Department of Toxic Substances Control  
Attention: Mr. Eugene Shirai  
1001 "I" Street  
P.O. Box 806  
Sacramento, California 95812-0806

SUBMISSION OF QUARTERLY REPORT; Consent Order Item B-1.6

Dear Mr. Shirai,

The following quarterly report for Q3 2019 outlines the Thermostat Recycling Corporation's (TRC) most recent outreach and pilot project activities. By this submission, S. Groner Associates, Inc. (SGA) is fulfilling obligations on behalf of the 24 signatories of the Consent Order listed below. If you have any questions regarding this submission, please feel free to contact me at (562) 597-0205 or the address below.

Regards,

Stephen Groner, P.E.  
California Program Manager  
Thermostat Recycling Corporation  
President/S. Groner Associates, Inc.  
100 W. Broadway, Suite 290  
Long Beach, CA 90802

Mr. Ralph Vasami  
Executive Director  
Thermostat Recycling Corporation  
500 Office Center Drive, Suite 400  
Fort Washington, PA 19034

**(24) Company's signatures representing:**

Bard Manufacturing Company, Inc.  
Burnham Holdings, Inc.  
Carrier Corporation  
Chromalox  
Crane Co.  
Climate Master, Inc.

Valliant Corporation  
W.W. Grainger  
White-Rodgers

## Introduction

During the third quarter (July-September) of 2019, S. Groner Associates (SGA) worked on behalf of the Thermostat Recycling Corporation (TRC) to implement the following tasks from the DTSC-approved Outreach Plan and Pilot Plan as a part of the California TRC Program. The following report outlines those efforts undertaken during this quarter broken into audiences.

## Summary of Results

1. Mercury-added thermostats collected this quarter: 2,939
2. New collection containers this quarter: 8
  - Number and location (by street address) of new collection bins assigned (see Appendix).
3. Mercury-added thermostats collected this year: 12,062

## Outreach Program

### Summary of Outreach Activities for Audience A

#### Retail/ Consumer

##### Summary

Historically, retailers have been a small component of the mercury thermostat take-back recycling effort. In an effort to increase the collection of mercury thermostats throughout the state of California and provide more accessible and public facing recycling locations for consumers, we have targeted hardware stores throughout the state as new collection site partners.

As part of the partnerships formed through this outreach, retail stores agree to host a TRC recycling bin or pail, display promotional materials in their store, be in communication with TRC regarding progress, and provide barriers and motivators related to the success of the recycling effort that they observe with their customers. The retail toolkits that we send to stores that request a bin include a folder with a TRC program introduction letter, a prepping and shipping instructions sheet, a sheet to help users identify mercury thermostats, English and Spanish shelf talkers, and English and Spanish window clings (see appendix for more detail).

Having solidified 52 retail partnerships in 2016-2017, we worked to expand the number of retail partnerships in 2018. In Q1'18, we reviewed the geographic locations of current partnerships and identified areas that would benefit from both increased levels of promotion and the establishment of additional thermostat drop-off locations. Part of this mapping involved cross-referencing the areas in which we have promotions through local utility companies, and then working to ensure that there were sufficient retailers acting as collection sites in those areas. Using this information, we created a list of new locations to recruit as collection sites, and conducted outreach to these locations from Q2'18-Q1'19.

In Q2'19 we finished outreach to all of the 272 retail locations in the database compiled during Q1'18, and developed plans to visit a subset of the 78 stores at which bin placements had been made. In-person check-in visits to stores around the Bay Area and Long Beach will confirm if promotional materials (i.e. shelf talkers) are appropriately placed to best promote the program.

In Q3'19, TRC divided the stores that had accepted bins into 3 groups: those within driving distance of Los Angeles, those within driving distance of Oakland, and those too far to drive to from either location. Calls were made to the stores that were not in driving distance to ensure they had received their TRC bin and placed promotional materials appropriately in-store. Calls were made to stores within driving distance of both Oakland and Los Angeles to schedule times for in-store visits. These visits will provide TRC with an opportunity to confirm the proper placement of promotional materials, ensure employee awareness of the program, and receive direct feedback about the program and its rebate process.

In-store visits are scheduled to begin in Q4'19.

### **Barriers**

- Difficulty reaching the decision maker on the phone and lack of response after leaving voicemail(s).
- Busy schedule of retailers prevents decision-maker from being available and reliably returning calls.
- High employee turnover creates a recurring, almost institutional lack of knowledge about TRC, and a loss of accountability. Bins are often lost or misplaced. In Q3'19, six locations requested new bins because of misplacement and all but 2 requested new materials.
- Disinterest in the program over time.

### **Motivators**

- Minimum effort is required to receive materials.
- Desire to maintain the partnership:
  - Their customers have previously brought mercury thermostats into the store.
  - Their customers have left mercury thermostats on their property after hours.
  - Many other stores throughout CA, in their area, or retail chain are already participating in the program.

### **Results**

- All of the 33 retailers within non-driving distance of Oakland and Long Beach were called, and 23 were reached on the phone. All but 2 need new materials.
- Outreach was attempted to all 14 contacts within driving distance of Long Beach to schedule store visits. 7 store visits were scheduled
- 70 total calls placed.
- 3 emails sent.

## **Household Hazardous Waste (HHW)**

### **Summary**

In Q2'18, we continued conducting outreach to HHW facilities to place bins and partner with them to promote our thermostat collection program. Outreach to place new bins with HHW facilities was conducted to locations where stakeholders in that city or county expressed interest in promoting our materials but did not have a collection site. Outreach was then conducted to HHW Facilities in those locations to place bins. Two bins were placed with HHW Facilities in Q4'18. In Q1'19, SGA began planning the HHW facility event partnership outreach for the upcoming quarter(s) by creating a call script and putting together a database of potential partners.

In Q2'19, TRC organized the first in a series of collection events at CA HHW facilities. The first event occurred on June 8<sup>th</sup> in Fallbrook (2551 Oliver Hill Road) from 9AM-3PM and was hosted

S. GRONER ASSOCIATES, INC.

by the San Diego Household Hazardous Waste Facility. A Google Ad Campaign ran before the event took place to raise awareness about mercury thermostat recycling at the event (see Results section for more info). A total of 3 mercury thermostats and 2 surveys were collected from the 2 individuals that dropped off thermostats on the day of the event. There are two additional HHW events planned for Q3'19.

In Q3'19, TRC continued to coordinate collection events, provide materials to partners, and send reminders/day-of checklists to HHW facility contacts. One collection event was held at Merced County Regional Waste Authority (7040 N Hwy 59) on July 20th from 8AM-12PM, and another event was held on August 10th from 8AM-12PM at Santa Clara County's HHW facility in Mountain View.

In addition to event-specific promotional flyers that were developed and mailed for distribution at events (these flyers were in English, Spanish, and a Vietnamese translation was developed for Santa Clara County based on their demographics), TRC ran a Google Ads campaign before each event to raise awareness for the event. TRC also supplied the HHW facility in Santa Clara County with plastic bags to collect thermostats and rebate forms after receiving this suggestion as feedback from Merced County Regional Waste Authority after their event.

### **Barriers**

- Some HHW programs are already implementing efforts and not looking for additional partnership opportunities.

### **Motivators**

- HHW facilities are aware of the environmental hazards of mercury and are motivated to help.
- HHW facilities appreciate TRC's paid promotional support to increase awareness of and recycling at events they already planned and efforts they have undertaken.

### **Results**

- Coordinated collection events with 2 County HHW facilities located in Central and Northern California.
- Created, printed, and mailed 750 event-specific promotional fliers (in regionally-appropriate languages) for distribution before the July and August events. These fliers were also uploaded to a page on TRC's website, which Google Ads directed to.
- Sent 75 rebate forms to Merced and Santa Clara's HHW programs in preparation for the events.
- Collected surveys from our contacts at Merced and Santa Clara County, which asked participants how they heard about the event.
- Collected a total of 3 mercury thermostats at events that took place this quarter.
- Received photographs from the Merced and Santa Clara County events (see below).

## Environmental Contractors

### Summary

Environmental contractors are an important audience for TRC. While conducting outreach to other audiences it has been reported that environmental contractors are hired to manage waste disposal during renovations. In the third quarter we continued to conduct outreach to these contractors that specialize in removing and properly disposing of hazardous waste. We also collected names of environmental contractors mentioned in outreach to other audiences to add to the potential targets. Our primary goal was to place bins or pails with environmental contractors and offer them a \$2.50 incentive rebate per mercury thermostat.

### Barriers

- Delays due to needing approval from corporate before participating in the program.
- Difficulty reaching the decision maker; therefore, we leave numerous voicemails.
- A majority of environmental contractors respond that they hardly ever encounter mercury thermostats and there is a limited number of mercury thermostats in circulation.

### Motivators

- \$70,000 fine for improper disposal
- \$2.50 incentive for each returned thermostat
- Social norms: Mentioning number of bins environmental contractors have received throughout California and/or naming those companies.

### Results

- We conducted 11 outreach calls to environmental contractors.

- TRC was unsuccessful in placing bins with this audience during the quarter.

## **General Contractors**

### **Summary**

TRC continues to complete outreach to general contractors in hopes of gaining greater participation. Our outreach efforts are to inform the contractor of our program if they are not already aware, and sign the contractor up for recycling through a bin or pail. Our primary goal was to place bins or pails with general contractors and offer them a \$2.50 incentive rebate per mercury thermostat.

### **Barriers**

- In terms of contractor outreach, we continue to contact locations who don't want to be contacted.
- A majority of general contractors respond that they either do not work with thermostats or that they hardly ever encounter mercury thermostats.
- A large percentage of calls result in voicemail messages that are not returned.

### **Motivators**

- We did not find any motivators for this audience during the quarter.

### **Results**

- TRC called 143 general contractors. These efforts yielded zero bin placements.

## **HVAC Contractors**

### **Summary**

TRC continues to complete outreach to HVAC contractors in hopes of gaining greater participation. Our calls are made to inform the contractor of our program if they are not already aware, and sign the contractor up for recycling through a bin or pail. Our primary goal was to place bins or pails with HVAC contractors and offer them a \$2.50 incentive rebate per mercury thermostat.

### **Barriers**

- In terms of contractor outreach, we continue to contact locations who don't want to be contacted.
- A majority of contractors respond that they hardly ever encounter mercury thermostats.
- Another frequent response is that they already recycle through their wholesaler.
- A majority of calls result in voicemail messages that are not returned.

### **Motivators**

- \$70,000 fine for improper disposal

- Although the majority of our sign-ups this quarter were from contractors who already recycled at the wholesaler, we were able to get them to directly participate and order a container with the incentive offer.

## **Results**

- TRC called 26 HVAC contractors.
- During the third quarter we had zero sign-ups from HVAC contractors.

## **Demolition Contractors**

### **Summary**

TRC continues to complete outreach to demolition contractors in hopes of gaining greater participation. Our calls are made to inform the contractor of our program if they are not already aware, and sign the contractor up for recycling through a bin or pail. Our primary goal was to place bins or pails with demolition contractors and offer them a \$2.50 incentive rebate per mercury thermostat.

### **Barriers**

- In terms of contractor outreach, we continue to contact locations who don't want to be contacted.
- A majority of contractors respond that they either do not work with thermostats or that they hardly ever encounter mercury thermostats.
- A majority of calls result in voicemail messages that are not returned.

### **Motivators**

- \$70,000 fine for improper disposal
- This quarter, most of the demolition contractor calls resulted in a response that they never or vary rarely see mercury thermostats, but we had a few that were willing to take a container just in case.

## **Results**

- TRC made 67 calls to demolition contractors. During the quarter we had zero sign-ups from demolition contractors.
- K2 Demolition removed themselves from the program because, "They have not collected any mercury thermostats at this point and have found out that if they do come across them during demolition, they contract another company to safely remove them so they do not need to have the collection bin."

## **Wholesalers**

### **Summary**

TRC continues to complete outreach to both participating and non-participating HVAC wholesalers with hopes of gaining greater participation. Our collections during the third quarter were slightly higher compared to the same time last year. During the third quarter there was an average of 25 thermostats in the bins being returned, down from 27 in the second quarter.

### **Barriers**

- Non-compliant wholesalers continue to state they sell only plumbing supplies or are fabrication locations, and therefore will not accept a recycling container.
- Participating wholesalers are seeing a decline in collections, and send some of their recycling bins back to us because they do not need them anymore.

### **Motivators**

- We get positive feedback on the ease of the program from current collection locations.

### **Results**

- We completed 215 calls to wholesalers who hadn't returned a container in the past 6 months.
- TRC performed 151 site visits to wholesale collection locations in the program, and six additional visits to non-compliant wholesalers between July and September of 2019.
- We did not have any wholesale locations request a bin display that did not currently have one when they were offered during site visits.
- We were unsuccessful in recruiting any non-compliant wholesalers into our program during site visits.

## **Summary of Outreach Activities for Audience B**

### **Building Departments**

#### **Summary**

Building Departments are an audience that can assist with the collection of mercury-added thermostats through informing contractors, inspectors and other professionals about the importance of properly disposing of mercury thermostats. After research and communication with this audience TRC has found that employees of building departments have little contact with thermostats. However, the individuals who seek the services of the building department may come in contact with thermostats in their line of work. Therefore, building departments have served as a conduit for outreach.

In the third quarter TRC emailed 7 building department employees across the state to remind them about the program and pass along information they can communicate to their visitors. We had no responses or engagement from our outreach this quarter. We also began working on a universal waste checklist that will call out mercury thermostats (as opposed to “mercury-containing equipment”) that we can provide to entities.

## Barriers

- Building department employees have very little interest in our messaging or their responsibility in communicating the program.
- We had no interest in third-party assistance from organizations for the universal waste checklist adjustments.

## Motivators

- N/A

## Results

- TRC emailed 7 building departments with helpful information to pass along to visitors, with no response or interaction from recipients.
- A universal waste checklist that includes mercury thermostats, not just mercury equipment, was created for distribution.

## Utility Companies

### Summary

We are currently working to place outreach materials concerning mercury thermostat recycling alongside related rebate programs and other outreach initiatives that are active at the utility companies in our database. These efforts may include: posting information and links to the TRC website on their own websites, distributing bill inserts, posting on their social media accounts, sending out a TRC article in their newsletters, and/or performing point of purchase outreach with TRC materials at stores such as BestBuy, Lowe's, Home Depot, and Sears.

In Q1'19, we continued our support of these partnerships by conducting an internal audit to identify materials that needed updating and to assess our outreach strategy.

In Q2'19, we created an updated database to ensure that our ongoing outreach efforts are directly aligned with the metrics of interest as detailed in our proposed plans and DTSC consent orders. We reached out to 17 utility companies (both those that had promoted our program in the past and those that had not) to determine whether these utilities either directly install thermostats in the homes of their residents, use third-party contractors to do this installation, or offer rebates for residents who opt to self-install thermostats. Our updated outreach plan is tailored to each utility based on their designation within these three categories. We confirmed this information for 6 of the utility companies contacted.

In Q3'19 we continued our outreach with two main points of focus:

1. Identifying which "audience" 15 selected utility companies fell under (i.e. they either directly install thermostats in the homes of their residents, use third-party contractors to

S. GRONER ASSOCIATES, INC.

do these installations, or offer a rebate for those residents who opt to self-install thermostats).

2. Gathering metrics from utility companies to measure the efficacy of our past promotional efforts with them. Part of this effort involved ensuring that TRC links were still active on the webpages they had initially been added to, and requesting updates when necessary. Utilities hosting TRC links were also encouraged to add additional TRC resources to their pages (i.e. links to the rebate form and zip code locator).

Outreach efforts this quarter resulted in the audience determination of 12 utility companies, and the collection of partial data for past outreach efforts conducted by 6 utility companies (see the table below in “Results”). In order to provide our utility partners with the most up-to-date and effective promotional resources possible, TRC also began (and largely finalized) the redesign of the following promotional materials: bill inserts, tear pads, and fliers.

In Q4’19, the new outreach materials will be printed and distributed to our partners. TRC will continue to gather historical data on DTSC’s mandated metrics of interest, and continue its promotional outreach to old and new partners.

## **Barriers**

- **Not a Priority:** We have little leverage over utility companies. Any agreements or partnerships that may become established are subject to be put on hold or delayed by the utility companies, and contacts may become unresponsive for long periods of time. Our program is not a priority, even to the most enthusiastic partners, and follow-ups are always necessary.
- **Keeping Utility Companies Interested:** As our partnerships with the utility companies become more complex and more action and information is required on their end, utility companies tend to become less willing to participate in the program.
- **Connecting with the Right People:** It has been difficult to connect with the correct staff within their organizations. Contacts we had previously established have either moved into new departments or no longer work for the utility company. Getting ahold of third-party contractors has also taken time and required follow-up.
- **Residential Rebate Programs Phasing Out:** SoCal Gas has stated that their residential rebate program is being phased out because of a lack of savings and resident participation in the program. This would become a barrier if more utility companies experience the same trends and act similarly.

## **Motivators**

- **Large Utility Companies Host Similar Programs:** Promoting the mercury thermostat rebate program is a helpful tool to aid their existing energy saving initiative.
- **Leveraging Current Partners:** Mentioning the participation of larger utility companies, such as PG&E and SMUD in our outreach program has been an effective motivating factor.

S. GRONER ASSOCIATES, INC.

- Convenient Materials: Providing multiple mediums for promotion and “ready to go” materials have made the process easier for utility companies.

## Results

- Determined which “audience” (internal designation) the following 12 utility companies fall under, and began to work with these partners to develop audience-specific promotions:
  - Imperial Utilities
  - Pacific Corp
  - City of Anaheim Public Utilities Department
  - Banning Utilities
  - Alameda Municipal Power
  - Burbank Utilities
  - Biggs Utilities
  - Corona Utilities
  - SMUD
  - PG&E
  - Liberty Utilities
  - Lompoc Utilities
- Gathered partial data for DTSC-mandated metrics of interest for the following 6 Utility Companies (see table below for specific results):
  - Banning Utilities
  - Alameda Municipal Power
  - Burbank Utilities
  - Biggs Utilities
  - SoCal Gas
  - PG&E
- 48 calls placed and received.
- 53 emails sent and received.

**Table 6. Utility Company Metrics.**

Utility Company	Obtained Metrics: Number of Residential Customers Reached	Date of Outreach
Alameda Municipal Power	33,000 customers received a newsletter that contained information about the TRC program.	Newsletter sent August 2018.
Banning Utilities	779 views on the page that hosts the TRC program link.	Views collected from 6/28/19 - 10/2/19.

Biggs Utilities	800 residential customers received TRC bill inserts	Bill inserts distributed 11/30/18.
Burbank Utilities	200 fliers were sent to Burbank in December 2018. These fliers were placed in a collection center that receives approximately 100 visitors per day.	Period of time that Burbank had flyers: December 2018 - June 2019
PG&E	26,723 visits to page with TRC link	Page visits collected from 2/20/19 - 7/19/19.
SoCal Gas	243 total retail stores visited and 60 tabling events hosted per month at which TRC materials are handed out.	Outreach began December, 2018 and has continued through Q3'19.

## School Districts

### Summary

We prioritized outreach to schools with the most appropriate combination of the following parameters: average temperature of the region, the age of the structure, and the size of the population (an indication of the number and size of schools). Ultimately, our outreach will include all California schools, but we structured our initial outreach using these criteria. At this point, the outreach program's communications consist of cold-calls and emails with the purpose of distributing collection bins, collecting pertinent information about construction plans, communicating the requirement to recycle mercury thermostats, and understanding the process that individual schools take for hazardous waste disposal.

From Q4'17-Q4'18, TRC made repeated phone calls to schools that had received Proposition 39 grants. Prop 39 grant recipients are advantageous to our outreach because we can identify schools that are actively renovating and modernizing their facilities with environmental impact in mind. This outreach targeted the facility managers of individual schools under the assumption that they might have more capacity to speak with us, as well as feel more ownership over the safety of the school. During this time, none of the schools contacted requested a bin. In Q1'19, TRC changed tactics and began contacting school district offices. During the first quarter, one bin was placed.

In Q2'19, TRC contacted 97 unique school districts and began corresponding with two districts about placing bins. During these outreach calls, TRC was also able to gather the names of 8 hazardous waste companies that districts use to dispose of their waste. TRC also began outreach to 17 Facility Maintenance Organizations in an effort to disseminate information about the program to their membership.

In Q3'19, TRC contacted 101 school districts, finalized bin placements for the two districts identified in Q2'19, and identified 7 hazardous waste companies that districts contract to handle waste disposal. In Q4'19 TRC will continue conducting outreach to school districts in an effort to place bins, and continue gathering the contact information of hazardous waste haulers.

### **Barriers**

- There were difficulties getting in contact with many of the district facility managers. Both cold calls and follow-up calls were conducted during requested time frames, and frequently resulted in being transferred to a voicemail.
- Schools would rather continue the pre-existing relationships they have with their waste haulers than change their process to accommodate the TRC program.

### **Motivators**

- Removal of hazardous materials from areas in which children might be exposed & the knowledge that these materials will be properly recycled by a trusted source.
- Saving money by not hiring a waste hauler to collect their mercury thermostats, while also gaining money from TRC's rebate.
- Avoiding the time taken to coordinate with a waste hauler.

### **Results**

- 383 calls were placed to 101 unique school districts and stand-alone schools (i.e. schools that are not associated with a school district and operate on their own).
- 92 emails were sent & received.
- Bins sent to 2 school districts
  - Oxnard Union High School District
  - Ross Valley Elementary School District]
- TRC discontinued outreach to 22 school districts/unique schools after at least 6 calls and follow-up emails were sent with adequate time to respond.
- 45 school districts/unique schools declined participation, mostly because they had already completed renovations.
- Names of school districts/unique schools that declined participation:
  - William S. Hart Union High School District
  - Lucia Mar Unified School District
  - Campbell Union School District
  - Nevada City School District
  - West Park Charter Academy
  - Cuddeback Union Elementary School District
  - Antioch Charter Academy
  - HomeTech Charter

- Palo Verde Union Elementary School District
- Uncovered the following Hazardous Waste Hauler information:
  - Lucia Mar Unified uses a local source whose name is Mike Wilson; his number is 805.474.3000 ext: 1041
  - Campbell Union School District uses “Universal Waste”
  - Pivot Online Charter - North Bay uses “Matrix Building Solutions” and “Emcor Mesa Energy Systems, Inc.”
  - Oak Run Elementary uses “Meyer Crane”
  - Southern Humboldt Joint Unified School District uses “Evans Mechanical”
  - Ferndale Unified School District uses “RCEA”
  - Nord Country School uses “Jesse Heating and Air”

- Corresponded with Oxnard Union High School District & Ross Valley School District about hosting bins.

*Note: A call is defined as successful if the target person is reached and the full call script was implemented.*

## Universities/Colleges

### Summary

TRC continues to complete outreach to universities and colleges with hopes of placing recycling containers with their facility departments. Most universities and colleges have a facility manager, but they tend not to work on HVAC-related repairs or replacements. The recycling responsibility is typically left to the contractor working on the project. Our outreach will focus on educating facility managers about recycling mercury-added thermostats and supplying them with a bin if their facility has mercury-added thermostats on-site. The managers can then supply their contractors with the bin or have the contractor leave the thermostats with the manager, who can then properly recycle them.

### Barriers

- Most calls end in a voicemail that is left unreturned or simply hang-ups.
- Many universities say that if there were to be mercury thermostats that need replaced and recycled it would be taken care of by the hired contractor.
- Numerous schools we contacted stated that mercury thermostats had been switched out years ago.

### Motivators

- N/A

### Results

- A total of 12 calls were made to universities and colleges in the third quarter.
- We were unsuccessful in placing any bins or pails with the locations.

## Summary of Outreach Activities for Audience C

## Property Managers

### Commercial Property Managers

#### Summary

TRC continues to perform outreach to commercial property managers with hopes of gaining greater participation. We are helping commercial property managers become more aware of rebate incentives as an effective way of encouraging the proper disposal of mercury thermostats via a TRC recycling bin. One strategy to spread our message to this audience was to have

property manager associations serve as the communicator. Property management associations serve as a conduit of information to property management companies regarding best practices and policy updates.

In the third quarter TRC continued outreach to commercial property management associations with the goal of placing articles in their publications (i.e. blog, newsletter, email, etc.) and/or on their websites.

Below is a list of the commercial property management associations we have been in contact with:

1. California Association of Realtors (CAR)
2. NAIOP SoCal
3. Building Owners and Managers Association of California (BOMACal)
  - a. Silicon Valley
  - b. San Francisco
  - c. San Diego
  - d. Sacramento
  - e. Oakland-East Bay
  - f. Orange County
  - g. Greater Los Angeles
  - h. Inland Empire
4. Association of Commercial Real Estate (ACRE)
5. AIR Commercial Real Estate Association
6. International Council of Shopping Centers (ICSC)

### **Barriers**

- Most calls end in a voicemail that is left unreturned or simply hang-ups.
- Many property managers we contact state that they no longer have mercury thermostats in the properties.

### **Motivators**

- N/A

### **Results**

- TRC completed outreach to all 13 commercial property management associations.
- We were unable to place any articles this quarter, and to our knowledge no information on the TRC program was shared through their outreach.

### **Residential Property Managers**

### **Summary**

S.GRONER ASSOCIATES, INC.

Residential property managers should be able to properly identify and promote the safe removal and disposal of mercury-added thermostats within their properties. We have focused on helping residential property managers become more aware of the rebate incentives and trying to place recycling bins with them to promote proper disposal. Residential property managers need to be aware of AB-245 to avoid the costly penalty of not recycling thermostats properly.

In the third quarter TRC continued outreach to residential property management associations with the goal of placing articles in their publications (i.e. blog, newsletter, email, etc.) and/or on their websites.

Below is a list of the residential property management associations we are currently in contact with:

1. California The National Association of Residential Property Managers (CALNARPM)
  - a. Alameda/ Contra Costa o Long Beach/ Orange County
  - b. Los Angeles
  - c. Marin/ Sonoma
  - d. Monterey Bay o Northern California Central Valley
  - e. Sacramento o San Diego
  - f. Santa Clara
2. California Apartment Association (CAA)
  - a. Central Valley
  - b. Contra Costa
  - c. Greater Fresno
  - d. Greater Inland Empire
  - e. Income Property Assn. of Kern
  - f. Los Angeles
  - g. Marin Income Property Association
  - h. North Bay
  - i. Orange County
  - j. Rental Housing Assn. of Sacramento Valley
  - k. San Diego
  - l. San Francisco Apartment Association
  - m. Solano
  - n. Tri-County
3. International Realty & Investments
4. Apartment Association of Greater Los Angeles (AAGLA)
5. Apartment Owners Association of California, Inc
  - a. San Fernando Valley
  - b. Orange County
  - c. Los Angeles
  - d. San Diego
  - e. Long Beach
  - f. Northern California
6. FirstService Residential California
  - a. Bay Area

---

**Thermostat Recycling Corporation**

Quarterly Report 2019 Q3

SGA | 21

- b. Inland Empire
  - c. Los Angeles
  - d. Orange County
  - e. Palm Desert
  - f. Sacramento
  - g. San Diego
  - h. Santa Clarita
  - i. San Francisco
7. California Association of Realtors (NAR)

### **Barriers**

- Most calls end in a voicemail that is left unreturned or simply hang-ups.
- Many property managers we contact state that they no longer have mercury thermostats in the properties.

### **Motivators**

- N/A

### **Results**

- TRC completed outreach to 21 residential property management associations.
- We were unable to place any articles this quarter, and to our knowledge no information on the TRC program was shared through their outreach.

## **Hotel/Motel**

### **Summary**

Most hotels and motels need to consistently renovate their structures to meet the standards of their customers; therefore, TRC does not see the majority of these establishments as being a fruitful audience for program success. Based on calls, hotels, motels, inns, and bed & breakfasts of lower revenue have the greatest likelihood of having mercury-containing thermostats. The best means of contacting these businesses is by partnering with lodging associations and working to place an article about TRC's program in their communications and outreach. The potential legal and financial repercussions of improper waste disposal should be a powerful motivator for this audience.

We continued outreach to hotels and motels during the third quarter with the goal of placing an article (see appendix) in their publications (i.e. blog, newsletter, email, etc.) and/or on their websites. Below is a list of the hotel-motel associations we are in contact with:

1. California Hotel & Lodging Association
2. San Diego County Hotel Motel Association
3. Anaheim/Orange County Hotel Lodging Association

4. Sonoma County Lodging Association
5. Sacramento Hotel Association
6. Hotel Council of San Francisco
7. Taiwan Hotel Motel Association of Southern California
8. Hotel Association of Los Angeles
9. Boutique and Lifestyle Lodging Association

**Barriers**

- The associations are difficult to get ahold of and seem to be unresponsive.

**Motivators**

- When we are successful in getting someone on the phone, initially they seem interested.

**Results**

- TRC completed outreach to the 9 associations mentioned above.
- We were unable to place any articles this quarter, and to our knowledge no information on the TRC program was shared through their outreach.

## Pilot Program

### Summary of Pilot Activities for Audience A

#### Retail/Consumer

##### Summary

In this pilot program, we tested immediate monetary incentives with six retailers throughout the state of California. The goal of the retail pilot was to initiate and maintain a robust program that: engaged participating retailers, increased overall collection rates, and provided conclusive evidence to indicate what the most effective financial incentive amount per recycled mercury-added thermostat should be for TRC's California program.

Nine hardware stores initially signed up for the program, but one location in Folsom was not able to continue participation due to unrelated internal business issues. Two other stores — one in Crestline, CA (Q2'18), and another in Stockton, CA (Q3'18) — requested removal from the program due to the lack of participation by their customers. The remaining hardware stores are located in Clovis, Los Angeles, Sacramento, West Hollywood, and Fresno, which had two stores. We also have three control stores where no incentive is offered for the return of mercury thermostats. One of these controls is located in Oakland, and the other two are located in San Francisco. We identified store locations based on the average age of structures in the area, the income level of the city, the size of the population, and the potential for temperature fluctuation.

During the third quarter, we continued to support these six retail pilot partners by providing financial incentives in the form of an immediate in-store credit for consumers and contractors who turned in mercury-added thermostats with the corresponding rebate forms. We also supported the stores by continuing to conduct check-in calls in order to determine whether stores needed any new materials or support.

##### Barriers

- The surrounding communities were built after mercury thermostats stopped being sold.
- The type of hardware store: one store indicated that they were an industrial hardware store and seldom saw homeowners.
- New employees sometimes weren't trained on the specifics of the recycling program.
- Misplacement of materials: customer logs and promotional materials.

##### Motivators

- Store location information was placed on the TRC website via a zip code locator.
- Received promotional materials from TRC reminding employees about the program.
- The desire to help their community.

##### Results

- Total calls placed: 6

## HHW

### Summary

In Q1'17, TRC initiated a pilot with three HHW county programs across the state of California. The goal was to measure the effectiveness of a \$10 mail-in-rebate incentive intended to drive residents to recycle mercury-added thermostats. This included San Bernardino County (South), Santa Clara County (Central), and Del Norte County (North). This was in response to the Approval with Modification Letter from DTSC on October 7, 2016:

*“2. TRC is to implement a pilot project that provides a \$10 per thermostat incentive payment (using either a mail-in rebate or gift card) to anyone who turns in thermostats at household hazardous waste collection facilities. This type of pilot project was proposed in TRC’s May 10, 2016 draft Pilot Programs Plan but removed from its August, 2016 submittal.”*

During the third quarter, TRC worked with the participating HHWs to continue reinforcement of the program and its goals. The rebate was provided to HHWs when the incentive forms were turned in, and check-in calls were conducted. Out of all the target audiences, HHW program managers have been particularly supportive of TRC’s program goals, as they align with their goal of effectively collecting hazardous waste from residents.

### Barriers

- The length of time it can take to receive a relatively small rebate deters people from participation because people feel as though it is a waste of their time.

### Motivators

- Shared goals/role of environmental stewardship.
- Sandwich board sign and fliers advertising the TRC program are useful visual prompts for residents.

### Results

- No known incentives were paid to residents through an HHW drop-off.
- 43 check-in calls were placed to all HHWs in the third quarter.

## Wholesaler

### Summary

In Q1'17, TRC initiated a pilot with 12 HVAC wholesalers across the state to measure the effectiveness of monetary incentives on HVAC wholesalers’ return rates. \$100 rebates were offered for the return of bins containing 40 or more mercury thermostats, while \$2.50 was

S. GRONER ASSOCIATES, INC.

offered per thermostat for bins containing less than forty thermostats. This is in response to the Approval with Modification Letter from DTSC on October 7, 2016:

*“3. TRC is to implement a pilot project that provides \$100 mail-in rebate for each bin return by HVAC Wholesalers that contain 40 or more thermostats, and for bins with less than 40 thermostats, a prorated amount of \$2.50 for each thermostat in the returned bin. Although a pilot project of this type was not included in the May 10, 2016 or the August 8, 2016 pilot project plans, DTSC notes that the return rate for HVAC Wholesaler return of collection bins has remained around 55%. A return rate this low, in the primary participant group that has been the focus TRC’s program, is troubling, and it is important for TRC to explore methods to improve the collections in these bins, and the rate of their return.”*

The 12 HVAC wholesaler collection sites were chosen for the pilot program using quota sampling to ensure that they met the following criteria:

1. All had a combined, baseline return rate of 55% (for a representative sample).
2. At least four had been in the program for more than two years.
3. At least three returned more than three bins in the past year.
4. At least four were located in Northern California.
5. At least four were located in Southern California.

We sent each participating manager a packet with instructions on how to file the new HVAC Wholesaler invoice form (see appendix) in order to receive their rebate check after returning their TRC bin. We also included 25 forms with their bins.

#### Letter Sent to Wholesale Managers

Hello!

Thank you for agreeing to participate in Thermostat Recycling Corporation’s (TRC) HVAC Wholesaler Incentive Program. For each bin returned with 40 or more thermostats, we will provide a \$100 reimbursement, or \$2.50 per thermostat if the bin contains fewer than 40 thermostats. This incentive program will last until December 31, 2017.

During this year, I will be contacting you once a quarter to follow up with the program. Feel free to contact me with any questions you may have, at this email: [ksingh@sga-inc.net](mailto:ksingh@sga-inc.net) or by calling me at 732-485-4589.

Attached you will find the Invoice Form necessary to obtain the reimbursement. These will also be sent to your store’s location by mail. Please read the attached instructions, which detail how to properly submit the form to TRC.

Again, thank you for your participation!

Sincerely,  
X

The program was extended past December 31, 2017 to honor incentives occurring through 2019.

In the third quarter of 2019, TRC continued this pilot with 12 HVAC wholesalers across the state of California to measure the effectiveness of monetary incentives on HVAC wholesalers' return rates. We supported our HVAC Wholesaler pilot partners by providing the incentive when rebate forms or bins were turned in and when conducting check-in calls.

### **Barriers**

- Employee turnover creates a lack of training for the new employee.
- Loss of materials that describe the program.

### **Motivators**

- Ease of the process.
- The program brings contractors into their stores.
- Increased concern for the environment and embracement of the positive benefit the program delivers.

### **Results**

- No active wholesalers in the pilot were paid an incentive this quarter.

## **Summary of Pilot Activities for Audience B**

### **School Districts**

#### **Summary**

Schools can best support the collection of mercury-added thermostats by being informed of proper disposal procedures and by having a collection bin on hand. Given their limited funding, we believe that public schools undergo a longer renovation process and could have decades-old thermostats in their facilities. Using the average temperature of a region, the age of the area's structures, and the population size as parameters, we have prioritized schools that are most likely to have mercury thermostats.

The pilot program differs from the outreach program in that our communication with pilot schools is approached as a partnership, tracked more closely, and given more attention than our communication with schools in the general outreach program. Additionally, the pilot program tracks a subset of schools and must offer the \$5 incentive for every mercury t-stat, whereas the general school outreach may offer the \$5 incentive as an option but is not required to do so.

In Q1'19, our general outreach calls helped us identify one school district (Union Middle School) that was replacing mercury thermostats. This school requested a bin and was added to the pilot program. In Q2'19, we continued our outreach to schools and identified two more schools that were interested in bins. While the bulk of the work to secure these bin placements occurred in Q2'19, the bin order was technically not placed until early July, so it is counted in this report for Q3'19. These two schools have also been added to the pilot program.

In Q3'19, the two bin placements mentioned above were finalized for Oxnard Union High School District and Ross Valley School District during general outreach. These contacts were then placed in the pilot program to track continued correspondence.

### **Barriers**

- Thermostats Already Replaced: The majority of successfully contacted schools have already replaced their mercury thermostats (many under proposition 39).
- Difficulty in Connecting with the Appropriate Point of Contact. Both cold calls and follow-up calls conducted during requested time frames were frequently transferred to voicemail, and not returned.
- Schools would rather continue the pre-existing relationships they have with their waste haulers than change their process to accommodate the TRC program.

### **Motivators**

- Legal repercussions of not maintaining a safe environment for school children.
- Saving money by not hiring a waste hauler to collect their mercury thermostats, while also gaining money from TRC's rebate.
- Removal of hazardous materials from areas in which children might be exposed & the knowledge that these materials will be properly recycled by a trusted source.
- Avoiding the time taken to coordinate with a waste hauler.

### **Results**

- Bins placed this quarter: 2 (same as general audience).
- 1 call was placed to pilot school districts.
- 4 total emails were sent & received.

## **Summary of Pilot Activities for Audience C**

### **Utility Companies**

#### **Summary**

Utility companies are a key audience for TRC because they have the potential to reach a large section of an area's population, and their websites are often the first stop for residents looking to upgrade their homes for energy efficiency. Many of our efforts piggyback off of existing programs that provide information and rebates for items such as thermostats and other

S. GRONER ASSOCIATES, INC.

appliances. Originally, the pilot was going to run through utility companies' contractors, who we thought regularly installed and removed thermostats for their customers. However, upon further investigation, we determined that it is not common practice for utility companies to employ contractors. As such, we switched tactics to better fit the goals and structure of the utility companies we engage with during our outreach.

The utility pilot seeks to offer a “collect all” thermostat recycling program to some utility customers, as well as to collect additional data points (this information is additional in relation to the metrics tracked for general outreach). Utility customers that live in areas with collect-all bins will be offered a way to recycle any thermostats they have (hence “collect all”), in addition to receiving a \$5 rebate for mercury-added thermostats. We are running this “collect all” program with two of our utility pilots as a way of determining whether the identification of mercury thermostats (vs. electronic thermostats) acts as a barrier to collection, as well as to determine whether the number of electronic thermostats being recycled is comparable to the number of mercury thermostats being recycled.

In Q1'19, TRC continued its support of these partnerships by conducting an internal audit to identify materials that required updating and to assess our outreach strategy.

In Q2'19 TRC created an updated database to ensure that our ongoing outreach efforts are directly aligned with the metrics of interest as detailed in our proposed plans and DTSC consent orders. We reached out to both of our pilot utility companies to determine whether they either directly install thermostats in the homes of their residents, use a third-party contractor to do this installation, or offer a rebate for residents who opt to install thermostats themselves. Our updated outreach plan for utility companies is based on their designation within these three categories. We were able to confirm this information for the SF Public Utilities Commission (SFPUC).

In Q3'19 we were unable to identify which audience our second pilot utility company in Lassen fell under. In the past, they have not been willing to carry POP materials.

In Q4'19 we will work to implement outreach initiatives with SFPUC, reassess our partnership with Lassen and the possibilities that exist there, and work to expand the overall number of utility companies in our pilot program.

### **Barriers**

- Connecting and Following-up: It is difficult to get ahold of and to follow up with the employees of utility companies.
- Approval: The point of contact often needs to get approval from supervisors and this process can be lengthy.

### **Motivators**

- Utility companies see mercury-added thermostat recycling as a worthwhile cause.

- The TRC program fits well with the existing energy efficiency and rebate programs that utility companies offer.

## Results

- 6 emails sent & received.
- No thermostat returns from the retail stores, wholesalers, HVAC contractor and HHW facility associated with the utility pilot.
- Received no response from our contact at Lassen.

## Property Managers

### Summary

Property managers are a valuable audience for TRC because they can support the collection of mercury-added thermostats by practicing the safe removal and disposal of these thermostats within their properties. Typically, tenants will request thermostat replacements when a thermostat breaks rather than management conducting periodic checks, but property managers are often the parties responsible for ensuring that thermostats are up to date within the buildings they manage.

All of the property managers we spoke with in our scoping calls had stated that contractors were hired and are trusted to dispose of thermostats properly. A lack of awareness of the legal repercussions from the managers' standpoint provided an opportunity for outreach and engagement. In-person outreach was conducted for this pilot, as it was expected to achieve better results than phone or email outreach.

Our property manager pilot includes both residential and commercial managers located in Long Beach and Oakland. The pilot is a collect-all program where property managers collect both electronic and mercury thermostats for recycling. The goal of this pilot is to observe whether or not identification of mercury thermostats acts as a barrier to the collection and proper recycling of mercury thermostats. The pilot will also provide us with a general understanding of the ratio of mercury vs. electronic thermostats that are being disposed of. Our tactics were developed to assist commercial and residential property managers in San Francisco, Oakland, Los Angeles, and Long Beach to become more aware of the TRC incentive Program.

In Q4'18, SGA created a database of 22 property management companies in Oakland and Los Angeles that we could visit in-person and place a TRC collection bin with. We also created a call script based on the results of previous outreach efforts to this audience that addressed barriers and motivators. In Q4'18, we began in-person outreach, visited 11 property managers in Oakland and placed 7 bins. In Q1'19, we visited 7 property managers in Long Beach and placed 4 bins. In Q2'19, we visited 9 property management companies in the Los Angeles area and placed 3 bins.

In Q3'19, we visited 10 property management companies in Long Beach and placed 5 bins. We followed up these visits with an email to the companies who accepted the bin. This follow up serves two purposes:

- Provides an easy way for our contact to reach us if they had questions,
- Provides an opportunity to ask for updates about thermostat collections.

After placing a bin with a company called “By the Sea,” they reached out and requested to have their bin picked up because they no longer wanted it in their office. After first explaining the benefits of the program and informing them of the smaller pail option, we picked up the bin. Thus, the total number of bins distributed this quarter is 4.

### Barriers

- Frequency: This audience believes they do not have mercury thermostats in their properties or do not come across them enough to host a bin
- Storage: This audience states they don’t have a place to keep the bin, even when offered the smaller pail. They do not want to store the bin in their work space.

### Motivators

- In-person Outreach: Having the bin in person at the location appeared to make property managers more motivated to accept the bin
- Official Materials Visible: Having TRC materials that detailed the \$70,000 fine that we could show property managers in person appeared to make property managers less skeptical about the program and more willing to accept a bin
- Minimum Effort to Participate: Telling property managers that they did not have to print the rebate form for residents appeared to make them more willing to accept the bin

### Results

- Visited 10 property management companies in the Los Angeles area and placed 4 collect-all bins.
- 1 bin was placed at each of the following property management businesses:
  - Action Management (Residential)
  - Phoenix Property Management (Residential)
  - Brockman Properties (Residential)
  - Living Property Management (Residential)
  - By the Sea (Residential)
- 1 bin was returned by the following property management business:
  - By the Sea (Residential)
- 8 calls or emails were sent this quarter.

### Table 7. Pilot Property Management Partnerships.

S.GRONER ASSOCIATES, INC.

Description	July '19	Aug '19	Sept '19
Number of calls/emails	0	8	0
Number of visits	10	0	0
Number of bins placed	5	-1	0

## Program Modification Plan

**Proposed Modification #1:** Provide smaller recycling pails to requesting locations.

- Completed/ongoing
- Offered in person during site visits and trade shows, as well as outreach calls

**Proposed Modification #2:** Move “miss you” postcards sent from 3 times a year to 6 times a year to current collection locations.

- Ongoing/in process
- In Q3: sent 689 postcards in July and September

**Proposed Modification #3:** Send quarterly reminder shipment emails to all collection locations not returning a container in 6 months.

- Ongoing/in process
- In Q3: sent 172 emails in September

**Proposed Modification #4:** Call all collection locations 4 times a year that haven’t shipped a bin in 6 months.

- Made 415 calls in Q3 to these locations

**Proposed Modification #5:** Begin offering a merchandising display to all wholesale or retail locations visited during store sweeps.

- Completed, most already had displays, keep their bin in the back, or didn’t have room for them. We had no requests for the merchandising displays in Q3.

**Proposed Modification #6:** Execute site visit sweeps 2 times a year to clean out locations with a minimum visit of 100 locations each sweep.

- Required to visit every location every year
- Q3: 151 current collection site visits | 6 non-compliant visits

**Proposed Modification #7:** Ensure all marketing collateral include a version in Spanish.

- We have Spanish translations for all current marketing material, available on our website and well as printed by request
- Have link for Spanish version on all new advertisements, targeting Spanish speaking homeowners with new brochure and messaging

**Proposed Modification #8:** Produce a California specific YouTube pop-up advertisement for

specific Google AdWords key terms which is informed by the non-monetary message testing from Group A pilot plan.

- Completed

**Proposed Modification #9:** Change California specific marketing collateral to include messaging which are informed by the non-monetary message testing from Group A pilot plan.

- Ongoing, all new marketing includes family/safety messaging

**Proposed Modification #10:** Once a year, meet with other Extended Producer Responsibility (EPR) groups which operate in California to discuss best practices and ways to improve outreach.

- Attended by a TRC employee in the third quarter of 2018, a meeting for the fourth quarter of 2019 is in the works

**Proposed Modification #11:** Reach out to all HVAC wholesale locations across the State that are not currently collecting mercury-added thermostats.

- 6 visits in Q3

**Proposed Modification #12:** Review all collection locations' geographic coverage with GIS mapping software. The findings are to be published in each year's annual report submission. Where gaps in coverage are discovered, TRC will implement a campaign to target placing recycling containers in the region.

- Reference GIS maps

## Geographic Information Systems (GIS)

The following maps show the total number of collection locations throughout the state of California with the location's respective population per county. Size of population helps to depict the number of residents served by our collection sites.

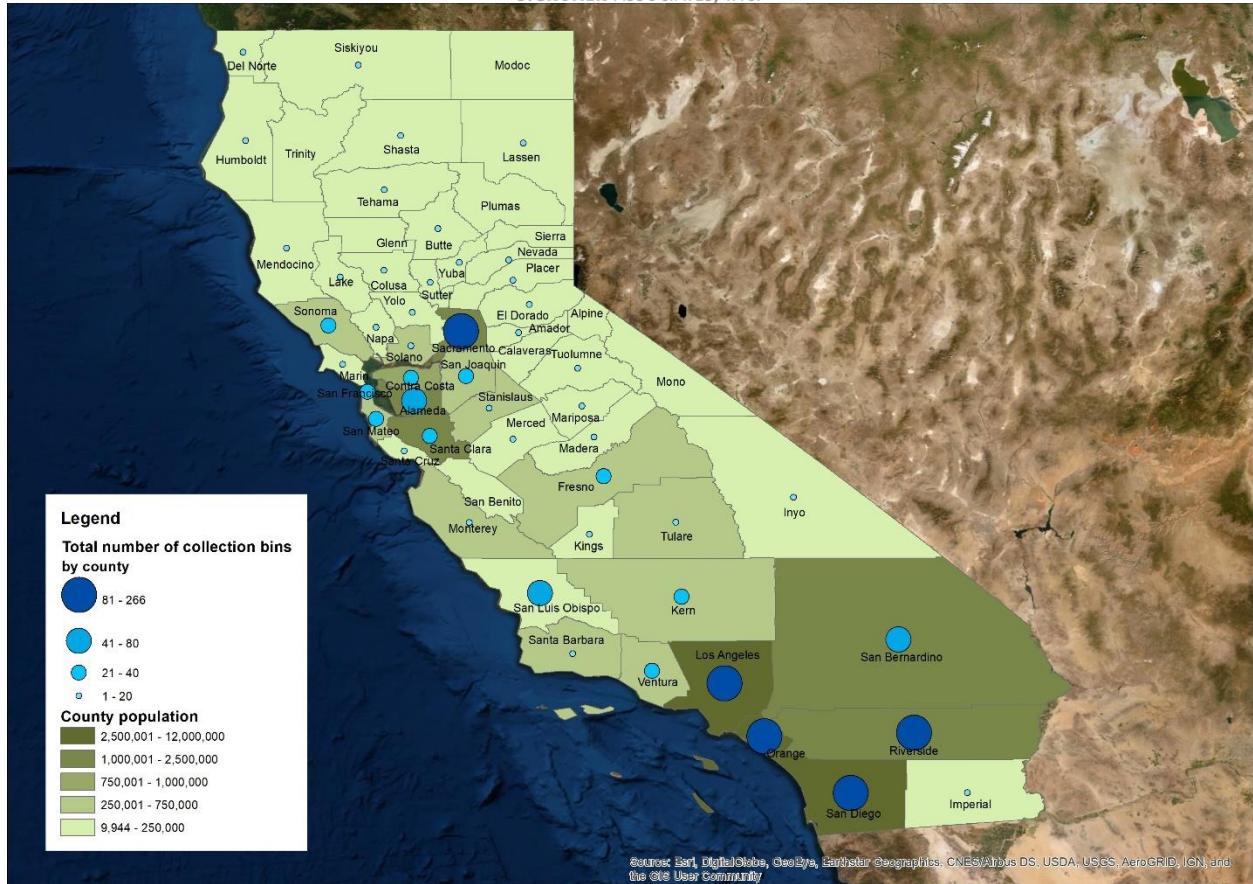

Figure I. Map showing active bins placements in Q3'19.

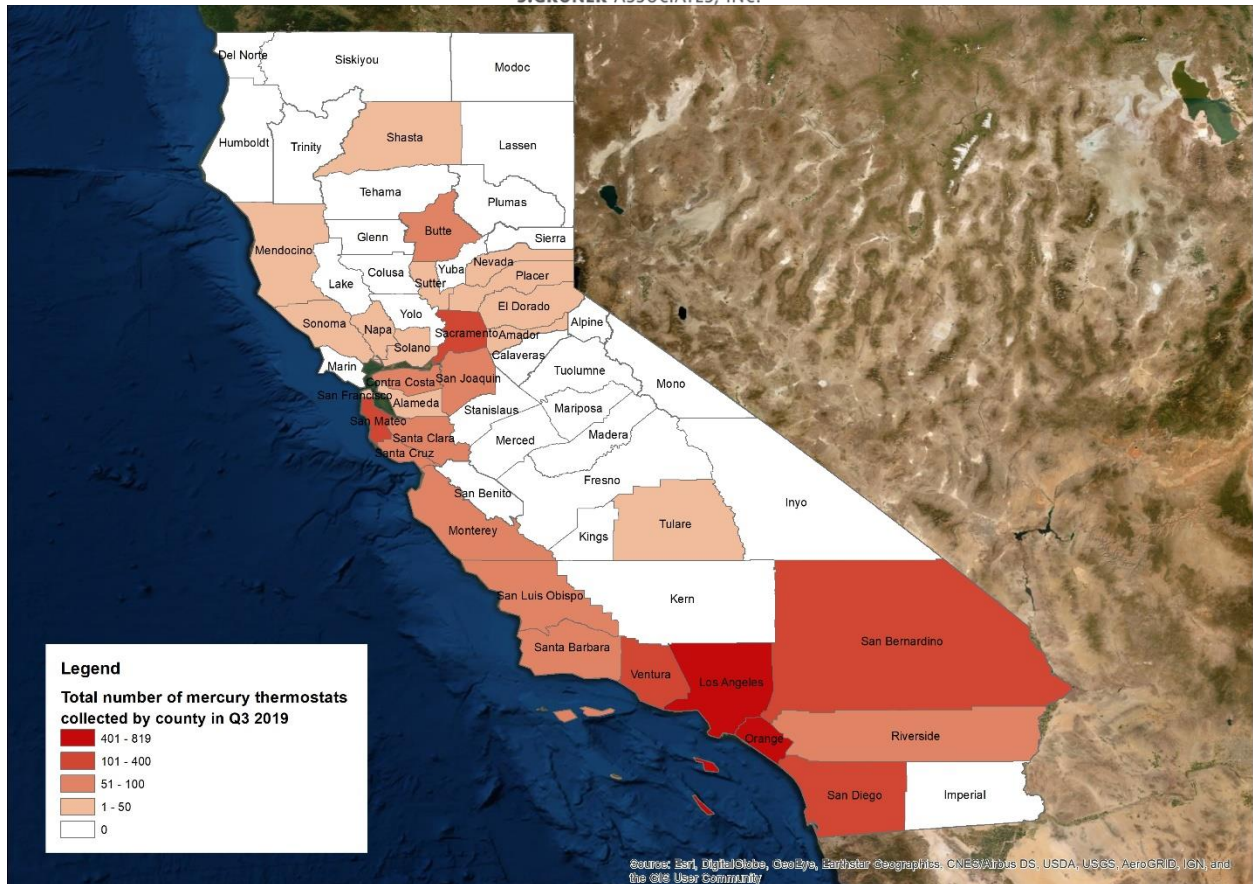

Figure II. Map showing total thermostats collected in Q3'19.

## Collection Location Summary

A table documenting the collection locations in California with account type, address and collection data is included in the appendix.

## CSLB Forms

The Contractor State License Board license number forms, as gathered by wholesalers, are included below.

*Include white copy in TRC container. Retain yellow copy for your records.*

## Incentive Payments

No incentive payments were made in Q3 2019.

## Site Visits

A table documenting site visits conducted in Q3 2019 is included in the Appendix. These site visits include documentation for non-compliant locations.

## Advertising

### Summary

As in the 1st and 2nd quarters of 2019, digital advertising remains the focus of TRC's 2019 California ad campaign. TRC has allocated ad dollars to Google Ads and into digital ads.

### Google Ads

Google Ads is a digital advertising platform where advertisers bid on search terms (or keywords) in order to have brief ads displayed. TRC has invested about 30% of its 2019 California advertising allocation into Google Ads. This PPC campaign targets people searching for relevant terms and drives traffic to various pages on the TRC site, based on the terms searched.

The goal of the PPC campaign is two-fold: Awareness and conversion. TRC has developed (and continues to modify) the PPC campaign to align with terms searched by individuals related to thermostats, mercury, mercury recycling, thermostat replacement, etc. By serving up ads to people searching for these terms, TRC is able to build awareness for the need to recycle mercury-containing thermostats and for the TRC program. Secondly, TRC's ads drive people to sections of the website where conversions can be tracked. Specifically, TRC is prompting people to find a recycling location or to request a bin.

Google Ads started in January. The summary of the campaign's delivery for the 3rd quarter is detailed below.

Impressions: 327,627

Clicks: 4,968

CTR: 1.52%

CPC: \$1.24

Search Impression Share: 52.77%

Conversions: 331

- Note: A conversion is counted when someone clicks the zip code finder page.

### Digital Display

Another part of the budget is directed towards digital display advertising. Through digital display ads, TRC's message is positioned in front of audiences who profile against our selected target

demographics. Similar to the PPC campaign, the digital display campaign builds awareness and seeks conversions. Ads will be served to people based on their online search behavior. The creative reminds people to recycle mercury thermostats and drives clicks to pages like the zip code finder section of the website.

The targeted digital display campaign performed well. The table below details deliverables.

**Table 8. Third Quarter performance of Google display ads.**

Month	Impressions	Clicks	CRT	x National Average	Total Engagement
July	2,620,273	10,059	0.38%	5.48	0.38%
August	2,604,122	10,469	0.40%	5.74	0.40%
September	2,537,591	9,347	0.37%	5.26	0.37%
<b>TOTAL</b>	<b>7,761,986</b>	<b>29,875</b>	<b>0.38%</b>	<b>5.50</b>	<b>0.38%</b>

### Analysis

It is worth noting that the Q3 performance has optimized over Q2. Key metrics for July and August out-performed April and May of 2019. For the quarter, impressions are up by 6.8%. Clicks are up 15.9%. And the CTR is up 7.8%. Digital campaigns are continually optimizing and so the longer they run, the better they perform.

### Barriers

There were no barriers to launching this advertising.

### Motivators

Digital is highly effective and efficient. Moreover, digital provides for the ability to track ROI.

### Results

Results have been very strong. The average PPC click through rate is 1.91% across all industries. Considering the highly nuanced nature of the TRC PPC campaign, a CTR of 1.31% is very high. TRC's digital display campaign is also out-performing national metrics for delivery.

It is worth noting that the Search Impression Share is very high, at 64.85% for the quarter. (Note: The Search Impression Share varies by industry, geography, specific spending, etc. We typically strive for at least 50% Search Impression Share.) This reflects the number of impressions achieved divided by the number of eligible impressions for the search terms built into the campaign.

## Outreach Program

### Audience A

#### Retail toolkit materials

Retail: Program introduction letter

S. GRONER ASSOCIATES, INC.

500 Office Center Drive – Suite 400 | Fort Washington, PA 19034 | [thermostat-recycle.org](http://thermostat-recycle.org)

Dear Retail Partner:

Thank you for participating in the Thermostat Recycling Corporation's (TRC) California Retail Collection Program. As a TRC partner, your efforts will help keep mercury out of our waste stream and increase customer loyalty through demonstrating your store's commitment to a sustainable community.

We will provide you a free collection bin or gallon pail with pre-paid shipping, a shelf-talker to place on your thermostat aisle, and a folder with additional information to share with your employees about our program. We will provide free publication education materials and promote your store through online channels.

Effective immediately, California residents in your geographic region will be eligible for a \$5 mail-in rebate that is provided by their utility company, when they recycle their mercury thermostat at a Thermostat Recycling Corporation (TRC) location. So be aware that some customers may deliver their thermostat in a plastic bag that also includes a rebate form. There is no action required on your part, simply place the thermostat in the bin with the other thermostats. The rebate payment will be sent to the customer directly on behalf of TRC.

Please remember that for your employees' safety, TRC bins must be shipped when the bin is full or within one year of the date the first mercury thermostat was collected. The bin is returned to the store for the collection of additional thermostats.

If you have any questions regarding this incentive program, please call us at **1-888-266-0550** or email us at [trc@thermostat-recycle.org](mailto:trc@thermostat-recycle.org) for more information.

Thank you,

A handwritten signature in black ink, appearing to read "Ryan L. Kiscaden".

Ryan L. Kiscaden  
Executive Director  
Thermostat Recycling Corporation

S.GRONER ASSOCIATES, INC.

## Retail: Prepping and shipping instructions sheet

an industry-funded non-profit

### Preparing TRC Collection Container for Shipment

When your collection container is full, or when it has been one year since at least one mercury thermostat has been sitting in it, please use the following steps to prepare your container for shipping:

1. Check to make sure the items in the collection container are mercury-containing thermostats **only**. Remove any unacceptable items. If you find anything besides whole mercury thermostats, please contact TRC for special shipping instructions. Never accept jars or any other containers of liquid mercury as those are hazardous waste and cannot be shipped in our bins.

UNACCEPTABLE ITEMS

2. Enclose the thermostats in the liner, use the provided nylon tie to tie the liner. Close the container and secure it by using the remaining nylon ties on the two ends of the lid.

3. Review the instructions that came with your container prior to closing it in preparation for shipping. It is very important to neatly write your return address on the pre-paid shipping label and to use indelible ink if possible. Turn this page over for details.

4. Attach the shipping label to the TRC container and schedule a "Ground Return Pickup" from Fedex (turn this page over for instructions.) Make sure to keep your tracking number to help TRC track the shipment if an issue occurs.

## Shipping TRC Collection Container

1. Schedule a FedEx "Ground Return Pickup" by calling 1.800.463.3339 or online at [www.fedex.com/returnpickup](http://www.fedex.com/returnpickup) (username and password are not required)
2. Enter Pickup Information (Note: Tracking ID is found on red label that was delivered with the container)
3. Select "Schedule Pickup." Your confirmation number will appear on the next page. Keep your confirmation number to help TRC track the shipment if an issue occurs.

TRACKING ID:

4. Attach red shipping label to container. Your container will be picked up and then a new collection container will be sent to you.

Thank you for being part of the TRC recycling program.

Retail: Identifying a mercury thermostat sheet

## Identifying a Mercury Thermostat

If the thermostat uses a dial or lever, odds are it contains mercury and needs to be recycled. Containing between 3 and 12 grams of mercury, thermostats are likely the device in homes that have the most amount of mercury today.

**1. Examples of mercury thermostats include:**

**2.**

Look for the  
mercury bulb  
inside.

**3. If the thermostat has mercury, it needs to be recycled. It's the law.\*  
Just put the entire mercury thermostat in the green TRC collection container.**

\*Disposal bans apply in the following states: CA, CT, FL, IA, IL, ME, MA, MN, NY, NH, OR, PA, RI and VT.

## Audience C

### Hotel/Motel Article

500 Office Center Drive – Suite 400 | Fort Washington, PA 19034 | [thermostat-recycle.org](https://www.thermostat-recycle.org)

**\$70,000 Fine for Not Recycling a Thermostat! TRC has the Solution.**

Who knew that those old thermostats could cost you \$70,000? That's the fine for failing to recycle mercury thermostats. Why such a hefty penalty? Because when mercury thermostats are discarded with everyday trash, the mercury bulb will break, and the mercury will escape and become a dangerous hazard.

According to California law, it's illegal to dispose of mercury thermostats in the trash or leave them at customers' premises. HVAC, demolition contractors, property managers, and residents are responsible for recycling all mercury thermostats they remove from service. Everyone can comply with the law and avoid the \$70,000 fine by enrolling in the Thermostat Recycling Corporation's (TRC) free and easy recycling program. After receiving collection containers from TRC, property managers and contractors can collect mercury thermostats and then send back the containers (when full or after one year) with an enclosed prepaid shipping form.

Staying compliant with the law is a good thing, but what's even better is that property managers, contractors, or property owners get a \$5 rebate for every recycled mercury thermostat. That's right, instead of paying the fine, TRC will pay you! It's a win-win situation. You get rewarded for doing the right thing, avoid the \$70,000 penalty, and the environment is protected from additional mercury pollution.

If interested, enroll in the program by visiting <https://www.thermostat-recycle.org/statelaws/california> or contact Danielle Myers at [danielle.myers@thermostat-recycle.org](mailto:danielle.myers@thermostat-recycle.org) or 888-266-0550 with any questions.
