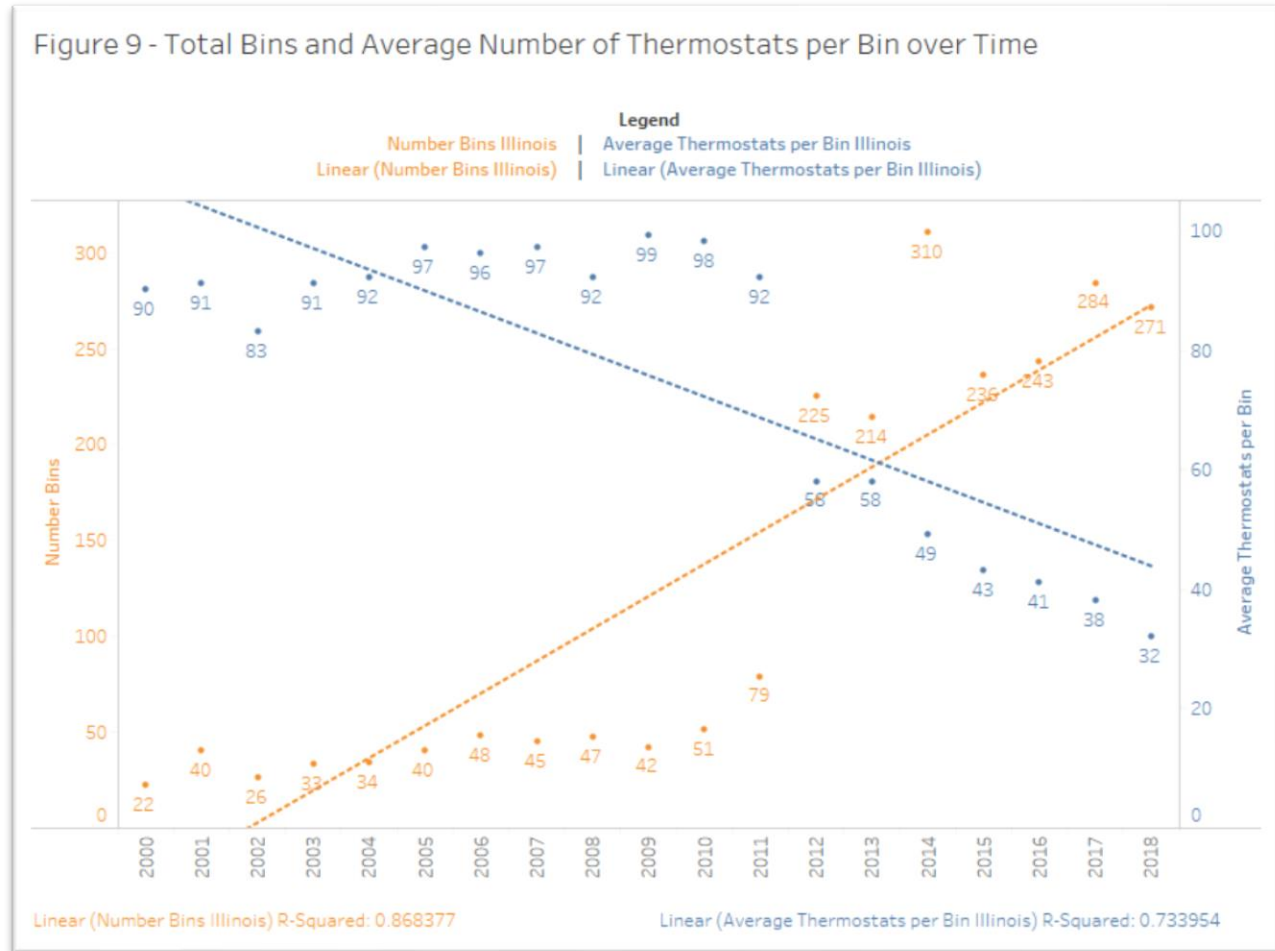

Figure 9 plots the total bins returned over time along with the average number of thermostats per bin over the same period. In general, the number of bins returned in Illinois increased steadily from 2000 to 2018. A negative correlation has been identified between the number of bins returned since 2009 and the number of thermostats per bin.

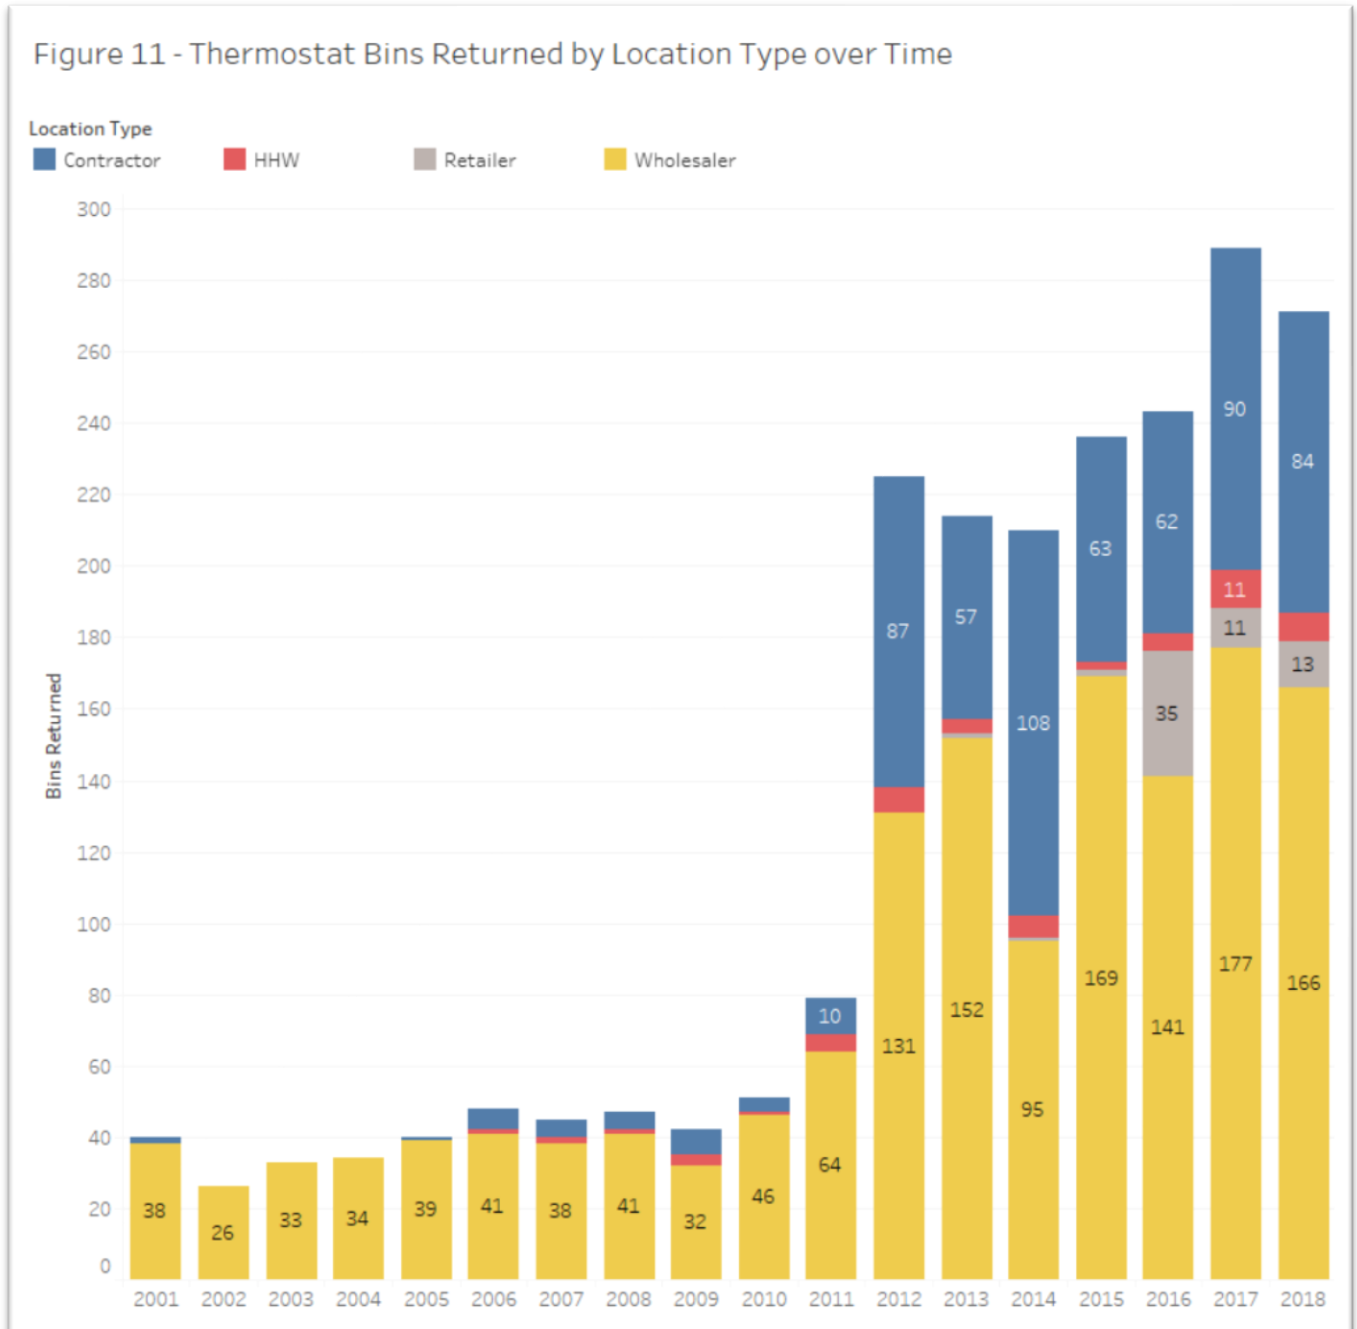

SECTION 2: Channel Partner Analysis

Section 2 of the report examines the partner locations in more detail. Most thermostats collected in the Illinois were through wholesalers (68.7%) with a majority of remaining thermostats collected by contractors (27.6%). Figure 10 shows the distribution of thermostats collected by location type in 2018.

Figure 10 - Thermostats Collected by Location Type in 2018

The number of bins returned in 2018 decreased from 2017 levels across wholesalers and contractors. Figure 11 displays the change in the number of bins returned by thermostat collection type over time in the Illinois.

In 2018, 45% of Illinois locations possessing a collection bin sent back at least one bin for recycling. The distribution is displayed in Figure 12.

Figure 13 displays the total bins and thermostats returned by county in 2018. An analysis of the top performing counties revealed that Cook County (76 bins, 3,013 thermostats), Dupage County (39 bins, 880 thermostats), and Winnebago County (12 bins, 691 thermostats) returned the greatest number of bins and thermostats in 2018.

TRC partner Johnstone Supply (1,037 thermostats) returned the highest number of thermostats in Illinois in 2018, followed by Franklin Energy Services (861 thermostats) and Munch's Supply (552 thermostats). Apart from these locations, 7 program partners returned more than 200 thermostats each. Figure 14 displays the top performers in terms of total thermostats returned in 2018.

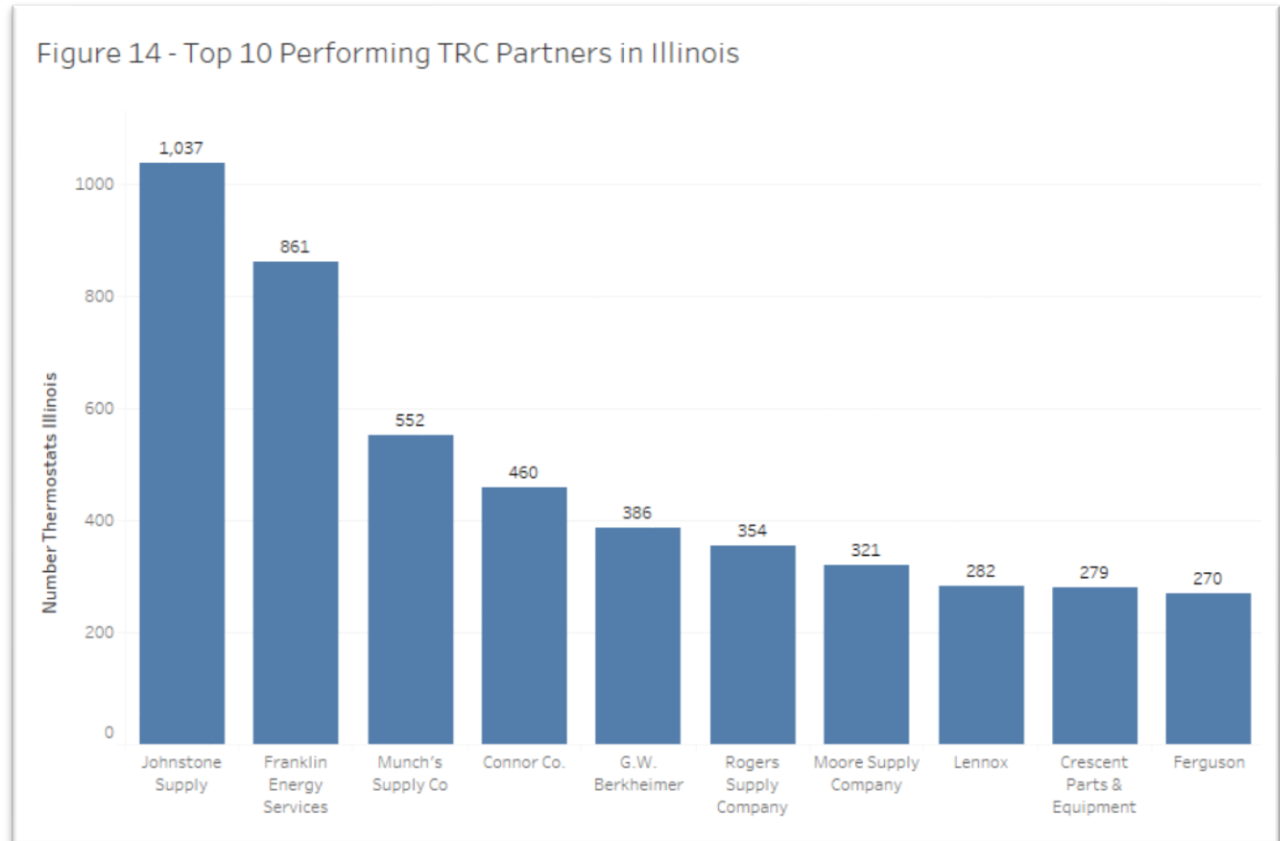

Figure 15 includes the top performers for 2018 by each of the following categories: total bins returned, total thermostats returned, and average number of thermostats per bin.

TRC conducted several activities in 2018 to increase the number of bins and thermostats returned in the Illinois. These activities included site visits and 'miss you' calls to collection locations that may not have returned a bin recently. In 2018, 192 site visits were conducted in Illinois, and a total of 384 'miss you' calls were placed. Figure 16 displays the relationship between the number of site visits per month, the bins returned per month, and the number of thermostats (in 100's) returned per month. In 2018, there was a positive correlation between activities performed and the number of bins returned

Figure 16 - Relationship Between Site Visits and Bins and Thermostats Returned Per Month in 2018

Figure 17 displays the relationship between the number of calls per month, the bins returned per month and the number of thermostats (by 100's) returned per month. Calls were placed in the months of April, July, and October.

Figure 18 examines the return rates of four groups (if applicable) – locations that did not receive a call or visit, locations that received at least one visit, locations that received at least one call, and locations that received both a call and visit. The rate of active participation (which refers to locations that returned at least one bin) in 2018 was 52% for locations that did not receive either a visit and call, but 59% for visited locations and 35% for called locations.

SECTION 3: Comparisons to National and Other States' Data

To compare how the Illinois collection partners performed in 2018, the national average for the number of bins returned per locations that returned at least one bin was calculated and compared to the Illinois average since 2012. The average number of bins does not include locations that did not return any bins in that year. It should be noted that when making comparisons each Illinois has different regulations, different mix of housing types, local policies, and incentives that may have a unique impact on returns. Overall, the average number of bins returned per location per year was lower in Illinois than the U.S. average, as shown in Figure 19.

Figure 19 - Average Number of Bins Returned Per Location Per Year

Figure 20 displays the locations in Illinois that returned more than one bin in a given year since 2015, and Figure 21 displays the top 10 partners in the U.S. over the same period in terms of the number of bins returned.

Figure 22 displays total percentage of locations that actively participated in the program (active participation defined as sending back at least one bin) in 2018, for all the states that mandate thermostat returns reporting as well as the U.S. national average for all states (reporting and non-reporting). In 2018, 45% of the locations in Illinois returned at least one bin compared to a national average of 33%. The highest percentage of locations returning a bin in 2018 amongst states that mandate thermostat returns reporting was Rhode Island (74%).

Figure 22 - Percent of Locations Returning a Bin in 2018

Figure 23 compares the Illinois and national rates for several analytics. These include: total whole thermostats, bins, and loose switches collected, number of thermostats collected by total locations and per actively participating locations, number of thermostats per bin returned on average, equivalent average, number of mercury thermostat equivalents returned in 2018, and finally percent change in mercury thermostat conversion from 2017 to 2018. The equivalent average is an average of the number of switches in whole thermostats collected in the Illinois, and it is used to represent and equivalent number of thermostats from returned loose switches. The thermostat equivalent number includes the totals of whole thermostats returned plus the number of thermostats estimated from loose switches. The states displayed are those that mandate thermostat returns reporting and the U.S. average is for all states that return bins (reporting and non-reporting).

2018 Collections by Brand

In Illinois, Thermostat Recycling Corporation (TRC) recovered the equivalent of 8,822 mercury thermostats from 8,722 whole mercury thermostats plus 117 mercury switches removed from thermostats. A total of 65.09 pounds of mercury was diverted from solid waste. In 2018 the Illinois Environmental Protection Agency set a collection goal in the amount of 7,000 for mercury thermostats equivalents.

*Please note the explanation of the converted thermostats or thermostat equivalents below.² An example of the mercury ampoule is shown below.

As required by the Illinois statute, a table of thermostat brand holder with the corresponding thermostats, count of switches and pounds of mercury recycled is below. It is important to note that there still remain non-members whose thermostats the TRC collection program recycles. They are listed in the table as “Non-Member Brands”. Also, there were a few changes that affected TRC’s membership.

1. Lear Siegler dissolved their business and is no longer a paying TRC member. Please see the Appendix regarding their dissolution notice.
2. Johnson Controls, Inc. closed on a transaction which acquired the assets of Lux Products Corporation. Lux’s remaining liabilities (including the mercury thermostat obligation) remained with a newly created company, STLPC Corporation.

² A mercury thermostat contains a variable amount of mercury ampoules or “switches” attached to the subbase of the thermostat. These glass ampoules often times are collected in the recycling container without the intact thermostat attached to them. TRC collects and counts these loose ampoules and recycles them. To derive the converted thermostat or thermostat equivalent, the program takes the following calculations to develop the converted thermostat or thermostat equivalent. First, TRC will count the total whole (intact) thermostats collected in the recycling bins. From these units, there is an intact ampoule count. TRC then takes the intact ampoules divided by the whole (intact) thermostats or otherwise known as the conversion ratio. After the conversion ratio is calculated, TRC will multiple the loose mercury switches by the conversion ratio. Lastly, we add this result to the whole (intact) thermostats to produce the converted thermostats or thermostat equivalents.

2018 Accounting of the Program Expenses

Below is a summary of program expenses for the Illinois collection program in 2018. 2018 program expenses (reported in the annual report) are unaudited and are for management purposes only.

Prior to submittal of this annual report, the expenses were reviewed by Halt, Buzas & Powell, LTD. In 2018, the program spent nationally a grand total of \$3,306,769.

Program Component	2017	2018	Difference (\$'s)
Direct Expense for Marketing & Outreach	42,834	39,205	(3,629)

Current Collection Locations

Small Pails Expanded

In 2018, TRC shipped 320 small pails to collection points around the country. We also shipped 451 new green bins. In comparison, the program shipped 510 new green bins in 2017 and 191 small pails³. Collection locations either requested the new pail when they signed up to participate in the program or were switched out with the ‘nudge’⁴ campaign. The large, green bins which have been the staple of the program, continued to be replenished to a collection location. Because the containers are reused and bar coded, we anticipate that the request for new containers will continue to decrease as the program operates into the future.

- Of the totals provided, TRC shipped 32 NEW small pails and 8 NEW large bins in Illinois.

Collection Location Outbound Phone Calls

Our outbound phone calls have been branded internally as the “Miss You Call” process. These calls promote collection container returns and in 2018, these calls were handled more efficiently. TRC reallocated resources for miss you calls to collection sites that have not returned a container in over a year. These calls were outsourced to two companies; Regus Property Management and Intelligent Office. By outsourcing calling, TRC has amplified its call time to 25 hours a month and increased the number of bins returned. The accumulation of these changes has netted the program an increase of 563 calls over 2017. In total, the program called 2,962 current collection locations in 2018.

- Of the totals provided, TRC completed 384 calls to encourage shipping the recycling container compared to 500 a year prior in Illinois. A copy of the locations called can be found in the Appendix.

³ New bin orders coincide with accounts that open new stores, move or lose their existing containers.

⁴ Originally, the ‘nudge’ campaign was intended to automatically send pails to locations that returned bins with 6 or less thermostats and asking the location to consider using the pail going forward and return their large, green bin. Partway through 2018, the campaign was modified to only send pails to locations that inquired about the new container because many pails were lost or returned in the original campaign.

Collection Location Postcards

Following up the 'Miss You' call process, TRC sent well over 5,900 postcards and site verification forms throughout the year to collection locations that haven't shipped a bin in the past year.

- Of the totals provided, TRC mailed 769 reminder postcards and site verification forms in Illinois. A year prior TRC sent 840.

Collection Location Emails

A trigger system was developed in which TRC emailed locations three weeks after receiving a postcard to encourage them to directly ship the recycling container.

- TRC emailed 352 collection locations three weeks after the location received a reminder postcard to ship their container in Illinois.

Collection Location Site Visits

1,533 site visits were completed in the following states: California, Connecticut, Illinois, Maine, Minnesota, New York, Pennsylvania, Illinois, and Vermont. The purpose of a site visit is to inform the location of their requirement for participation, what their specific state statute requires of them, scheduling a shipment of our recycling container, and to answer any questions they may have. Often times, valuable intel is gathered during the site visit which is used to enhance TRC's outreach and other tactics.

- Of the totals provided, TRC visited 192 collection locations compared to 126 in 2017. A copy of the sites (if any were completed) visited can be found in the Appendix.

HVAC Industry

The HVAC industry is arguably still the best, most productive and most engaged channel for recycling mercury containing thermostats. We consider this industry to be HVACR manufacturers, wholesale distributors, and contractors which are intimately involved with the recovery of mercury thermostats. In 2018, TRC took the following actions:

- Continued the Big Man on Planet (BMOP) Competition but renamed the contest to "Banish Mercury Off the Planet".

- Pursued HVAC Educators with a direct mailing. TRC sent to 753 contacts a direct marketing letter encouraging educators to use provided materials to update their curriculum on mercury thermostats. We placed revisions to the apprenticeship and curriculum guides. Trade associations; PAHRA & ACCA worked our informational materials into presentations to the US Department of Labor. TRC's information was also added to the schools that are PAHRA accredited⁵.
 - Of the totals provided, TRC sent 55 contacts in Illinois this mailing.
- TRC followed up its exhibition at the Service World Expo with a follow-up direct mailing to attendees offering to participate in the program. TRC sent to 230 contacts a direct marketing letter encouraging participants of the Service World Expo to sign up for and use the recycling program.
 - Of the totals provided, TRC sent 21 contacts in Illinois this mailing.
- Sent an email to all ACCA members reminding them of their responsibility to inform technicians about recycling. ACCA does not provide a breakout of its members.

⁵ The committee is made up of members of AHRI manufacturers, HARDI distributors, ACCA contractors, CARE educators-instructors, RSES, PHCC contractors, CARE educators and the Association of Career & Technical Educators (ACTE).

Utility Industry

In 2018, TRC continued its refined approach engaging the utility sector, specifically targeted actions toward the utility companies themselves, the installer/implementer, and community action agencies. Each of these audiences have distinct messaging requirements and informational needs. TRC attended a utility-focused webinar which included data on the expansion of energy efficiency policies and the impacts to HVACR replacement programs. As demonstrated in the chart below (Source; DOE website), programs including energy efficiency have been expanding exponentially in recent years. It has been our experience that these programs include thermostat replacements through the use of prescriptive incentive rebate schemes or direct installation programs.

With these learnings in mind, TRC took the following actions:

1. Purchased research on energy efficiency projects geared towards thermostat replacements and rebates/incentives. The goal is to continually use the list, review program offerings and look for ways to increase awareness and direct participation in the recycling program.
2. Directly marketed to 44 community action agencies and NGO's in Illinois and 55 home performance contractors.

3. Published a low-income focused article on Energy Central (invite-only blog site for utility industry participants) which has wide, national, and interactive distribution.
4. Developed marketing collateral for the paying TRC members to include in utility-based RFP's for thermostat replacement programs.

5. Interacted with the following entities during the course of travel for trade shows in which we attended, exhibiting, or spoke at.

Date	Account Name	Description	Who we targeted/Name

Waste Related Sector and Household Hazardous Waste (HHW) Industry

Not unlike the utility industry, TRC spent time with the waste-related sector. These attempts were to gain new collection locations, form better relationships with the audience and raise overall awareness of the TRC program. Because of these learnings, TRC took the following actions:

- Scoured google alerts for new HHW facilities openings or events to target phone call or email outreach to encourage them to use program. There was 1 result in Illinois.
- Sent Earth911.org a copy of our collection location list for cross-promotion on their website.

Advertising and Awareness

SEO

Search Engine Optimization (SEO) is the process whereby a website is optimized through original content and on-site coding tactics so that it appears at the top of “organic searches.” An organic search is one that appears “naturally” in a search engine like Google or Bing. In other words, an organic listing is not ranked through paid search.

Organic traffic to a website is more relevant. Site visitors arriving at a website are typically more engaged with such sites as measured by time spent, pages visited, return visits, etc.

Gillespie Group was engaged to expand TRC’s organic search footprint. Two key measures were identified as a baseline for growth. They are: Data Cube (organic search volume multiplied by click through rate) and page-one organic terms. In January, TRC had a Data Cube score of 130 and only had 15 organic search terms ranked on page one of a Google search.

Through December of 2018, both the Data Cube and Page One Keywords have increased. The Data Cube is now at 1087 and the page-one keywords are at 104.

Two main tactics were deployed to improve TRC's organic search position: Original Content and On-Site Optimization.

Original Content

TRC has added approximately ten (10) units of content to the website per month. A "unit of content" is defined as a page, a blog post, video or other content.

This content has been linked out to TRC's social platforms, providing another path for organic optimization.

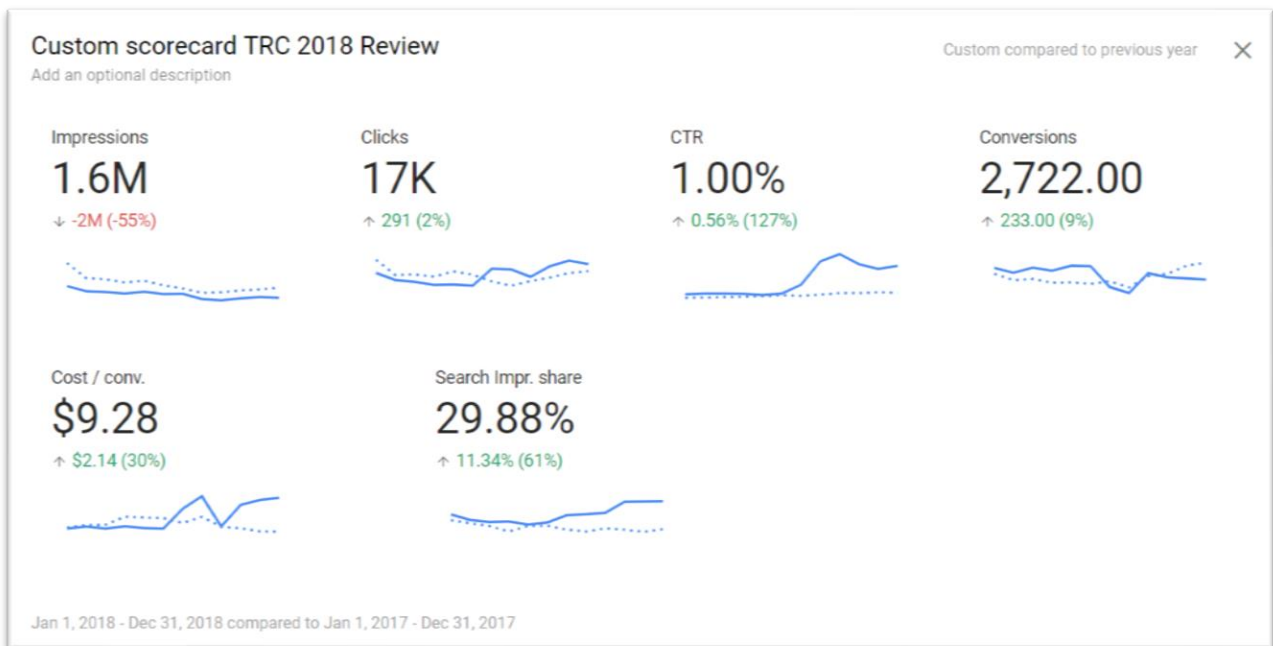

On Site Optimization

TRC has focused on optimizing the site's code and structure. Currently the site is performing very well with minimal site errors and optimized meta and micro data (i.e. alt tags, title tags, meta descriptions, etc.).

Search Engine Marketing

Search Engine Marketing (also SEM or pay per click—PPC) is the process of buying a paid position on the search engine results page. TRC refined its SEM approach this year with positive results.

FAMILY AND SAFETY FIRST!
Customer safety and environmental stewardship is increasingly important for today's utility company. That's why we've partnered with dozens of utility providers throughout the nation to ensure that mercury thermostats are safely collected and properly disposed. Mercury is a human health hazard if it is not disposed of properly. It contaminates the environment and will harm others and wildlife. With the help of utility companies, and thousands of other national partners, we've collected over 2.1 million tons of mercury since 2007.

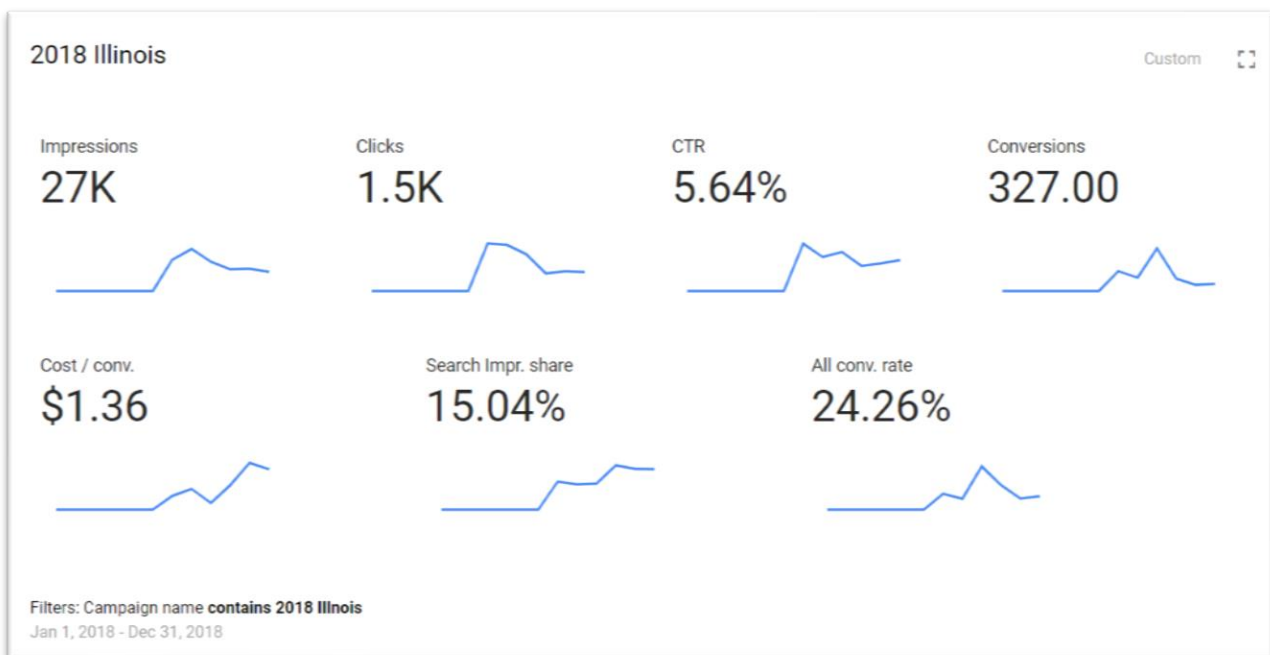

WEATHERIZATION AND GRANTS THROUGH GOVERNMENT AGENCIES
The sales, installation, and disposal of mercury containing thermostats may have been banned in the state that you have received Weatherization Assistance Program (WAP) grants from the Department of Energy. It is important to consider your obligations in informing others and managing the proper recycling of these devices during weatherization projects focused on energy efficiency. There is a strong likelihood that HVAC systems (furnaces, boilers, and heat pumps) are still controlled by non-programmable, non-digital, mercury-containing thermostats. It is also likely that these devices are still in operation within the residences that your programs target. Because of this, you should consider the following recommendations.

Participate directly in the TRC program or require the technicians administering the weatherization grants to do so and update your field guides with information related to mercury thermostat regulations. The National Renewable Energy Laboratory (NREL) has listed under the Standard Work Specifications (SWS) tool via its website, information related to mercury thermostat assessment and handling. The standard 5.3104.b Controls - Thermostat Replacement describes details on how to handle thermostats containing mercury. It is important that sub-grantee recipients know that workers and occupants can and will be protected from improper disposal or handling of these devices. The custody of control is limited to universal waste generators. But, the moral obligation to communicate responsibilities to hired technicians remains within your control.

OUR BINS AND PAILS
Thermostat Recycling Corporation works with retail partners, wholesale companies and municipalities. We provide large and small collection bins. TRC handles the collection and replacement of our bins.

2019 Program Modifications

Thermostat Recycling Corporation's 2019 Goals

TRC continues to set high-level annual goals for the organization. These goals assist in decision making and prioritization of activities. For the calendar year of 2019, TRC plans to focus on:

1. Continuing to fulfill Illinois statutory requirements, agreements and other arrangements for regulatory compliance.
2. Targeting mercury thermostat collections at Utilities. Maintain the HVAC industry collections. Other key audiences vary by requirements.
3. Focusing on education and awareness tactics geared toward tech schools, post-secondary and technical reference manuals placements.

Thermostat Recycling Corporation's Planned Tasks

In addition to the above goals, TRC will set specific tasks to focus on. Completion of these tasks' aid in the overall organization's goals.

1. Promote the program using the 2018 Illinois Register, Volume 42, Issue 52 version of the amended regulations. Section 190.135 of the regulations is included in the Appendix.
2. Look for opportunities to switch existing collection points to small pails.
3. Audit our processing facility for efficiency gains and consistent recycling container lead times.
4. Attend and integrate learnings from other EPR products after quarterly Executive Director in-person meetings.
5. Roll-out public releases throughout the year (blogs, press releases, and articles).
6. Continue the program's operational activities such as outbound phone calls, mailing reminder postcards, and visiting sites. Use collection data trends and available tools to target these initiatives.
7. Attend the list of 2019 events such as trade shows and conferences. Look for speaking opportunities at attended events.

HOW MERCURY THERMOSTAT WASTE IS HANDLED

WASTE MERCURY-ADDED THERMOSTAT MANAGEMENT THROUGH VEOLIA ES TECHNICAL SOLUTIONS, LLC.

Beginning December 19, 2016, bins with waste mercury-switch thermostats were received at a new fulfillment/inventory center in Port Washington, Wisconsin (WIR000130591). The facility is owned and operated by Veolia ES Technical Solutions, L.L.C. (Veolia) under contract with TRC.

All recycling containers, including pails and bins are received at the loading dock and sent to the TRC inventory area. The bin and plastic liner are opened and the contents are identified, sorted, and tallied. The following data is recorded for each bin returned and processed: bin number, business name (location name), city, state, zip code, date returned, number of thermostats and mercury switches by manufacturer and any non-conforming material.

The containers are returned to the location that sent it in with a new prepaid address label within 72 hours of receipt. The thermostats are stored and staged in a plastic lined carton in a storage area for final processing. The containers are dated and processed in order received, first in-first out.

The thermostats and any loose bulb collected from the bins are consolidated into a special 55-gallon drum which is labeled and dated according to regulations. The drum is sealed with a band and is only opened when contents are being added to it. Special negative pressure venting assures any fumes are captured and vented when the drum is opened.

The 55-gallon drum is then shipped to Veolia's mercury recovery facility (WID988566543) for final processing of the mercury ampoules (switches) Veolia Environmental Services meets or exceeds all local, state, federal and EPA regulations for the management of the product.

The containers are returned from the storage area to the mercury recovery processing area to have the mercury bulbs removed from the plastic housing. Universal Waste Regulations require the recycling and disposal of waste within 12 months of acceptance at the processing facility.

Small quantities of thermostats are removed from the container, which is then closed again, a spillage. The bulbs are removed from the thermostats and placed into processing vessel at the work station. Once the processing vessel is full, the vessel is loaded into the mercury recovery retort oven.

If a bulb breaks and the mercury spills, the work area is designed to contain the spillage and the operators are trained in the clean-up and disposal of mercury. The TRC inventory

and processing areas are equipped with special mercury vacuum cleaners and the work area is vacuumed at the end of the work day to assure that any spillage is cleaned up and not left to evaporate.

Veolia meets or exceeds all local, state, federal and EPA regulations for the management of the product. The mercury recovery facility and process are permitted by the Wisconsin Department of Natural Resources. Veolia's approvals for mercury recovery/recycling include:

- EPA - identification WID988566543
- Hazardous Waste Storage License #6008
- Hazardous Waste Treatment License (Mercury Recovery Operations) #4585
- Air Operation Permit #246076050-S01
- Storm Water General Permit #WI-S067857-4

In addition to the regulatory permits, both Veolia Port Washington facilities have developed and maintains management systems in accordance with ISO 14001-2004, OHSAS 18001-2007, and Responsible Recycling (R2:2013) Practice. All persons who handle mercury thermostats as part of the TRC operation receive training in the handling of Hazardous Waste and Universal Waste.

The mercury containing ampules are retorted at Veolia's Port Washington Mineral Springs facility. The mercury is removed during the retort process. The post retort debris consists of broken glass ampules. The debris is tested for residual mercury to document the removal of the mercury to levels below the US EPA Land Disposal Restriction (LDR) levels. The debris is then disposal of as a non-hazardous solid waste at Advanced Disposal Glacier Ridge Landfill, LLC in Horicon, Wisconsin.

A site evaluation of the Veolia Processing Center in Port Washington, WI was conducted by TRC staffer, Danielle Myers, in early October 2017. From this audit, a new design flow for processing bins was discovered, as well as more efficient ways to return bins back to participating facilities and contractors. Updates to packaging instructions were also a result, and will include new marketing collateral, incentives, and small pails.

COLLECTION OF OUT-OF-SERVICE MERCURY THERMOSTATS

Section	
190.100	Purpose
190.110	Applicability
190.120	Definitions
190.130	Annual Collection Goals
190.135	Narrative Collection Program Goals
190.140	Severability

AUTHORITY: Implementing and authorized by Section 25(c) of the Mercury Thermostat Collection Act [415 ILCS 98/25(c)].

SOURCE: Old Part repealed at 22 Ill. Reg. 14327, effective July 15, 1998; new Part adopted at 38 Ill. Reg. 22635, effective November 20, 2014; amended at 42 Ill. Reg. 24897, effective December 11, 2018.

Section 190.120 Definitions

Except as stated in this Section, or unless a different meaning of a word or term is clear from the context, the definitions of words or terms in this Part ~~will~~[shall](#) be the same as those applied to the same words or terms in the Mercury Thermostat Collection Act.

"Act" means the Mercury Thermostat Collection Act~~;~~ [415 ILCS 98].

"Agency" means *the Illinois Environmental Protection Agency*. [415 ILCS 98/10]

["Collection location" means a permanent or temporary physical location at which mercury thermostats are collected for transportation, recycling, and disposal as part of a collection program.](#)

"Collection program" means *a system for collection, transportation, recycling, and disposal of out-of-service mercury thermostats that is financed and managed*

NOTICE OF ADOPTED AMENDMENTS

or provided by a thermostat manufacturer individually or collectively with other thermostat manufacturers in accordance with the Act. [415 ILCS 98/10]

"Contractor" means a person engaged in the business of installation, service, or removal of heating, ventilation and air-conditioning components. [415 ILCS 98/10]

"Mercury thermostat" means a product or device that uses a mercury switch to sense and control room temperature through communication with heating, ventilating, or air conditioning equipment, including those products or devices used to sense and control room temperature in residential, commercial, industrial, and other buildings. "Mercury thermostat" does not mean thermostats used to sense and control temperature as part of a manufacturing or industrial process. [415 ILCS 5/22.23b(f)]

"Out-of-service mercury thermostat" means a mercury thermostat that is removed, replaced, or otherwise taken out of service. [415 ILCS 98/10]

"Person" means any individual, partnership, co-partnership, firm, company, limited liability company, corporation, association, joint stock company, trust, estate, political subdivision, State agency, or any other legal entity or its legal representatives, agents, or assigns. [415 ILCS 98/10]

"Thermostat manufacturer" means a person who owns or owned a name brand of one or more mercury thermostats sold in Illinois. [415 ILCS 98/10]

"Thermostat retailer" means a person who sells in Illinois thermostats of any kind primarily to homeowners or other nonprofessionals through any sale or distribution mechanism. A thermostat retailer that meets the definition of thermostat wholesaler will be considered a thermostat wholesaler. [415 ILCS 98/10]

"Thermostat wholesaler" means a person who is engaged in the distribution and wholesale selling of heating, ventilation, and air-conditioning components, including, but not limited to, thermostats, to contractors, and whose total wholesale sales account for 80% or more of its total sales. A thermostat manufacturer, as defined in this Section, is not a thermostat wholesaler. [415 ILCS 98/10]

NOTICE OF ADOPTED AMENDMENTS

(Source: Amended at 42 Ill. Reg. 24897, effective December 11, 2018)

Section 190.130 Annual Collection Goals

- a) Collection programs required under the Act ~~must~~shall be designed to collectively achieve the following annual statewide collection goals:

- 1) Compliance with the Collection Program Goals set forth in Section 190.135; and
- 2) The collection of no fewer than the number of out-of-service mercury thermostats, as follows:

Calendar Year	Mercury Thermostats Taken Out of Service
2015	22,500
2016	25,000
2017	30,000
2018	7,000 <u>32,500</u>
2019	6,000 <u>37,500</u>
2020	5,000 <u>40,000</u>

- b) Failure to Achieve Annual Collection Goals in Calendar Year 2015 or 2017

- 1) *If the collection programs do not collectively achieve the collection goals provided for in this Part for calendar year 2015 or 2017, thermostat manufacturers shall, individually or collectively, submit to the Agency for review and approval proposed revisions to the collection programs that are designed to achieve the goals in subsequent calendar years. The proposed revisions shall be submitted to the Agency with the annual report required in Section 20 of the Act. [415 ILCS 98/15(c)]*
- 2) *If the Agency determines the revised collection programs will not collectively achieve the collection goals set forth in this Part, the Agency may require modifications to one or more collection programs that the Agency determines are necessary to achieve the collection goals. Modifications required by the Agency may include improvements to outreach and education conducted under the collection program,*

ILLINOIS ENVIRONMENTAL PROTECTION AGENCY

NOTICE OF ADOPTED AMENDMENTS

expansion of the number and location of collection sites established under the program, modification of the roles of participants, and a \$5 financial incentive in the form of either cash or a coupon offered by the manufacturer to contractors and consumers for each out-of-service mercury thermostat returned to a collection site. [415 ILCS 98/15(d)(2)]

- c) *Any person adversely affected by a goal established by subsection (a) may obtain a determination of the validity or application of the goal by filing a petition for review on or before January 9, 2015. Any appeal must be filed in with the Appellate Court for the District in which the cause of action arose. During the pendency of the review, the goal under review shall remain in effect. [415 ILCS 98/25(d)]*
- d) *No later than April 1, 2016 and no later than April 1 of each year thereafter, each thermostat manufacturer shall, individually or collectively with other thermostat manufacturers, submit an annual report on its collection program to the Agency covering the one-year period ending December 31 of the previous year, to be posted on the manufacturer's website in accordance with Section 20(b) of the Act. [415 ILCS 98/2025(b)]*

Section 190.135 Narrative Collection Program Goals

- a) Collection Program Goals
 - 1) Each collection program must maintain at least 525 collection locations statewide, or 20% more collection locations statewide than were maintained during the previous calendar year, whichever is less.
 - 2) Each collection program must engage in outreach to its collection locations, as follows:
 - A) Biannual in-person on-site outreach, by a collection program representative, to any collection location in its collection program that returned 20 or fewer mercury thermostats during either of the previous two calendar years.

ILLINOIS ENVIRONMENTAL PROTECTION AGENCY

NOTICE OF ADOPTED AMENDMENTS

- B) Quarterly telephonic outreach to any collection location in its collection program that returned 40 or fewer mercury thermostats during the previous calendar year.
 - C) Quarterly electronic outreach to all collection locations in its collection program.
- 3) Each collection program must include outreach campaigns targeting additional potential program participants.
 - A) Each of the following categories of persons must be the target of at least two outreach campaigns:
 - i) Thermostat wholesalers;
 - ii) Contractors;
 - iii) Thermostat retailers; and
 - iv) Homeowners.
 - B) Each collection program's outreach campaigns must include, at a minimum, information about its collection program, a description of the environmental benefits of participating in the collection program, and an offer to participate in its collection program.
 - C) Nothing in subsection (a)(3) prohibits any collection program from individually or collectively conducting additional outreach campaigns that target other audiences.
- b) Each collection program must demonstrate compliance with this Section in its annual reporting that includes the number of thermostats collected pursuant to Section 190.130(d).
- c) Compliance with the Collection Program Goals set forth in subsection (a) will constitute satisfaction of the collection goals established by the Agency in accordance with Section 25(c) of the Act and this Part.
