WE SHARE THE GOOD NEWS – 2019 WAS ANOTHER POSITIVE YEAR

As the 2019 annual reports are being written, it is important to reflect on how much activity the program encompassed in the last year. The program continued to work in new and interesting ways to keep collecting mercury-containing thermostats. We began to streamline our vendors in the process of relocating our headquarters to New York, NY. TRC remains a nimble organization focused on finding and recycling every mercury thermostat every time.

Data shows that the replacement of HVACR equipment continues to be the leading channel for mercury thermostat replacement. The accelerated adoption of “smart-home” controls and the array of utility programs which encourage early thermostat replacements have also been major drivers of collections. Looking ahead, TRC anticipates that the program will continue to fulfill state statutory requirements, agreements and other arrangements for regulatory and legislative compliance. But we will continue to target mercury thermostat collections at utility energy efficiency programs while simultaneously maintaining the HVAC industry collections. TRC will continue to work with its partners in industry, the energy sector and the regulatory community to achieve positive results.

TRC MARKETING

The message around the importance of properly disposing of mercury-containing devices is really a familiar message, and it’s hard to keep a familiar message fresh. Our goal is to maintain awareness of the issue without becoming “white” noise, which is the challenge any recycler faces. This will be accomplished through innovative marketing and creative delivery platforms.

In the energy space, TRC continues to engage the utility stakeholders on the importance of collecting mercury-containing thermostats while developing, deploying and incentivizing thermostat replacement programs. Our efforts continue to demonstrate our intent and commitment while offering suggestions related to future incentive practices.

This year we continued to utilize our Tableau software for enhanced and immediate updates on our results. More and more we are expanding the use of technology and social media to raise TRC’s profile on digital platforms in a continued effort to raise awareness of the need to properly collect and dispose of mercury-containing thermostats.

KEY ALLIANCES

For a program such as TRC's to be successful year after year requires the coordinated effort of many parties. TRC is fortunate to have exceptional support from its industry members, collection partners, marketers, allied industries, regulatory agencies and staff. These strategic partnerships allow TRC's effectiveness to grow as it continues to move forward successfully in the collection and disposal of mercury-containing thermostats.

We are happy to provide you with this year's annual report. Please do not hesitate to contact us with comments or questions.

NEW YORK

2019 Collections and Evaluation

The following analytical report details the annual program performance for mercury thermostat collection in the state of New York in 2019. A few of the program highlights for 2019 are included below:

- In 2019 the program **collected 39.2 lbs. of mercury** in New York. Since 2000, the annual quantity of mercury collected in New York has averaged 34.4 lbs.
- The program collected **4,963 whole thermostats in 2019**. This was a 12% decrease over the number of thermostats collected in 2018. Since 2000, the average thermostat count per year is 3,565.
- The **number of whole thermostats collected per bin in 2019 was 31 thermostats**, an increase from 29 in 2018.
- The counties with the most bins and thermostats returned in 2019 were **Monroe County (19 bins, 980 thermostats)**, **Niagara County (7 bins, 489 thermostats)**, and **Suffolk County (16 bins, 464 thermostats)**.
- In 2019, **34% of the partner locations returned at least one bin**.
- **A total of 263 'Miss You' calls were placed and 120 site visits were conducted in 2019** which resulted in a positive relationship of activity to bin returns.
- In addition to 4,963 whole thermostats, **74 loose switches were collected, bringing the total number of "thermostat equivalents" returned in 2019 to 5,022**, a decrease of 26% from 2018.

Section 1: Program Analytics

Section 1 of this report examines the annual performance of the thermostat collection recycling program in terms of bins, thermostats, and mercury collected as well as the year-over-year progression of the program. On average, the program has collected 34.4 lbs. of mercury and 3,565 whole thermostats per year since 2000. In 2019, the program collected 39.2 lbs. of mercury from 4,963 thermostats and 74 loose switches. Figure 1 below displays the total number of bins, the total number of thermostats, and the quantity of mercury collected in New York since the beginning of the program.

Figure 1 - Program Performance Over Time

Year	Number Bins	Number Thermostats	Mercury (Lb)
2000	5	468	7.9
2001	22	1,334	15.7
2002	21	1,145	10.4
2003	32	1,829	16.2
2004	35	2,473	21.0
2005	32	2,211	20.6
2006	53	3,915	34.1
2007	34	2,396	21.0
2008	52	3,774	31.5
2009	44	3,306	28.0
2010	57	3,871	37.8
2011	47	3,422	31.9
2012	49	3,473	29.2
2013	38	2,297	22.4
2014	78	4,786	40.1
2015	201	6,466	83.8
2016	165	5,857	59.8
2017	204	7,703	84.9
2018	191	5,619	51.8
2019	160	4,963	39.2
Total	1,520	71,308	687.3
Average	76	3,565	34.4

Figure 2 displays the number of bins collected in New York since the initiation of the collection program, as well as the total number of bins collected in the U.S. over the same period. The number of bins collected in New York has generally increased from 2000 to 2010. In 2014, bin returns increased again, peaking with the highest number of bins returned in 2017 with 204 bins. In 2019, the number of bins returned was 160 bins.

Figure 2 - Bins Collected Over Time in New York and Nationally

The 39.2 lbs. of mercury collected in New York in 2019 was 24% lower than the 51.8 lbs. collected in 2018. Figure 3 displays the quantity of mercury collected in New York over time as well as the annual percent change in New York and nationally.

Figure 3 - Quantity (Lb) of Mercury Collected in Program and Annual Changes to New York and Nationally

Year	Mercury (Lb)	% Change New York	% Change Nationally
2000	7.9		
2001	15.7	100%	89%
2002	10.4	-34%	14%
2003	16.2	56%	11%
2004	21.0	29%	17%
2005	20.6	-2%	11%
2006	34.1	65%	32%
2007	21.0	-39%	2%
2008	31.5	50%	16%
2009	28.0	-11%	16%
2010	37.8	35%	26%
2011	31.9	-16%	4%
2012	29.2	-8%	-5%
2013	22.4	-24%	-5%
2014	40.1	79%	13%
2015	83.8	109%	-1%
2016	59.8	-29%	-15%
2017	84.9	42%	-7%
2018	51.8	-39%	-42%
2019	39.2	-24%	5%
Average	34.4		

New York collected 4,963 thermostats in 2019. This was a 12% decrease over the number of thermostats collected in 2018. Figure 4 displays the total number of thermostats collected in New York and nationally, and Figure 5 shares the underlying data as well as the calculated annual percent change.

Figure 4 - Number of Whole Thermostats Collected Over Time in New York and Nationally

Figure 5 - Whole Thermostats Collected in New York and Nationally Over Time and Annual Percent Change

2014	4,786	108%	12%
2015	6,466	35%	-2%
2016	5,857	-9%	-18%
2017	7,703	32%	-3%
2018	5,619	-27%	-11%
2019	4,963	-12%	-5%
Average	3,565		

Figure 6 displays the monthly distribution of bins and thermostats collected in New York in 2019. The months with the greatest number of thermostats returned were June (726 thermostats, 26 bins), and November (652 thermostats, 26 bins). The months with the greatest number of bins returned were also June (26 bins), and November (26 bins). Conversely, the months with the least activity in 2019 were July and September.

The highest number of thermostats per bin returned occurred in August and September (87 and 70 thermostats per bin each month, respectively). Figure 7 shows the average number of thermostats per bin returned per month for the year.

Figure 8 displays the average number of thermostats returned per bin in New York and in the U.S. since the beginning of the New York program. Nationally, the number of thermostats per bin has been decreasing annually since 2000. In New York a similar pattern is observed after 2009, with the exception of a few years. The number of thermostats per bin in 2019 (31 thermostats per bin avg.) increased from 2018 (29 thermostats per bin avg.) which was the lowest to date.

Figure 8 - Average Number of Thermostats per Bin Returned Over Time in New York and Nationally

Figure 9 plots the total bins returned over time along with the average number of thermostats per bin over the same period. In general, the number of bins returned in New York increased steadily from 2000 to 2017, and since has seen a slight drop. At the same time, thermostats per bin remained consistent until 2012, after which the trend in thermostats per bin dropped. A negative correlation has been identified between the number of bins returned since 2009 and the number of thermostats per bin.

SECTION 2: Channel Partner Analysis

Section 2 of the report examines the partner locations in more detail. Most thermostats collected in New York were through wholesalers (74.8%) with the majority of remaining thermostats collected by household hazardous waste facilities (5.6%) and contractors (18.8%). Figure 10 shows the distribution of thermostats collected by location type in 2019.

Figure 10 - Thermostats Collected by Location Type in 2019

The number of bins returned in 2019 decreased across all location types compared to 2018. Figure 11 displays the change in the number of bins returned by thermostat collection type over time in New York.

In 2019, 34% of New York locations possessing a collection bin sent back at least one bin for recycling. The distribution is displayed in Figure 12.

Figure 13 displays the total bins and thermostats returned by county in 2019. An analysis of the top performing counties revealed that Monroe County (19 bins, 980 thermostats), Niagara County (7 bins, 489 thermostats), and Suffolk County (16 bins, 464 thermostats) returned the greatest number of bins and thermostats in 2019.

Figure 13 - Bins Returned and Total Thermostats Returned 2019 by County

	Number Thermostats	Number Bins
Monroe	980	19
Niagara	489	7
Suffolk	464	16

TRC partner Irr Supply (1,209 thermostats) returned the highest number of thermostats in New York in 2019, followed by Johnstone Supply (394 thermostats) and B&F/Johnstone Supply (379 thermostats). Apart from these locations, 6 program partners returned more than 100 thermostats each. Figure 14 displays the top performers in terms of total thermostats returned in 2019.

Figure 14 - Top 10 Performing TRC Partners in New York

Figure 15 includes the top performers for 2019 by each of the following categories: total bins returned, total thermostats returned, and average number of thermostats per bin.

Figure 15 - Top 10 Performing Partners by Total Bins, Total Thermostats, and Average Thermostats per Bin

	Number Thermostats	Number Bins	Average Thermostats per Bin
Irr Supply	1,209	23	53
Johnstone Supply	394	9	44
B&F/Johnstone Supply	379	8	47
R. E. Michel Co.	358	10	36
F.W. Webb	262	7	37
United Refrigeration	162	6	27
Ryan Plumbing & Ht.	156	2	78
Monroe County DES	132	2	66
Home Serve Usa/National Grid	123	1	123
Cooney A/C & Htg.	93	1	93

TRC conducted several activities in 2019 to increase the number of bins and thermostats returned in New York. These activities included site visits and 'miss you' calls to collection locations that may not have returned a bin recently. In 2019, 120 site visits were conducted in New York, and a total of 263 'miss you' calls were placed. Figure 16 displays the relationship between the number of site visits per month, the bins returned per month, and the number of thermostats (in 100's) returned per month. In 2019, there was a positive correlation between activities performed and the number of bins returned.

Figure 16 - Relationship Between Site Visits and Bins and Thermostats Returned Per Month in 2019

Figure 17 displays the relationship between the number of calls per month, the bins returned per month and the number of thermostats (by 100's) returned per month. Calls were placed in the months of January, May and September.

Figure 17 - Relationship Between 'Miss You' Calls and Bins and Thermostats Returned per Month in 2019

Figure 18 examines the return rates of four groups (if applicable) – locations that did not receive a call or visit, locations that received at least one visit, locations that received at least one call, and locations that received both a call and visit. The rate of active participation (which refers to locations that returned at least one bin) in 2019 was 27% for locations that did not receive a visit or call, but 69% for visited locations and 34% for called locations.

Figure 18 - Percent Change in Bins and Thermostat Returns for Locations that Received a Visit or Call Over Locations that did not Receive Either

	No Visit No Call	Visit	Call	Visit and Call
Number of Locations	55	32	326	80
Rate of Active Participation*	27%	69%	34%	26%
Bins per Participating Location	1.20	0.36	1.00	1.00
Thermostats per Participating Location	63	10	29	21
Thermostats per Bin	52.39	28.00	29.39	21.00

* Locations that returned one or more bins during 2019.

SECTION 3: Comparisons to National and Other States' Data

To compare how the New York collection partners performed in 2019, the national average for the number of bins returned per location that returned at least one bin was calculated and compared to the New York average since 2012. The average number of bins does not include locations that did not return any bins in that year. It should be noted that when making comparisons each state has different regulations, a different mix of housing types, local policies, and incentives that may have a unique impact on returns. Overall, the average number of bins returned per location per year was lower in New York than the U.S. average, as shown in Figure 19.

Figure 19 - Average Number of Bins Returned Per Location Per Year

Figure 20 displays the locations in New York that returned more than one bin in a given year since 2016, and Figure 21 displays the top 10 partners in the U.S. over the same period in terms of the number of bins returned.

Figure 22 displays total percentage of locations that actively participated in the program (active participation defined as sending back at least one bin) in 2019, for all the states that mandate thermostat returns reporting as well as the U.S. national average for all states (reporting and non-reporting). In 2019, 34% of the locations in New York returned at least one bin compared to a national average of 17%. The highest percentage of locations returning a bin in 2019 among states that mandate thermostat returns reporting was Rhode Island (74%).

Figure 22 - Percent of Locations Returning a Bin in 2019

Figure 23 compares the New York and national rates for several analytics. These include: total whole thermostats, bins, and loose switches collected, number of thermostats collected by total locations and per actively participating locations, number of thermostats per bin returned on average, equivalent average, number of mercury thermostat equivalents returned in 2019, and finally percent change in mercury thermostat conversion from 2018 to 2019. The equivalent average is an average of the number of switches in whole thermostats collected in New York, and it is used to represent an equivalent number of thermostats from returned loose switches. The thermostat equivalent number includes the totals of whole thermostats returned plus the number of thermostats estimated from loose switches. The states displayed are those that mandate thermostat returns reporting and the U.S. average is for all states that return bins (reporting and non-reporting).

Figure 23 - Comparison of States and US Average Among Several Categories

State	Whole Thermostats	Bins	Loose Switches	Thermostats returned per total # of locations with bins	Average Thermostats per bin	Average Thermostats collected per location that returned at least one bin in 2019	Equivalent Average	Thermostat Equivalents in 2019	% Change over previous year

2019 Collections by Brand

In New York, Thermostat Recycling Corporation (TRC) recovered the equivalent of 5,022 mercury thermostats from 4,963 whole mercury thermostats plus 74 mercury switches removed from thermostats. A total of 39.2 pounds of mercury was diverted from solid waste. *Please note the explanation of the converted thermostats or thermostat equivalents below.¹ An example of the mercury ampoule is shown below.

As required by the state statute, a table of thermostat brand holders with the corresponding thermostats, count of switches and pounds of mercury recycled is below. It is important to note that there still remain non-members whose thermostats the TRC collection program recycles. They are listed in the table as “Non-Member Brands”. Also, there was a change that affected TRC’s membership.

1. Sears Holdings filed for bankruptcy on October 15, 2018 and is no longer a paying TRC member.

¹ A mercury thermostat contains a variable amount of mercury ampoules or “switches” attached to the subbase of the thermostat. These glass ampoules often times are collected in the recycling container without the intact thermostat attached to them. TRC collects and counts these loose ampoules and recycles them. To derive the converted thermostat or thermostat equivalent, the program takes the following calculations to develop the converted thermostat or thermostat equivalent. First, TRC will count the total whole (intact) thermostats collected in the recycling bins. From these units, there is an intact ampoules count. TRC then takes the intact ampoules divided by the whole (intact) thermostats or otherwise known as the conversion ratio. After the conversion ratio is calculated, TRC will multiple the loose mercury switches by the conversion ratio. Lastly, we add this result to the whole (intact) thermostats to produce the converted thermostats or thermostat equivalents.

2019 Accounting of the Program Expenses

Below is a summary of program expenses for the New York collection program in 2019. 2019 program expenses (reported in the annual report) are unaudited and are for management purposes only. Prior to submittal of this annual report, the expenses were reviewed by Kellen Company.

Program Component	2018	2019	Difference
Direct Expense for Marketing & Outreach	\$ 29,415.00	\$ 25,302.93	\$ (4,112.07)
Incentive/Promotional Payments	\$ 1,043.00	\$ -	\$ (1,043.00)
Legal	\$ 37,581.00	\$ 38,750.00	\$ 1,169.00
New Collection Containers	\$ -	\$ -	\$ -
Recycling Costs	\$ 27,245.00	\$ 21,336.06	\$ (5,908.94)
Travel	\$ 5,899.00	\$ 1,728.21	\$ (4,170.79)
TRC Staff & Administration	\$ 15,041.00	\$ 17,576.34	\$ 2,535.34
Total Expenses	\$ 116,224.00	\$ 104,693.54	\$ (11,530.46)

2019 Education and Outreach

Direct Marketing (Email, Mail, Other Communications)

Current Collection Locations

Small Pails and Green Bins

In 2019, TRC shipped 55 small pails to collection points around the country. We also shipped 291 new green bins. In comparison, the program shipped 451 new green bins in 2018 and 320 small pails². Collection locations either requested the new pail when they signed up to participate in the program or chose to switch out their bin with a pail due to decreased collections. The large green bins which have been the staple of the program continued to be replenished as they were returned for processing. Because the containers are reused and bar coded, we anticipate that the request for new containers will continue to decrease as the program operates.

- Of the totals provided, TRC shipped 6 new small pails and 20 new large bins in the state.

Collection Location Outbound Phone Calls

Our outbound phone calls have been branded internally as the “Miss You Call” process. These calls promote collection container returns and offer as a reminder to locations that have not received any thermostats. TRC allocates these miss you calls to collection sites that have not returned a container in over a year. These calls are outsourced to the Regus Property Management representatives and Intelligent Office. These calls also serve as a friendly customer service check to see if any of the program materials need to be replenished or if missing containers need to be replaced. In total, the program called 3,557 current collection locations in 2019.

- Completed 263 calls to encourage shipping the recycling container compared to 499 a year prior. A copy of the sites called can be found in the Appendix.

Collection Location Postcards

TRC updated the reminder postcard design in 2019 to encourage locations to heed the message. The postcards are sent to all locations that have not returned a container in the past year. In 2019, TRC

² New bin orders coincide with accounts that open new stores, move or lose their existing containers.

mailed 14,145 postcards. By updating the look of these postcards, TRC hopes to engage locations that were used to the old design and may have disregarded it in the past.

- Mailed 930 reminder postcards compared to 984 a year prior.

Collection Location Emails

TRC emailed locations three weeks after receiving a postcard to encourage them to directly ship the recycling container. These emails contain step-by-step instructions for shipping and direct contact information for missing shipping labels or further questions.

- Emailed 278 collection locations three weeks after receiving the reminder postcard to ship their container.

Collection Location Site Visits

Throughout the year, 1,797 site visits were completed in numerous states. The purpose of site visits is to inform the location of their requirements in participation, what the statute requires of them, shipment of the recycling container, and to answer any questions they may have. Often times, valuable information is gathered during the site visit which is used to enhance TRC's outreach and update the database with current contact details.

- Visited 120 collection locations compared to 123 in 2018. A copy of the sites visited can be found in the Appendix.

HVAC Industry

The HVAC industry is arguably still the best, most productive and most engaged channel for recycling mercury containing thermostats. We consider this industry to be the manufacturers, wholesale distributors, and contractors which are intimately involved with the recovery of mercury thermostats. TRC took the following actions:

- Continued the “Banish Mercury Off the Planet” (BMOP) Competition encouraging all HARDI wholesalers to compete through collections. Included direct marketing to 258 HVAC wholesale headquarter locations.

- HVAC Educators direct marketing. We sent 691 emails encouraging educators to use materials provided by TRC to update their curriculum on mercury thermostats. TRC created new collateral directly targeted at HVAC technicians in training. These brochures were made available to institutions and trade schools for current and interested HVAC students.

FAQs

TRC is a non-profit corporation voluntarily founded by thermostat manufacturers for the purpose of promoting and facilitating the collection and proper disposal of mercury thermostats. TRC now represents 31 manufacturers that historically distributed mercury-containing thermostats in the US.

- What is the purpose of the program?**
The goal of the program is to recycle all mercury-containing thermostats that are taken out of use.
- I'm an HVAC contracting business. Can I direct ship waste mercury thermostats to TRC?**
Yes, HVAC contracting businesses are eligible to participate in the program. Use TRC's "Contractor" order form to sign your business up today.
- What thermostats can be recycled?**
The program accepts all brands of wall-mount mercury-containing thermostats. The thermostat must be whole and not leaking. TRC no longer requires the thermostat cover. Examples of mercury-containing thermostats can be found on our website. TRC does not collect other mercury-containing products.
- What should I do?**
Whenever you replace a mercury-containing thermostat, keep the old one and return it to a participating TRC collection site. Visit thermostatrecycle.org to find a collection site near you.

About Our Company

The Thermostat Recycling Corporation (TRC) is a non-profit (501(c)(3)) stewardship organization that facilitates and manages the collection and proper disposal of mercury-containing thermostats.

HVAC Technicians: Don't forget to... Recycle THIS.

Mercury & HVAC

As an HVAC technician, you may encounter a mercury thermostat when replacing or repairing a system in an older home/building. It is important to know the proper removal and disposal of a mercury-containing thermostat as to not endanger yourself or others. Numerous states require HVAC contractors to recycle mercury-containing thermostats, as they are the individual removing it from the wall. Failure to do so could result in a fine.

Mercury

Mercury is a bio toxin commonly found in older thermostats, among many other items. Mercury was used in thermostats to control home and commercial building temperatures until 2007. However, this does not mean all mercury thermostats have been replaced.

TRC

Luckily for you, Thermostat Recycling Corporation (TRC) will gladly help you recycle old mercury-containing thermostats. TRC is a non-profit organization founded in 1998 by thermostat manufacturers Honeywell, White-Rodgers and General Electric to promote the safe and proper collection/disposal of old mercury thermostats. We provide bins and pallets to collect thermostats and will help you find the nearest collection site to drop them off at for free.

The Law

At this time, the sale of mercury-containing thermostats is banned. Many states have since banned throwing any mercury-containing thermostat in the trash, and enacted laws to dispose of the thermostat properly. Many states have outright disposal bans and more restrictive requirements.

How to Tell If A Thermostat Contains Mercury

If the thermostat has a lever or dial, chances are it contains mercury. Look for the mercury switch and be sure to properly recycle the thermostat.

Safely Remove and Dispose

Once you've identified whether the thermostat contains mercury, make sure the power to it is out off. Remove and save the thermostat's cover. Loosen the contact screws while holding the thermostat to the sub-base. Remove from the sub-base. Place the cover back on the thermostat to protect the mercury bulb. Remove the sub-base from the wall. Place in a TRC designated thermostat recycling bin at a collection site found on our website.

Utility Industry

In 2019, TRC continued its refined approach on how to engage the utility sector, specifically targeting actions toward the utility companies themselves, the installer/implementer, and community action agencies. Each of these audiences have distinct messaging requirements and informational needs.

- Completed year-long research project targeting state TRMs for utility programs, focusing on environmental benefits and inclusion of thermostat recycling.
 - TRC plans to use these findings in 2020 to target individual utility programs.

- Sent 614 informational emails on thermostat recycling to the DOE weatherization program.
- Sent 437 informational emails to known utility implementers on the program.
- Released article urging utility organizations to participate in program and emphasized inclusive sustainability messaging.

Waste Related Sector and Household Hazardous Waste (HHW) Industry

The waste-related sector remains an important sector for TRC to target individuals and those residents performing DIY thermostat installations. These attempts were to gain new collection locations, form better relationships with the audience and raise overall awareness of the TRC program. As a result of these learnings, TRC took the following actions:

- Scoured google alerts for new HHW facilities openings or events to target phone call or email outreach to encourage them to use program. Sent 62 emails.
- Continued partnering with Earth911 and provided collection location list for cross-pollinating.
- Exhibited at the national North American Hazardous Materials Management Association (NAHMMMA) Conference.
- Exhibited at the New York Federation Annual Conference in May.

Advertising and Awareness

Website

In 2019, TRC worked on expanding its website content. As a result, throughout the year TRC posted “Short Snippets” relating to waste and sustainability in the typical consumer’s life. Listed here are the pieces added to our website for visitor’s enjoyment this year.

Google Ads

TRC invested in a Google Ads campaign in New York throughout 2019. The results and ad examples are detailed below.

Search Engine Marketing (SEM)

Search Engine Marketing (also SEM or pay per click—PPC) is the process of buying a paid position on the search engine results page. TRC refined its SEM approach this year with positive results, with a 20% increase in clicks, a 33% increase in impressions and a 22% increase in conversions, according to **Google Adwords Reporting**.

Search Engine Optimization (SEO)

Search Engine Optimization (SEO) is the process whereby a website is optimized through original content and on-site coding tactics to increase its chances of appearing near the top of “organic searches.” An organic search is one that appears “naturally” in a search engine like Google or Bing. In other words, an organic listing is not ranked through paid search.

Organic traffic to a website typically brings visitors who stay longer, and visit more pages, on average. Two key measures were identified as a baseline for growth. They are:

- Clicks from Search (Organic search volume multiplied by click through rate)
- Page-one organic terms.

In December 2018, TRC had Clicks from Search of 1,087 and 104 organic search terms ranked on page one of a Google search. Through December of 2019, both the Clicks from Search and Page One Keywords have increased. The Clicks from Search is now at 6,427 and the page-one keywords are at 334, according to the **Google Search Console**.

On Site Optimization

TRC has continued to focus on optimizing the site's code and structure. Site performance as measured by **Google Page Speed Insights** shows the site at a score of 70 out of 100. Google favors sites that deliver content quickly, so speed is important.

A **MOZ Pro Site Audit** was also conducted to determine key metrics for SEO.

2020 Program Modifications

Thermostat Recycling Corporation's 2020 Goals

TRC continues to set high-level annual goals for the organization. These goals assist in decision making and prioritization of activities. For the calendar year 2020, TRC plans to focus on:

- Continuing to fulfill state statutory requirements, agreements and other arrangements for regulatory compliance.
- Targeting mercury thermostat collections at Utilities. Maintain the HVAC industry collections. Other key audiences vary by state and requirements.
- Focusing on education and awareness tactics geared toward tech schools, post-secondary and technical reference manuals.

Thermostat Recycling Corporation's Planned Tasks

In addition to the above goals, TRC set specific tasks which we plan to focus on. Completion of these tasks aid in the overall organization's goals.

- Attend and integrate learnings from other EPR products after the biannual Product Stewardship in-person meetings.
- Roll-out public releases throughout the year.
- Continue the program's operational activities such as outbound phone calls, mailing reminder postcards, and visiting sites. Use collection data trends to target these initiatives.
- Attend the list of 2020 events such as trade shows and conferences³. Look for speaking opportunities at attended events.

2019 Collection Location Bin Receipt

HOW MERCURY THERMOSTAT WASTE IS HANDLED

WASTE MERCURY-ADDED THERMOSTAT MANAGEMENT THROUGH VEOLIA ES TECHNICAL SOLUTIONS, LLC.

TRC containers with waste mercury-switch thermostats are received at a fulfillment/inventory center in Port Washington, Wisconsin (WIR000130591). The facility is owned and operated by Veolia ES Technical Solutions, L.L.C. (Veolia) under contract with TRC.

All recycling containers, including pails and bins are received at the loading dock and sent to the TRC inventory room. The container and plastic liner are opened and the contents are identified, sorted, and tallied. The following data is recorded for each bin returned and processed: bin number, business name (location name), city, state, zip code, date returned, number of thermostats and mercury switches by manufacturer and any non-conforming material.

The containers are returned to the location that sent it in with a new prepaid address label within 3 weeks of receipt. The thermostats are stored and staged in a plastic lined carton in a storage area for final processing. The containers are dated and processed in order received, first in-first out.

The thermostats and any loose bulbs collected from the containers are consolidated into a special 55-gallon drum which is labeled and dated according to regulations. The drum is sealed with a band and is only opened when contents are being added to it. Special negative pressure venting assures any fumes are captured and vented when the drum is opened.

The 55-gallon drum is then shipped to Veolia's mercury recovery facility (WID988566543) for final processing of the mercury ampules (switches). Veolia Environmental Services meets or exceeds all local, state, federal and EPA regulations for the management of the product.

The containers are returned from the storage area to the mercury recovery processing area to have the mercury bulbs removed from the plastic housing. Universal Waste Regulations require the recycling and disposal of waste within 12 months of acceptance at the processing facility.

Small quantities of thermostats are removed from the container, which is then closed again. The bulbs are removed from the thermostats and placed into processing vessel at the work station. Once the processing vessel is full, the vessel is loaded into the mercury recovery retort oven.

If a bulb breaks and the mercury spills, the work area is designed to contain the spillage and the operators are trained in the clean-up and disposal of mercury. The TRC inventory

and processing areas are equipped with special mercury vacuum cleaners and the work area is vacuumed at the end of the work day to ensure that any spillage is cleaned up and not left to evaporate.

Veolia meets or exceeds all local, state, federal and EPA regulations for the management of the product. The mercury recovery facility and process are permitted by the Wisconsin Department of Natural Resources. Veolia's approvals for mercury recovery/recycling include:

- EPA - identification WID988566543
- Hazardous Waste Storage License #6008
- Hazardous Waste Treatment License (Mercury Recovery Operations) #4585
- Air Operation Permit #246076050-S01
- Storm Water General Permit #WI-S067857-4

In addition to the regulatory permits, both Veolia Port Washington facilities have developed and maintain management systems in accordance with ISO 14001-2004, OHSAS 18001-2007, and Responsible Recycling (R2:2013) Practice. All persons who handle mercury thermostats as part of the TRC operation receive training in the handling of Hazardous Waste and Universal Waste.

The mercury containing ampules are retorted at Veolia's Port Washington Mineral Springs facility. The mercury is removed during the retort process. The post retort debris consists of broken glass ampules. The debris is tested for residual mercury to document the removal of the mercury to levels below the US EPA Land Disposal Restriction (LDR) levels. The debris is then disposal of as a non-hazardous solid waste at Advanced Disposal Glacier Ridge Landfill, LLC in Horicon, Wisconsin.

A site evaluation of the Veolia Processing Center in Port Washington, WI was conducted by TRC's operations and compliance manager, Danielle Myers, in late October 2019. An audit is scheduled to be completed every two years.

Part II Declaration and Signature Authorization of Officer

Under penalties of perjury, I declare that I am an officer of the above organization and that I have examined a copy of the organization's 2018 electronic return and accompanying schedules and statements and to the best of my knowledge and belief, they are true, correct, and complete. I further declare that the amount in Part I above is the amount shown on the copy of the organization's electronic return. I consent to allow my intermediate service provider, transmitter, or electronic return originator (ERO) to send the organization's return to the IRS and to receive from the IRS (a) an acknowledgement of receipt or reason for rejection of the transmission, (b) the reason for any delay in processing the return or refund, and (c) the date of any refund. If applicable, I authorize the U.S. Treasury and its designated Financial Agent to initiate an electronic funds withdrawal (direct debit) entry to the financial institution account indicated in the tax preparation software for payment of the organization's federal taxes owed on this return, and the financial institution to debit the entry to this account. To revoke a payment, I must contact the U.S. Treasury Financial Agent at 1-888-353-4537 no later than 2 business days prior to the payment (settlement) date. I also authorize the financial institutions involved in the processing of the electronic payment of taxes to receive confidential information necessary to answer inquiries and resolve issues related to the payment. I have selected a personal identification number (PIN) as my signature for the organization's electronic return and, if applicable, the organization's consent to electronic funds withdrawal.

Officer's PIN: check one box only

☒ I authorize **BURDETTE SMITH & BISH LLC** to enter my PIN **22314**
ERO firm name Enter five numbers, but do not enter all zeros

as my signature on the organization's tax year 2018 electronically filed return. If I have indicated within this return that a copy of the return is being filed with a state agency(ies) regulating charities as part of the IRS Fed/State program, I also authorize the aforementioned ERO to enter my PIN on the return's disclosure consent screen.

☐ As an officer of the organization, I will enter my PIN as my signature on the organization's tax year 2018 electronically filed return. If I have indicated within this return that a copy of the return is being filed with a state agency(ies) regulating charities as part of the IRS Fed/State program, I will enter my PIN on the return's disclosure consent screen.

Officer's signature ▶ _____ Date ▶ _____

Part III Certification and Authentication

ERO's EFIN/PIN. Enter your six-digit electronic filing identification number (EFIN) followed by your five-digit self-selected PIN.

54409522314

Do not enter all zeros

I certify that the above numeric entry is my PIN, which is my signature on the 2018 electronically filed return for the organization indicated above. I confirm that I am submitting this return in accordance with the requirements of **Pub. 4163**, Modernized e-File (MeF) Information for Authorized IRS e-file Providers for Business Returns.

ERO's signature ▶ _____ Date ▶ _____

**ERO Must Retain This Form - See Instructions
Do Not Submit This Form to the IRS Unless Requested To Do So**

LHA For Paperwork Reduction Act Notice, see instructions.

Form **8879-EO** (2018)
