WE SHARE THE GOOD NEWS – 2019 WAS ANOTHER POSITIVE YEAR

As the 2019 annual reports are being written, it is important to reflect on how much activity the program encompassed in the last year. TRC began to streamline its vendors in the process of relocating our headquarters to New York, NY. The program continued to work in new and interesting ways to keep collecting mercury-containing thermostats. The TRC program which operates in 48 states captured 134,022 across the entire country. However, despite the continued robust programs and outreach efforts, TRC continues to see a decline in California participation. The amount of mercury collected in California in 2019 was a 2% decrease from the amount collected in 2018.

Data shows that the replacement of HVACR equipment continues to be the leading channel by which mercury thermostats are replaced. The accelerated adoption of “smart-home” controls and the array of utility programs which encourage early thermostat replacements have also been major drivers of collections. Looking ahead, TRC anticipates that the program will continue to fulfill state statutory requirements, agreements and other arrangements for operating a collection program to satisfy regulatory and legislative compliance.

However, in California the actual collections are consistently far below the targets set which indicates that the targets for collection in California are unrealistic. TRC will continue to target mercury thermostat collections at utility energy efficiency programs while simultaneously maintaining the HVAC industry collections and trying to build collections from other participant groups. TRC continues to work with its partners in industry, the energy sector, its pilot program partners and the regulatory community to achieve positive results, and will continue its robust collection efforts and outreach efforts. Despite these robust efforts, and the placement of additional collection bins throughout California, the collection bins continue to have fewer thermostats for processing. And, this is to be expected; as mercury thermostats are successfully collected, there are fewer and fewer available for collection.

The message around the importance of properly disposing of mercury-containing devices is really an old message, and it's hard to keep an old message fresh. Our goal is to maintain awareness of the issue without becoming "white" noise, which is the challenge any recycler faces. This will be accomplished through innovative marketing and creative delivery platforms.

In the energy space, TRC continues to pursue the utility stakeholders on the importance of collecting mercury-containing thermostats while developing, deploying and incentivizing thermostat replacement programs. Our efforts continue to demonstrate our intent and commitment while offering suggestions related to future incentive practices. However, in California these efforts, combined with the targeted pilot outreach programs we have conducted, yielded no greater collections. TRC's efforts to actively engage the utilities, despite presentations at utility conferences and meetings with utilities, have not resulted in a greater willingness on the part of the utilities to engage in the collection efforts in any meaningful way.

This year we continued to utilize our Tableau software for enhanced and immediate updates on our results. More and more we are expanding the use of technology and social media to raise TRC's profile on digital platforms in a continued effort to raise awareness of the need to properly collect and dispose of mercury-containing thermostats. Data driven decisions should be key. The charts throughout this report demonstrate the program's noticeable downward trend.

KEY ALLIANCES

For a program such as TRC's to be successful year after year requires the coordinated effort of many parties. TRC is fortunate to have exceptional support from its industry members, collection partners, marketers, allied industries, regulatory agencies and staff. These strategic partnerships allow TRC's effectiveness to grow as it continues to move forward successfully in the collection and disposal of mercury-containing thermostats.

Collectively through TRC, manufacturers have implemented DTSC-approved plans to comply with the applicable law and regulations. While the collections have been robust and TRC's annual programs include all of the components required by the governing statute, the program has not been able to meet the DTSC-created numeric collection targets.

TRC remains a nimble organization focused on finding and recycling every mercury thermostat every time. We are happy to provide you with this year's annual report. Please do not hesitate to contact us with comments or questions.

A handwritten signature in black ink, appearing to read 'R. Vasami', written over a thin horizontal line.

Ralph Vasami
Executive Director

CALIFORNIA

2019 Collections and Evaluation

The following analytical report details the annual program performance for mercury thermostat collection in the state of California in 2019. A few of the program highlights for 2019 are included below:

- **The charts below demonstrate the program's noticeable downward trend. The collection program peaked in California in 2013.** There is an unmistakable downward trend for the average thermostats in the bin over time, even though a greater number of containers are being returned for processing.
- In 2019 the program **collected 175.7 lbs. of mercury** in California, a **2% decrease from 2018**.
- The program collected **14,305 whole thermostats in 2019**. This was a 4% increase over the number of thermostats collected in 2018, although these thermostats contained less mercury ampules than 2018. This modest increase parallels a national increase in mercury collections of 3%. **In 2019, TRC saw a rise in loose switches returned, but a fall in the number of mercury thermostats.**
- Since 2001, the average thermostat count per year in California is 10,778.
- The **number of whole thermostats collected per bin in 2019 was 25 thermostats**, a slight increase from 23 in 2018, but overall reflecting a downward trend of the number of thermostats per bin in California.
- The counties with the most bins and thermostats returned in 2019 were **Los Angeles County (184 bins, 5,550 thermostats), Orange County (53 bins, 1,461 thermostats), and Riverside County (48 bins, 1,238 thermostats)**. These returns parallel our focused efforts on highly populated regions.
- In 2019, 51% of the partner locations returned at least one bin in California, which is the third highest return rate in the United States.
- **A total of 1,283 'Miss You' calls and 747 site visits were placed in 2019** which resulted in a positive relationship between activity and bin returns.
- In addition to 14,305 whole thermostats, **3,563 loose switches were collected, bringing the total number of "thermostat equivalents" returned in 2019 to 16,350**, an increase of 4% from 2018.

Section 1: Program Analytics

Section 1 of this report examines the annual performance of the thermostat collection recycling program in terms of bins, thermostats, and mercury collected as well as the year-over-year progression of the program. On average, the program has collected 140.7 lbs. of mercury and 10,778 whole thermostats per year since 2001. In 2019, the program collected 175.7 lbs. of mercury from 14,305 thermostats and 3,563 loose switches. Figure 1 below displays the total number of bins, the total number of thermostats, and the quantity of mercury collected in California since the beginning of the program.

Figure 1 - Program Performance Over Time

Year	Number Bins	Number Thermostats	Mercury (Lb)
2001	13	182	4.9
2002	14	702	10.5
2003	47	2,395	38.9
2004	55	3,025	36.6
2005	65	3,901	45.9
2006	98	5,110	77.4
2007	112	5,750	83.3
2008	138	7,007	104.8
2009	136	7,441	103.6
2010	227	13,340	185.8
2011	338	18,697	254.8
2012	366	16,353	219.7
2013	534	20,956	265.5
2014	571	20,178	266.9
2015	456	18,260	214.8
2016	392	15,501	184.6
2017	544	17,976	220.3
2018	587	13,710	179.7
2019	577	14,305	175.7
Total	5,270	204,789	2,673.7
Average	277	10,778	140.7

Figure 2 displays the number of bins collected in California since the initiation of the collection program, as well as the total number of bins collected in the U.S. over the same period. The number of bins collected in California has generally increased from 2000 to 2014. In 2017, bin returns increased again, peaking with highest number of bins returned in 2018 with 587 bins. While the program sees greater bin returns each year that does not equate to greater thermostat returns.

Figure 2 - Bins Collected Over Time in California and Nationally

The 175.7 lbs. of mercury collected in California in 2019 was 2% lower than the 179.7 lbs. collected in 2018. This decline can be accounted to a smaller equivalent average in 2019 (detailed in Figure 23). Figure 3 displays the quantity of mercury collected in California over time as well as the annual percent change in California and nationally.

Figure 3 - Quantity (Lb) of Mercury Collected in Program and Annual Changes to California and Nationally

Year	Mercury (Lb)	% Change California	% Change Nationally
2001	4.9		89%
2002	10.5	112%	14%
2003	38.9	271%	11%
2004	36.6	-6%	17%
2005	45.9	25%	11%
2006	77.4	69%	32%
2007	83.3	8%	2%
2008	104.8	26%	16%
2009	103.6	-1%	16%
2010	185.8	79%	26%
2011	254.8	37%	4%
2012	219.7	-14%	-5%
2013	265.5	21%	-5%
2014	266.9	1%	13%
2015	214.8	-20%	-1%
2016	184.6	-14%	-15%
2017	220.3	19%	-7%
2018	179.7	-18%	-42%
2019	175.7	-2%	5%
Average	140.7		

California collected 14,305 thermostats in 2019. This was a modest 4% increase over the number of thermostats collected in 2018, even though the amount of mercury declined. Figure 4 displays the total number of thermostats collected in California and nationally, and Figure 5 shares the underlying data as well as the calculated annual percent change.

Figure 4 - Number of Whole Thermostats Collected Over Time in California and Nationally

Figure 5 - Whole Thermostats Collected in California and Nationally Over Time and Annual Percent Change

Year	Number Thermostats California	% Change California	% Change Nationally
2001	182		
2002	702	286%	27%
2003	2,395	241%	7%
2004	3,025	26%	23%
2005	3,901	29%	8%
2006	5,110	31%	30%
2007	5,750	13%	0%
2008	7,007	22%	19%
2009	7,441	6%	15%
2010	13,340	79%	28%
2011	18,697	40%	0%
2012	16,353	-13%	-5%
2013	20,956	28%	-4%
2014	20,178	-4%	12%
2015	18,260	-10%	-2%
2016	15,501	-15%	-18%
2017	17,976	16%	-3%
2018	13,710	-24%	-11%
2019	14,305	4%	-5%
Average	10,778		

Figure 6 displays the monthly distribution of bins and thermostats collected in California in 2019. The months with the greatest number of thermostats returned were March (2,501 thermostats, 110 bins) and April (2,768 thermostats, 108 bins). The months with the greatest number of bins returned were also March (110 bins) and April (108 bins). Conversely, the months with the least activity in 2019 were May and November.

The highest number of thermostats per bin returned occurred in January and February (40.6 and 40.8 thermostats per bin each month, respectively). These figures tend to support the shoulder season (heating and air conditioning periods) months garner better returns. Figure 7 shows the average number of thermostats per bin returned per month for the year.

Figure 7 - Average Thermostats per Bin Returned per Month for 2019

Figure 8 displays the average number of thermostats returned per bin in California and in the U.S. since the beginning of the California program. Nationally, the number of thermostats per bin has been decreasing annually since 2000. In California a similar pattern is observed, with the exception of a few years. The number of thermostats per bin in 2019 (25 thermostats per bin avg.) increased slightly from 2018 (23 thermostats per bin avg.), which was the lowest to date. The expectation is that the number of thermostats per bin will continue to decline, as we have greater bins distributed but see fewer thermostat returns overall. A lower average in California is the result of visiting every location every year and calling locations that have not shipped in the past 6 months, as required by the program modifications. Therefore, if a bin has one or more thermostats it is prepared for a return shipment. However, typically locations return bins only once a year or when they are full, on the national level.

Figure 9 plots the total bins returned over time along with the average number of thermostats per bin over the same period. In general, the number of bins returned in California increased steadily for the most part from 2001 to 2018. At the same time, thermostats per bin have seen a downward trend. A negative correlation has been identified between the number of bins returned and the number of thermostats per bin.

SECTION 2: Channel Partner Analysis

Section 2 of the report examines the partner locations in more detail. Most thermostats collected in California were through wholesalers (85.7%) with the majority of the remaining thermostats collected by household hazardous waste facilities (6.0%) and contractors (7.6%). Figure 10 shows the distribution of thermostats collected by location type in 2019. Wholesalers continue to collect the majority of mercury thermostats in California, even though TRC pursues all audience types required in the consent order.

The number of bins returned in 2019 increased from 2017 levels across household hazardous waste facilities. Wholesalers returned relatively the same number of bins. Figure 11 displays the change in the number of bins returned by thermostat collection type over time in California. While the program has been greatly expanded in the past ten years, it has not garnered greater thermostat collections.

Figure 11 - Thermostat Bins Returned by Location Type over Time

In 2019, 51% of California locations possessing a collection bin sent back at least one bin for recycling. The distribution is displayed in Figure 12. All locations received a site visit during the year, in which a TRC representative prepares the container for shipping. Those locations that do not return a bin typically do not have any mercury thermostats in their container.

Figure 13 displays the total bins and thermostats returned by county in 2019. An analysis of the top performing counties revealed that Los Angeles County (184 bins, 5,550 thermostats), Orange County (53 bins, 1,461 thermostats), and Riverside County (48 bins, 1,238 thermostats) returned the greatest number of bins and thermostats in 2019.

Figure 13 - Bins Returned and Total Thermostats Returned 2019 by County

	Number Thermostats	Number Bins
Los Angeles	5,550	184
Orange	1,461	53
Riverside	1,238	48
San Diego	1,112	49

TRC partner US Air Conditioning Distributors (USACD) (2,552 thermostats) returned the highest number of thermostats in California in 2019, followed by Johnstone Supply (2,390 thermostats) and Refrigeration Supplies Distributor (RSD) (1,116 thermostats). Apart from these locations, five program partners returned more than 500 thermostats each. Figure 14 displays the top performers in terms of total thermostats returned in 2019, all of whom were HVAC wholesalers.

Figure 14 - Top 10 Performing TRC Partners in California

Figure 15 includes the top performers for 2019, all of whom are HVAC wholesalers, by each of the following categories: total bins returned, total thermostats returned, and average number of thermostats per bin.

Figure 15 - Top 10 Performing Partners by Total Bins, Total Thermostats, and Average Thermostats per Bin

	Number Thermostats	Number Bins	Average Thermostats per Bin
Us Air Conditioning Distributors (USACD)	2,552	66	39
Johnstone Supply	2,390	63	38
Refrigeration Supplies Distributor (RSD)	1,116	47	24
Sigler's	652	17	38
AC Pro	630	20	32
United Refrigeration	563	25	23
Allied Refrigeration	550	19	29
Ferguson	535	21	25
R. E. Michel Co.	476	18	26
Goodman Distribution	407	28	15

TRC conducted several activities in 2019 to increase the number of bins and thermostats returned in California. These activities included site visits and 'miss you' calls to collection locations that may not have returned a bin recently. In 2019, 747 site visits were conducted in California, and a total of 1,283 'miss you' calls were placed. Figure 16 displays the relationship between the number of site visits per month, the bins returned per month, and the number of thermostats (in 100's) returned per month.

Figure 16 - Relationship Between Site Visits and Bins and Thermostats Returned Per Month in 2019

Figure 17 displays the relationship between the number of calls per month, the bins returned per month and the number of thermostats (by 100's) returned per month. Calls were placed in the months of February, March, April, May, June, July, August, September, and December.

Figure 17 - Relationship Between 'Miss You' Calls and Bins and Thermostats Returned per Month in 2019

Figure 18 examines the return rates of four groups (if applicable) – locations that received at least one visit and locations that received both a call and visit. The rate of active participation (which refers to locations that returned at least one bin) in 2019 was 78% for locations that received a visit but only 44% for both visited and called locations.

Figure 18 - Percent Change in Bins and Thermostat Returns for Locations that Received a Visit or Call Over Locations that did not Receive Either

	Visit	Visit and Call
Number of Locations	224	298
Rate of Active Participation*	78%	44%
Bins per Participating Location	1.44	1.30
Thermostats per Participating Location	42	24
Thermostats per Bin	29.24	18.27

* Locations that returned one or more bins during 2019.

SECTION 3: Comparisons to National and Other States' Data

To compare how the California collection partners performed in 2019, the national average for the number of bins returned per location that returned at least one bin was calculated and compared to the California average since 2012. The average number of bins does not include locations that did not return any bins in that year. It should be noted that when making comparisons each state has different regulations, a different mix of housing types, local policies, and incentives that may have a unique impact on returns. Overall, the average number of bins returned per location per year was higher in California than the U.S. average, as shown in Figure 19.

Figure 19 - Average Number of Bins Returned Per Location Per Year

Figure 20 displays the locations in California that returned more than one bin in a given year since 2016, and Figure 21 displays the top 10 partners in the U.S. over the same period in terms of the number of bins returned. On the whole, these partners are returning less thermostats each year.

Figure 22 displays total percentage of locations that actively participated in the program (active participation defined as sending back at least one bin) in 2019, for all the states that mandate thermostat returns reporting as well as the U.S. national average for all states (reporting and non-reporting). In 2019, 51% of the locations in California returned at least one bin compared to a national average of 17%. The highest percentage of locations returning a bin in 2019 amongst states that mandate thermostat returns reporting was Rhode Island (74%).

Figure 23 compares the California and national rates for several analytics. These include: total whole thermostats, bins, and loose switches collected, number of thermostats collected by total locations and per actively participating locations, number of thermostats per bin returned on average, equivalent average, number of mercury thermostat equivalents returned in 2019, and finally percent change in mercury thermostat conversion from 2018 to 2019. The equivalent average is an average of the number of switches in whole thermostats collected in California, and it is used to represent an equivalent number of thermostats from returned loose switches. The thermostat equivalent number includes the total of whole thermostats returned plus the number of thermostats estimated from loose switches. The states displayed are those that mandate thermostat returns reporting and the U.S. average is for all states that return bins (48).

Figure 23 - Comparison of States and US Average Among Several Categories

State	Whole Thermostats	Bins	Loose Switches	Thermostats returned per total # of locations with bins	Average Thermostats per bin	Average Thermostats collected per location that returned at least one bin in 2019	Equivalent Average	Thermostat Equivalents in 2019	% Change over previous year
CA	14,305	577	3,563	19	25	34	1.7424	16,350	4%
CT	1,694	54	1,208	8	31	22	1.3118	2,615	-30%

US Avg	2,792	64	788	14	43	59	1.4153	3,334	-31%

Figure 24 further compares this state and national data by showing how each state ranked in each of these categories, from highest to lowest. California ranks top for thermostat collections and bin returns among the U.S. The states compared are those that mandate thermostat returns reporting and the U.S. average is for all states that return bins (reporting and non-reporting).

Figure 24 - Comparison of States and US Average Among Several Categories, Rankings

	Whole Thermostats	Bins	Loose Switches	Thermostats returned per total # of locations with bins	Average Thermostats per bin	Average Thermostats collected per location that returned at least one bin in 2019	Equivalent Average	Thermostat Equivalents in 2019	% Change over previous year

2019 Collections by Brand

In California, Thermostat Recycling Corporation (TRC) recovered the equivalent of 16,350 mercury thermostats from 14,305 whole mercury thermostats plus 3,563 mercury switches removed from thermostats. A total of 175.7 pounds of mercury was diverted from solid waste. *Please note the explanation of the converted thermostats or thermostat equivalents below.¹ An example of the mercury ampoule is shown below.

As required by the state statute, a table of thermostat brand holders with the corresponding thermostats, count of switches and pounds of mercury recycled is below. It is important to note that there still remain non-members whose thermostats the TRC collection program recycles. They are listed in the table as “Non-Member Brands”. Also, there was a change that affected TRC’s membership.

1. Sears Holdings filed for bankruptcy on October 15, 2018 and is no longer a paying TRC member.

¹ A mercury thermostat contains a variable amount of mercury ampoules or “switches” attached to the subbase of the thermostat. These glass ampoules often times are collected in the recycling container without the intact thermostat attached to them. TRC collects and counts these loose ampoules and recycles them. To derive the converted thermostat or thermostat equivalent, the program takes the following calculations to develop the converted thermostat or thermostat equivalent. First, TRC will count the total whole (intact) thermostats collected in the recycling bins. From these units, there is an intact ampoules count. TRC then takes the intact ampoules divided by the whole (intact) thermostats or otherwise known as the conversion ratio. After the conversion ratio is calculated, TRC will multiple the loose mercury switches by the conversion ratio. Lastly, we add this result to the whole (intact) thermostats to produce the converted thermostats or thermostat equivalents.

2019 Accounting of the Program Expenses

Below is a summary of program expenses for the California collection program in 2019. In 2018, TRC completed the one-year advertising component of the consent order, resulting in an increased spend for marketing and outreach. Therefore, marketing and outreach had a decreased spend in 2019 and TRC staff expenses decreased as a result of staff changes in the first half of 2019. Although TRC's California overall spend decreased in 2019, the program results saw a slight increase. The 2019 program expenses (reported in the annual report) are unaudited and are for management purposes only. Prior to submittal of this annual report, the expenses were reviewed by Kellen Company.

Program Component	2018	2019	Difference
Direct Expense for Marketing & Outreach	\$ 1,371,690.00	\$ 650,980.89	\$ (720,709.11)
Incentive/Promotional Payments	\$ 3,200.00	\$ 5,298.80	\$ 2,098.80
Legal	\$ 65,473.00	\$ 47,275.00	\$ (18,198.00)
New Collection Containers	\$ -	\$ -	\$ -
Recycling Costs	\$ 67,187.00	\$ 72,145.27	\$ 4,958.27
Travel	\$ -	\$ -	\$ -
TRC Staff & Administration	\$ 43,877.00	\$ 15,601.91	\$ (28,275.09)
Total Expenses	\$ 1,551,427.00	\$ 791,301.87	\$ (760,125.13)

2019 Education and Outreach

Direct Marketing (Email, Mail, Other Communications)

Current Collection Locations

Small Pails and Green Bins

In 2019, TRC shipped 55 small pails to collection points around the country. We also shipped 291 new green bins. In comparison, the program shipped 451 new green bins in 2018 and 320 small pails². Collection locations either requested the new pail when they signed up to participate in the program or chose to switch out their bin with a pail due to decreased collections. The large green bins which have been the staple of the program continued to be replenished as they were returned for processing. Because the containers are reused and bar coded, we anticipate that the request for new containers will continue to decrease as the program operates.

- Of the totals provided, TRC shipped 18 new small pails and 51 new large bins in the state.

Collection Location Outbound Phone Calls

Our outbound phone calls have been branded internally as the “Miss You Call” process. These calls promote collection container returns and serve as a reminder to locations that have not received any thermostats. TRC allocates these miss you calls to collection sites that have not returned a container in over a year. These calls are outsourced to the Regus Property Management representatives and Intelligent Office. These calls also serve as a friendly customer service check to see if any of the program materials need to be replenished or if missing containers need to be replaced. In total, the program called 3,557 current collection locations in 2019.

- Completed 1,283 calls to encourage shipping the recycling container compared to 807 a year prior. These calls are made to locations that have not returned a bin in the past 6 months, and are made year round. A copy of the sites called can be found in the Appendix.

Collection Location Postcards

TRC updated the reminder postcard design in 2019 to encourage locations to heed the message. The postcards are sent to all locations that have not returned a container in the past year. In 2019, TRC

² New bin orders coincide with accounts that open new stores, move or lose their existing containers.

mailed 14,145 postcards. By updating the look of these postcards, TRC hopes to engage locations that were used to the old design and may have disregarded it in the past.

- Mailed 1,899 reminder postcards compared to 1,516 a year prior.

Collection Location Emails

TRC emailed locations three weeks after receiving a postcard to encourage them to directly ship the recycling container. These emails contain step-by-step instructions for shipping and direct contact information for missing shipping labels or further questions.

- Emailed 759 collection locations three weeks after receiving the reminder postcard to ship their container.

Collection Location Site Visits

Throughout the year, 1,797 site visits were completed in numerous states. The purpose of site visits is to inform the location of their requirements in participation, what the statute requires of them, shipment of the recycling container, and to answer any questions they may have. Often times, valuable information is gathered during the site visit which is used to enhance TRC's outreach and update the database with current contact details.

- Visited 747 collection locations compared to 814 in 2018. TRC is required to visit all collection locations in California. A copy of the sites visited can be found in the Appendix.

HVAC Industry

The HVAC industry is arguably still the best, most productive and most engaged channel for recycling mercury containing thermostats. We consider this industry to be the manufacturers, wholesale distributors, and contractors which are intimately involved with the recovery of mercury thermostats. However, even though this sector collects the largest amount of mercury thermostats in the program, they tell they continue to see fewer and fewer mercury thermostats. TRC took the following actions:

- Continued the “Banish Mercury Off the Planet” (BMOP) Competition encouraging all HARDI wholesalers to compete through collections. Included direct marketing to 258 HVAC wholesale headquarter locations.

- HVAC Educators direct marketing. We sent 691 emails encouraging educators to use materials provided by TRC to update their curriculum on mercury thermostats. TRC created new brochures and posters (depicted below) directly targeted at HVAC technicians in training. These brochures were made available to institutions and trade schools for current and interested HVAC students.
- Completed 1,511 calls to contractors to inform them of the program and available incentives and if interested, sign up for a collection container. Most contractors feel they do not see mercury thermostats anymore, and therefore do not want to sign up for a recycling container.
- Exhibited at the Institute of Heating and Air Conditioning Industries, Inc. (IHACI) conference in Pasadena, CA.

FAQs

TRC is a non-profit corporation voluntarily founded by thermostat manufacturers for the purpose of promoting and facilitating the collection and proper disposal of mercury thermostats. TRC now represents 31 manufacturers that historically distributed mercury-containing thermostats in the US.

- What is the purpose of the program?**
The goal of the program is to recycle all mercury-containing thermostats that are taken out of use.
- I'm an HVAC contracting business. Can I direct ship waste mercury thermostats to TRC?**
Yes, HVAC contracting businesses are eligible to participate in the program. Use TRC's "Contractor" order form to sign your business up today.
- What thermostats can be recycled?**
The program accepts all brands of wall-mount mercury-containing thermostats. The thermostat must be whole and not leaking. TRC no longer requires the thermostat cover. Examples of mercury-containing thermostats can be found on our website. TRC does not collect other mercury-containing products.
- What should I do?**
Whenever you replace a mercury-containing thermostat, keep the old one and return it to a participating TRC collection site. Visit thermostat-recycle.org to find a collection site near you.

About Our Company

The Thermostat Recycling Corporation (TRC) is a non-profit (501(c)3) stewardship organization that facilitates and manages the collection and proper disposal of mercury-containing thermostats.

HVAC Technicians: Don't forget to... Recycle THIS.

Mercury & HVAC

As an HVAC technician, you may encounter a mercury thermostat when replacing or repairing a system in an older home/building. It is important to know the proper removal and disposal of a mercury-containing thermostat as to not endanger yourself or others. Numerous states require HVAC contractors to recycle mercury-containing thermostats, as they are the individual removing it from the wall. Failure to do so could result in a fine.

Mercury

Mercury is a bio-toxin commonly found in older thermostats, among many other items. Mercury was used in thermostats to control home and commercial building temperatures until 2007. However, this does not mean all mercury thermostats have been replaced.

The Law

At this time, the sale of mercury-containing thermostats is banned. Many states have since banned throwing any mercury-containing thermostat in the trash, and enacted laws to dispose of the thermostat properly. Many states have outright disposal bans and more restrictive requirements.

TRC

Luckily for you, Thermostat Recycling Corporation (TRC) will gladly help you recycle old mercury-containing thermostats. TRC is a non-profit organization founded in 1998 by thermostat manufacturers Honeywell, White-Rodgers and General Electric to promote the safe and proper collection/disposal of old mercury thermostats. We provide bins and pallets to collect thermostats and will help you find the nearest collection site to drop them off at for free.

How to Tell If A Thermostat Contains Mercury

If the thermostat has a lever or dial, chances are it contains mercury. Look for the mercury switch and be sure to properly recycle the thermostat.

Safely Remove and Dispose

Once you've identified whether the thermostat contains mercury, make sure the power to it is cut off. Remove and save the thermostat's cover. Loosen the contact screws while holding the thermostat to the sub-base. Remove from the sub-base. Place the cover back on the thermostat to protect the mercury bulb. Remove the sub-base from the wall. Place in a TRC designated thermostat recycling bin at a collection site found on our website.

Utility Industry

In 2019, TRC continued its refined approach on how to engage the utility sector, specifically targeting actions toward the utility companies themselves, the installer/implementer, and community action agencies. Each of these audiences have distinct messaging requirements and informational needs. Unfortunately, TRC has little leverage over utility companies. Any agreements or partnerships that may become established are subject to be put on hold or delayed by the utility companies, and contacts become unresponsive for long periods of time.

- Completed year-long research project targeting state TRMs for utility programs, focusing on environmental benefits and inclusion of thermostat recycling.
 - TRC plans to use these findings in 2020 to target individual utility programs.
- Sent 614 informational emails on thermostat recycling to the DOE weatherization program.
- Sent 437 informational emails to known utility implementers on the program.
- Released article urging utility organizations to participate in program and emphasized inclusive sustainability messaging.
- Continued outreach to state utilities via email and phone to promote program with residents, offering marketing collateral (tear pads, letters, promotional emails, fliers, posters, bill inserts).

Waste Related Sector and Household Hazardous Waste (HHW) Industry

The waste-related sector remains an important sector for TRC to target individuals and those residents performing DIY thermostat installations. TRC attempted to gain new collection locations, form better relationships with the audience and raise overall awareness of the TRC program. As a result of these learnings, TRC took the following actions:

- Scoured google alerts for new HHW facility openings or events to target phone call or email outreach to encourage them to use program. Sent 62 emails.
- Continued partnering with Earth911 and provided collection location list for cross-pollinating.
- Exhibited at the national North American Hazardous Materials Management Association (NAHMMMA) Conference.

- Organized and promoted 3 HHW collection events in Northern (Santa Clara County), Central (Merced County), and Southern (San Diego County) County.
 - These events were promoted via Google Ads and the creation and distribution of event-specific promotional materials.
- Continued implementing \$10 mail-in-rebate incentive at participating HHW locations

Schools and Universities

As part of the consent order, TRC continued to target schools and universities to participate in the collection program. Many schools and universities report that any replacement of mercury thermostats would be taken care of by a hired contractor. Numerous locations we contacted stated that mercury thermostats had been switched out years ago.

- Began conducting calls to district offices that were planning on wrapping up construction on prop 39 projects.
- Continued offering \$5 per mercury thermostat for direct participation at schools.
- Continued conducting calls to small universities and community colleges that received Prop 39 grants.

Property Managers, Building Departments and Hotels/Motels

Both commercial and residential property managers, as well as building departments and hotels/motels have proven a tough sector to connect with. TRC continues to pursue these sectors based on the consent order, but finds little to no interaction. These audiences report that they do not see mercury thermostats.

- Continued outreach via phone and email to property managers and respective associations, building departments and hotels/motels associations.
- Created universal waste checklist to include mercury thermostats, although partnerships remain disinterested. Previous requirements did not contain direct mention of mercury thermostats from the California Building Standards Commission.
- TRC was unable to place articles in trade publications or association newsletters in 2019, despite numerous attempts.

Retail and Local Hardware Stores

Retailers are an important sector for TRC to target individuals and those residents performing DIY thermostat installations. However, retailers are not required to participate in TRC's program and gaining participation has proven difficult. Large retailers refuse to participate because of a concern for the liability of mercury. Even smaller retailer stores that offer to collect, eventually return the container empty no longer wanting to participate due to lack of collections.

- Visited and or called locations to confirm promotional materials are appropriately placed to best promote the program.
- Continued monetary rebates to recyclers at retail locations. Promotional material depicted below.

Advertising and Awareness

Website

In 2019, TRC worked on expanding its website content. As a result, throughout the year TRC posted "Short Snippets" relating to waste and sustainability in the typical consumer's life. Listed here are the pieces added to our website for visitor's enjoyment this year.

Behavioral Targeted Video

Behavioral targeting is a form of digital advertising where digital ads (static banner or video ads) are served up to people who, through their online search pattern and content consumption, are identified as having an affinity for certain interests or behaviors.

In California, TRC deployed a behaviorally targeted video campaign that reached people in the following categories:

- Recycling/Energy
- Office and Facilities
- Construction and Maintenance

A fourth, broader category was included that targeted people who searched for keywords related to thermostat recycling. The campaign ran from April 1 through September 30. The results of the overall campaign are below.

Search Engine Marketing (SEM)

Search Engine Marketing (also SEM or pay per click—PPC) is the process of buying a paid position on the search engine results page. TRC refined its SEM approach this year with positive results, with a 20% increase in clicks, a 33% increase in impressions and a 22% increase in conversions, according to **Google Adwords Reporting**.

Search Engine Optimization (SEO)

Search Engine Optimization (SEO) is the process whereby a website is optimized through original content and on-site coding tactics to increase its chances of appearing near the top of “organic searches.” An organic search is one that appears “naturally” in a search engine like Google or Bing. In other words, an organic listing is not ranked through paid search.

Organic traffic to a website typically brings visitors who stay longer, and visit more pages, on average.

Two key measures were identified as a baseline for growth. They are:

- Clicks from Search (Organic search volume multiplied by click through rate)
- Page-one organic terms.

In December 2018, TRC had Clicks from Search of 1,087 and 104 organic search terms ranked on page one of a Google search. Through December of 2019, both the Clicks from Search and Page One Keywords have increased. The Clicks from Search is now at 6,427 and the page-one keywords are at 334, according to the **Google Search Console**.

2019 Trended Clicks from Search

2019 Trended Number of Top 10 Ranked Keywords

On Site Optimization

TRC has continued to focus on optimizing the site's code and structure. Site performance as measured by **Google Page Speed Insights** shows the site at a score of 70 out of 100. Google favors sites that deliver content quickly, so speed is important.

A **MOZ Pro Site Audit** was also conducted to determine key metrics for SEO.

2019 Trade Shows, Conferences, and Presentations

Date	Show	Location
January		
14th-16th	AHR Expo	Atlanta, GA
21st-24th	Association Energy Services Professionals Show	San Antonio, TX
31st	High School HVAC Presentation - PSA PHCC Training Center	Aston, PA
February		
4th	High School HVAC Presentation - PSA PHCC Training Center	Aston, PA
6th-7th	Better Buildings by Design Vermont Conference	Burlington, VT
20th-22nd	Midwest Energy Efficiency Alliance Trade Event	Chicago, IL
26th	ACA/NE 2019 Technical Training & Management Conference	Boxboro, MA
March		
3rd-5th	HVAC Excellence Trade Show	Las Vegas, NV
4th-6th	IE3 Show - ACCA National Trade Show	San Antonio, TX
14th	Electric & Gas Industries Association (EGIA) Inspire Event	Valley Forge, PA
April		
1st-4th	Home Performance Coalition Conference	Chicago, IL

15th-18th	Service World Expo	Las Vegas, NV
November		
20th	IHACI Annual Trade Show	Pasadena, CA
December		
7th-10th	Heating, Air Conditioning, Refrigeration Distributors International Annual Conference	New Orleans, LA

An example of our trade show booth is demonstrated below.

2019 Consent Order Activities

On February 10, 2016, the Department of Toxic Substances Control (DTSC) and 25 manufacturers who are members of the TRC came to an agreement to improve out-of-service mercury-added thermostat collections in California by entering into a Consent Order³. The 25 manufacturers represented by TRC who had entered into the Consent Order were as follows: Bard Manufacturing Company, Inc., Burnham Holdings, Inc., Carrier Corporation, Chromalox, Crane, Climate Master, Inc., Empire Comfort Systems, General Electric Company, Honeywell International Inc, Hunter Fan Company, Invensys, Inc., ITT Corporation, Johnson Controls, Lear Siegler, Lennox International Inc., Lux Products Corporation, The Marley-Wylain Company, Nortek Global HVAC LLC, Sears Holdings, Thomas & Betts Corporation, Trane Residential Systems, Uponor, Inc., Valliant Corporation, W.W. Grainger, Inc., and White-Rodgers.

The Consent Order required the manufacturers to develop an outreach plan and pilot projects plan to increase awareness and incentivize safe disposal of mercury-added thermostats. Four of TRC's members (E.g. Daikin Applied/McQuay International, Goodman Global, Inc., Rheem Manufacturing Company, and TPI Corporation) did not sign onto the order, and a fifth member (PSG Controls, Inc.) went out of business. In 2018, one of the 25 companies, Lear Siegler dissolved their corporation. In 2019, Sears Holdings declared bankruptcy.

In the interest of fulfilling the requirements of the Consent Order and in conjunction with Stephen Groner Associates, TRC worked with DTSC to develop an outreach and pilot plan to heighten collections in the state of California. Once the consent order was active and each plan approved by DTSC, TRC has submitted a total of fourteen quarterly reports. A copy of each quarterly report can be reviewed on our website at https://www.thermostat-recycle.org/resources/media_center/.

2020 Program Modifications

Thermostat Recycling Corporation's 2020 Goals

TRC continues to set high-level annual goals for the organization. These goals assist in decision making and prioritization of activities. For the calendar year 2020, TRC plans to focus on:

- Targeting mercury thermostat collections at Utilities. Maintain the HVAC industry collections. Other key audiences vary by state and requirements.
 - a. In California, TRC will continue to pursue collections from targeted audiences, although these efforts have not yielded additional returns.
- Focusing on education and awareness tactics geared toward tech schools, post-secondary and technical reference manuals.
 - a. In California, continue education in both English and Spanish, while messaging targets family and safety.

Thermostat Recycling Corporation's Planned Tasks

In addition to the above goals, TRC set specific tasks which we plan to focus on. Completion of these tasks aid in the overall organization's goals.

- Attend and integrate learnings from other EPR products after the biannual Product Stewardship in-person meetings.
- Roll-out public releases throughout the year.
- Continue the program's operational activities such as outbound phone calls, mailing reminder postcards, and visiting sites. Use collection data trends to target these initiatives.
- Attend the list of 2020 events such as trade shows and conferences⁴. Look for speaking opportunities at attended events.

Date	Show	Location
February		
3rd-5th	AHR Expo	Orlando, FL
5th-6th	Efficiency Vermont	Burlington, VT
17th-20th	AESP Show	Anaheim, CA
26th-28th	MEEA	Chicago, IL

HOW MERCURY THERMOSTAT WASTE IS HANDLED

WASTE MERCURY-ADDED THERMOSTAT MANAGEMENT THROUGH VEOLIA ES TECHNICAL SOLUTIONS, LLC.

TRC containers with waste mercury-switch thermostats are received at a fulfillment/inventory center in Port Washington, Wisconsin (WIR000130591). The facility is owned and operated by Veolia ES Technical Solutions, L.L.C. (Veolia) under contract with TRC.

All recycling containers, including pails and bins are received at the loading dock and sent to the TRC inventory room. The container and plastic liner are opened and the contents are identified, sorted, and tallied. The following data is recorded for each bin returned and processed: bin number, business name (location name), city, state, zip code, date returned, number of thermostats and mercury switches by manufacturer and any non-conforming material.

The containers are returned to the location that sent it in with a new prepaid address label within 3 weeks of receipt. The thermostats are stored and staged in a plastic lined carton in a storage area for final processing. The containers are dated and processed in order received, first in-first out.

The thermostats and any loose bulbs collected from the containers are consolidated into a special 55-gallon drum which is labeled and dated according to regulations. The drum is sealed with a band and is only opened when contents are being added to it. Special negative pressure venting assures any fumes are captured and vented when the drum is opened.

The 55-gallon drum is then shipped to Veolia's mercury recovery facility (WID988566543) for final processing of the mercury ampules (switches). Veolia Environmental Services meets or exceeds all local, state, federal and EPA regulations for the management of the product.

The containers are returned from the storage area to the mercury recovery processing area to have the mercury bulbs removed from the plastic housing. Universal Waste Regulations require the recycling and disposal of waste within 12 months of acceptance at the processing facility.

Small quantities of thermostats are removed from the container, which is then closed again. The bulbs are removed from the thermostats and placed into processing vessel at the work station. Once the processing vessel is full, the vessel is loaded into the mercury recovery retort oven.

If a bulb breaks and the mercury spills, the work area is designed to contain the spillage and the operators are trained in the clean-up and disposal of mercury. The TRC inventory

and processing areas are equipped with special mercury vacuum cleaners and the work area is vacuumed at the end of the work day to ensure that any spillage is cleaned up and not left to evaporate.

Veolia meets or exceeds all local, state, federal and EPA regulations for the management of the product. The mercury recovery facility and process are permitted by the Wisconsin Department of Natural Resources. Veolia's approvals for mercury recovery/recycling include:

- EPA - identification WID988566543
- Hazardous Waste Storage License #6008
- Hazardous Waste Treatment License (Mercury Recovery Operations) #4585
- Air Operation Permit #246076050-S01
- Storm Water General Permit #WI-S067857-4

In addition to the regulatory permits, both Veolia Port Washington facilities have developed and maintain management systems in accordance with ISO 14001-2004, OHSAS 18001-2007, and Responsible Recycling (R2:2013) Practice. All persons who handle mercury thermostats as part of the TRC operation receive training in the handling of Hazardous Waste and Universal Waste.

The mercury containing ampules are retorted at Veolia's Port Washington Mineral Springs facility. The mercury is removed during the retort process. The post retort debris consists of broken glass ampules. The debris is tested for residual mercury to document the removal of the mercury to levels below the US EPA Land Disposal Restriction (LDR) levels. The debris is then disposal of as a non-hazardous solid waste at Advanced Disposal Glacier Ridge Landfill, LLC in Horicon, Wisconsin.

A site evaluation of the Veolia Processing Center in Port Washington, WI was conducted by TRC's operations and compliance manager, Danielle Myers, in late October 2019. An audit is scheduled to be completed every two years.

Part II Declaration and Signature Authorization of Officer

Under penalties of perjury, I declare that I am an officer of the above organization and that I have examined a copy of the organization's 2018 electronic return and accompanying schedules and statements and to the best of my knowledge and belief, they are true, correct, and complete. I further declare that the amount in Part I above is the amount shown on the copy of the organization's electronic return. I consent to allow my intermediate service provider, transmitter, or electronic return originator (ERO) to send the organization's return to the IRS and to receive from the IRS (a) an acknowledgement of receipt or reason for rejection of the transmission, (b) the reason for any delay in processing the return or refund, and (c) the date of any refund. If applicable, I authorize the U.S. Treasury and its designated Financial Agent to initiate an electronic funds withdrawal (direct debit) entry to the financial institution account indicated in the tax preparation software for payment of the organization's federal taxes owed on this return, and the financial institution to debit the entry to this account. To revoke a payment, I must contact the U.S. Treasury Financial Agent at 1-888-353-4537 no later than 2 business days prior to the payment (settlement) date. I also authorize the financial institutions involved in the processing of the electronic payment of taxes to receive confidential information necessary to answer inquiries and resolve issues related to the payment. I have selected a personal identification number (PIN) as my signature for the organization's electronic return and, if applicable, the organization's consent to electronic funds withdrawal.

Officer's PIN: check one box only

☒ I authorize **BURDETTE SMITH & BISH LLC** to enter my PIN **22314**
ERO firm name Enter five numbers, but do not enter all zeros

as my signature on the organization's tax year 2018 electronically filed return. If I have indicated within this return that a copy of the return is being filed with a state agency(ies) regulating charities as part of the IRS Fed/State program, I also authorize the aforementioned ERO to enter my PIN on the return's disclosure consent screen.

☐ As an officer of the organization, I will enter my PIN as my signature on the organization's tax year 2018 electronically filed return. If I have indicated within this return that a copy of the return is being filed with a state agency(ies) regulating charities as part of the IRS Fed/State program, I will enter my PIN on the return's disclosure consent screen.

Officer's signature ▶ _____ Date ▶ _____

Part III Certification and Authentication

ERO's EFIN/PIN. Enter your six-digit electronic filing identification number (EFIN) followed by your five-digit self-selected PIN.

54409522314

Do not enter all zeros

I certify that the above numeric entry is my PIN, which is my signature on the 2018 electronically filed return for the organization indicated above. I confirm that I am submitting this return in accordance with the requirements of **Pub. 4163**, Modernized e-File (MeF) Information for Authorized IRS e-file Providers for Business Returns.

ERO's signature ▶ _____ Date ▶ _____

ERO Must Retain This Form - See Instructions
Do Not Submit This Form to the IRS Unless Requested To Do So
