Operations and Compliance Manager

WE SHARE THE GOOD NEWS – 2019 WAS ANOTHER POSITIVE YEAR

As the 2019 annual reports are being written, it is important to reflect on how much activity the program encompassed in the last year. The program continued to work in new and interesting ways to keep collecting mercury-containing thermostats. We began to streamline our vendors in the process of relocating our headquarters to New York, NY. TRC remains a nimble organization focused on finding and recycling every mercury thermostat every time.

Data shows that the replacement of HVACR equipment continues to be the leading indicator to mercury thermostat replacement. The accelerated adoption of "smart-home" controls and the array of utility programs which encourage early thermostat replacements have also been major drivers of collections. Looking ahead, TRC anticipates that the program will continue to fulfill state statutory requirements, agreements and other arrangements for regulatory and legislative compliance. But we will continue to target mercury thermostat collections at utility energy efficiency programs while simultaneously maintaining the HVAC industry collections. TRC will continue to work with its partners in industry, the energy sector and the regulatory community to achieve positive results.

TRC MARKETING

The message around the importance of properly disposing of mercury-containing devices is really an old message, and it's hard to keep an old message fresh. Our goal is to maintain awareness of the issue without becoming "white" noise, which is the challenge any recycler faces. This will be accomplished through innovative marketing and creative delivery platforms.

In the energy space, TRC continues to engage the utility stakeholders on the importance of collecting mercury-containing thermostats while developing, deploying and incentivizing thermostat replacement programs. Our efforts continue to demonstrate our intent and commitment while offering suggestions related to future incentive practices.

This year we continued to utilize our Tableau software for enhanced and immediate updates on our results. More and more we are expanding the use of technology and social media to raise TRC's profile on digital platforms in a continued effort to raise awareness of the need to properly collect and dispose of mercury-containing thermostats.

KEY ALLIANCES

For a program such as TRC's to be successful year after year requires the coordinated effort of many parties. TRC is fortunate to have exceptional support from its industry members, collection partners, marketers, allied industries, regulatory agencies and staff. These strategic partnerships allow TRC's effectiveness to grow as it continues to move forward successfully in the collection and disposal of mercury-containing thermostats.

We are happy to provide you with this year's annual report. Please do not hesitate to contact us with comments or questions.

Ralph Vasami

Executive Director

MAINE

2019 Collections and Evaluation

The following analytical report details the annual program performance for mercury thermostat collection in the state of Maine in 2019. A few of the program highlights for 2019 are included below:

- In 2019 the program **collected 29.5 lbs. of mercury** in Maine. Since 2001, the annual quantity of mercury collected in Maine has been an average of 27.12 lbs.
- The program collected **4,397 whole thermostats in 2019**. This was a 46% increase over the number of thermostats collected in 2018. Since 2001, the average thermostat count per year is 3,805.
- The **number of whole thermostats collected per bin in 2019 was 41 thermostats,** an increase from 29 in 2018**.**
- The counties with the most bins and thermostats returned in 2019 were **Cumberland County (33 bins, 1,273 thermostats), Penobscot County (16 bins, 865 thermostats), and Androscoggin County (12 bins, 637 thermostats).**
- In 2019, **41% of the partner locations returned at least one bin**.
- **A total of 97 'Miss You' calls were placed and 143 site visits in 2019** which resulted in a positive relationship of activity to bin returns.
- In addition to 4,397 whole thermostats, **3 loose switches were collected, bringing the total number of "thermostat equivalents" returned in 2019 to 4,400**, an increase of 46% from 2018.

Section 1: Program Analytics

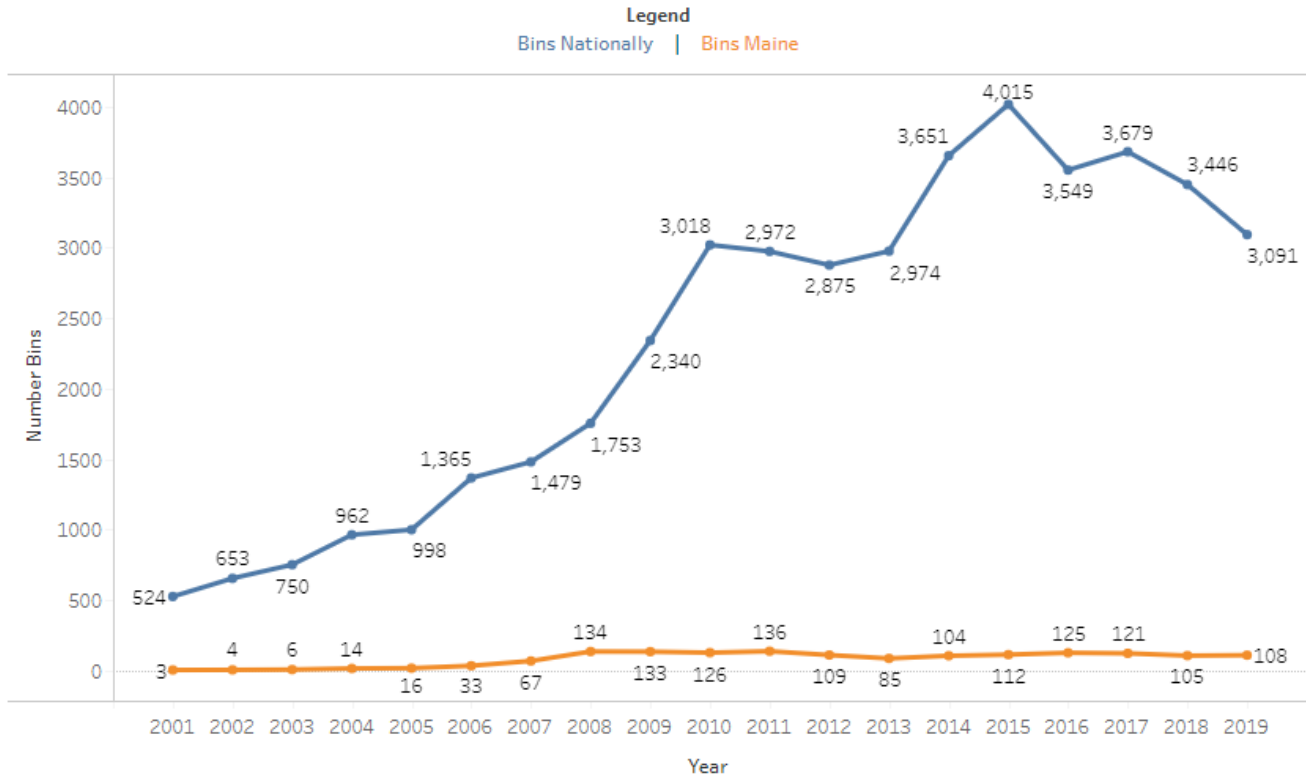
Section 1 of this report examines the annual performance of the thermostat collection recycling program in terms of bins, thermostats, and mercury collected as well as the year-over-year progression of the program. On average, the program has collected 27.2 lbs. of mercury and 3,805 whole thermostats per year since 2001. In 2019, the program collected 29.5 lbs. of mercury from 4,397 thermostats and 3 loose switches. Figure 1 displays the total number of bins, the total number of thermostats, and the quantity of mercury collected in Maine since the beginning of the program.

Figure 1 - Program Performance Over Time

Year	Number Bins	Number Thermostats	Mercury (Lb)
2001	3	233	1.7
2002	4	280	1.9
2003	6	482	4.5
2004	14	1,079	9.8
2005	16	1,492	16.9
2006	33	3,003	22.3
2007	67	4,656	36.9
2008	134	5,555	38.5
2009	133	6,374	44.5
2010	126	6,523	44.9
2011	136	6,616	46.4
2012	109	6,679	46.5
2013	85	4,213	29.5
2014	104	4,341	29.9
2015	112	4,571	32.0
2016	125	4,823	33.6
2017	121	3,956	26.6
2018	105	3,014	20.6
2019	108	4,397	29.5
Total	1,541	72,287	516.5
Average	81	3,805	27.2

Figure 2 displays the number of bins collected in Maine since the initiation of the collection program, as well as the total number of bins collected in the U.S. over the same period. The number of bins collected in Maine has generally increased from 2001 to 2011. In 2014, bin returns increased again, although they had peaked with the highest number of bins returned in 2011 with 136 bins.

Figure 2 - Bins Collected Over Time in Maine and Nationally



The 29.5 lbs. of mercury collected in Maine in 2019 was 43% higher than the 20.6 lbs. collected in 2018. Figure 3 displays the quantity of mercury collected in Maine over time as well as the annual percent change in Maine and nationally.

Figure 3 - Quantity (Lb) of Mercury Collected in Program and Annual Changes to Maine and Nationally

Year	Mercury (Lb)	% Change Maine	% Change Nationally
2001	1.7		89%
2002	1.9	16%	14%
2003	4.5	131%	11%
2004	9.8	119%	17%
2005	16.9	72%	11%
2006	22.3	32%	32%
2007	36.9	66%	2%
2008	38.5	4%	16%
2009	44.5	15%	16%
2010	44.9	1%	26%
2011	46.4	3%	4%
2012	46.5	0%	-5%
2013	29.5	-37%	-5%
2014	29.9	1%	13%
2015	32.0	7%	-1%
2016	33.6	5%	-15%
2017	26.6	-21%	-7%
2018	20.6	-23%	-42%
2019	29.5	43%	5%

Average	27.2

Maine collected 4,397 thermostats in 2019. This was a 46% increase over the number of thermostats collected in 2018. Figure 4 displays the total number of thermostats collected in Maine and nationally, and Figure 5 shares the underlying data as well as the calculated annual percent change.

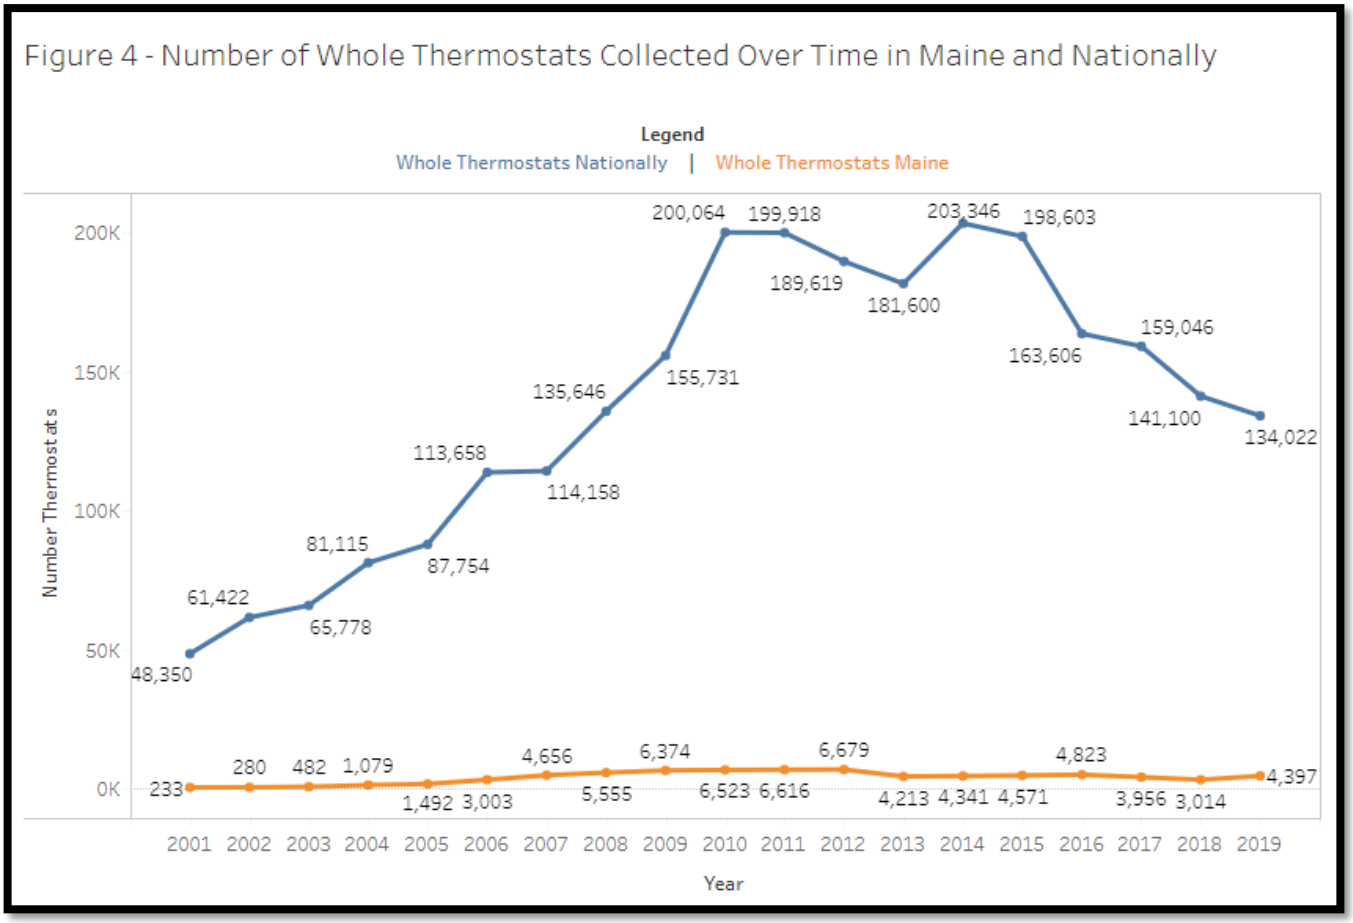


Figure 5 - Whole Thermostats Collected in Maine and Nationally Over Time and Annual Percent Change

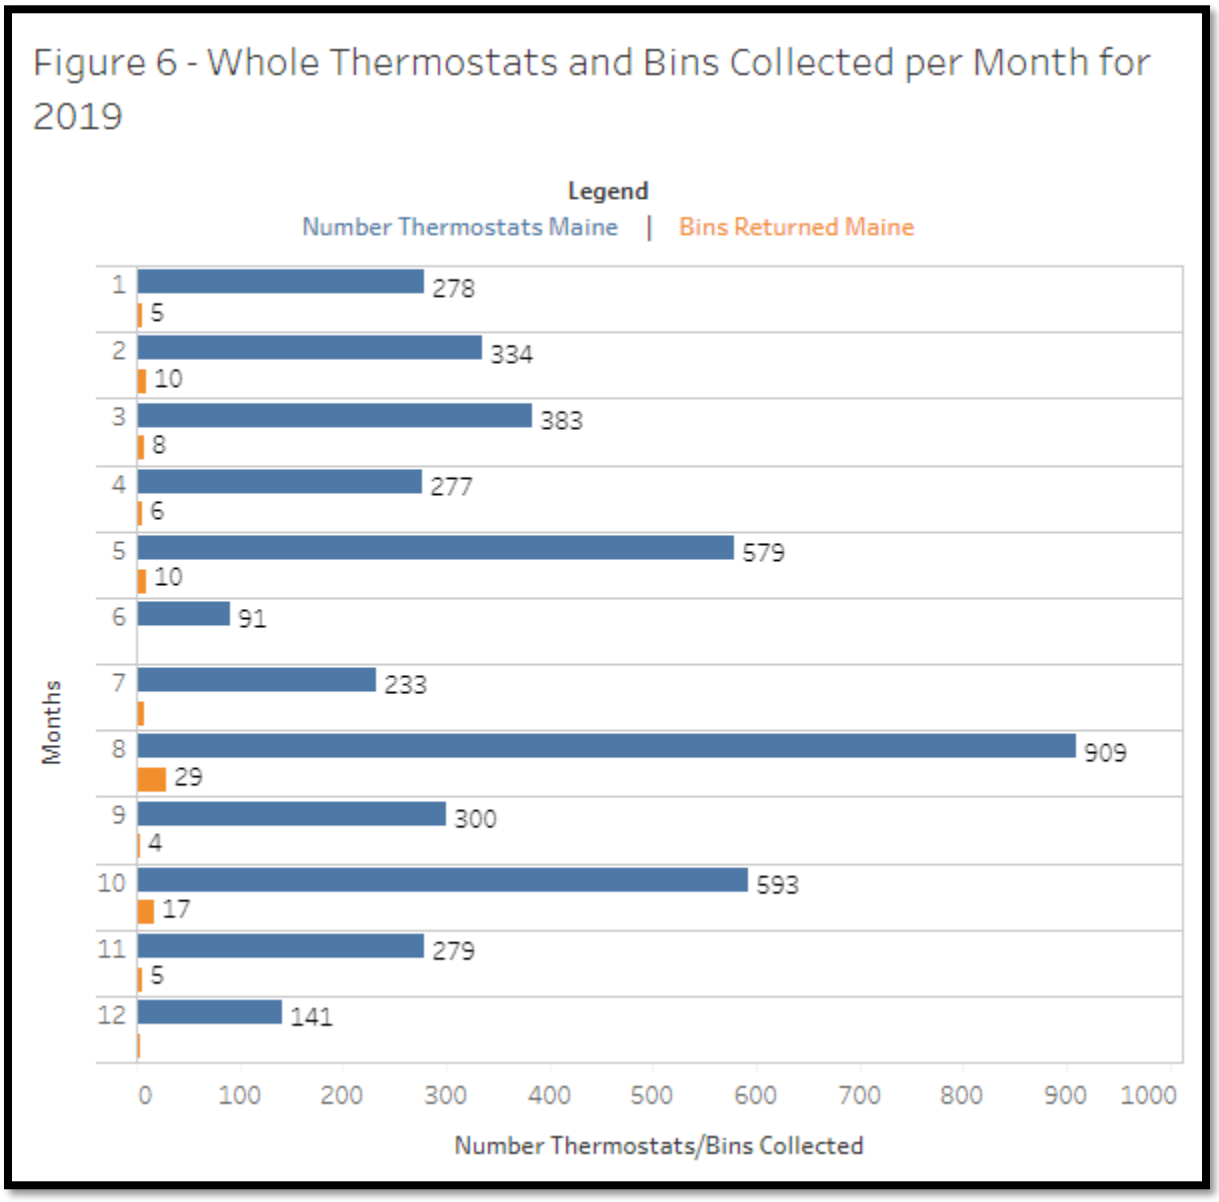
Year	Number Thermostats Maine	% Change Maine	% Change Nationally
2001	233		
2002	280	20%	27%
2003	482	72%	7%
2004	1,079	124%	23%
2005	1,492	38%	8%
2006	3,003	101%	30%
2007	4,656	55%	0%
2008	5,555	19%	19%
2009	6,374	15%	15%
2010	6,523	2%	28%
2011	6,616	1%	0%
2012	6,679	1%	-5%
2013	4,213	-37%	-4%
2014	4,341	3%	12%
2015	4,571	5%	-2%
2016	4,823	6%	-18%
2017	3,956	-18%	-3%
2018	3,014	-24%	-11%
2019	4,397	46%	-5%

Average	3,805

Figure 6 displays the monthly distribution of bins and thermostats collected in Maine in 2019. The months with the greatest number of thermostats returned were August (909 thermostats each, 29 bins) and October (593 thermostats, 17 bins). The months with the greatest number of bins returned were also August (29 bins) and October (17 bins). Conversely, the months with the least activity in 2019 were June and December.



The highest number of thermostats per bin returned occurred in May and September (57.9 and 75.0 thermostats per bin each month, respectively). Figure 7 shows the average number of thermostats per bin returned per month for the year.

Figure 7 - Average Thermostats per Bin Returned per Month for 2019

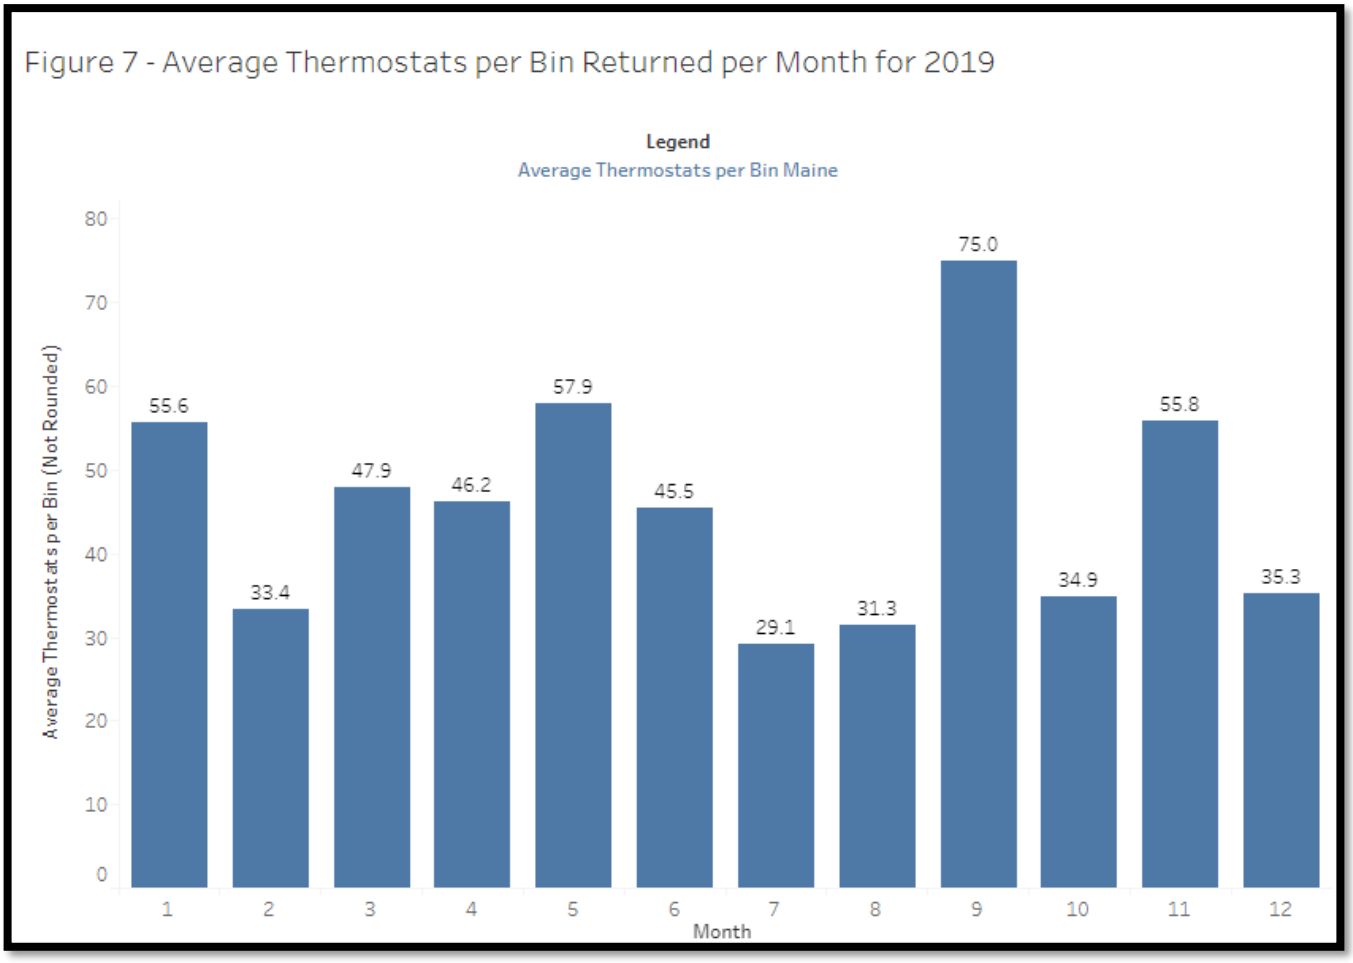


Figure 8 displays the average number of thermostats returned per bin in Maine and in the U.S. since the beginning of the Maine program. Nationally, the number of thermostats per bin has been decreasing annually since 2000. In Maine a similar pattern is observed after 2005, with the exception of a few years. The number of thermostats per bin in 2019 (41 thermostats per bin avg.) increased from 2018 (29 thermostats per bin avg.).

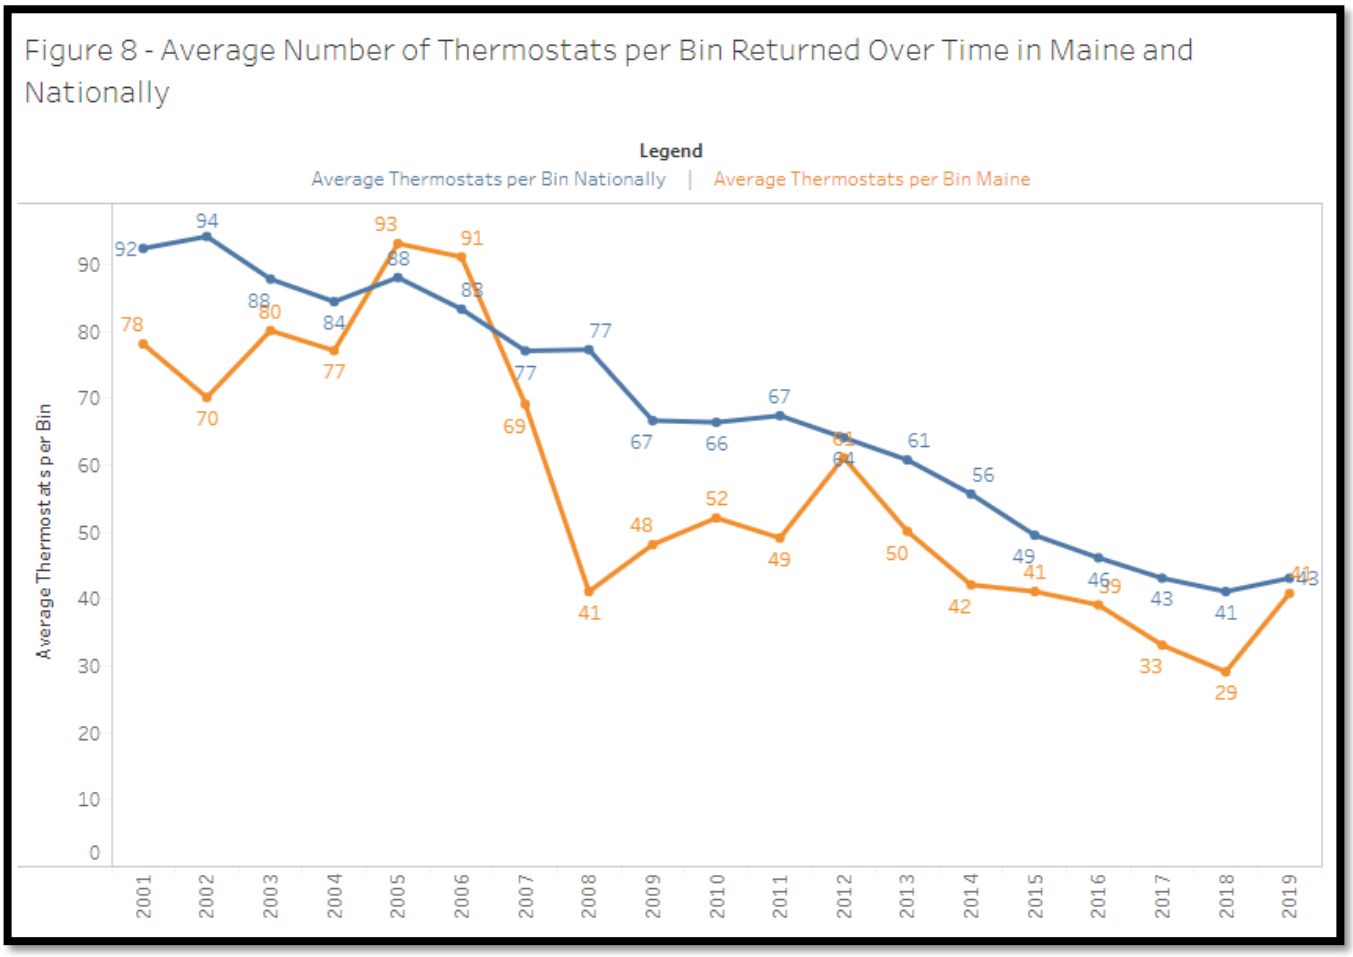

Figure 9 plots the total bins returned over time along with the average number of thermostats per bin over the same period. In general, the number of bins returned in Maine increased steadily from 2001 to 2011 and then again until 2016. A negative correlation has been identified between the number of bins returned and the number of thermostats per bin.

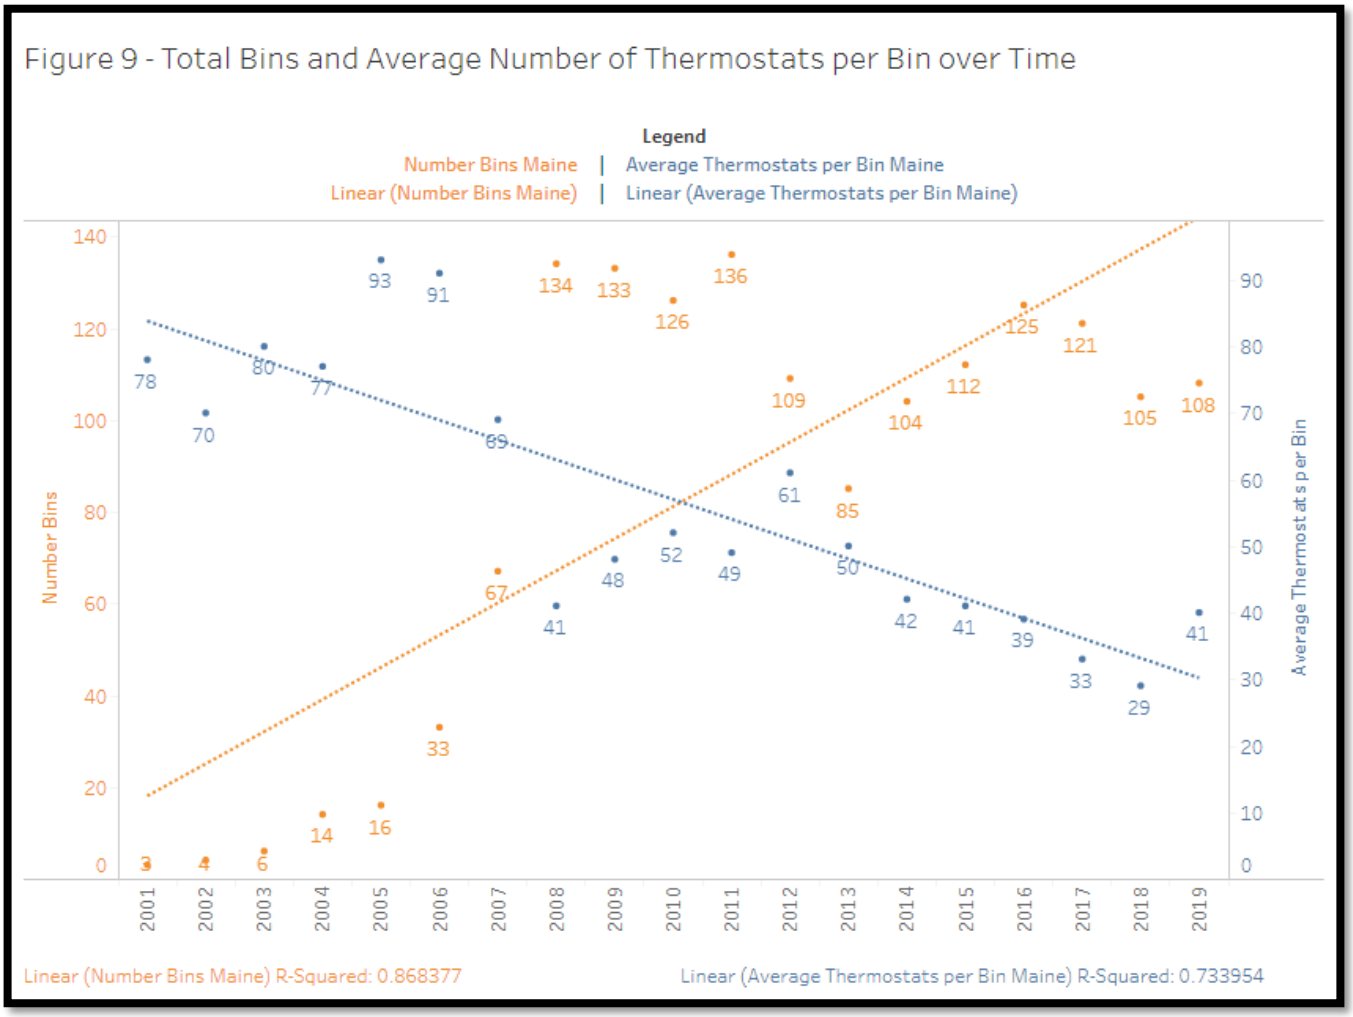
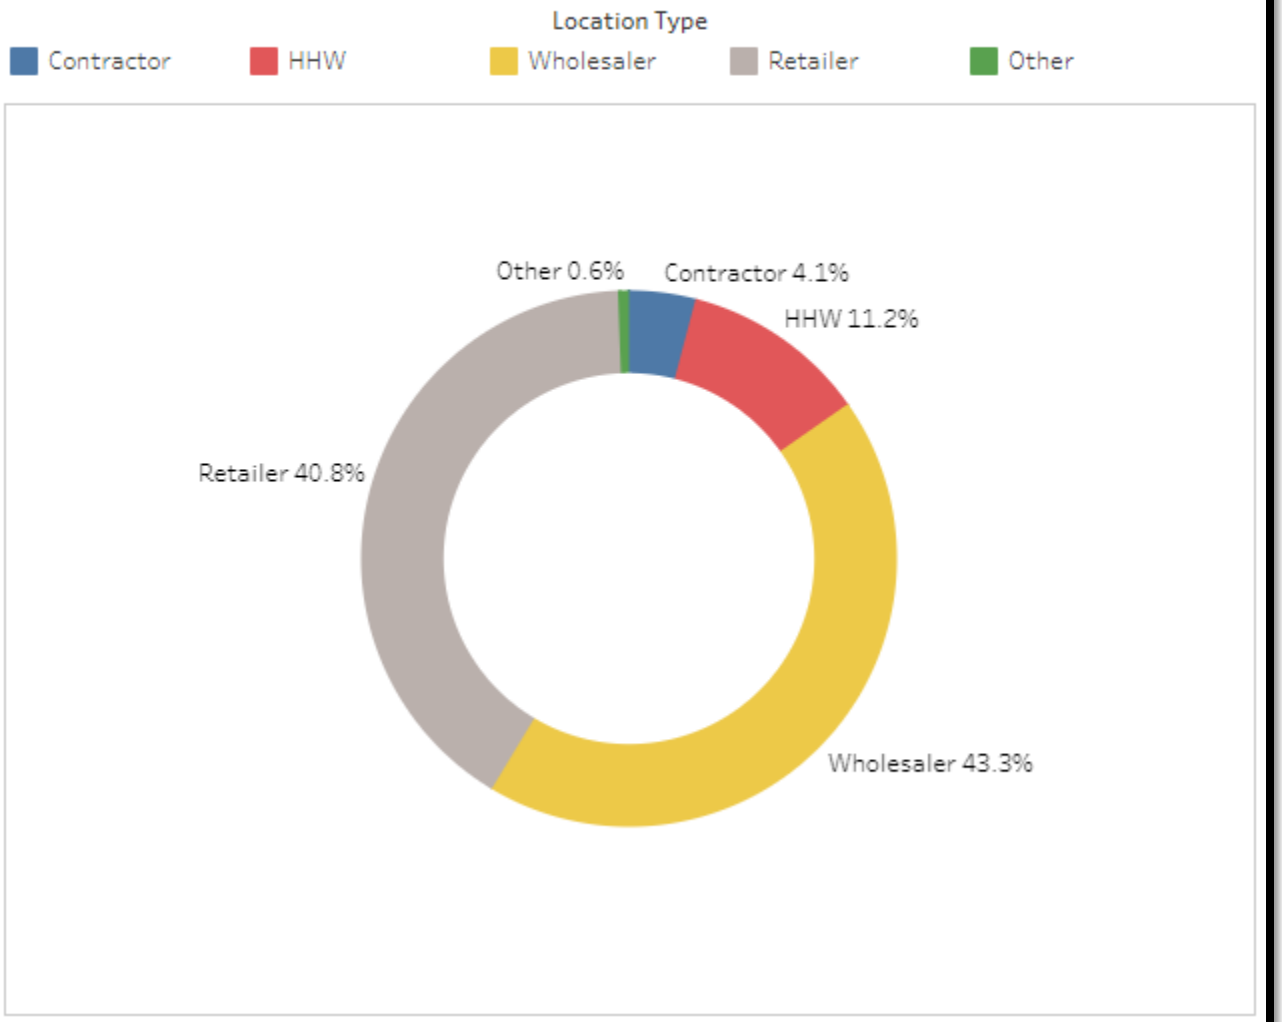


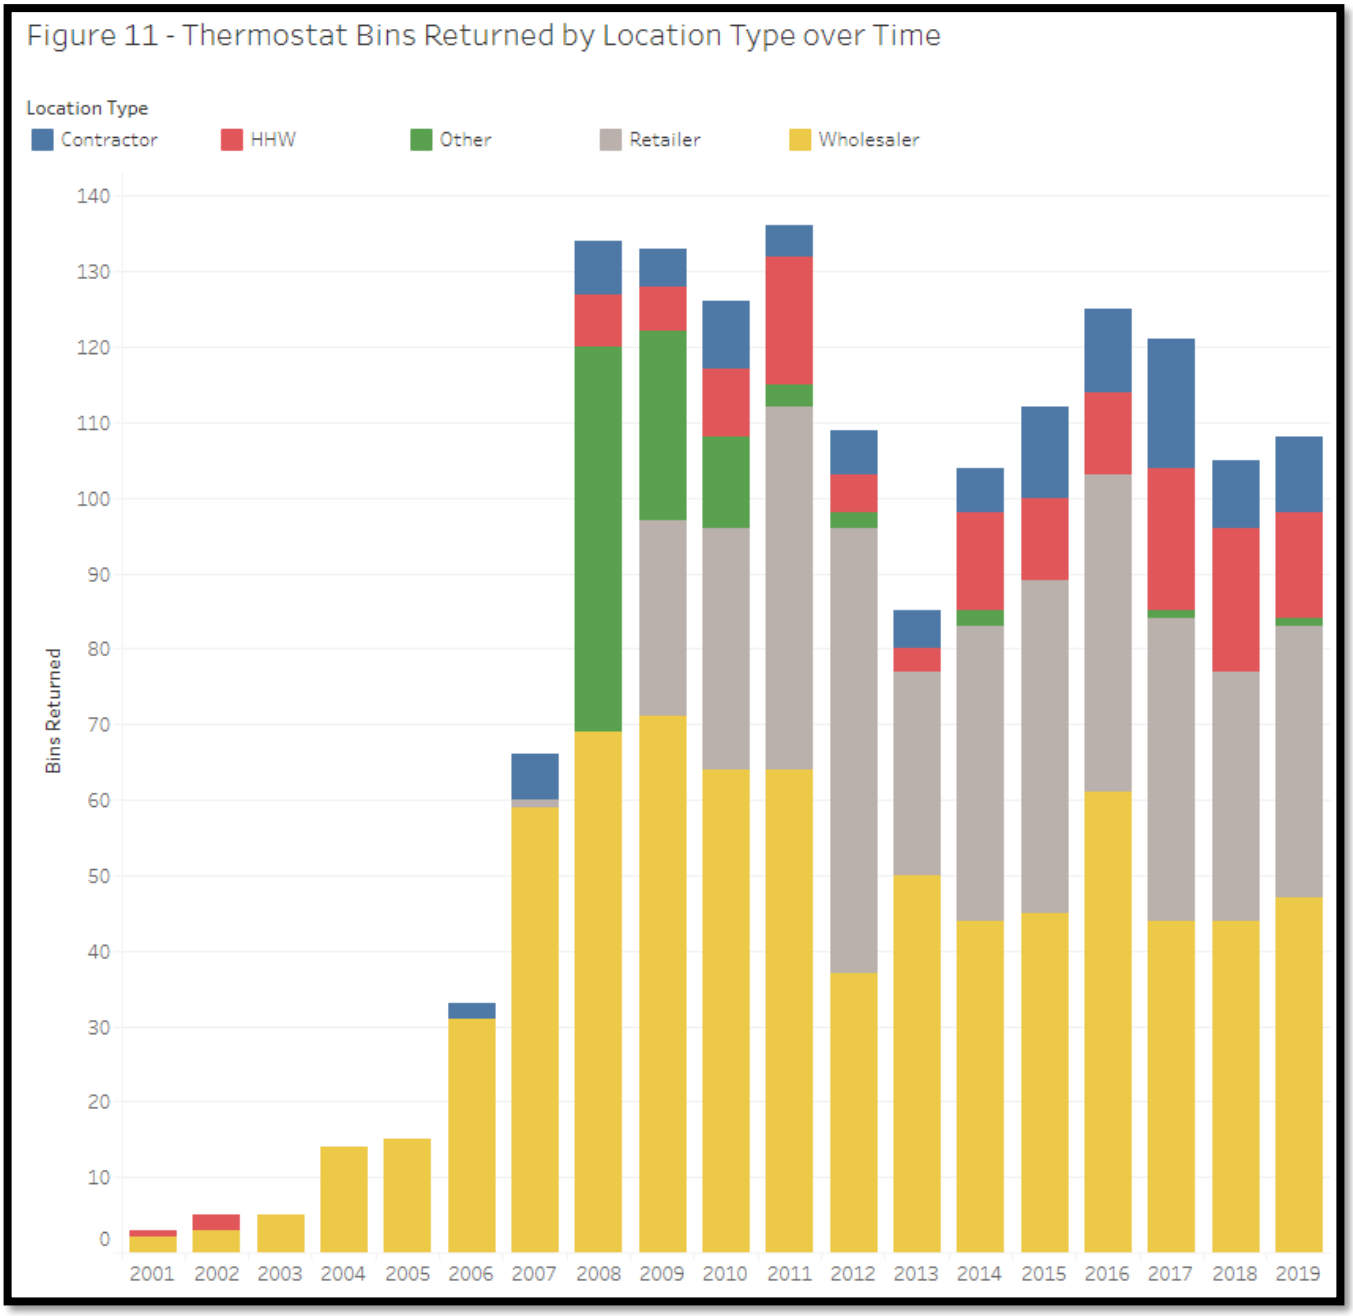
SECTION 2: Channel Partner Analysis

Section 2 of the report examines the partner locations in more detail. The majority of thermostats collected in Maine were through wholesalers (43.3%) and retailers (40.8%). Figure 10 shows the distribution of thermostats collected by location type in 2019.

Figure 10 - Thermostats Collected by Location Type in 2019



The number of bins returned in 2019 increased across wholesalers, retailers and contractors. HHWs decreased slightly. Figure 11 displays the change in the number of bins returned by thermostat collection type over time in Maine.



In 2019, 41% of Maine locations possessing a collection bin sent back at least one bin for recycling. The distribution is displayed in Figure 12.

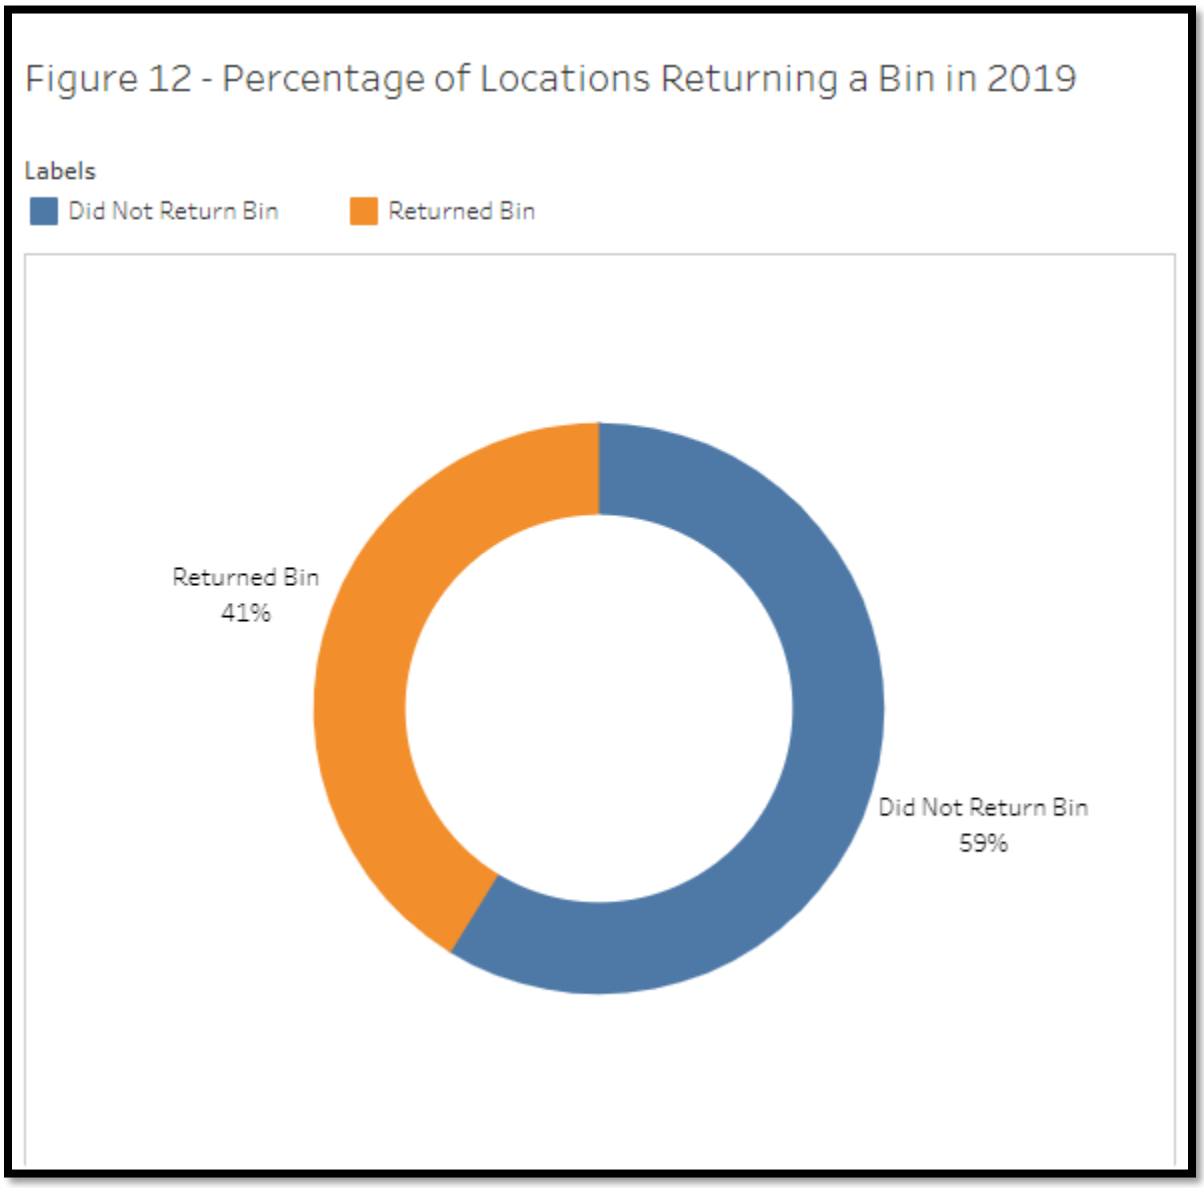


Figure 13 displays the total bins and thermostats returned by county in 2019. An analysis of the top performing counties revealed that Cumberland County (33 bins, 1,273 thermostats), Penobscot County (16 bins, 865 thermostats), and Androscoggin County (12 bins, 637 thermostats) returned the greatest number of bins and thermostats in 2019.

Figure 13 - Bins Returned and Total Thermostats Returned 2019 by County

	Number Thermostats	Number Bins
Cumberland	1,273	33
Penobscot	865	16
Androscoggin	637	12
Kennebec	533	11
York	276	10
Sagadahoc	193	5

Knox	164	3
Hancock	117	3
Lincoln	81	2
Piscataquis	34	2
Franklin	32	2
Oxford	20	2
Washington	7	1

TRC partner Aubuchon Hardware (592 thermostats) returned the highest number of thermostats in Maine in 2019, followed by F.W. Webb (557 thermostats) and Bell Simons (525 thermostats). Apart from these locations, 7 program partners returned more than 100 thermostats each. Figure 14 displays the top performers in terms of total thermostats returned in 2019.

Figure 14 - Top 10 Performing TRC Partners in Maine

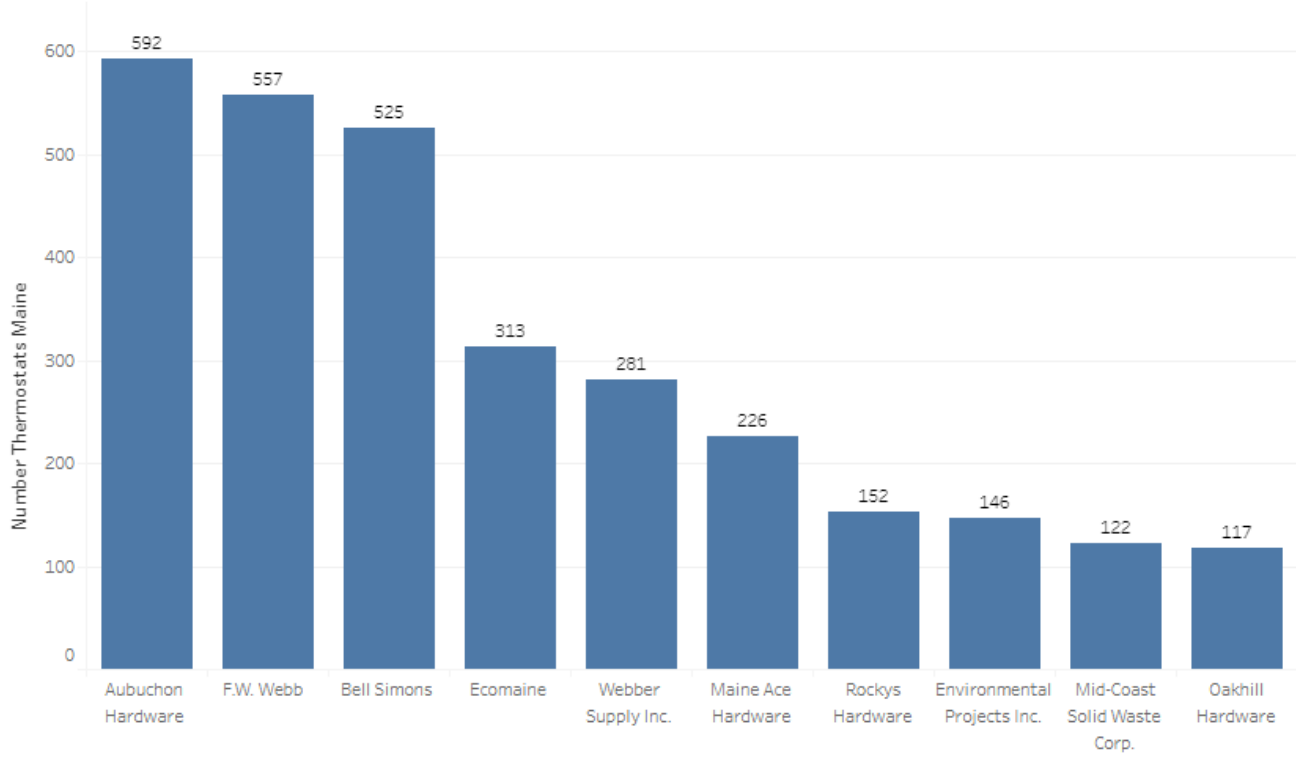

Figure 15 includes the top performers for 2019 by each of the following categories: total bins returned, total thermostats returned, and average number of thermostats per bin.

Figure 15 - Top 10 Performing Partners by Total Bins, Total Thermostats, and Average Thermostats per Bin

	Number Thermostats	Number Bins	Average Thermostats per Bin
Aubuchon Hardware	592	10	59
F.W. Webb	557	14	40
Bell Simons	525	10	53
Ecomaine	313	4	78
Webber Supply Inc.	281	4	70
Maine Ace Hardware	226	2	113
Rockys Hardware	152	1	152
Environmental Projects Inc.	146	2	73
Mid-Coast Solid Waste Corp.	122	2	61
Oakhill Hardware	117	2	59

TRC conducted several activities in 2019 to increase the number of bins and thermostats returned in Maine. These activities included site visits and 'miss you' calls to collection locations that may not have returned a bin recently. In 2019, 143 (49 completed by TRC) site visits were conducted in Maine, and a total of 97 'miss you' calls were placed. Figure 16 displays the relationship between the number of site visits per month, the bins returned per month, and the number of thermostats (in 100's) returned per month. In 2019, there was a positive correlation between activities performed and the number of bins returned.

Figure 16 - Relationship Between Site Visits and Bins and Thermostats Returned Per Month in 2019

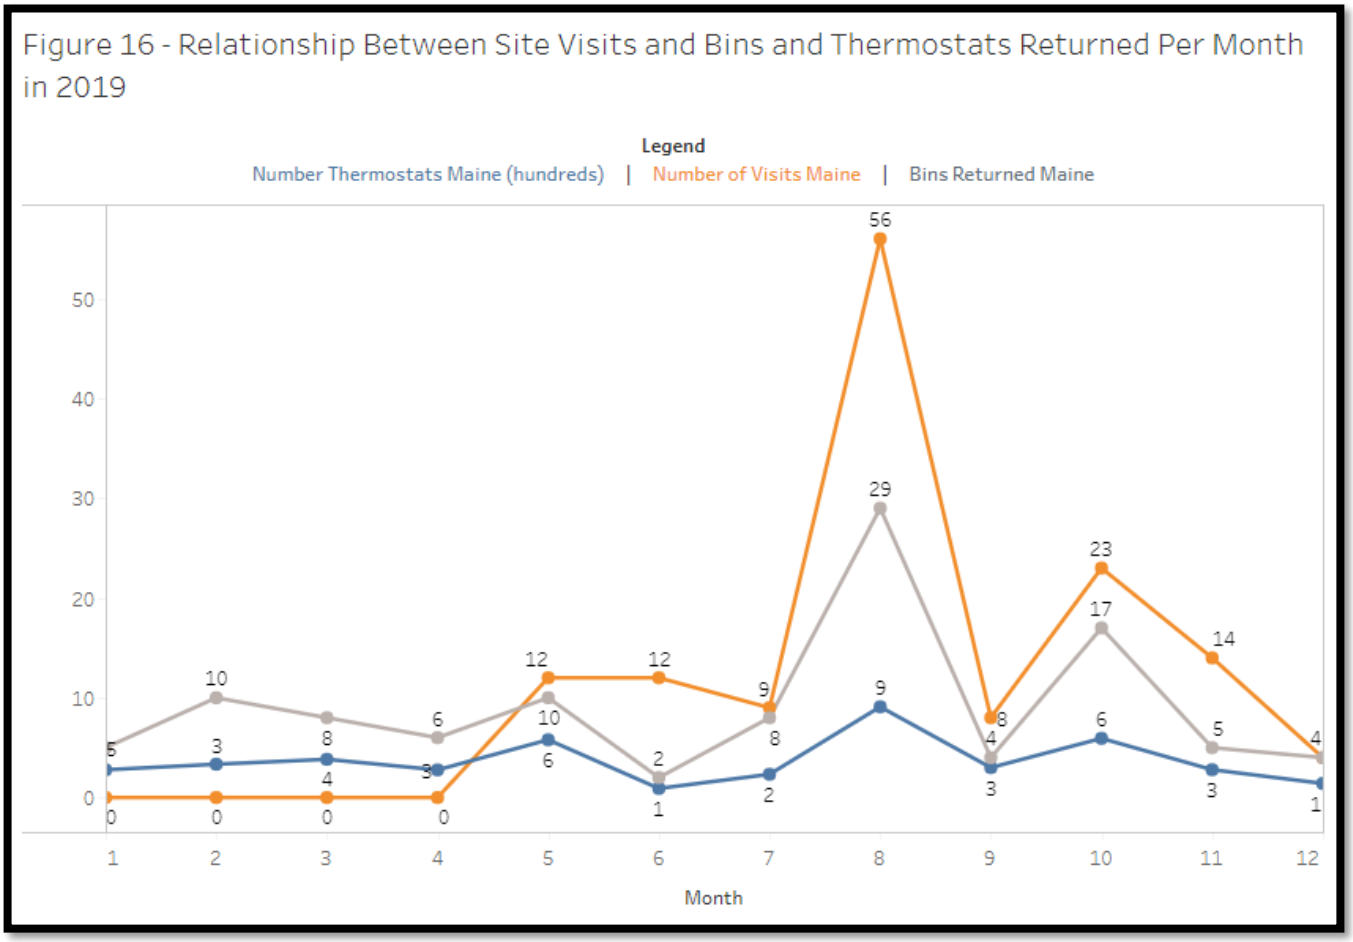

Figure 17 displays the relationship between the number of calls per month, the bins returned per month and the number of thermostats (by 100's) returned per month. Calls were placed in the months of April and August.

Figure 17 - Relationship Between 'Miss You' Calls and Bins and Thermostats Returned per Month in 2019

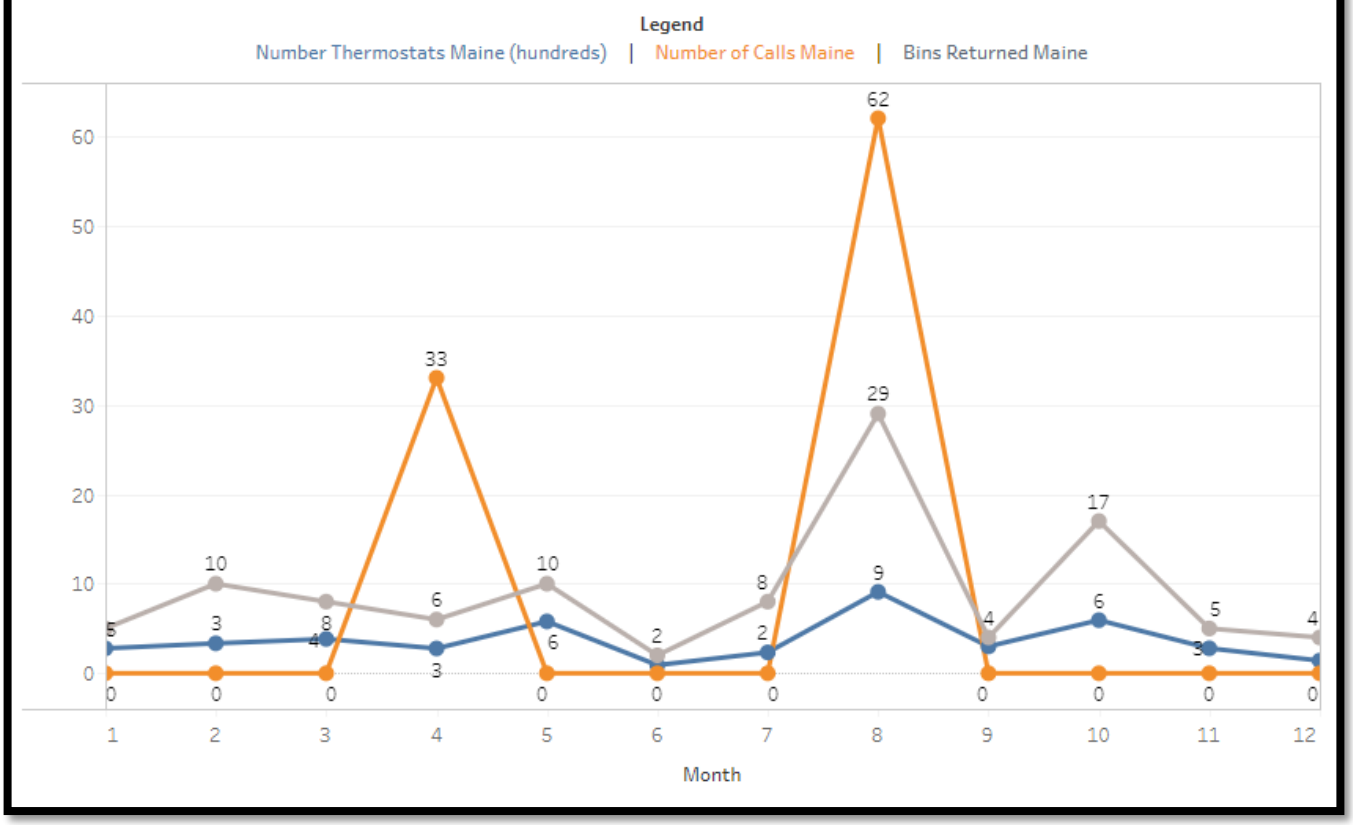

Figure 18 examines the return rates of four groups (if applicable) – locations that did not receive a call or visit, locations that received at least one visit, locations that received at least one call, and locations that received both a call and visit. The rate of active participation (which refers to locations that returned at least one bin) in 2019 was 33% for locations that did not receive a visit and call, but 54% for visited locations and 25% for called locations.

Figure 18 - Percent Change in Bins and Thermostat Returns for Locations that Received a Visit or Call Over Locations that did not Receive Either

	No Visit No Call	Visit	Call	Visit and Call
Number of Locations	40	71	8	72
Rate of Active Participation*	33%	54%	25%	40%
Bins per Participating Location	1.46	1.18	2.50	1.24
Thermostats per Participating Location	65	54	50	44
Thermostats per Bin	44.16	45.67	20.00	35.64

* Locations that returned one or more bins during 2019.

SECTION 3: Comparisons to National and Other States' Data

To compare how the Maine collection partners performed in 2019, the national average for the number of bins returned per location that returned at least one bin was calculated and compared to the Maine average since 2012. The average number of bins does not include locations that did not return any bins in that year. It should be noted that when making comparisons each state has different regulations, a different mix of housing types, local policies, and incentives that may have a unique impact on returns. Overall, the average number of bins returned per location per year was lower in Maine than the U.S. average. However, in 2019, Maine's average was slightly higher than the national average, as shown in Figure 19.

Figure 19 - Average Number of Bins Returned Per Location Per Year

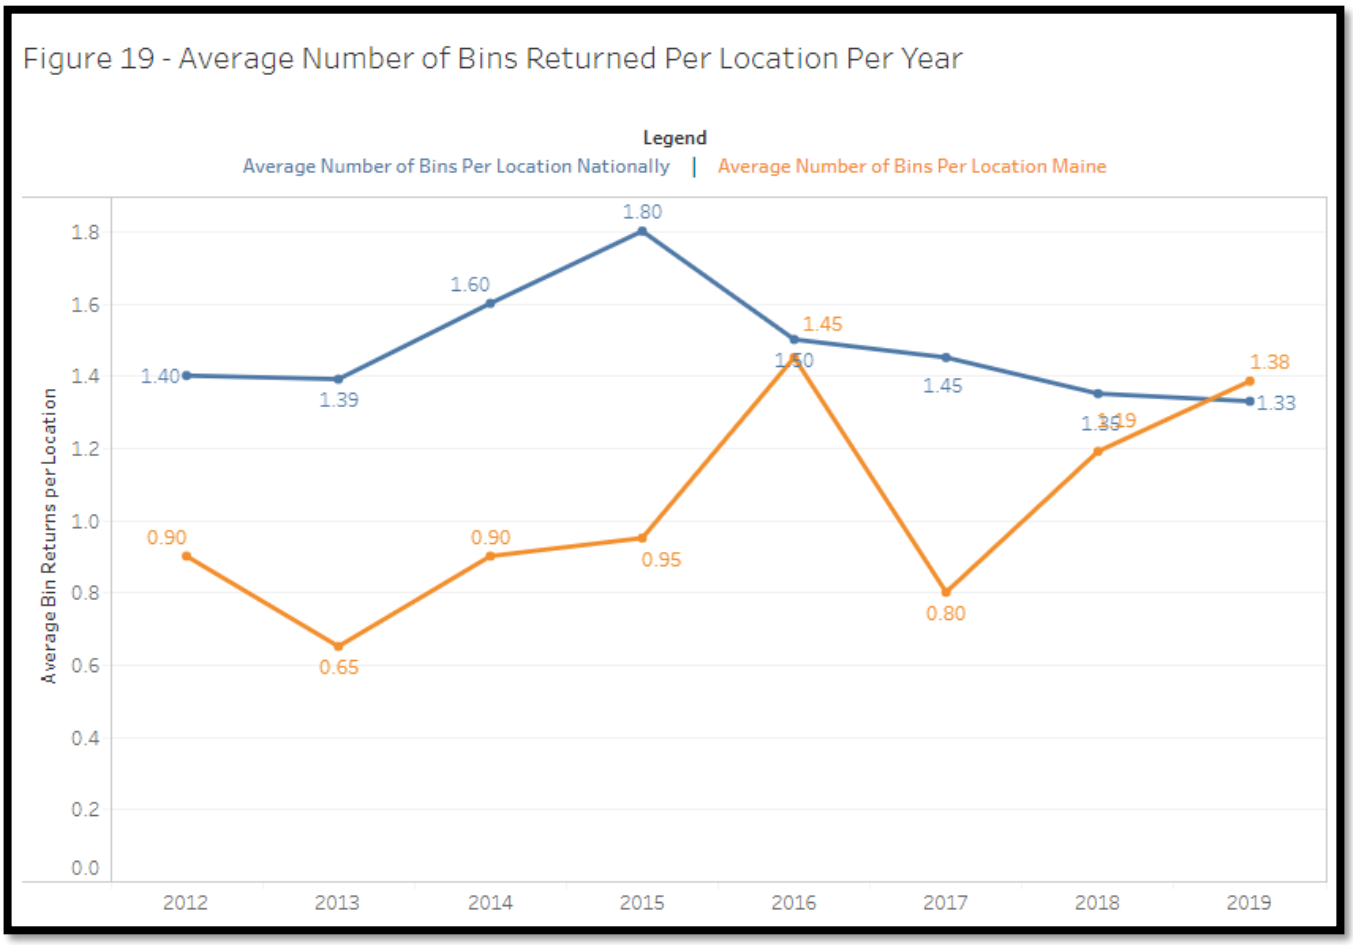

Figure 20 displays the locations in Maine that returned more than one bin in a given year since 2016, and Figure 21 displays the top 10 partners in the U.S. over the same period in terms of the number of bins returned.

Figure 22 displays total percentage of locations that actively participated in the program (active participation defined as sending back at least one bin) in 2019, for all the states that mandate thermostat returns reporting as well as the U.S. national average for all states (reporting and non-reporting). In 2019, 41% of the locations in Maine returned at least one bin compared to a national average of 17%. The highest percentage of locations returning a bin in 2019 amongst states that mandate thermostat returns reporting was Rhode Island (74%).

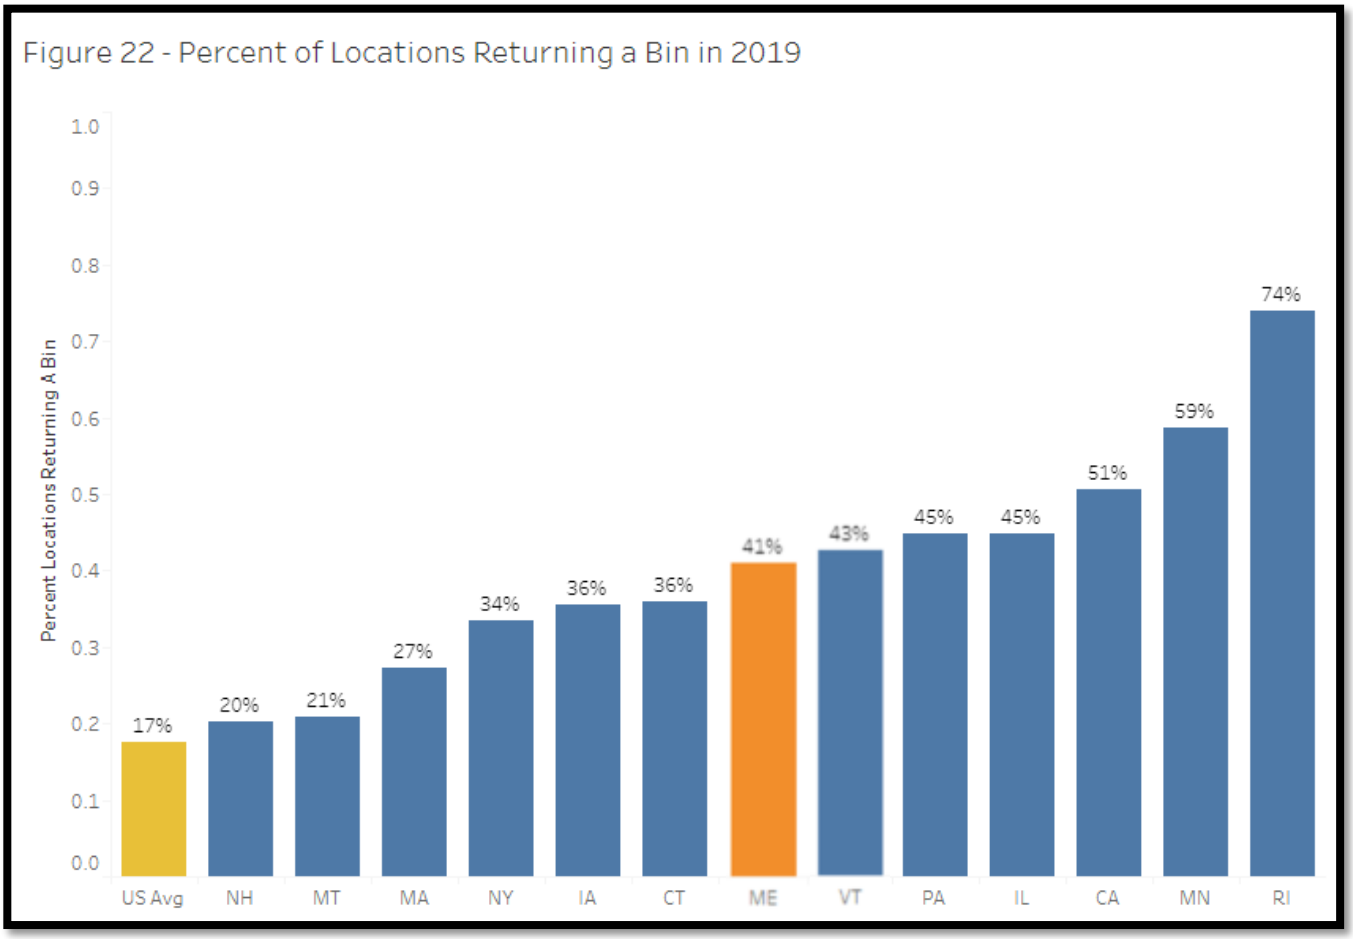

Figure 23 compares the Maine and national rates for several analytics. These include: total whole thermostats, bins, and loose switches collected, number of thermostats collected by total locations and per actively participating locations, number of thermostats per bin returned on average, equivalent average, number of mercury thermostat equivalents returned in 2019, and finally percent change in mercury thermostat conversion from 2018 to 2019. The equivalent average is an average of the number of switches in whole thermostats collected in Maine, and it is used to represent an equivalent number of thermostats from returned loose switches. The thermostat equivalent number includes the totals of whole thermostats returned plus the number of thermostats estimated from loose switches. The states displayed are those that mandate thermostat returns reporting and the U.S. average is for all states that return bins (reporting and non-reporting).

Figure 23 - Comparison of States and US Average Among Several Categories

State	Whole Thermostats	Bins	Loose Switches	Thermostats returned per total # of locations with bins	Average Thermostats per bin	Average Thermostats collected per location that returned at least one bin in 2019	Equivalent Average	Thermostat Equivalents in 2019	% Change over previous year

Figure 24 further compares this state and national data by showing how each state ranked in each of these categories, from highest to lowest. Maine ranked in the top half and above the U.S. average for whole thermostats, bins returned, thermostats returned per total number of locations with bins, average thermostats per bin, average thermostats collected per location that returned at least one bin in 2019, and percent change in thermostat equivalents over 2018. The states compared are those that mandate thermostat returns reporting and the U.S. average is for all states that return bins (reporting and non-reporting).

2019 Collections by Brand

In Maine, Thermostat Recycling Corporation (TRC) recovered the equivalent of 4,400 mercury thermostats from 4,397 whole mercury thermostats plus 3 mercury switches removed from thermostats. A total of 29.5 pounds of mercury was diverted from solid waste. *Please note the explanation of the converted thermostats or thermostat equivalents below.[1] An example of the mercury ampoule is shown below.

As required by the state statute, a table of thermostat brand holders with the corresponding thermostats, count of switches and pounds of mercury recycled is below. It is important to note that there still remain non-members whose thermostats the TRC collection program recycles. They are listed in the table as "Non-Member Brands". Also, there was a change that affected TRC's membership.

1. Sears Holdings filed for bankruptcy on October 15, 2018 and is no longer a paying TRC member.

[1] A mercury thermostat contains a variable amount of mercury ampoules or "switches" attached to the subbase of the thermostat. These glass ampoules often times are collected in the recycling container without the intact thermostat attached to them. TRC collects and counts these loose ampoules and recycles them. To derive the converted thermostat or thermostat equivalent, the program takes the following calculations to develop the converted thermostat or thermostat equivalent. First, TRC will count the total whole (intact) thermostats collected in the recycling bins. From these units, there is an intact ampoules count. TRC then takes the intact ampoules divided by the whole (intact) thermostats or otherwise known as the conversion ratio. After the conversion ratio is calculated, TRC will multiple the loose mercury switches by the conversion ratio. Lastly, we add this result to the whole (intact) thermostats to produce the converted thermostats or thermostat equivalents.

2019 Accounting of the Program Expenses

Below is a summary of program expenses for the Maine collection program in 2019. 2019 program expenses (reported in the annual report) are unaudited and are for management purposes only. Prior to submittal of this annual report, the expenses were reviewed by Kellen Company.

Program Component	2018	2019	Difference
Direct Expense for Marketing & Outreach	$ 20,676.00	$ 29,870.81	$ 9,194.81
Incentive/Promotional Payments	$ 14,765.00	$ 15,135.55	$ 370.55
Legal	$ 3,000.00	$ -	$ (3,000.00)
New Collection Containers	$ -	$ -	$ -
Recycling Costs	$ 12,617.00	$ 17,344.24	$ 4,727.24
Travel	$ 142.00	$ 1,335.66	$ 1,193.66
TRC Staff & Administration	$ 9,742.00	$ 4,618.21	$ (5,123.79)
Total Expenses	**$ 60,942.00**	**$ 68,304.47**	**$ 7,362.47**

2019 Education and Outreach

Direct Marketing (Email, Mail, Other Communications)

Current Collection Locations

Small Pails and Green Bins

In 2019, TRC shipped 55 small pails to collection points around the country. We also shipped 291 new green bins. In comparison, the program shipped 451 new green bins in 2018 and 320 small pails[2]. Collection locations either requested the new pail when they signed up to participate in the program or chose to switch out their bin with a pail due to decreased collections. The large green bins which have been the staple of the program continued to be replenished as they were returned for processing. Because the containers are reused and bar coded, we anticipate that the request for new containers will continue to decrease as the program operates.

- Of the totals provided, TRC shipped 5 new small pails and 9 new large bins in the state.

Collection Location Outbound Phone Calls

Our outbound phone calls have been branded internally as the "Miss You Call" process. These calls promote collection container returns and offer as a reminder to locations that have not received any thermostats. TRC allocates these miss you calls to collection sites that have not returned a container in over a year. These calls are outsourced to the Regus Property Management representatives and Intelligent Office. These calls also serve as a friendly customer service check to see if any of the program materials need to be replenished or if missing containers need to be replaced. In total, the program called 3,557 current collection locations in 2019.

- Completed 97 calls to encourage shipping the recycling container compared to 135 a year prior. A copy of the sites called can be found in the Appendix.

Collection Location Postcards

TRC updated the reminder postcard design in 2019 to encourage locations to heed the message. The postcards are sent to all locations that have not returned a container in the past year. In 2019, TRC

[2] New bin orders coincide with accounts that open new stores, move or lose their existing containers.

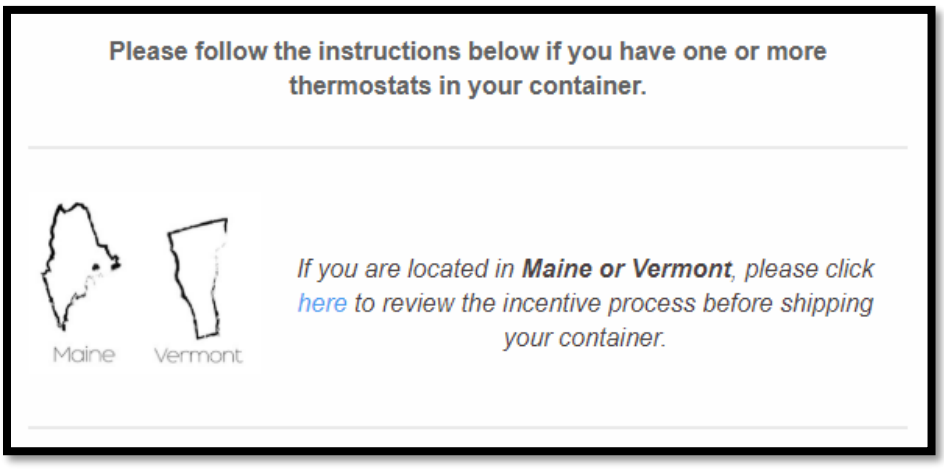
mailed 14,145 postcards. By updating the look of these postcards, TRC hopes to engage locations that were used to the old design and may have disregarded it in the past.

- Mailed 266 reminder postcards compared to 272 a year prior.

Collection Location Emails

TRC emailed locations three weeks after receiving a postcard to encourage them to directly ship the recycling container. These emails contain step-by-step instructions for shipping and direct contact information for missing shipping labels or further questions.

- Emailed 78 collection locations three weeks after receiving the reminder postcard to ship their container.
- Added language to reference $5 incentive process in email for Maine and Vermont



Collection Location Site Visits

Throughout the year, 1,797 site visits were completed in numerous states. The purpose of site visits is to inform the location of their requirements in participation, what the statute requires of them, shipment of the recycling container, and to answer any questions they may have. Often times, valuable information is gathered during the site visit which is used to enhance TRC's outreach and update the database with current contact details.

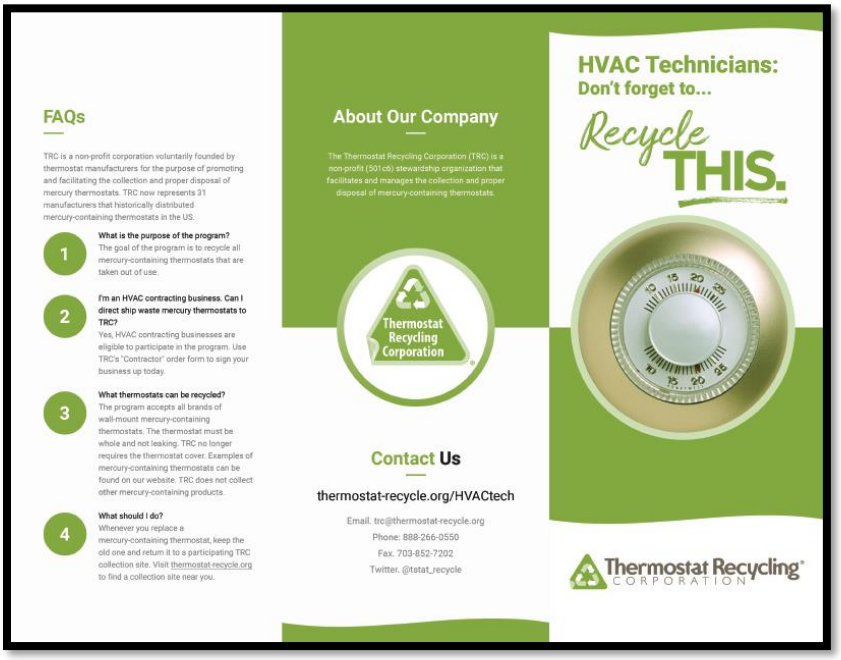
- Of the totals provided, TRC and the MEDEP aggregated, visited 143 collection locations compared to 162 in 2018. Of the 143 site visits, MEDEP visited 94 and TRC visited 49. A copy of the sites visited can be found in the Appendix.

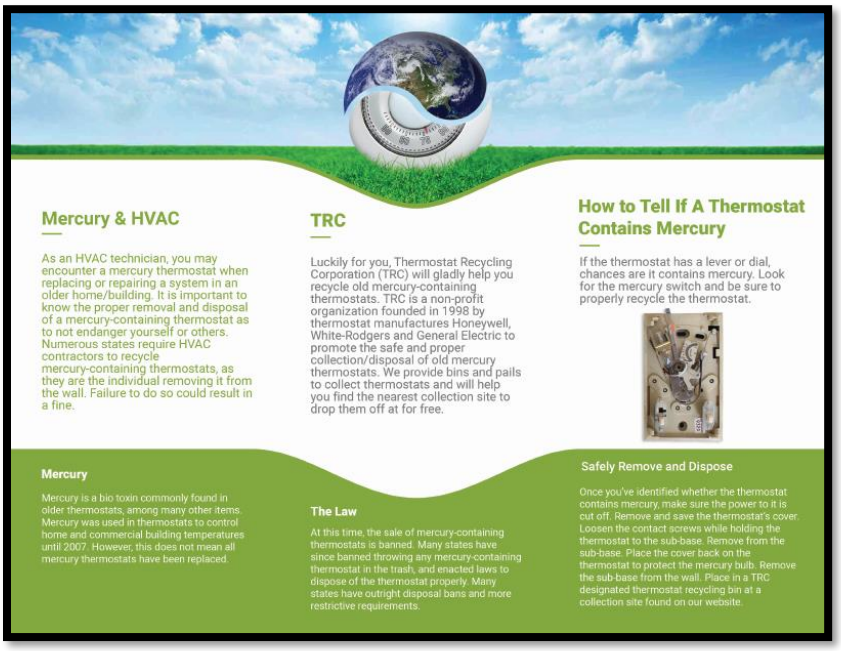
HVAC Industry

The HVAC industry is arguably still the best, most productive and most engaged channel for recycling mercury containing thermostats. We consider this industry to be the manufacturers, wholesale distributors, and contractors which are intimately involved with the recovery of mercury thermostats. TRC took the following actions:

- Continued the "Banish Mercury Off the Planet" (BMOP) Competition encouraging all HARDI wholesalers to compete through collections. Included direct marketing to 258 HVAC wholesale headquarter locations.

- HVAC Educators direct marketing. We sent 691 emails encouraging educators to use materials provided by TRC to update their curriculum on mercury thermostats. TRC created new collateral directly targeted at HVAC technicians in training. These brochures were made available to institutions and trade schools for current and interested HVAC students.





Utility Industry

In 2019, TRC continued its refined approach on how to engage the utility sector, specifically targeting actions toward the utility companies themselves, the installer/implementer, and community action agencies. Each of these audiences have distinct messaging requirements and informational needs.

- Completed year-long research project targeting state TRMs for utility programs, focusing on environmental benefits and inclusion of thermostat recycling.
    - TRC plans to use these findings in 2020 to target individual utility programs.

- Sent 614 informational emails on thermostat recycling to the DOE weatherization program.
- Sent 437 informational emails to known utility implementers on the program.
- Released article urging utility organizations to participate in program and emphasized inclusive sustainability messaging.

Waste Related Sector and Household Hazardous Waste (HHW) Industry

The waste-related sector remains an important sector for TRC to target individuals and those residents performing DIY thermostat installations. These attempts were to gain new collection locations, form better relationships with the audience and raise overall awareness of the TRC program. As a result of these learnings, TRC took the following actions:

- Scoured google alerts for new HHW facilities openings or events to target phone call or email outreach to encourage them to use program. Sent 62 emails.
- Continued partnering with Earth911 and provided collection location list for cross-pollinating.
- Exhibited at the national North American Hazardous Materials Management Association (NAHMMA) Conference.
- Exhibited at the Maine Recycling and Solid Waste Conference & Trade Show.

Advertising and Awareness

Website

In 2019, TRC worked on expanding its website content. As a result, throughout the year TRC posted "Short Snippets" relating to waste and sustainability in the typical consumer's life. Listed here are the pieces added to our website for visitor's enjoyment this year.

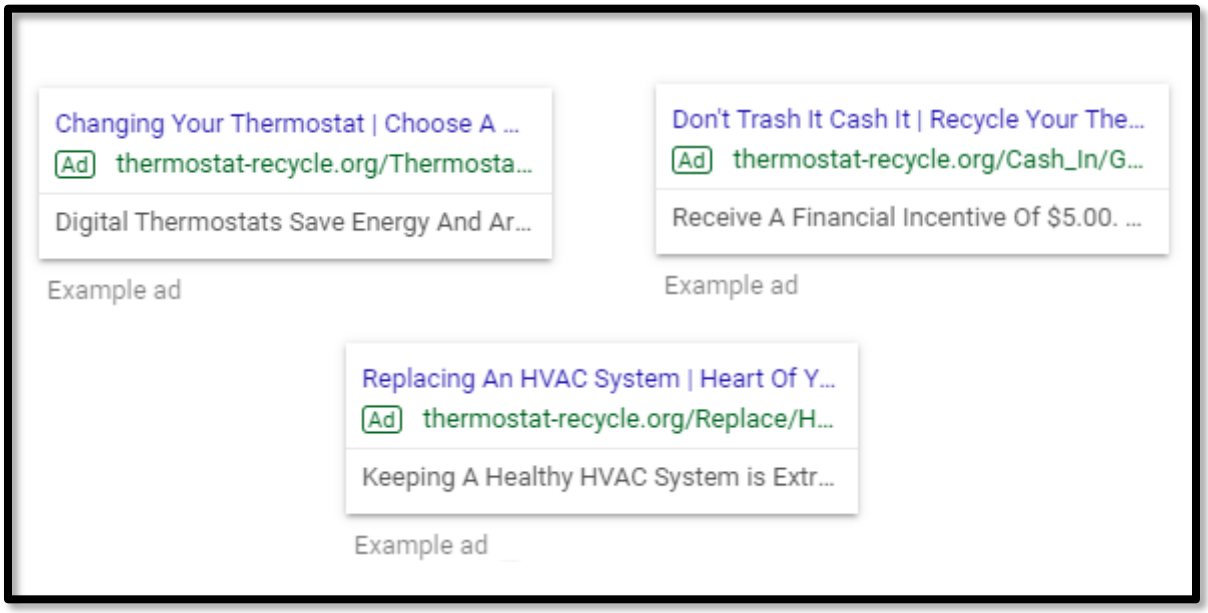
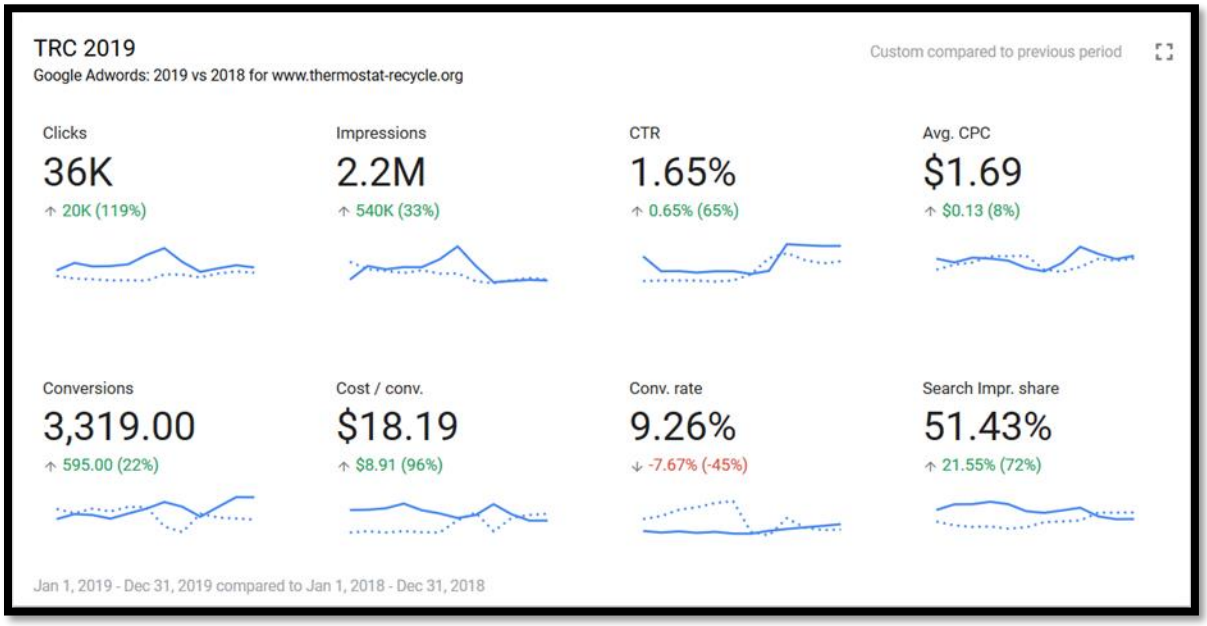
Google Ads

TRC invested in a Google Ads campaign in Maine throughout 2019. The results are detailed below.



Search Engine Marketing (SEM)

Search Engine Marketing (also SEM or pay per click—PPC) is the process of buying a paid position on the search engine results page. TRC refined its SEM approach this year with positive results, with a 20% increase in clicks, a 33% increase in impressions and a 22% increase in conversions, according to ***Google Adwords Reporting***.



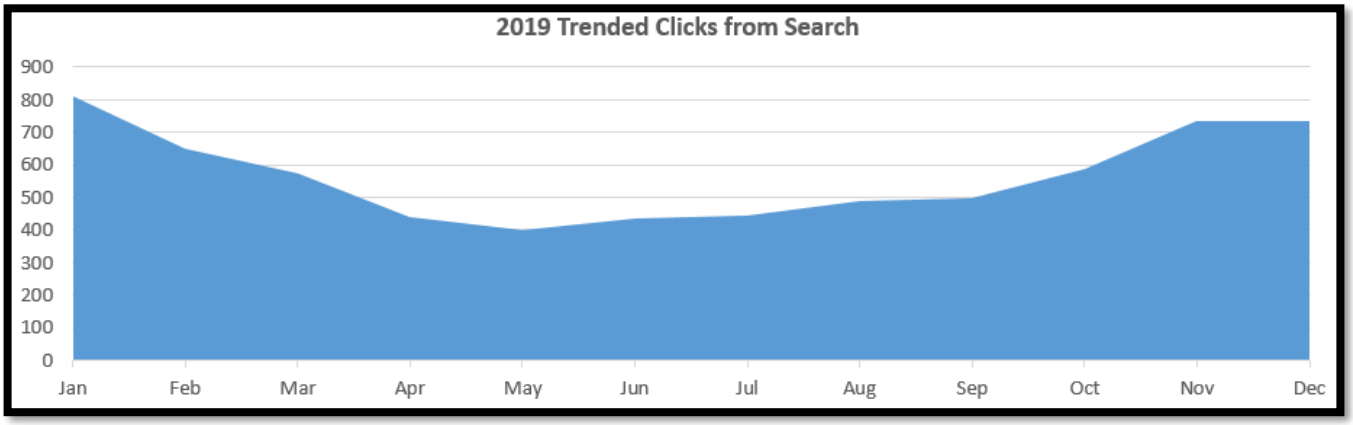
Search Engine Optimization (SEO)

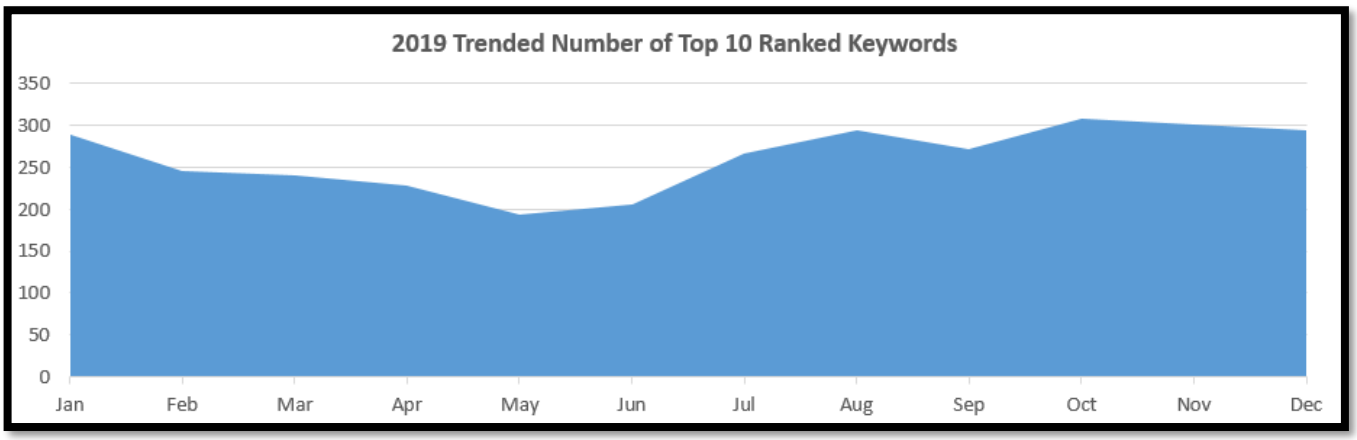
Search Engine Optimization (SEO) is the process whereby a website is optimized through original content and on-site coding tactics to increase its chances of appearing near the top of "organic searches." An organic search is one that appears "naturally" in a search engine like Google or Bing. In other words, an organic listing is not ranked through paid search.

Organic traffic to a website typically brings visitors who stay longer, and visit more pages, on average. Two key measures were identified as a baseline for growth. They are:

- Clicks from Search (Organic search volume multiplied by click through rate)
- Page-one organic terms.

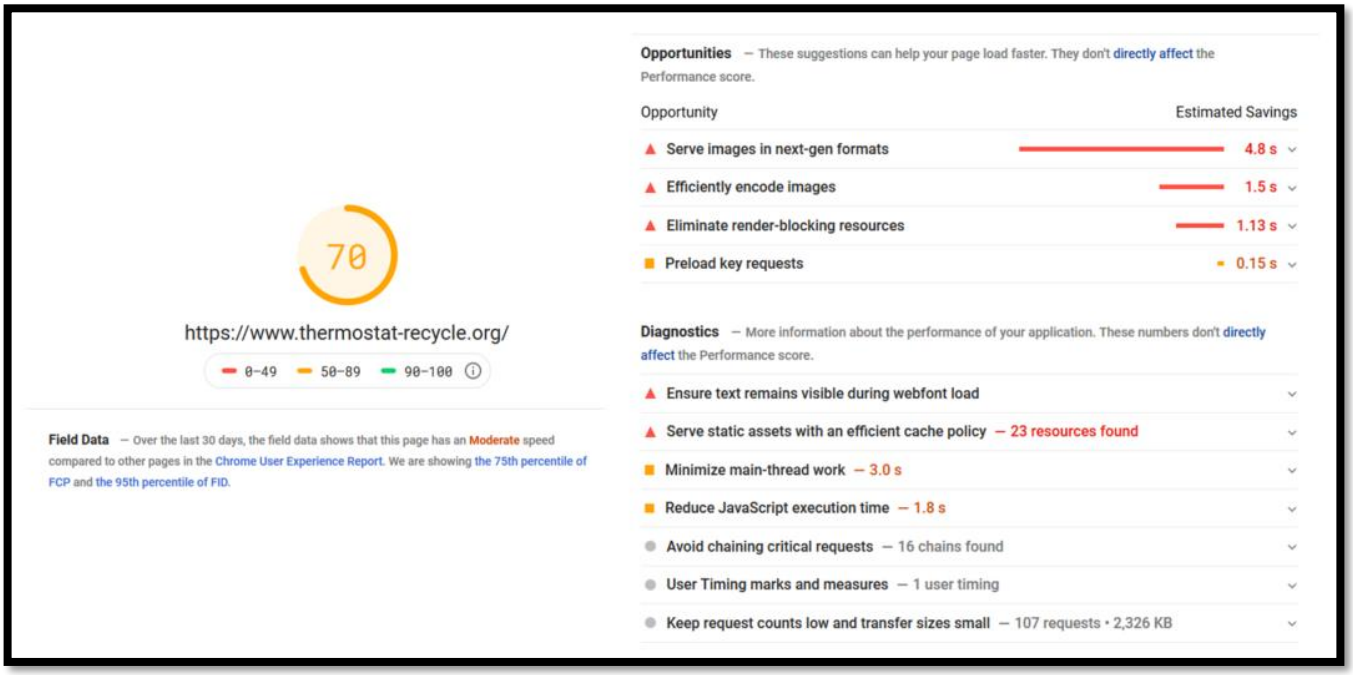
In December 2018, TRC had Clicks from Search of 1,087 and 104 organic search terms ranked on page one of a Google search. Through December of 2019, both the Clicks from Search and Page One Keywords have increased. The Clicks from Search is now at 6,427 and the page-one keywords are at 334, according to the ***Google Search Console***.





On Site Optimization

TRC has continued to focus on optimizing the site's code and structure. Site performance as measured by ***Google Page Speed Insights*** shows the site at a score of 70 out of 100. Google favors sites that deliver content quickly, so speed is important.



A ***MOZ Pro Site Audit*** was also conducted to determine key metrics for SEO.

2020 Program Modifications

Thermostat Recycling Corporation's 2020 Goals

TRC continues to set high-level annual goals for the organization. These goals assist in decision making and prioritization of activities. For the calendar year 2020, TRC plans to focus on:

- Continuing to fulfill state statutory requirements, agreements and other arrangements for regulatory compliance.
- Targeting mercury thermostat collections at Utilities. Maintain the HVAC industry collections. Other key audiences vary by state and requirements.
- Focusing on education and awareness tactics geared toward tech schools, post-secondary and technical reference manuals.

Thermostat Recycling Corporation's Planned Tasks

In addition to the above goals, TRC set specific tasks which we plan to focus on. Completion of these tasks aid in the overall organization's goals.

- Attend and integrate learnings from other EPR products after the biannual Product Stewardship in-person meetings.
- Roll-out public releases throughout the year.
- Continue the program's operational activities such as outbound phone calls, mailing reminder postcards, and visiting sites. Use collection data trends to target these initiatives.
- Attend the list of 2020 events such as trade shows and conferences[3]. Look for speaking opportunities at attended events.

HOW MERCURY THERMOSTAT WASTE IS HANDLED

WASTE MERCURY-ADDED THERMOSTAT MANAGEMENT THROUGH VEOLIA ES TECHNICAL SOLUTIONS, LLC.

TRC containers with waste mercury-switch thermostats are received at a fulfillment/ inventory center in Port Washington, Wisconsin (WIR000130591). The facility is owned and operated by Veolia ES Technical Solutions, L.L.C. (Veolia) under contract with TRC.

All recycling containers, including pails and bins are received at the loading dock and sent to the TRC inventory room. The container and plastic liner are opened and the contents are identified, sorted, and tallied. The following data is recorded for each bin returned and processed: bin number, business name (location name), city, state, zip code, date returned, number of thermostats and mercury switches by manufacturer and any non-conforming material.

The containers are returned to the location that sent it in with a new prepaid address label within 3 weeks of receipt. The thermostats are stored and staged in a plastic lined carton in a storage area for final processing. The containers are dated and processed in order received, first in-first out.

The thermostats and any loose bulbs collected from the containers are consolidated into a special 55-gallon drum which is labeled and dated according to regulations. The drum is sealed with a band and is only opened when contents are being added to it. Special negative pressure venting assures any fumes are captured and vented when the drum is opened.

The 55-gallon drum is then shipped to Veolia's mercury recovery facility (WID988566543) for final processing of the mercury ampules (switches). Veolia Environmental Services meets or exceeds all local, state, federal and EPA regulations for the management of the product.

The containers are returned from the storage area to the mercury recovery processing area to have the mercury bulbs removed from the plastic housing. Universal Waste Regulations require the recycling and disposal of waste within 12 months of acceptance at the processing facility.

Small quantities of thermostats are removed from the container, which is then closed again. The bulbs are removed from the thermostats and placed into processing vessel at the work station. Once the processing vessel is full, the vessel is loaded into the mercury recovery retort oven.

If a bulb breaks and the mercury spills, the work area is designed to contain the spillage and the operators are trained in the clean-up and disposal of mercury. The TRC inventory

and processing areas are equipped with special mercury vacuum cleaners and the work area is vacuumed at the end of the work day to ensure that any spillage is cleaned up and not left to evaporate.

Veolia meets or exceeds all local, state, federal and EPA regulations for the management of the product. The mercury recovery facility and process are permitted by the Wisconsin Department of Natural Resources. Veolia's approvals for mercury recovery/recycling include:

- EPA - identification WID988566543
- Hazardous Waste Storage License #6008
- Hazardous Waste Treatment License (Mercury Recovery Operations) #4585
- Air Operation Permit #246076050-S01
- Storm Water General Permit #WI-S067857-4

In addition to the regulatory permits, both Veolia Port Washington facilities have developed and maintain management systems in accordance with ISO 14001-2004, OHSAS 18001-2007, and Responsible Recycling (R2:2013) Practice. All persons who handle mercury thermostats as part of the TRC operation receive training in the handling of Hazardous Waste and Universal Waste.

The mercury containing ampules are retorted at Veolia's Port Washington Mineral Springs facility. The mercury is removed during the retort process. The post retort debris consists of broken glass ampules. The debris is tested for residual mercury to document the removal of the mercury to levels below the US EPA Land Disposal Restriction (LDR) levels. The debris is then disposal of as a non-hazardous solid waste at Advanced Disposal Glacier Ridge Landfill, LLC in Horicon, Wisconsin.

A site evaluation of the Veolia Processing Center in Port Washington, WI was conducted by TRC's operations and compliance manager, Danielle Myers, in late October 2019. An audit is scheduled to be completed every two years.

Part II Declaration and Signature Authorization of Officer

Under penalties of perjury, I declare that I am an officer of the above organization and that I have examined a copy of the organization's 2018 electronic return and accompanying schedules and statements and to the best of my knowledge and belief, they are true, correct, and complete. I further declare that the amount in Part I above is the amount shown on the copy of the organization's electronic return. I consent to allow my intermediate service provider, transmitter, or electronic return originator (ERO) to send the organization's return to the IRS and to receive from the IRS **(a)** an acknowledgement of receipt or reason for rejection of the transmission, **(b)** the reason for any delay in processing the return or refund, and **(c)** the date of any refund. If applicable, I authorize the U.S. Treasury and its designated Financial Agent to initiate an electronic funds withdrawal (direct debit) entry to the financial institution account indicated in the tax preparation software for payment of the organization's federal taxes owed on this return, and the financial institution to debit the entry to this account. To revoke a payment, I must contact the U.S. Treasury Financial Agent at 1-888-353-4537 no later than 2 business days prior to the payment (settlement) date. I also authorize the financial institutions involved in the processing of the electronic payment of taxes to receive confidential information necessary to answer inquiries and resolve issues related to the payment. I have selected a personal identification number (PIN) as my signature for the organization's electronic return and, if applicable, the organization's consent to electronic funds withdrawal.

Officer's PIN: check one box only

[X] I authorize BURDETTE SMITH & BISH LLC to enter my PIN 22314

ERO firm name

Enter five numbers, but do not enter all zeros

as my signature on the organization's tax year 2018 electronically filed return. If I have indicated within this return that a copy of the return is being filed with a state agency(ies) regulating charities as part of the IRS Fed/State program, I also authorize the aforementioned ERO to enter my PIN on the return's disclosure consent screen.

[ ] As an officer of the organization, I will enter my PIN as my signature on the organization's tax year 2018 electronically filed return. If I have indicated within this return that a copy of the return is being filed with a state agency(ies) regulating charities as part of the IRS Fed/State program, I will enter my PIN on the return's disclosure consent screen.

Officer's signature ▶ _____ Date ▶ _____

Part III Certification and Authentication

ERO's EFIN/PIN. Enter your six-digit electronic filing identification number (EFIN) followed by your five-digit self-selected PIN.

54409522314

Do not enter all zeros

I certify that the above numeric entry is my PIN, which is my signature on the 2018 electronically filed return for the organization indicated above. I confirm that I am submitting this return in accordance with the requirements of **Pub. 4163,** Modernized e-File (MeF) Information for Authorized IRS *e-file* Providers for Business Returns.

ERO's signature ▶ _____ Date ▶ _____

ERO Must Retain This Form - See Instructions
Do Not Submit This Form to the IRS Unless Requested To Do So

TRC Annual Report on Mercury-Added Thermostat Collection and Recycling in Maine – Calendar Year 2019 Activities

9

In accordance with 38 M.R.S.A. §1665-B(2)(G), the State of Maine is providing this form to the Thermostat Recycling Corporation (TRC) for reporting on behalf of the manufacturers of mercury-added thermostats on their 201 collection and recycling program performance in Maine. Please complete this form electronically, attach information as necessary, and submit a signed copy with all attachments, no later than April 1, 2020, to: Megan Pryor, Maine DEP, 17 State House Station, Augusta, ME 04333.

I. Thermostat Collection and Incentive Data. Provide the following collection information:

A. Current list of sites participating in TRC recycling program. Include facility name, address, contact, phone number, and type of facility (wholesaler, contractor, retailer, municipal, other).

- See annual report - Appendices, 2019 Collection Location Summary Report

B. Mercury switches collected. Attach a spreadsheet that lists the number of mercury thermostats and switches collected from each brand owner and the weight of mercury collected from Maine in the following format:

- See annual report, page 32 – 2019 Maine Collections by Brand

C. Thermostats returned by collection location. Include the following information for each collection site in Maine registered with TRC to collect mercury-added thermostats in 2019:

- Location type (wholesaler, contractor, retailer, municipal, other)
- Location name
- Location address
- Site contact name
- Contact phone number and e-mail (as available)
- Collection bin number(s)
- Date of last bin return (include for all sites, even if last return date is prior to 2019)

  - See annual report - Appendices, 2019 Collection Location Summary Report

D. Summary of incentive payments. List a count of each $5 incentive payment made (not a summary of unique transactions) in the following format:

	Retail	Mail-back*	Wholesale	Contractor	Municipal/other
Number of Hg t-stats received in 2019	1793	0	1906	180	518
Number of $5 incentives paid in 2019	910	0	1293	124	411
Hg t-stats received with no incentive sticker or claim form in 2019	117		31	67	246
Hg t-stats received with incentive sticker and no remittance coupon on file as of 12/31/19			0	0	0
Hg t-stats received w/ illegible, damaged, or incomplete coupons or claim forms in 2019			0	0	0
Checks disbursed in 2019, returned as undeliverable and no alternative delivery		0	0	0	0

TRC Annual Report on Mercury-Added Thermostat Collection and Recycling in Maine – Calendar Year 2019 Activities

*List towns from which TRC received mercury-added thermostats through the mail-back program.

- In 2019, there were 0 thermostats sent from mail-back.

III. **<u>Education and Outreach</u>**. Describe all education and outreach efforts undertaken in 2019 to promote the TRC program in Maine. For each activity, describe the strategy employed to target Maine residents, and whether the effort specifically conveyed information on the $5 incentive. Provide copies of materials utilized to promote thermostat recycling and the return incentive. Do not include national or industry-based outreach efforts unless Maine businesses, residents, or municipalities were specifically targeted, contacted, or otherwise the recipients (e.g. Google location-specific advertising tracking data that reached Maine residents) of the education and outreach efforts.

A. Print media ads distributed in Maine: Include ad copy, publication name, and dates published.

   a. Page 41-42 of annual report

B. Radio and TV PSAs/ads: Include a copy of each PSA and ad, a description of its distribution, the channels on which the ad was run, the time slots, and number of times the ad was run.
   a. Page 43-44 of annual report

C. Online ads: Describe the online advertising strategy to target Maine residents and include screen shots of ads, websites where they appeared, date range during which they appeared, and click-through rate.
   a. Page 45 of annual report

D. Direct outreach to current collection sites in Maine: include copies of fliers, postcards, letters, and other print outreach; dates of distribution; number sent out; responses from participants, if any; and dates and locations of site visits.
   a. Page 34-38 of annual report. Site visit data is included in the appendices.

E. Outreach to recruit new collection sites in Maine: describe format and frequency of efforts to recruit new collection sites, including copies of materials distributed, number and types of facilities targeted; and number and names of new collection sites signed up as a result.
   a. Page 36-38 of annual report

F. Other: describe any additional education and outreach activities specific to the Maine program that were conducted in 2019; include intended audience and geographic distribution.
   a. Page 34-38 of annual report

G. Measures of success: describe methods of measuring success of outreach efforts in Maine, including: the results of surveys of general public and targeted audience (e.g., contractors) awareness of mercury thermostat collection programs and financial incentive; increases in thermostat recycling program participation; improved quality of bin contents and incentive vouchers; greater frequency of bin returns; increased usage of incentive vouchers; increases in the number of participating collection sites.
   a. This is explained throughout the report in its correlating sections.

IV. **<u>Program effectiveness.</u>** Provide an evaluation of the effectiveness of the collection program in Maine. Include information on any changes in the number of collection sites by type from the previous year, and any data available on the number of mercury thermostats remaining in Maine

buildings.

- Page 6-30 of annual report

V. **Program modifications**. Describe proposed modifications to increase the efficiency and effectiveness of the Maine mercury thermostat recycling incentive program.

- Page 51 of annual report

VI. **Participating manufacturers**. Attach a spreadsheet with the following information on the TRC members that are participating in the Maine mercury thermostat recycling incentive program.

See Appendices – List of Participating Manufacturers.

VII. **Additional information** – Provide other comments and recommendations germane to the Maine mercury thermostat recycling program.

SIGNATURE OF RESPONSIBLE OFFICER

I certify under penalty of law that I have personally examined the information submitted in this document and all attachments thereto and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe the information is true, accurate, and complete. I am aware there are significant penalties for submitting false information, including the possibility of fine and imprisonment.
