SUBMISSION OF QUARTERLY REPORT; Consent Order Item B-1.6

Dear Ms. Avila,

The following quarterly report for Q4 '17 outlines the Thermostat Recycling Corporation's (TRC) most recent outreach and pilot project activities. By this submission, S. Groner Associates, Inc. (SGA) is fulfilling obligations on behalf of the 25 signatories of the Consent Order listed below. If you have any questions regarding this submission, please feel free to contact me at (562) 597-0205 or the address below.

Regards,

Stephen Groner
California Program Manager, TRC
100 W. Broadway, Suite 290
Long Beach, CA 90802

cc: Paris Greenlee

Introduction

During the fourth quarter (October- December), 2017 S. Groner Associates (SGA) working on behalf of the Thermostat Recycling Corporation (TRC) focused on implementing the following tasks from the DTSC-approved Outreach Plan and Pilot Plan as a part of the California TRC Program. The following report outlines those efforts undertaken during this quarter broken into audiences.

Summary of Results

1. Mercury-added thermostats collected this quarter: 5,197
2. New collection locations this quarter: 21
 - Number and location (by street address) of new collection bins: included in appendix
3. Mercury-added thermostats collected this year: 17,976
4. Program element/participants to which the collected thermostats are attributed: information not attributed due to overlapping tactical elements

Table 1. Number of bins (cumulative)

Audience	Q1 2017	Q2 2017	Q3 2017	Q4 2017
A				
Contractors	172	182	189	193
HHWs	198	205	225	226

Universities/ Colleges	N/A	N/A	0	0	0
C					
Residential Property Managers	N/A	N/A	0	0	0
Commercial Property Managers	N/A	N/A	0	0	0
Hotel/ Motel	N/A	N/A	0	0	0
TOTAL	12	3	2	0	17

NOTE: "Discontinued" means that the participant declined to continue participation

All data is updated on a quarterly basis and is subject to change as more accurate data becomes available.

Additional note: TRC has adjusted its thermostat counting process to ensure better consistency, quality and accuracy. A mercury thermostat is now counted as collected when it is received by the materials management facility. Previously a thermostat was counted when the collection point in California reported its collection numbers and shipped its bin to the management facility.

Outreach Program

Summary of Outreach Activities for Audience A

Retail/ Consumer

Summary

In an effort to increase the collection of mercury thermostats throughout the state of California we focused our efforts in Q4 on raising the visibility of our recycling site to consumers. We performed outreach to our 52 retail partners and provided them with new storefront materials to advertise their store as a mercury thermostat collection site. When we initially partnered with retail locations we had provided them with educational and promotional materials, both for their employees and also for the store's customers. With time many of these promotional materials have been misplaced or have been distributed to customers. In Q4'17 we sent out new materials in the form of toolkits, to our retail collection locations to refresh their materials and ensure that they were promoting the program (see Appendix).

Each toolkit included:

- 2 window clings in both English and Spanish;
- 2 shelf-talkers in both English and Spanish;
- An overview letter reiterating how the program works;
- An updated shipping instructions guide based on recent FedEx changes, and
- A letter showing ways to identify mercury thermostats.

Barriers: During an in-store visit at Bay Hardware in Los Angeles, CA the following barriers were discussed:

- Space: The TRC collection container had to be put in the back to make room for Christmas products.
- Uncertainty: Many customers aren't sure if they have mercury thermostats.

Motivators

- The Manager speaks to every customer shopping for a new thermostat about mercury thermostats and how to identify them and recycle them.
- The Manager is happy that he is considered a hardware store with environmentally friendly solutions.

Results

- One bin was returned from retail locations in Q4 '17.

HHW

Summary

In Q4'17 TRC worked with The California Product Stewardship Council (CPSC) to create a strategy to improve our HHW partnerships and promotion for the program through outreach activities. While this quarter was mostly dedicated to creating a strategy and organizing contracts to put this plan in motion, we plan to leverage our partnership with CPSC to increase response and participation by the HHW community. This strategy will be implemented in Q1'18.

Environmental Contractors

Summary

In Q4'17 TRC continued to gather contact information for environmental contractors during our outreach to all of our other audiences. This database will be used in future quarters for outreach activities with the goal of distributing collection bins to their locations.

General Contractor

Summary

TRC continues to complete outreach to this audience with hopes of gaining greater participation. Our calls are made to inform the contractor of our program if they are not already aware and sign the contractor up for recycling through a bin or pail.

Barriers

- Hard to generate engagement: We continue to contact locations who don't want to be contacted. A majority of contractors respond that infrequently encounter mercury added thermostats.
- Not their job: Another frequent response is that they subcontract waste and hire a third-party to remove waste.

Motivators

N/A

Results

- TRC made 275 calls and sent two emails blasts to general contractors. These efforts yielded one bin placement.

HVAC Contractor

Summary

TRC continues to complete outreach to this audience with hopes of gaining greater participation. Our calls are made to inform the contractor of our program if they are not already aware and sign the contractor up for recycling through a bin or pail.

Barriers

- Hard to generate engagement: We continue to contact locations who don't want to be contacted. A majority of contractors respond that they hardly ever encounter mercury added thermostats.

Motivators

N/A

Results

- TRC sent one email to HVAC contractors. During Q4'17 we had no sign-ups from HVAC contractors.

Demolition Contractor

Summary

TRC continues to complete outreach to this audience with hopes of gaining greater participation. Our calls are designed to inform the contractor of our program if they are not already aware and sign the contractor up for recycling through a bin or pail.

Barriers

- Hard to generate engagement: We continue to contact locations who don't want to be contacted. A majority of contractors respond that they infrequently encounter mercury thermostats.
- Not their job: Another frequent response is that they subcontract waste, hiring a third-party to remove waste.

Motivators

- This quarter we have noticed an increased level of interest from demolition contractors. If contractors do happen to see mercury thermostats on a more frequent basis, they seem to be more willing to hear more about the program.

Results

- TRC made 163 calls and sent two email blasts to demolition contractors. During Q4'17 we had no sign-ups from demolition contractors.

Wholesalers

Summary

Our collections are up compared to last year, largely due to greater bin returns from collection sites prompted by site visits and calls where we requested bins to be returned.

Barriers

- Bin denial: Non-compliant wholesalers continue to state they are only plumbing supplies or fabrication locations, and therefore will not accept a recycling container.
- Declining collections: Participating wholesalers are seeing a decline in collections and send some of their recycling bins back to us because they do not need them anymore.

Motivators

- Convenient: We get positive feedback on the ease of the program from current collection locations. We were able to sign up four Hajoca wholesale locations during site visits.

Results

We completed 57 calls and sent 263 postcards to locations who hadn't returned a container in the past 12 months. TRC performed 446 site visits to current collection locations, with another 33 visits to non-compliant wholesalers between October and December.

Our collections are up compared to last year, largely due to greater bin returns from collection sites through site visits and calls. We completed 50 more calls to current locations in Q4'17 compared to Q4'16, as well as 479 greater site visits during the same time period. 59 locations requested a bin display who did not currently have one when they were offered during site visits. We were also successful in recruiting four non-compliant wholesalers into our program during site visits (Hajoca Corporation in Hawthorne, Palm Springs, El Monte, and Los Angeles).

Summary of Outreach Activities for Audience B

Building Departments

Building Departments can best support the collection of mercury-added thermostats by informing contractors, inspectors and other professionals who come to the department, about the importance of proper disposal of mercury thermostats. Based on our scoping calls, we believe that employees of building departments have little contact with thermostats. However,

the professionals who seek the services of the building department frequently come in contact with thermostats in their line of work. Therefore, building departments will serve as a conduit for outreach, not unlike the role the utility companies hold in outreach to consumers and contractors. Flyers will be placed at the front desks of the building departments will be created and distributed. The flyers will focus on the hefty fines associated with improper disposal and will be designed with vibrant colors and large fonts to draw attention amongst the bevy of other flyers present at the building department office.

In Q4 '17, the following tasks were completed for use in Q1'18:

- Database of building departments
- Concept for building department flyers

Utility Companies

Utility companies can support our efforts by disseminating information to their customers seeking thermostat rebates and encouraging their HVAC contractors to recycle mercury thermostats through the TRC program. During Q4 '17, TRC worked with utilities to encourage them to share the mercury thermostat recycling message with their HVAC contractors.

Barriers

- Not a priority issue: Lack of urgency in promoting mercury-added thermostat recycling;
- Multiple contacts/departments: In many cases different staff and departments (e.g., Energy Savings Assistance Program, Communications department) need to approve messages which led to bottlenecks for dissemination;
- Small pool of contractors: Most of the utilities only work with between two and five contractors who handle HVAC-related jobs;
- Difficult to verify if message was disseminated: Utilities work with only a handful of HVAC contractors and subsequently all of the communication between the utility and their contractor is through a private email, letter, or phone call.

Motivators

- Mercury-added thermostat recycling seen as a worthwhile cause;
- All the major utilities offer a program that in some way incentivizes the replacement of thermostats;
- Intra-office referrals within each utility company helped us find the right contact and added credibility to our message.

Results

- In addition to the outreach to Pacific Gas & Electric conducted during Q3 '17, in Q4 '17 we reached five utilities and five Low-Income Weatherization Programs (the latter were

contacted at the behest of DTSC), corresponded with 17 individuals, and received confirmation from five organizations that the mercury thermostat recycling message was shared with approximately 25 HVAC contractors.

- Received one online bin order that indicated “utility company” as the way the contractor heard about the program;
- Identified contact information for utility employees responsible for consumer outreach.

Table 7. Results of HVAC Contractor Outreach via Utilities & Low-Income Weatherization Programs

Organization	Results
Los Angeles Department of Water & Power (LADWP)	<ul style="list-style-type: none"> • Agreed to inform all HVAC contractor applicants (as part of a new program launch)
SoCalGas (Sempra Energy)	<ul style="list-style-type: none"> • Agreed to mail a letter to all of their HVAC contractors • Agreed to include information about recycling mercury thermostats into the contract signed by their HVAC contractors
San Diego Gas & Electric (SDGE)	<ul style="list-style-type: none"> • Emailed TRC recycling information to their five HVAC contractors • Encouraged trainers/teachers in the Energy Innovation Center to share the information with contractors
Southern California Edison (SCE)	<ul style="list-style-type: none"> • Emailed TRC recycling information to their four HVAC contractors
Sacramento Municipal Utility District (SMUD)	<ul style="list-style-type: none"> • Emailed TRC recycling information to their one HVAC contractor
Low-Income Weatherization Program (Bay Area)	<ul style="list-style-type: none"> • Explained the TRC program; no confirmation received that the information was shared with contractors
Low-Income Weatherization Program (Los Angeles)	<ul style="list-style-type: none"> • Explained the TRC program; no confirmation received that the information was shared with contractors
Low-Income Weatherization Program (Northern CA)	<ul style="list-style-type: none"> • Non-responsive
Low-Income Weatherization Program (Central Valley)	<ul style="list-style-type: none"> • Non-responsive
Low-Income Weatherization Program (Southern CA)	<ul style="list-style-type: none"> • Non-responsive

School Districts

Schools can best support the collection of mercury-added thermostats by being informed of the proper disposal procedures and by having the collection bin at hand. Given public school's limited funding, we believe that public schools are slow to renovate and could have thermostats from decades past in their facilities. Using average temperature of region, age of structure and population as parameters, we have prioritized schools in San Bernardino, Fresno and Sacramento for pilot calls, but address the whole state of California in our outreach efforts.

In Q4 '17, SGA made repeated phone calls to prioritizing 39 school districts located in Sacramento, San Bernardino and Fresno that had received prop 39 grant. The script for the pilot phone calls were similar to that of outreach. However, pilot script differed from that of the outreach script in that the phone calls were framed as an introductory call to a yearlong assistance initiative with quarterly check-ins to gauge and assist in the school's evolving hazardous waste disposal needs.

Barriers

- Point of contact: There were difficulties in getting in contact with the district facility manager. Both cold calls and calls made during requested time frames resulted in being transferred to a voicemail very frequently.

Motivators

- N/A

Results and Planned Changes

Both cold calls and calls made during requested time frames resulted in being transferred to voicemail very frequently. A brief voicemail indicating our purpose and value as a cost-free mercury disposal service was iterated on the voicemail. Similarly, emails promoting TRC's collection bin program were sent to the facility managers. Neither the voicemails nor the emails received responses excluding two instances. The lacking reception seems to indicate one or a combination of the following: i) lack of interest in proper disposal by the facility manager despite need of the service, ii) absence of mercury thermostats in school districts resulting in disinterest, iii) lack of interaction between facility manager and clerical staff/voicemail.

The following findings were identified from the responses we were able to gather from the phone call attempts. The full list of gathered responses can be viewed on Table 8.

- All facility managers contacted stated that mercury containing thermostats are absent from the district excluding two facility managers

Table 8. Calls for School Outreach

Description	Frequency Q4 '17	Frequency Q3 '17
Number of Calls	23	133
Successful Contact	3	10
Emails Sent	0	39

Note: A call is defined as successful if the facility manager of the school district is reached and the full call script was implemented.

Table 9. All Gathered Responses from Outreach Calls to Commercial Property Managers

School District	Number of Renovated Rooms in past year	Number of Rooms to be Renovated Next Year	Mercury Thermostat Present?	Name of Waste Hauler Utilized
Poway Unified School District	1	1	Absent	Not utilized
Bakersfield City	1	1	Absent	Not utilized
Saugus Union	12	None at the moment	Absent	Not utilized
Yuba City Unified	Unsure	0	Absent	Unsure if used

El Monte City School District	less than 10	385	Present	Unsure if used
Santa Maria-Bonita	less than 6	Undecided	Present	Unsure if used
Union Elementary	Unsure	Unsure	Present	Restoration Company

In order to address points i & iii, SGA is considering taking the following actions in the upcoming quarter:

- Send physical mail detailing our purpose and value to the district facility managers. An item of use such as a desk calendar or refrigerator magnet with a call to action and contact information will be included in the shipping.
- Contact the assistant/associate superintendent through phone calls and emails. The assistant/associate superintendent is considered to be the organizational superior with the most frequent contact with the property manager in our scoping calls.
- Attend an occupational conference for facility managers to distribute information and obtain survey answers.

Universities/ Colleges

Universities and Colleges can best support the collection of mercury-added thermostats by serving as a conduit to the waste haulers or contracting companies that service their facility. While most Universities and Colleges have a facility manager, they do not usually work on HVAC related repairs or replacements. Our interviews showed that facility managers knew that mercury-added thermostats should not be thrown in the trash, but they did not have an understanding of where or how to properly dispose of them, this responsibility was left to the contractor working on the project. Our outreach will focus on educating facility managers about recycling mercury-added thermostats and supply them with a bin if their facility does have mercury-added thermostats on-site. The managers can then supply their contactors with the bin or have the contractor leave the thermostats with the manager to properly recycle. In Q4 '17, SGA made repeated phone calls to 79 universities. The 79 universities were chosen due to the size of their large student body which exceeded 10,000 students.

Barriers

- Point of contact: There were difficulties in getting in contact with the district facility manager. Both cold calls and calls made during requested time frames resulted in being transferred to a voicemail very frequently.

Top Motivators

- N/A

Results and Planned Changes

Both cold calls and calls made during requested time frames resulted in being transferred to voicemail very frequently. A brief voicemail indicating our purpose and value as a cost-free mercury disposal service was iterated on the voicemail. Similarly, emails promoting TRC's collection bin program were sent to the facility managers. Neither the voicemails nor the emails received responses excluding two instances across all audiences. The lacking reception seems to indicate one or a combination of the following: i) lack of interest in proper disposal by the facility manager despite need of the service, ii) absence of mercury thermostats in school districts resulting in disinterest, iii) lack of interaction between facility manager and clerical staff/voicemail.

The following findings were identified from the responses we were able to gather from the phone call attempts. The full list of gathered responses can be viewed on Table 11.

- 16 of the 22 university facility manager contacted stated that there were no mercury thermostats present on their campuses. Three of the 22 universities were unsure.
- Number of waste haulers utilized by universities were identified. North State Environmental was most frequently cited.

Table 10. Calls to University Outreach

Description	Frequency Q4 '17
Number of Calls	215
Successful Contact	23
Emails Sent	79

Note: A call is defined as successful if the person of interest was reached and the full call script was implemented.

In order to address points i & iii, SGA is considering taking the following actions in the upcoming quarter:

- Send physical mail detailing our purpose and value to the facility managers. An item of use such as a desk calendar or refrigerator magnet with a call to action and contact information will be included in the shipping;
- Contact assistant director of facilities management through phone calls and emails. The assistant director of facilities management is considered to be the organizational superior with the most frequent contact with the district facility managers in our scoping calls;
- Attend an occupational conference for facility managers to distribute information and obtain survey answers.

Summary of Outreach Activities for Audience C

Commercial Property Managers

Property Managers are the party responsible for ensuring that thermostats are up to date within the buildings they manage. Rather than management conducting periodic checks, thermostats tend to be switched out when tenants make a request. It is notable that more often than not there seems to be no communication between the external contractor and the property management on safe disposal of hazardous material. The potential legal and financial repercussions of improper waste disposal can be a powerful motivator to property management companies. This audience can best support the collection of mercury-added thermostat by being able to properly identify and promote the safe removal and disposal of mercury-added thermostats within their properties. Our tactics will help property managers become more aware of mercury-added thermostats, aid in proper identification, and make them aware of proper disposal via a TRC recycling bin.

In Q4 '17, a list of property management companies that deal mostly in commercial properties were identified and contacted. The list was abridged by isolating commercial property management companies located in San Bernardino, Sacramento and Fresno, which we believe to be most at risk for improper disposal. 153 contacts were gathered in this manner and contacted.

Barriers

- Point of contact: There were difficulties in getting in contact with the commercial property managers. Both cold calls and calls made during requested time frames resulted in being transferred to a voicemail very frequently.

Motivators

- N/A

Results and Planned Changes

Both cold calls and calls made during requested time frames resulted in being transferred to voicemail very frequently. A brief voicemail indicating our purpose and value as a cost-free mercury disposal service was iterated on the voicemail. Similarly, emails promoting TRC's collection bin program were sent to the property managers. Neither the voicemails nor the emails received responses excluding two instances across all audiences. The lacking reception seems to indicate one or a combination of the following: i) lack of interest in proper disposal by the property manager despite need of the service, ii) absence of mercury thermostats in properties held by company resulting in disinterest, iii) lack of interaction between property manager and clerical staff/voicemail.

The following findings were identified from the responses we were able to gather from the phone call attempts. The full list of gathered responses can be viewed on Table 13.

- All commercial property managers successfully contacted noted the absence of mercury containing thermostats on their property excluding two individuals;
- None of the commercial property managers stated to use internal contractor for HVAC needs.

Table 12. Outreach Calls to Commercial Property Managers

Description	Frequency Q4 '17
Number of Calls	226
Successful Contact	12
Emails Sent	153

Note: A call is defined as successful if the person of interest was reached and the full call script was implemented.

In order to address points i & iii, SGA is considering taking the following actions in the upcoming quarter:

- Send physical mail detailing our purpose and value to the property managers. An item of use such as a desk calendar or refrigerator magnet with a call to action and contact information will be included in the shipping.
- Contact the president of the property management company through phone calls and emails. The president of the company is considered to be the organizational superior with the most frequent contact with the property manager in our scoping calls.
- Attend an occupational conference for property managers to distribute information and obtain survey answers.

Outreach to Commercial Property Associations

Summary

Our secondary target for outreach are the property management associations that these companies look to for advice, or to stay up to date on the latest policies. We will look to partner, advertise and disseminate our message within their networks and publications.

In Q4' 17, we created a database of commercial property management associations. The database contains eight companies. We created talking points to explain the program, discussed the \$5 rebate per thermostat that is recycled through the program, discussed any ways we can get this message to their members, and inquired about who handles the removal or replacement of the thermostats for their properties.

Table 14. Outreach to create partnerships

Descriptor	Number
Potential partners	8
Successful contacts	3

NOTE: A partnership is defined as successful if the proper person was reached and all talking points were discussed.

Table 15. Potential partner organizations

Partner Organization	Number of members in partner organization
California Association of Realtors (CAR)	100+
NAIOP Socal	1,000+
Building Owners and Managers Association of California (BOMACal)	N/A
Association of Commercial Real Estate (ACRE)	300+
California Business Properties Association	10,000+
AIR CRE	N/A
International Council of Shopping Centers (ICSC)	70,000+
National Association of Realtors (NAR)	1.2 million

Barriers

- Point of contact: Once contact was made, it was challenging to identify the person who was the decision maker and who could handle getting the message to their members.
- Disseminating too much information: There was also a concern about getting too much information out to their members as one association said they were very selective about what information goes in their newsletters or on their member facing website.
- Making contact: There were several calls that were not returned and several instances where we were not able to make contact.

Motivators

- Good general interest: The people we did speak with were interested in knowing what the proper procedure was when removing mercury thermostats and expressed interest in passing the information along to their members.
- Motivated by avoiding the penalty: The people we spoke with were more interested in complying with the law and avoiding a \$25,000 fine than the \$5 rebate.

Results and Planned Changes

These calls raised awareness about the environmental and legal consequences of mercury-added thermostats not being disposed of properly. One association requested information solely as it relates to the legal/legislative requirements of recycling mercury thermostats. She said that they have a company policy about forwarding 3rd party information on to their members, so it would only be appropriate if the information was legal.

Moving forward we will continue to find the correct person who handles not only the messaging to their members, but also specifically finding out information as to who is actually doing the work of removing thermostats for the commercial properties.

Residential Property Managers

Property managers are the party responsible for ensuring that thermostats are up to date within the buildings they manage. Rather than management conducting periodic checks, thermostats tend to be switched out when tenants make a request. It is notable that more often than not there seems to be no communication between the external contractor and the property management on safe disposal of hazardous material. The potential legal and financial repercussions of improper waste disposal can be a powerful motivator to property management companies. This audience can best support the collection of mercury-added thermostat by being able to properly identify and promote the safe removal and disposal of mercury-added thermostats within their properties. Our tactics will help property managers

become more aware of mercury-added thermostats, aid in proper identification, and make them aware of proper disposal via a TRC recycling bin.

Given the low rate of target members requesting a recycling bin (across all audiences), two versions (Tone A & Tone B) of the scripts were created for residential property managers to test impact. Tone A stressed the legal ramification of improper disposal and the \$25,000 fine that is associated. Tone B stressed the community benefits of proper disposal of mercury thermostats. At this time, only Tone A has been utilized. Tone B will be utilized in Q1 '18 and the results will be discussed next quarter.

In Q4 '17, 107 property management companies that deal mostly in residential properties were identified and contacted.

Barriers

- Point of contact: There were difficulties in getting in contact with the residential property managers. Both cold calls and calls made during requested time frames resulted in being transferred to a voicemail very frequently.

Motivators

- N/A

Results and Planned Changes

Both cold calls and calls made during requested time frames resulted in being transferred to voicemail very frequently. A brief voicemail indicating our purpose and value as a cost-free mercury disposal service was iterated on the voicemail. Similarly, emails promoting TRC's collection bin program were sent to the property managers. Neither the voicemails nor the emails received responses excluding two instances across all audiences. The lacking reception seems to indicate one or a combination of the following: i) lack of interest in proper disposal by the property manager despite need of the service, ii) absence of mercury thermostats in properties held by company resulting in disinterest, iii) lack of interaction between property manager and clerical staff/voicemail.

The following findings were identified from the responses we were able to gather from the phone call attempts. The full list of gathered responses can be viewed on Table 17.

- All residential property managers successfully contacted noted the absence of mercury containing thermostats on their properties excluding two individuals.
- 7 of the 16 participants noted that they use an internal team for their HVAC needs.

Table 16. Outreach Calls to Residential Property Managers

Description	Frequency Q4 '17
-------------	------------------

Number of Calls	218
Successful Contact	16
Emails Sent	107

Note: A call is defined as successful if the person of interest was reached and the full call script was implemented.

**Table 17. All Gathered Responses from Outreach Calls to Residential Property Managers:
Tone A**

University	Use External HVAC Contractor?	HVAC Business Name	Mercury Thermostat Present?	Name of Waste Hauler Utilized

Monte Vista Assets Inc.	Yes	Utilized but unsure of name	Present	Unsure if used

In order to address points i & iii, SGA is considering taking the following actions in the upcoming quarter:

- Send physical mail detailing our purpose and value to the district property managers. An item of use such as a desk calendar or refrigerator magnet with a call to action and contact information will be included in the shipping.
- Contact the president of the property management company through phone calls and emails. The president of the company is considered to be the organizational superior with the most frequent contact with the property manager in our scoping calls.
- Attend an occupational conference for property managers to distribute information and obtain survey answers.

Residential Property Associations

Summary

Our secondary target for outreach are the property management associations that these companies look to for advice, or to stay up to date on the latest policies. We will look to partner, advertise, and disseminate our message within their networks and publications. The third objective, is to collect the contact information of any third-party contractors that are being used by managers and compile that in our database for follow up outreach.

In Q4'17, we created a database of residential property management associations. The database contains 56 associations. We created talking points to explain the program, discussed the \$5 rebate, ways we can partner to disseminate the message to their members, and educated associations on the \$25,000 fine in the state of California for not disposing of a mercury-added thermostat properly.

Table 18. Outreach Summary

Action	Number
Organizations contacted	56
Successful Contacts	12

NOTE: A partnership is created when all talking points are covered with a member of the association

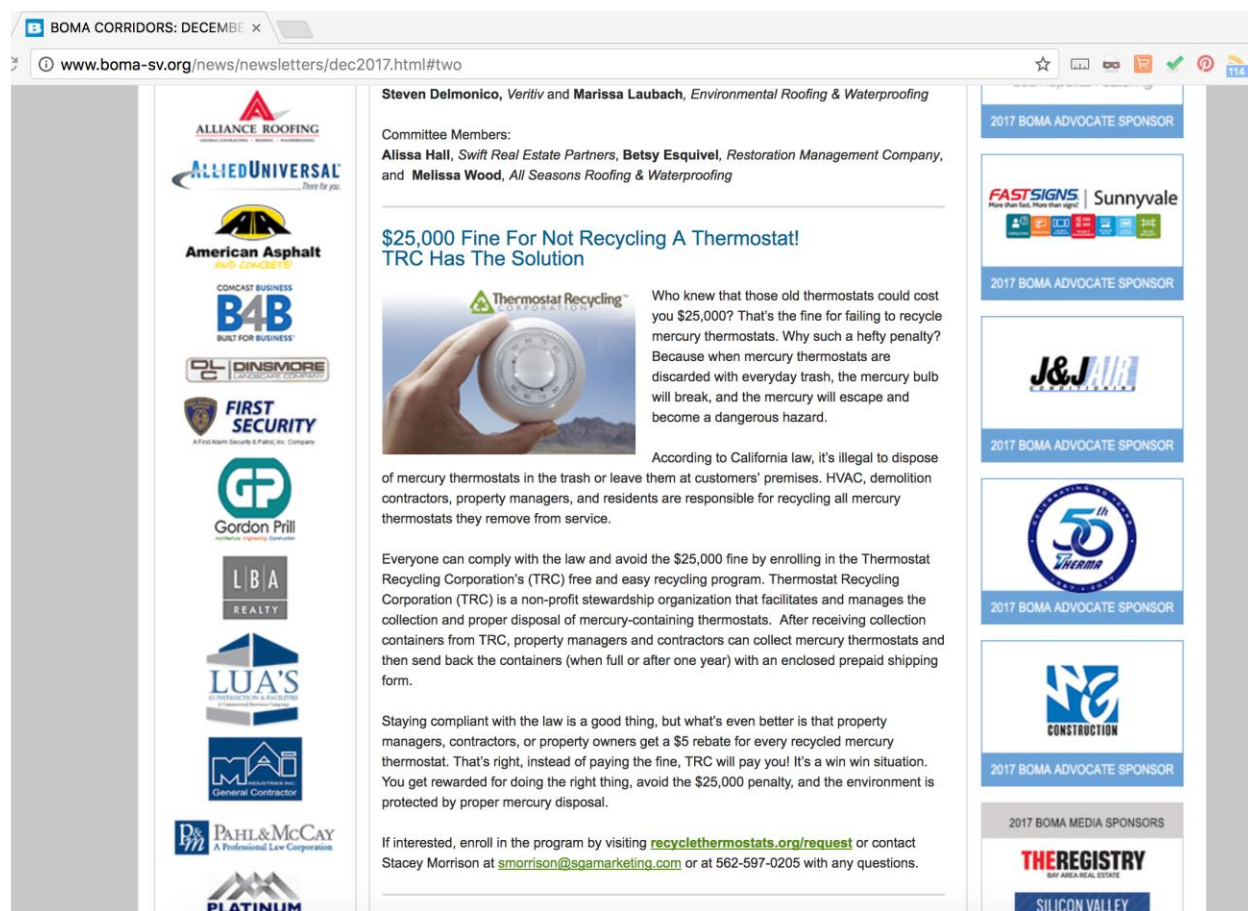

Barriers

- Point of contact: There were challenges finding the correct person to speak to. Several associations have one person answering the phone for several locations, this made it difficult to reach each location while going through the same person.

Motivators

Several associations were eager to get this information out to their members, as this is the type of information published in their newsletters. Many associations were interested in information regarding the fine associated with improper disposal and wanted their members to be aware of this. We created a newsletter style article with a graphic to be published in newsletters both online and in print. An example of an article posted on the boma-sv.org site is provided below.

Figure 1. Newsletter posting for bomagla.org

The screenshot shows a web browser displaying a newsletter article on the website www.boma-sv.org/news/newsletters/dec2017.html#two. The page layout includes a sidebar with various logos, a main content area with an article, and a right sidebar with sponsor information.

**\$25,000 Fine For Not Recycling A Thermostat!
 TRC Has The Solution**

 Who knew that those old thermostats could cost you \$25,000? That's the fine for failing to recycle mercury thermostats. Why such a hefty penalty? Because when mercury thermostats are discarded with everyday trash, the mercury bulb will break, and the mercury will escape and become a dangerous hazard.

According to California law, it's illegal to dispose of mercury thermostats in the trash or leave them at customers' premises. HVAC, demolition contractors, property managers, and residents are responsible for recycling all mercury thermostats they remove from service.

Everyone can comply with the law and avoid the \$25,000 fine by enrolling in the Thermostat Recycling Corporation's (TRC) free and easy recycling program. Thermostat Recycling Corporation (TRC) is a non-profit stewardship organization that facilitates and manages the collection and proper disposal of mercury-containing thermostats. After receiving collection containers from TRC, property managers and contractors can collect mercury thermostats and then send back the containers (when full or after one year) with an enclosed prepaid shipping form.

Staying compliant with the law is a good thing, but what's even better is that property managers, contractors, or property owners get a \$5 rebate for every recycled mercury thermostat. That's right, instead of paying the fine, TRC will pay you! It's a win win situation. You get rewarded for doing the right thing, avoid the \$25,000 penalty, and the environment is protected by proper mercury disposal.

If interested, enroll in the program by visiting recyclethermostats.org/request or contact Stacey Morrison at smorrison@sgamarketing.com or at 562-597-0205 with any questions.

MERCURY THERMOSTAT RECYCLING PROGRAM HELPS OWNERS AVOID PENALTIES

Martha Cox-Nitlikman •
December/04/2017

TAGS: [mercury](#) [thermostats](#) [recycling](#) [penalties](#)

BOMA/GLA has been contacted by the Thermostat Recycling Corp. (TRC), a company set up under federal law to assist owners in properly disposing of mercury thermostats. Fines for improper disposal can be as high as \$25,000, but owners can avoid penalties by using industry collection containers provided by TRC. To learn more, [click here...](#)

Results and Planned Changes

Moving forward we will continue to work to find the correct point of contact and continue to provide articles for their newsletters, be available to answer questions about the program and work to distribute collection bins when appropriate.

Hotel/ Motel

Summary

Hotels and motels can best support the collection of mercury-added thermostats by being informed of the proper disposal procedures. Given hotel and to a lesser extent motel's need to consistently renovate their establishment to meet the standards of their brand, we do not see the majority of hotels and motels to be a fruitful audience for individual outreach. Based on our scoping calls, we believe that hotels/motels/inns/bed and breakfasts of lower revenue would have the greatest likelihood of having mercury containing thermostats. Given the difficulty in identifying these lower revenue lodging businesses, we will be contacting and partnering with lodging associations to place an article or eNewsletter containing information on the need to recycle mercury containing thermostats. The potential legal and financial repercussions of

improper waste disposal will be emphasized as it is a likely powerful motivator for hotel and motel management.

Lodging associations will be contacted in Q1 '18. In order to prepare for these calls, the following materials were produced in Q4 '17. These items are available for review in the appendix section of the report.

- Database of lodging associations
- Article to be placed
- Informational sheet + sign up form that will be linked on the article
- General talking points of the calls to lodging associations.

Pilot Program

Summary of Pilot Activities for Audience A

Retail/ Consumer

In this one-year pilot program we tested immediate monetary incentives in eight retailers throughout the state of California. The goal of the retail pilot was to initiate and maintain a robust program that: engaged participating retailers, increased overall collection rates and provided conclusive evidence on what the most effective financial incentive amount per recycled mercury-added thermostat should be for TRC's California program. During Q4 '17, we continued the program with eight hardware stores to provide financial incentives in the form of immediate in-store credit for consumers and contractors for turning in a mercury-added thermostat. Nine hardware stores signed up initially, but one location in Folsom was not able to continue participation due to unrelated internal business issues. The remaining hardware stores were located in Clovis, Crestline, Fresno (two stores), Los Angeles, Sacramento, Stockton and West Hollywood. We chose these locations based on the age of structures, income, population-size and temperature fluctuation in an area. We also had three control stores located in Oakland and San Francisco (two store locations).

Figure 2. TRC retail pilot cards left at register and in thermostat aisle

Qualitative quarterly check in calls revealed retail manager's perceived barriers and motivators to participating in the program.

Barriers

- Lack of awareness: General lack of awareness of importance of mercury-added thermostat recycling among customers;
- Not a problem: Mercury-added thermostats are considered a non-issue because they see and hear about so few of them in their area;
- Logistics of recycling: When buying a new thermostat, customers don't know to bring their old one in to recycle and the rebate isn't enough to encourage them to come back;
- Not the right target: The homes in their area aren't old enough; therefore, they do not have mercury thermostats.

Motivators

- Extra promotion for the store via TRC marketing materials; public relations/advertising through TRC marketing for pilot efforts;
- Ability to provide customers with guidance regarding mercury-added thermostat recycling;
- Easy drop-off process for customers.

Table 19. Retail pilot partners: \$5, \$10 incentive immediate in-store credit

Pilot Partner	Address	City
Emigh Ace Hardware (\$10)	3555 El Camino Avenue	Sacramento

Cole Hardware (Control sites - received additional training but not part of incentives)	5533 College Avenue	Oakland

HHW

In the Q1 '17, TRC initiated a one-year pilot with three HHW county programs across the State of California--San Bernardino County (South), Santa Clara County (Central), and Del Norte County (North)--to measure the effectiveness of a \$10 mail-in-rebate incentive to drive residents to recycle mercury-added thermostats. This is in response to the October 7, 2016 Approval with Modification Letter from DTSC:

2. TRC is to implement a pilot project that provides a \$10 per thermostat incentive payment (using either a mail-in rebate or gift card) to anyone who turns in thermostats at household hazardous waste collection facilities. This type of pilot project was proposed in TRC's May 10, 2016 draft Pilot Programs Plan but removed from its August 8, 2016 submittal.

During Q4 '17, TRC worked with the participating HHW program managers to continue to reinforce the program and its goals. Out of all the target audiences, HHW program managers have been particularly supportive in TRC's program goals as it aligns with their goal of effectively collecting hazardous waste from residents.

Qualitative quarterly check in calls revealed HHW manager's perceived barriers and motivators to participating in the program.

Barriers

- Inconvenient: The rebate is inconvenient to claim, and the incentive amount is not worth the effort;
- Confusion: Have accidentally collected some items that are not mercury-added thermostats because either the staff, the customers or both being unaware/uninformed of the process;
- Logistical difficulties: Mercury-added thermostats are difficult to collect due to the nature of HHW's being mainly drive-by and drop-off locations.

Motivators

- The sandwich signs placed outside the HHW are a good way to communicate information about mercury-added thermostats to customers;
- Recycling mercury fits in with HHW values, so employees and management truly care about the issue.

Table 20. HHW pilot partners: \$10 mail-in-rebate incentive for residents

Pilot Partner	Address	City
Del Norte Solid Waste Management Authority	1700 State Street	Crescent City
County of Santa Clara - Household Hazardous Waste Program	1555 Berger Drive, Suite 300	San Jose
San Bernardino County Fire - Household Hazardous Waste Division (in conjunction with City of San Bernardino)	S.B. International Airport 2824 East "W" Street, Bldg. 302	San Bernardino
San Bernardino County Fire - Household Hazardous Waste Division (in conjunction with Ontario)	1430 South Cucamonga Avenue	Ontario
San Bernardino County Fire - Household Hazardous Waste Division (in conjunction with Hesperia)	Hesperia Fire Station 17443 Lemon Street	Hesperia

Wholesaler

In Q4 '17, TRC continued a one-year pilot with 12 wholesalers across the State to measure the effectiveness of monetary incentives on wholesalers' return rates. This is in response to the October 7, 2016 Approval with Modification Letter from DTSC:

3. TRC is to implement a pilot project that provides \$100 mail-in rebate for each bin returned by wholesalers that contain 40 or more thermostats, and for bins with less than 40 thermostats, a pro-rated amount of \$2.50 for each thermostat in the returned bin. Although a pilot project of this type was not included in the May 10, 2016 or the August 8, 2016 pilot project plans, DTSC notes that the return rate for wholesaler return of collection bins has remained around 55%. A return rate this low, in the primary participant group that has been the focus of TRC's program, is troubling, and it is important for TRC to explore methods to improve the collections in these bins, and the rate of their return.

We selected and partnered with 12 current wholesaler collection sites for the pilot program and used quota sampling to ensure that participating wholesalers met the following criteria:

1. Had a combined, baseline return rate of 55% (for a representative sample)
2. At least 4 who have been in the program for more than 2 years
3. At least 3 returned more than 3 bins in the past year
4. At least 4 located in Northern California
5. At least 4 located in Southern California

We sent each participating manager a packet with instructions on how to file the new wholesaler invoice form (see appendix) to receive their check rebate after returning their TRC bin and 25 forms to send in with their bins.

Letter sent to Wholesale Managers

Hello!

Thank you for agreeing to participate in Thermostat Recycling Corporation's (TRC) Wholesaler Incentive Program. For each bin returned with 40 or more thermostats, we will provide a \$100 reimbursement, or \$2.50 per thermostat if the bin contains fewer than 40 thermostats. This incentive program will last until December 31, 2017.

During this year, I will be contacting you once a quarter to follow up with the program. Feel free to contact me with any questions you may have, at this email: ksingh@sga-inc.net or by calling me at 732-485-4589.

Attached you will find the Invoice Form necessary to obtain the reimbursement. These will also be sent to your store's location by mail. Please read the attached instructions, which detail how to properly submit the form to TRC.

Again, thank you for your participation!

Sincerely,
Kendra

Qualitative quarterly check in calls revealed wholesaler manager's perceived barriers and motivators to participating in the program.

Barriers

- Confusion with rebate forms: Unsure and unconcerned about the process for receiving the rebate and who is responsible for filling out the forms;
- Awareness: Seem to think the majority of mercury-added thermostats are gone already;
- Misunderstanding regarding bin returns: The bin is only returned when completely full, so thermostats may sit in the bin for long periods of time.

Motivators

- Knowing that they are doing something useful to help the environment;
- The ease of the process – leave the bin out and contractors can simply drop mercury-added thermostats in the bin on their way into or out of the store;
- Having a second bin to use after the first bin is filled up and sent away motivates them to continue the program.

Results

Quantitative findings are included as follows:

- How many total thermostats collected: 4,534
- How many bins returned: 173

Table 21. Wholesale pilot: \$2.50 incentive per thermostat when bin is returned to TRC

Summary of Pilot Activities for Audience B

School Districts

Schools can best support the collection of mercury-added thermostats by being informed of the proper disposal procedures and by having the collection bin at hand. Given public school's limited funding, we believe that public schools are slow to renovate and could have thermostats from decades past in their facilities. Using average temperature of region, age of structure and population as parameters, we have prioritized schools in San Bernardino, Fresno and Sacramento for pilot calls (but will open to all schools as the program expands via outreach).

In Q4 '17, SGA made repeated phone calls to all 43 school districts located in California who had received a prop 39 grant that had specified HVAC renovation as part of their grant proposal. The script for the pilot phone calls were similar to that of outreach. However, pilot script differed from that of the outreach script in that the phone calls were framed as an introductory call to a yearlong assistance initiative with quarterly check-ins to gauge and assist in the school's evolving hazardous waste disposal needs.

Barriers

- Point of contact: There were difficulties in getting in contact with the district facility manager. Both cold calls and calls made during requested time frames resulted in being transferred to a voicemail very frequently.

Motivators

- N/A

Results and Planned Changes

Both cold calls and calls made during requested time frames resulted in being transferred to voicemail very frequently. A brief voicemail indicating our purpose and value as a cost-free mercury disposal service was iterated on the voicemail. Similarly, emails promoting TRC's collection bin program were sent to the facility managers. Neither the voicemails nor the emails received responses excluding two instances. The lacking reception seems to indicate one or a combination of the following: i) lack of interest in proper disposal by the facility manager despite need of the service, ii) absence of mercury thermostats in school districts resulting in disinterest, iii) lack of interaction between facility manager and clerical staff/voicemail.

The following findings were identified from the responses we were able to gather from the phone call attempts. The full list of gathered responses can be viewed on Table 23.

- All facility managers contacted stated that mercury containing thermostats are absent from the district excluding one facility manager

Table 22. Calls to Pilot Schools

Description	Frequency Q4 '17
Number of Calls	140
Successful Contact	15
Emails Sent	43

Table 23. All Gathered Responses from School Districts

Center Unified Joint School District	300	Undecided	Unsure	California Conservation Corp Services

NOTE: Numeric answers were first sought for the appropriate questions but were not always obtained.

In order to address points i & iii, SGA is considering taking the following actions in the upcoming quarter:

- Send physical mail detailing our purpose and value to the district facility managers. An item of use such as a desk calendar or refrigerator magnet with a call to action and contact information will be included in the shipping.
- Contact associate/assistant superintendent through phone calls and emails. The associate/assistant superintendent is considered to be the organizational superior with the most frequent contact with the district facility managers in our scoping calls.
- Attend an occupational conference for facility managers to distribute information and obtain survey answers.

Summary of Pilot Activities for Audience C

Utility Companies

The utility pilot program seeks to offer a \$5 rebate to utility customers who properly dispose of their mercury-added thermostats. During Q4 '17 we secured a pilot project partner—Los Angeles Department of Water & Power (LADWP)—and established the groundwork for roll out.

Barriers

- Not a priority issue: lack of urgency in promoting mercury-added thermostat recycling caused the roll out of the partnership to be delayed.
- Multiple contacts/departments: different staff and departments need to approve messages for distribution to customers which further delays dissemination.

Motivators

- Mercury-added thermostat recycling seen as a worthwhile cause.

Results

- Confirmation from LA DWP to promote the \$5 mercury thermostat rebate to their customers; sent LADWP suggestions on how to add the mercury thermostat rebate message to their existing materials.

- Developed a mercury thermostat rebate form to be distributed to LA DWP customers (see appendix).
- Corresponded with the Los Angeles SAFE Household Hazardous Waste collection centers to inform them of the impending rebate program and mailed a letter (see appendix) with pilot program details to each of the seven locations.

Property Managers

Property managers are the party responsible for ensuring that thermostats are up to date within the buildings they manage. Rather than management conducting periodic checks, thermostats tend to be switched out when tenants make a request. It is notable that more often than not there seems to be no communication between the external contractor and the property management on safe disposal of hazardous material. The potential legal and financial repercussions of improper waste disposal can be a powerful motivator to property management companies. This audience can best support the collection of mercury-added thermostat by being able to properly identify and promote the safe removal and disposal of mercury-added thermostats within their properties. Our tactics will help property managers become more aware of mercury-added thermostats, aid in proper identification, and make them aware of proper disposal via a TRC recycling bin.

In Q4 '17, SGA worked with TRC to put together a collection program for property managers. Unlike other collection programs, the pilot's collection program allows both electronic and mercury added thermostats to be included in the bin. In Q4'17 we coordinated the logistics of a bin return that accommodates both types of thermostats. Furthermore, SGA has created a phone call script and a database of potential contacts to be utilized to promote the specified program in Q1 '18.

Program Modification Plan

In 2017 TRC implemented the program modification plan (PMP). The modification added a state-wide advertising campaign, to help increase awareness of mercury-added thermostats; Geographic Information Systems (GIS) mapping, to depict efforts like adding new collection sites; Store sweep information, summarizing TRC's visits to collection sites who have not returned their bin within the one-year time period; and details regarding the incentive payments paid out to our audience targets. Below you will find detailed summaries on all of the PMP initiatives.

Geographic Information Systems (GIS)

The following maps show the total number of collection locations throughout the state of California with the location's respective population per county. Size of population helps to depict the number of residents served by our collection sites.

Figure 3. Collection location and population per county as of Q4 '17

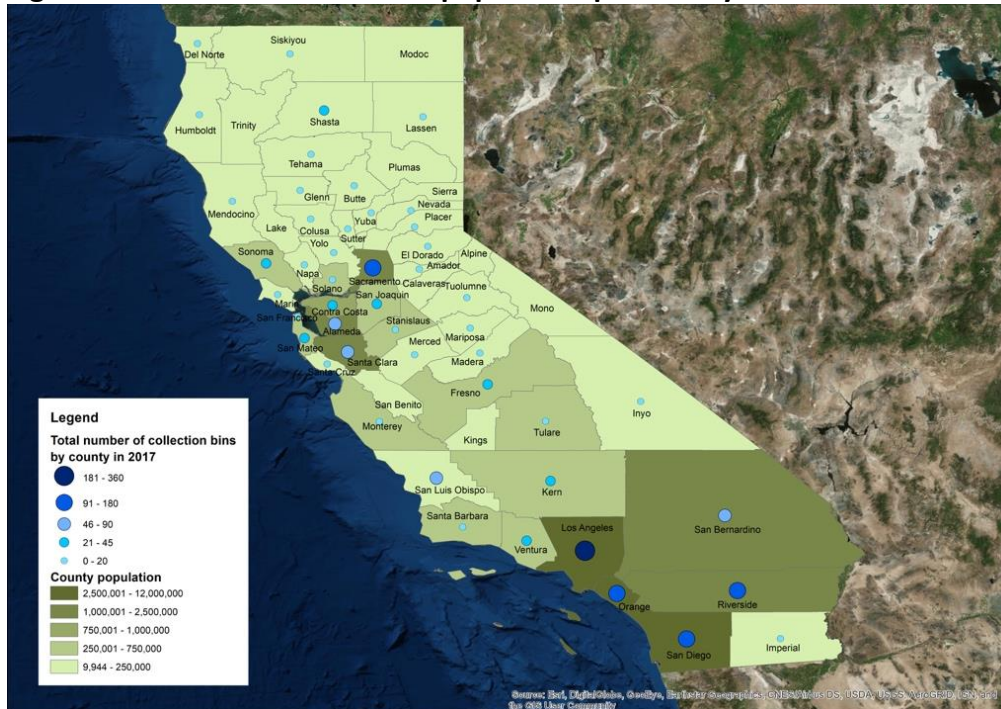

Figure 4. Total number of mercury thermostats collected: 2017

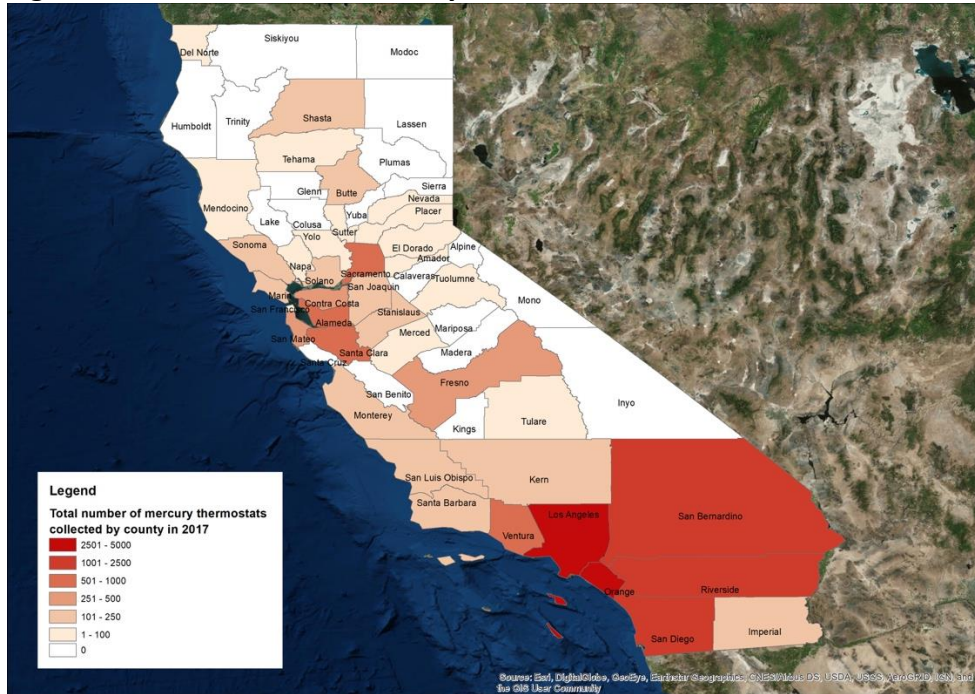

Table 24. Number of organizations contacted: 2017

Cumulative Totals by Audience	Number of Organizations Contacted
Audience A	4,550
Audience B	491
Audience C	556
Total	5,597

Mirroring previous quarters, GIS mapping was also utilized in Q4 '17 to assess the needs of California, regionally. Where applicable, the map and its distribution of drop off locations, number of thermostats collected, and county population were referenced to make decisions on resource allocation. We will continue to incorporate this data to determine locations where we can increase outreach and pilot participation and to assess the general needs of the region's population.

Collection Location Summary

A table documenting the collection locations in California with account type and address is included in the appendix.

CSLB Forms

The Contractor State License Board license number forms, as gathered by wholesalers, are included in the appendix.

Incentive Payments

In Q4' 17 TRC continued to fulfill incentive payments to HHW facilities, retailers, wholesalers and contractors. In Q4' 17 a total of \$1,368.37 was paid to contractors and wholesalers, we did not receive any incentive payment requests from the other audiences.

Table 25. Incentives Paid Out

Audience	\$ Amount
Retailers/HHWs	0.00
Contractors/Wholesalers	1,368.37

Table 26. Contractors/Wholesalers Paid

Site Visits

A table documenting site visits conducted in Q4 '17 is included in the appendix. These site visits include documentation for non-compliant locations.

Advertising

Summary

In Q4'17 TRC planned for incremental advertising efforts required by DTSC. We developed a comprehensive ad campaign and presented our plan to DTSC in Sacramento, CA. The campaign presented to DTSC planned for a November start, which launched as scheduled. These ads included banner and display advertising targeting by audiences like professional contractors, do-it-yourselfers, by geographies and by demographics in California. In addition, TRC has also run YouTube video advertisements, a Facebook ad campaign and a Google Adwords campaign in the state of California.

Barriers

There were no discernable barriers to the advertising.

Motivators

Results from the advertising indicate that keywords and target audience segments related to the HVAC industry resonate with the message. This is manifest through the performance of keyword groups related to terms that include the word "thermostat." This suggests that

continuing to communicate the TRC message to this professional audience will yield awareness and engagement.

Figure 6. Window cling (left), how to identify a mercury thermostat (right)

Window clings

Identifying a Mercury Thermostat

If the thermostat uses a dial or lever, odds are it contains mercury and needs to be recycled. Containing between 3 and 12 grams of mercury, thermostats are likely the device in homes that have the most amount of mercury today.

- Examples of mercury thermostats include:
- Look for the mercury bulb inside.
- If the thermostat has mercury, it needs to be recycled. It's the law.* Just put the entire mercury thermostat in the green TRC collection container.

*Disposal laws apply in the following states: CA, CT, FL, IL, IN, ME, MA, MI, MN, NY, OH, RI, SD and VT

Figure 7. Bin shipping instructions

Preparing TRC Collection Containers for Shipment

When your collection container is full, or when it has been one year since at least one mercury thermostat has been sitting in it, please use the following steps to prepare your container for shipping:

- Check to make sure the items in the collection container are mercury-containing thermostats **only**. Remove any unacceptable items. If you find anything besides whole mercury thermostats, please contact TRC for special shipping instructions. Never accept jars or any other containers of liquid mercury as those are hazardous waste and cannot be shipped in our bins.
- Enclose the thermostats in the liner, use the provided nylon tie to tie the liner. Close the container and secure it by using the remaining nylon ties on the two ends of the lid.
- Review the instructions that came with your container prior to closing to closing it in preparation for shipping. It is very important to neatly write your return address on the one-sided shipping label, and use markers as if possible. Turn this page over for details.
- Attach the shipping label to the collection tub and schedule a "Ground Return Pickup" from FedEx (turn this page over for instructions.) Make sure to get a tracking number from the driver at pick-up to help TRC track the shipment if an issue occurs.

Thermostat-recycling.org | 1-888-266-0332 | trc@thermostat-recycling.org

Shipping TRC Collection Container

- Schedule a FedEx "Ground Return Pickup" by calling 1-800-463-3339 or online at www.fedex.com/returnpickup (username and password are not required).
- Enter Pickup Information (Note: Tracking ID is found on red label that was delivered with collection container).
- Select "Schedule Pickup." Your confirmation number will appear on the next page. Keep your confirmation number to help TRC track the shipment if an issue occurs.
- Attach red shipping label to container. Your container will be picked up and then a new collection container will be sent to you.

Thank you for being part of the TRC recycling program.

Figure 8. Retail instructions

School District Outreach Calling Script

1. *New introduction key points*
 - i. *Calling on behalf of EPA (Environmental Protection Agency)*
 - ii. *Calling to ensure that the school districts are aware of legal requirements for disposing waste materials*
 - iii. *Ask for facilities manager*
2. *Roughly, how many school rooms have you renovated in your district in the past year?*
 - a. *Did most of these rooms have thermostats?*
3. *Does your district have plans to renovate school rooms in the next year? If so, roughly how many rooms?*
4. *Are there any mercury containing thermostats in your schools?*
5. *May I ask what your district's process of removing and disposing mercury thermostats is?*
 - a. *[Mark down whether they know how to properly dispose in the database]*
 - i. *Correct answer: identify mercury containing thermostat, dispose of it at a household hazardous waste center, participating retailer, hvac wholesaler or through a waste contractor*
 - b. *Does your district hire an independent contractor or Waste hauler for the district's hazardous waste disposal needs?*
6. *Offer bin: Thank you for the information. Our goal is to make mercury thermostat disposal free and convenient by sending participants a collection bin to ensure safe storage of this hazardous material and keep it away from your students and staff. Once a year or when your bin is full, you will mail the bin, with free shipping, to our waste processing facility. Once we receive the bin, we will ship you another empty bin and pay you \$5 per mercury thermostat to encourage proper disposal.*
 - a. *Can we send you a bin?*
 - i. *[if size is an issue: a gallon pail which is very small and compact was made for this reason, can provide]*
 - b. *Would you like this at multiple school sites?*
 - c. *Shipping address?*
7. *Referrals: Do you know of any other contacts in this district that might come across mercury thermostats and might want a free TRC bin?*

8. *Follow up: [Make sure you have the correct address to send bin to. Also confirm that you have the correct email, so you can forward them a summary of your call]*

School Email Template

Hi _____,

Thanks for your call. As a Thermostat Recycling Corporation (TRC) partner in California, your efforts play an important role in preventing mercury from entering the environment and keeping our community healthy. See more info here: recyclehomethermostats.org

We will provide your schools with a collection bin with pre-paid shipping, as well as a rebate form to receive your **\$5 incentive per mercury thermostat sent in**.

I'll go ahead and sign the following school locations up for our program:

Address - pail or bin?

Please let me know if a correction needs to be made, or if you have any further questions. Thank you for your time and your commitment to the environment.

Sincerely,

Embed –

Did you know a mercury thermostat contains over 1,000 times more mercury than a CFL bulb?

Help protect the environment by not disposing of mercury thermostats in the trash. In partnership with Thermostat Recycling Corporation (TRC), we're here to **make recycling mercury thermostats easy**.

Simply bring your whole, intact thermostats to drop off on your next visit and we will take care of the rest, **free of charge**.

Visit thermostat-recycle.org to learn more about the program.

Does my thermostat contain mercury?

If the thermostat uses a dial or lever, odds are it contains mercury and needs to be recycled. Containing between 3 and 12 grams mercury, thermostats are likely the device in homes that have the most mercury today.

Examples of mercury thermostats:

Look for the mercury switch inside.

If so, it needs to be recycled. It's the law.*

*Disposal bans apply in the following states: CA, CT, FL, IL, IN, ME, MA, MN, NY, NH, OR, PA, RI, and VT.

Hotel/Motel Association Talking Points

- **Objective:** Place article or eNewsletter with hotel motel associations. The article should be framed as an added value for the association and their readership.
- **Tone:** Friendly. Personable. Fluid. Ask about the person's day, their work. These phone calls should try to establish a connection in order to convince. It should not feel static like reading off a script.
- **Person of interest:** Editor in Chief, Business Services Manager. These are based on conversation with Stacey, but the structure of the publications didn't seem concrete. These will be the starting point
- Talking Points
 - Show credibility: calling on behalf of EPA
 - Show value:
 - Although mercury thermostats are no longer manufactured, we have found that there are still many in service in the lower cost hotel and motel industry.
 - Mercury is dangerous. Improper disposal has a fine of \$25,000.
 - We want to get the word out there to hotels and motels so that they don't have to face these fines.
 - Show ease:
 - The article is already written up for your review.
 - (if asked) We want to make this as easy as possible. If you wanted to specify a word count, change tone etc., we will customize to your specifications.
 - (if asked) Stats
 - Words: 175
 - Characters: 929
 - Lines 16

Hotel/Motel Association Article

\$25,000 Fine for Not Recycling a Thermostat! TRC has the Solution.

Who knew that those old thermostats could cost you \$25,000? That's the fine for failing to recycle mercury thermostats. Why such a hefty penalty? Because when mercury thermostats are discarded with everyday trash, the mercury bulb will break, and the mercury will escape and become a dangerous hazard.

According to California law, it's illegal to dispose of mercury thermostats in the trash. HVAC contractors, lodging managers and owners are responsible for recycling all mercury thermostats they remove from service. Staying compliant with the law is a good thing, but what's even better is that all participants of the program get a \$5 rebate for every recycled mercury thermostat. That's right, instead of paying the fine, TRC will pay you! It's a win win situation. You get rewarded for doing the right thing, avoid the \$25,000 penalty, and your community is protected by proper mercury disposal. [Just follow these three easy steps on our website!](#)

Pilot Program

Retail pilot instructions

1765 Duke Street | Alexandria, VA 22314 | thermostat-recycle.org

California Retail Pilot Program

Dear Retail Pilot Partner:

Thank you for participating in the Thermostat Recycling Corporation's (TRC) Retail Pilot Program. As a Retail Pilot Partner, you will be provided with a green bin to collect in-tact mercury thermostats from your customers. In exchange for each mercury thermostat brought in, retailers will provide customers with an immediate form of in-store credit of \$5 or \$10 (depending on the store). TRC will reimburse retailers for the costs of the in-store credit and assume all costs of shipping the bins for proper disposal.

Reimbursement Instructions

TRC bins should be shipped when the bin is full or within one year of the date the first mercury thermostat was collected. Collection sites will receive a new bin once the old bin is returned. Complete the following steps with your **three-part invoice form** to properly dispose of your mercury thermostats and receive your reimbursement check:

1. Include the **yellow** copy in the green bin with the thermostats. Use the shipping label included in your bin when it is ready to be processed.
2. Mail or email the **white** copy to TRC headquarters at 500 Office Center Drive, Suite 400, Fort Washington, PA 19034, trc@thermostat-recycle.org.
3. Retain the **pink** copy for your store records.

Once the bin is received and the mercury thermostats are accounted for, TRC will process all payment forms and administer a payment directly to the store. The bin will then return to you with new materials to begin the process again. This pilot program will last until December 31, 2017.

If you have any questions regarding this incentive program, please call us at **1-888-266-0550** or email us at trc@thermostat-recycle.org for more information.

Thank you,

HHW pilot instructions

1765 Duke Street | Alexandria, VA 22314 | thermostat-recycle.org

California HHW Pilot Program

Dear HHW Pilot Partner:

Thank you for participating in the Thermostat Recycling Corporation's (TRC) HHW Pilot Program. As a HHW Pilot Partner, you will be provided with a green bin to collect intact mercury thermostats from your residents, a toolkit with directions and payment forms, and promotional materials to promote this one-year pilot to your community. In exchange for each mercury thermostat brought in, you will provide residents with a payment form to fill out so that they can receive a \$10 check per mercury thermostat recycled at your facility. TRC will assume all costs of shipping the bins for proper disposal. This pilot program will last until December 31, 2017.

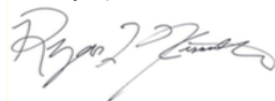

Reimbursement Instructions

TRC bins should be shipped when the bin is full or within one year of the date the first mercury thermostat was collected. Collection sites will receive a new bin once the old bin is returned. Please review the following steps to properly dispose of mercury thermostats and ensure your residents receive their reimbursement checks:

1. Receive mercury thermostat from resident and gently remove cover to make sure it contains mercury ampoules. Residents will not be reimbursed for non-mercury thermostats.
2. Provide resident with two-part form and plastic bag (maximum of 10 t-stats per bag). There is no limit to the number of mercury thermostats residents can be reimbursed for.
3. Include the filled-out white copy and the mercury thermostat in the plastic bag before placing into the green bin. Residents should retain the yellow copy for their records. Use the shipping label included in your bin when it is ready to be processed.
4. Once the bin is received and the mercury thermostats are accounted for, TRC will process all payment forms and administer checks directly to the residents.
5. The bin will then return to you with new materials to begin the process again.

If you have any questions regarding this incentive program, please call us at 1-888-266-0550 or email us at trc@thermostat-recycle.org for more information.

Thank you,

Ryan L. Kiscaden
Executive Director

Wholesaler pilot instructions

1765 Duke Street | Alexandria, VA 22314 | thermostat-recycle.org

California Wholesaler Incentive Program

Dear Wholesale Partner:

You have been selected to participate in the Thermostat Recycling Corporation's (TRC) Wholesaler Incentive Program. As a Wholesale Incentive Partner, you will be rewarded with either \$100 for every TRC bin returned with 40+ mercury thermostats, or \$2.50/ thermostat for bins returned with fewer than 40 thermostats. TRC will assume all costs of shipping the bins for proper disposal. This program will last until December 31, 2017.

Reimbursement Instructions

1. TRC bins should be shipped when the bin is full or within one year of the date the first mercury thermostat was collected.
2. Complete the "CA WHOLESALER PILOT PROGRAM INVOICE FORM."
 - a) Include the **yellow** copy in the green bin with the thermostats.
 - b) Mail or email the **white** copy to TRC headquarters at 500 Office Center Drive, Suite 400, Fort Washington, PA 19034 or trc@thermostat-recycle.org
 - c) Retain the **pink** copy for your store records.
3. Ship the bin to TRC (mailing label included in bin) and include the yellow invoice form.
4. TRC receives the bin and issues payment to the store. NOTE: TRC will only reimburse the store for mercury thermostats; non-mercury thermostats will not be reimbursed.
5. The bin is returned to the store for the collection of additional thermostats.

If you have any questions regarding this incentive program, please call us at **1-888-266-0550** or email us at trc@thermostat-recycle.org for more information.

Thank you,

Ryan L. Kiscaden
