SUBMISSION OF QUARTERLY REPORT; Consent Order Item B-1.6

Dear Mr. Greenlee,

The following quarterly report for the second quarter of 2018 outlines the Thermostat Recycling Corporation's (TRC) most recent outreach and pilot project activities, which have been implemented by our contractor S. Groner Associates, Inc. (SGA). By this submission, TRC is fulfilling obligations on behalf of the 25 signatories of the Consent Order listed below. If you have any questions regarding this submission, please feel free to contact me at (562) 597-0205 or the address below.

Regards,

Stephen Groner
California Program Manager, TRC
100 W. Broadway, Suite 290
Long Beach, CA 90802

cc:

Mr. David Miller

Introduction

During the 2nd quarter (April-June) of 2018, S. Groner Associates (SGA) worked on behalf of the Thermostat Recycling Corporation (TRC) to implement the following tasks from the DTSC-approved Outreach Plan and Pilot Plan as a part of the California TRC Program. The following report outlines those efforts undertaken during this quarter broken into audiences.

Summary of Results

1. Mercury-added thermostats collected this quarter: 4,529
2. New collection containers assigned this quarter: 46
 - Number and location (by street address) of new collection bins assigned (see appendix).
3. Mercury-added thermostats collected this year: 7,750
4. Program element/participants to which the collected thermostats are attributed: information not attributed due to overlapping tactical elements

Table 1. Number of bins in circulation (cumulative)

Audience	Q1 '17	Q2 '17	Q3 '17	Q4 '17	Q1 '18	Q2 '18

Outreach Program

Summary of Outreach Activities for Audience A

Retail/Consumer

Summary

Historically, retailers have been a small component of the mercury thermostat take-back recycling effort. In an effort to increase the collection of mercury thermostats throughout the state of California and provide more accessible and public facing recycling locations for consumers, we have targeted hardware stores throughout the state as new collection site partners. Having solidified 52 retail partnerships in 2016-2017, we began working to expand the number of retail partnerships in 2018. In Q1'18, we reviewed the geographic locations of current partnerships and targeting areas that would benefit from increased levels of promotion and thermostat drop off locations. Using this information, we created a list of locations to recruit as

drop off locations in Q2'18. In Q2'18, we began calling retail locations from our list to sign them up as TRC partner collection sites. In addition to beginning outreach calls in Q2'18, we also updated the materials in our retail partner toolkit, ordered and compiled the toolkits and sent them to our new retail partners. The toolkit serves as a guide to help retail locations participate in the program. The toolkits include a folder with a TRC program introduction letter, prepping and shipping instructions sheet, a sheet helping users to identify a mercury thermostat, English and Spanish shelf talkers, and English and Spanish window clings. In Q2'18, we placed a total of 126 outreach calls and secured five partnerships with retailers. As part of our partnership, these retail locations agreed to host a TRC recycling bin or pail in their facility, display promotional materials in their store and to be in communication with us regarding the progress, barriers and motivators they observe with their customers. TRC sent out a bin to each of these five locations and we prepared and mailed out toolkits to each of these retail locations.

Barriers

- Enrolled in another program: They are already participating in a thermostat recycling program and do not want to participate in two programs.
- Low frequency: They do not feel that their customers encounter mercury thermostats frequently enough to host a bin.
- No value: They do not feel having a bin would be of value to them.
- Space restrictions: They do not have enough space for the bin and promotional materials.

Motivators

- Minimum effort is required to participate
- Their customers have brought mercury thermostats into the store

Results

- Five partnerships were formed with retail locations
 - Five bins were placed with these locations
 - Five toolkits were sent to these locations
- 126 total retail locations were contacted

The following is a list of the retail locations that we entered into a partnership in Q2'18:

1. Markus Supply Ace Hardware - Oakland, CA
2. Van's Ace Hardware - Tracy, CA
3. Oakdale Ace Hardware - Oakdale, CA
4. Sanger Nursery & Hardware - Sanger, CA
5. K & L Hardware - San Bernardino, CA

The following is a list of materials that were finalized, ordered and sent to the above retail locations (see appendix):

- TRC Program Introduction Letter
- Prepping and Shipping Instructions Sheet
- Identifying a Mercury Thermostat Sheet
- English Shelf Talkers

- Spanish Shelf Talkers
- English Window Clings
- Spanish Window Clings

Household Hazardous Waste (HHW)

Summary

In Q2'18 we continued our partnership with the California Product Stewardship Council (CPSC) to coordinate with Household Hazardous Waste (HHW) facilities throughout the state to secure advertising or promotion of the TRC program. In Q2'18, we used a list of 43 HHW locations that expressed a willingness to promote and advertise the TRC program. In Q2'18, we developed the advertising and promotional materials to send to the HHW facilities to promote the program. Materials that were developed included website banner ads, social media posts with graphics, newsletter articles with graphics, utility bill inserts, and print advertisements (see appendix). Materials also emphasized the \$70,000 fine implemented by AB-245, giving residents an incentive to participate in the TRC recycling program. We also contacted certain HHW facilities that stated they were able to promote print advertisements to confirm the best type of advertisement to send. In Q3'18, we will send these materials to the 43 HHWs listed so that they can distribute and publish them on utility bill inserts, newsletters, websites, social media accounts and print advertisement outlets. We will also follow up with the HHWs to gather metrics and results of their promotion.

Barriers

- Mixed messages: Some HHWs that reported they could advertise via a certain medium later stated they could not actually advertise with that medium when contacted again but suggested another medium in its place.

Motivators

- HHWs are generally receptive to promoting the program in some form

Results

The following materials were created and are ready to send to 43 HHWs:

- Utility bill insert graphic and copy
- Newsletter with two graphic options
- Two social media post options with two graphic options
- Two website advertisement options with two graphic options
- Five graphic options for print advertisements (including two Spanish versions)

Environmental Contractors

Summary

Environmental contractors have emerged as a potentially important audience for TRC. In our outreach to other audiences like schools and universities, it has been reported that environmental

contractors are hired to manage waste disposal during renovations. In Q2'18 we began implementing our strategy based on the supposition that these contractors specialize in removing and properly disposing of hazardous waste and would be a prime target to receive a TRC recycling bin to streamline their activities. In previous quarters when our audience members have reported to use an environmental contractor we have recorded their name and contact information. We have compiled that information into a database and in Q2'18 we added our own contact list for a total of 78 environmental contractors in California to use during outreach. We also created a call script for outreach based on information we previously gathered about this audience. During Q2'18, we began calls to environmental contractors in this database with the goal of distributing collection bins to their locations. Our primary goal is to place a bin with environmental contractors and offer them a \$5 incentive rebate per mercury thermostat. Another goal is to collect information from this audience that could inform our campaign strategy and to document that information. During outreach calls we collected data on how often environmental contractors encountered mercury thermostats, how often they dispose of mercury thermostats, if they are interested in a bin, and why or why not.

Barriers

- Delays due to bureaucracy: The corporate office must approve the partnership prior to placing a bin.
- Contacting the right person: Difficulty reaching decision maker on the phone.

Motivators

N/A

Results

- A database with the contact information of 78 environmental contractors
- One call script created to conduct outreach calls
- 24 environmental contractors were contacted
- No bins were placed
- Information was collected and documented about how often environmental contractors encounter mercury thermostats, how often they dispose of them, if they are interested in a bin, and why they were or were not interested

General Contractors

Summary

TRC continues to complete outreach to this audience with hopes of gaining greater participation. Outreach efforts are to inform the contractor of our program if they are not already aware and sign the contractor up for recycling through a bin or pail.

Barriers

- Don't want to be bothered in general: TRC continues to contact locations who don't want to be contacted regarding items outside of their general operations.

- Scarcity of mercury thermostats: Most contractors respond that they either do not work with thermostats or that they hardly ever encounter mercury thermostats.

Motivators

N/A

Results

- TRC called 181 general contractors
- No bin placements

HVAC Contractors

Summary

TRC continues to complete outreach to this audience with hopes of gaining greater participation. Our calls are made to inform the contractor of our program if they are not already aware and sign the contractor up for recycling through a bin or pail.

Barriers

- Don't want to be bothered in general: TRC continues to contact locations who don't want to be contacted regarding items outside of their general operations.
- Scarcity of mercury thermostats: Most contractors respond that they either do not work with thermostats or that they hardly ever encounter mercury thermostats.
- Recycle with HVAC Wholesalers: A frequent response is that they already recycle through their HVAC Wholesaler.

Motivators

- Incentive: Although most of our sign-ups this quarter were from contractors who already recycle at a HVAC Wholesaler, we were able to get them to directly participate and order a container with the incentive offer.

Results

- TRC called 103 HVAC contractors
- Six bin placements

Demolition Contractors

Summary

TRC continues to complete outreach to this audience with hopes of gaining greater participation. Our calls are made to inform the contractor of our program if they are not already aware and sign the contractor up for recycling through a bin or pail.

Barriers

- Don't want to be bothered in general: TRC continues to contact locations who don't want to be contacted regarding items outside of their general operations.
- Scarcity of mercury thermostats: Most contractors respond that they either do not work with thermostats or that they hardly ever encounter mercury thermostats.

Motivators

N/A

Results

- TRC made 130 calls to demolition contractors
- No bin placements

HVAC Wholesalers

Summary

Our collections during the second quarter were lower compared to the same quarter last year. While we are completing more site visits and calls than ever before, there are not as many thermostats being collected in the TRC bins. During the second quarter there was an average of 21 thermostats in the bins being returned.

Barriers

- Plumbing only: Non-compliant HVAC Wholesalers continue to state they are only plumbing supplies or fabrication locations, and therefore will not accept a recycling container.
- Decline in recycling: Participating HVAC Wholesalers are seeing a decline in collections and send some of their recycling bins back to us because they do not need them anymore.

Motivators

- Ease of program: We received positive feedback on the ease of the program from current collection locations.

Results

- TRC completed 87 calls to HVAC Wholesalers who hadn't returned a container in the past 6 months
- TRC performed 217 site visits to current wholesale collection locations, with another 11 visits to non-compliant HVAC Wholesalers between April and June of 2018
- TRC completed 228 more site visits than in Q2'17
- 67 wholesale locations requested a new bin display

Summary of Outreach Activities for Audience B

Building Departments

Summary

Building Departments can best support the collection of mercury-added thermostats by informing contractors, inspectors and other professionals who come to the department about the importance of proper disposal of mercury thermostats. Based on our scoping calls, we believe that employees of building departments have little contact with thermostats. However, the professionals who seek the services of the building department frequently come in contact with thermostats in their line of work. Therefore, building departments will serve as a conduit for outreach. As part of our outreach efforts, promotional flyers will be placed at the front desks at building department offices.

Utilizing the database of county building departments created in Q4'17, and the call script created in Q1'18, we made 195 calls to county departments in Q2 of 2018. The building departments have been very receptive to our efforts and we have been able to distribute flyers to 45 out of the 57 county building departments. A minority of four county building departments have declined to take the flyers and we are still in communication with the remaining county building departments.

Barriers

- Building Department employees who did not accept our flyers have had a variety of different reasons for the refusal. No clear consensus was observed, and their answers varied from “not enough space” to “we don’t display flyers” to “the person who oversees office materials is not in.”

Motivators

- Smaller building departments that are resistant to hosting our flyers in their offices have been persuaded to take the flyers by mentioning the cooperativeness of larger county building departments.

Results

- Of the 57 county-level building departments that we have targeted, 45 building departments have agreed to distribute flyers on our behalf

Table 6. Outreach building department calls

Description	Frequency
Number of calls	195
Number of departments who requested flyers	45

Utility Companies

Summary

In our outreach plan we had strategized to reach out to utility companies who performed mercury thermostat installations via contractors for their customers, but upon further communication with utility companies we have not found a utility company that provides this service to their customers or facilitates the installation of thermostats for their customers. We will continue to perform outreach to determine if we are able to find a utility company that employs or has influence over contractors who may focus on thermostat installation. As our current area of focus we have reached out to utility companies to create partnerships to perform outreach directly to their customers promoting the TRC recycling program. Utility companies are mandated by the federal and state government to reduce energy usage per resident over time. Many utility companies have taken the strategy of promoting smart thermostats in order to meet their mandate. These rebate programs are frequently utilized by their large customer base, who we are now performing outreach to. We are currently working to place outreach materials concerning mercury thermostat recycling alongside related rebate programs and other outreach initiatives that are active. These efforts may include: posting information and links to the TRC website on their own websites, distributing bill inserts, posting on their social media accounts, sending out a TRC article in their newsletters, and/or performing point of purchase outreach with TRC materials at stores like BestBuy, Lowe's, Home Depot and Sears.

With our challenges to locate a utility company that involves themselves in thermostat removal and installation it is not possible to monitor the number of bins placed (as we are not able to place bins) but will still be able to monitor the number of thermostats collected and incentives returned. Our main emphasis is on communicating to utility customers how and where to recycle their mercury thermostats themselves and how to redeem the incentive.

In Q2'18, we made an extensive effort to create a relationship with four large utility companies and 23 small utility companies (see appendix).

These efforts, first, focused on determining if they hosted energy efficiency programs, performed POP, and what type of advertising opportunities they may offer. Secondly, these efforts focused on working with the utility company to disseminate information about the TRC program to their customers. We created website copy, a newsletter article, social media posts and point of purchase tear pads as options for the utility companies to disseminate the information (see appendix).

Barriers

- Keeping utility companies interested: Utilities are complex organizations with competing interests. It has been difficult connecting with the correct staff within their organizations and keeping their attention on our issue.
- Not a priority: We have little leverage over the large utility companies. Any agreements or partnerships that may become established are subject to be put on hold or delayed by the utility companies.
- Small utilities lack of similar programs: Some of the small utility companies do not have smart thermostat rebates specifically, so in some cases it has not been possible to piggyback off this resource.

Motivators

- Large utilities host similar programs: Utility companies are beholden to legislation that requires them to increase energy savings by existing customers and to increase energy capacity for the area of their service. Tying in the mercury thermostat rebate program as a helpful piece to aid their existing energy saving initiative has proven to be effective.
- Leveraging current partners: Mentioning the participation of larger utility companies such as PG&E and SMUD in our outreach program has been an effective discussion point.
- Convenient materials: Providing multiple mediums for promotion and “ready to go” materials has made the process easier for utility companies.

Results

- The following six utilities were uninterested or deemed ineligible due to the age of the homes and/or type of residents they serve:
 1. Bear Valley Electric Service
 2. City of Cerritos Electric Utility
 3. Glendale Water and Power
 4. Gridley Electric Utility
 5. Lathrop Irrigation District
 6. Moreno Valley Utility
- Website links to the TRC program were placed on websites of the following four utility companies:
 1. SCE
 2. SMUD
 3. Azusa Light and Water
 4. City of Banning Electric Department
- TRC point of purchase outreach materials were sent and/or co-branded with the following three utility companies:
 1. SoCal Gas
 2. SMUD, co-branded
 3. City of Healdsburg Electric Department

School Districts

Summary

Schools can best support the collection of mercury-added thermostats by being informed of the proper disposal procedures and by having a collection bin at hand. Schools, especially public schools can be slow to renovate and generally only replace a thermostat if it has ceased functioning. This may anecdotally signal the potential for decades old thermostats in their facilities. Using the average temperature of a region, the age of structure and the population size as parameters, we have first prioritized schools in San Bernardino, Fresno and Sacramento but will be including all California schools in the outreach program. The outreach program communications at this point consist of cold-calls with the purpose of distributing collection bins and to collect and distribute pertinent information regarding construction, the requirement to recycle mercury thermostats and their processes for hazardous waste disposal.

In Q4'17, TRC made repeated phone calls to schools, prioritizing 39 school districts located in Sacramento, San Bernardino and Fresno that had received prop 39 grant funds. Prop 39 grant recipients pose a significant advantage, as we can identify schools that are actively renovating and modernizing their facilities with environmental impact in mind. Given the importance of outreach to schools, TRC took Q1'18 to examine our call efforts to inform successive outreach and/or pilot programs for schools in Q2. After deliberation it was decided that we would reach out to individual schools that are part of the aforementioned school districts. It was hypothesized that perhaps the facility managers of the individual schools might have more capacity to be able to speak with us as well as feel more ownership of the safety of the school, so these managers were our main focus when calling the individual schools.

In Q2'18, TRC made a total of 473 calls to the individual schools and were able to have a successful contact with 32 of the 238 individual schools in our database. None of the 32 schools have requested a collection bin.

Barriers

- Redirecting us to districts: Few of the schools that we have spoken to have specifically requested us to speak to the school district instead. They have claimed that it is school policy to redirect external organizations to speak with the district concerning such manners.
- Difficulty getting in contact: There were difficulties in getting in contact with many of the district facility managers. Both cold calls and calls made during requested time frames frequently resulted in being transferred to a voicemail.

Motivators

Successful contacts	32

Note: A call is defined as successful if the target person is reached and the full call script was implemented.

Universities/Colleges

Summary

Universities and colleges can best support the collection of mercury-added thermostats by serving as a conduit to the waste haulers or contracting companies that service their facility. While most universities and colleges have a facility manager, they do not usually work on HVAC related repairs or replacements. Our initial interviews showed that facility managers knew that mercury-added thermostats should not be thrown in the trash, but they did not understand where or how to properly dispose of them. This responsibility was left to the contractor working on the project. Our outreach will focus on educating facility managers about recycling mercury-added thermostats and supply them with a bin if their facility does have mercury-added thermostats on-site. The managers can then supply their contractors with the bin or have the contractor leave the thermostats with the manager to properly recycle.

In Q4'17 and Q1'18, TRC made repeated phone calls to 79 universities. The 79 universities were chosen due to the size of their large student body, which exceeded 10,000 students. Based on the limited success of Q1'18 calls, the Q2'18 database was changed to be comprised of just small universities (under 10,000 students) and community colleges that have received Prop 39 grants. This change was made to test if smaller schools would be more responsive due to less bureaucracy.

In Q2'18, a total of 408 calls were made to such schools, with successful contacts to 33 schools. None of the universities or community colleges requested a collection bin.

Barriers

- Hard to get in contact: There were difficulties in getting in contact with many of the district facility managers. Both cold calls and calls made during requested time frames frequently resulted in being transferred to a voicemail.
- Call the district: A few of the community colleges that are part of a community college district have requested us to contact the district instead of them directly.

Summary of Outreach Activities for Audience C

Property Managers

Commercial Property Managers

Summary

The potential legal and financial repercussions of improper thermostat disposal can be a powerful motivator for commercial property managers. This audience can best support the collection of mercury-added thermostats by being able to properly identify and promote the safe removal and disposal of mercury-added thermostats within their properties. Our tactics will help commercial property managers become more aware of a rebate incentive and bin placement to encourage proper disposal via a TRC recycling bin.

Commercial property managers were chosen as an outreach target because their purview allows them to assess their organizational needs for mercury recycling, as well as have the occupational incentives to promote mercury recycling within their properties. Commercial property managers will want to be aware of the details of AB-245 to avoid the costly penalty of not recycling thermostats properly.

In previous quarters, phone calls were conducted to engage this audience but almost no contact was made. Therefore, a total of 1,177 emails from commercial property managers across California were acquired to see if digital communications would be more effective than phone calls when performing outreach to this audience. The email copy focuses on three messages for motivation: the \$70,000 fee associated with improper disposal of the mercury thermostats, a \$5 incentive per mercury thermostat recycled, and the convenience/ease of using the program. The email copy was developed to reflect the chief objectives of placing TRC recycling bins with commercial property managers and raise awareness about the \$5 incentive for mercury thermostat recycling.

In the upcoming quarter we will be sending a total of three emails to this audience. The headlines for each e-newsletter will be a/b tested to be able to develop a strong email for the third and final email. See the final draft of Email 1 in the appendix.

Barriers

- Finding the right contacts: It was difficult to find the proper emails from commercial property managers that aligned with our criteria making them more likely to come in contact with mercury thermostats.
- Delays: There were delays in sending out the emails due to technical issues with a url, gaining clarification on the validity of AB 245 in reference to mercury thermostats, and ensuring we had a significant number of emails prior to launch.

Motivators

- Financial repercussions: The strength of the AB-245 \$70,000 fine and the \$5 rebate program guided a clear call-to-action for each email. We hypothesize that this will be a motivator for this audience and hope to collect data indicating the validity of that hypothesis.

Results

- Three drafts of email copy were developed
- 1,177 commercial property manager emails were purchased

Commercial Property Management Associations

Summary

Property management associations serve as a conduit of information to property management companies regarding best practices and policy updates. They are also in communication with property managers and will therefore serve as a messenger for the TRC program. The associations are motivated to provide their members with up-to-date information, like how to avoid a significant fine by recycling mercury thermostats.

In Q2'18, we continued our outreach to commercial property management associations. Our goal was to place articles (see appendix) in their publications (i.e. blog, newsletter, email, etc.) and/or on their websites. Commercial property management associations were very difficult to communicate with as they're often occupied with other tasks when we call or email. Calls were often transferred to voicemails or to sales representatives resulting in a small number of successful contacts. Below is a list of the commercial property management associations we are currently in contact with:

1. California Association of Realtors (CAR)
2. NAIOP SoCal
3. Building Owners and Managers Association of California (BOMACal)
 - a. Silicon Valley
 - b. San Francisco

- c. San Diego
 - d. Sacramento
 - e. Oakland-East Bay
 - f. Orange County
 - g. Greater Los Angeles
 - h. Inland Empire
4. Association of Commercial Real Estate (ACRE)
 5. AIR Commercial Real Estate Association
 6. International Council of Shopping Centers (ICSC)

Barriers

- Difficult to get ahold of/unresponsive: Staff is often occupied with other tasks when we call and are unresponsive to voice mails and emails.
- Lack of interest: The employees we speak with are often not interested in the subject matter.

Motivators

- Ease of the process: We provide the article, graphics and any other information they need to move forward with promoting the program.

Results

- 30 calls were made to commercial property management associations
- Four successful points of contact was made
- One article was placed

Residential Property Managers

Summary

The potential legal and financial repercussions of improper thermostat disposal can be a powerful motivator for residential property managers. This audience can best support the collection of mercury-added thermostats by being able to properly identify and promote the safe removal and disposal of mercury-added thermostats within their properties. Our tactics will help residential property managers become more aware of a rebate incentive and bin placement to encourage proper disposal via a TRC recycling bin. Residential property managers were chosen as one of our targets for outreach because their purview allows them to assess their organizational needs for mercury recycling, as well as have the occupational incentives to promote mercury recycling within their properties. Residential property managers need to be aware of AB-245 to avoid the costly penalty of not recycling thermostats properly.

In previous quarters, phone calls were conducted to engage this audience, but successful contacts were minimal. Therefore, a total of 1,200 emails for residential property managers across California were acquired to see if digital communications would be more effective than phone calls when performing outreach to this audience.

The email copy focused on three messages for motivation: the \$70,000 fee associated with improper disposal of the mercury thermostats, a \$5 incentive per mercury thermostat recycled, and the convenience/ease of using the program. Email copy was developed to reflect the chief objectives of placing TRC recycling bins with residential property managers and raise awareness about the \$5 incentive for mercury thermostat recycling. In the upcoming quarter we will send a total of three emails to this audience. The headlines for each e-newsletter will be a/b tested to be able to develop a strong email for the third and final email. See the final draft of Email 1 in the appendix.

Barriers

- Finding the right contacts: It was difficult to find the proper emails from residential property managers that aligned with our criteria.
- Delays: There were delays in sending out the emails due to technical issues with a url, gaining clarification on the validity of AB 245 in reference to mercury thermostats, and ensuring we had a significant number of emails prior to launch.

Motivators

- Financial repercussions: The strength of the AB 245 \$70,000 fine and the \$5 rebate program guided a clear call-to-action for each email. We hypothesize that this will be a motivator for this audience and hope to collect data indicating the validity of that hypothesis.

Results

- Three drafts of email copy were developed
- 1,200 residential property manager emails were purchased

Residential Property Management Associations

Summary

Property management associations serve as a conduit of information to property management companies regarding best practices and policy updates. They are also in communication with property managers and will therefore serve as a messenger for the TRC program. The associations will want to provide their members with mercury recycling information as it will help property management companies avoid potential legal or financial repercussions of improper waste disposal.

In Q2'18, in addition to other outreach efforts we began making calls to the updated residential property management association database. Our goal is to place an article (see appendix) in their publications (i.e. blog, newsletter, email, etc.) and/or on their websites. After follow-up calls and emails, the property management associations showed initial interest, but it was difficult to actually have the promotional material successfully placed. Below is a list of the residential property management associations we are currently in contact with:

1. California The National Association of Residential Property Managers (CALNARPM)
 - Alameda/ Contra Costa
 - Long Beach/ Orange County
 - Los Angeles
 - Marin/ Sonoma
 - Monterey Bay
 - Northern California Central Valley
 - Sacramento
 - San Diego
 - Santa Clara
2. California Apartment Association (CAA)
 - Central Valley
 - Contra Costa
 - Greater Fresno
 - Greater Inland Empire
 - Income Property Assn. of Kern
 - Los Angeles
 - Marin Income Property Association
 - North Bay
 - Orange County
 - Rental Housing Assn. of Sacramento Valley
 - San Diego
 - San Francisco Apartment Association
 - Solano
 - Tri-County
3. International Realty & Investments

4. Apartment Association of Greater Los Angeles (AAGLA)
5. Apartment Owners Association of California, Inc
 - San Fernando Valley
 - Orange County
 - Los Angeles
 - San Diego
 - Long Beach
 - Northern California
6. FirstService Residential California
 - Bay Area
 - Inland Empire
 - Los Angeles
 - Orange County
 - Palm Desert
 - Sacramento
 - San Diego
 - Santa Clarita
 - San Francisco
7. California Residential Services Association
8. California Association of Realtors (NAR)

Barriers

- Difficult to get ahold of/unresponsive: Staff is often occupied with other tasks when we call and are unresponsive to voice mails and emails.
- Lack of interest: The employees we speak with are often not interested in the subject matter.

Motivators

- Ease of the process: We provide the article, graphics and any other information they need to move forward with promoting the program.

Results

- 52 calls were made to residential property management associations
- 12 successful points of contact were made
- One article was placed

Table 11. Calls to residential property managers

Description	Frequency
Number of calls	52
Successful contacts	12

Hotel/Motel

Summary

Hotels and motels can best support the collection of mercury-added thermostats by being informed of the proper disposal procedures. Given hotel's, and to a lesser extent motel's, need to consistently renovate their establishment to meet the standards of their brand, we do not see the majority of hotels and motels to be a fruitful audience for individual outreach. Based on our scoping calls, we believe that hotels/motels/inns/bed & breakfasts of lower revenue will have the greatest likelihood of having mercury-containing thermostats. Given the difficulty in identifying these lower revenue lodging businesses, we will be contacting and partnering with lodging associations to place an article or eNewsletter containing information on the need to recycle mercury-containing thermostats. The potential legal and financial repercussions of improper waste disposal will be emphasized as it is likely a powerful motivator for hotel and motel management.

We continued outreach to hotels and motels this quarter. Our goal is to place an article (see appendix) in their publications (i.e. blog, newsletter, email, etc.) and/or on their websites. After preliminary calls to establish contact, the hotel-motel associations showed significant interest, but were busy and difficult to follow up with. Below is a list of the hotel-motel associations we are in contact with:

1. California Lodging Industry Association
2. California Hotel & Lodging Association
3. San Diego County Hotel Motel Association
4. Anaheim/Orange County Hotel Lodging Association
5. Sonoma County Lodging Association
6. Sacramento Hotel Association
7. Hotel Council of San Francisco
8. Hospitality Santa Barbara
9. Monterey County Hospitality Association

Barriers

- Difficult to get ahold of/unresponsive
- Constantly passed along to different members of the organization

Motivators

- Desire to help their members
- Ease of the process – we provide the article

Results

- 33 points of contact made via calls/emails
- Two articles placed:
 - California Hotel & Lodging Association and
 - The Sonoma County Lodging Association
- One article shared in the Board Packet for their Board Meeting:
 - Sacramento Hotel Association

Pilot Program

Summary of Pilot Activities for Audience A

Retail/Consumer

Summary

In this pilot program we tested immediate monetary incentives in eight retailers throughout the state of California. The goal of the retail pilot was to initiate and maintain a robust program that: engaged participating retailers, increased overall collection rates and provided conclusive evidence on what the most effective financial incentive amount per recycled mercury-added thermostat should be for TRC's California program. During Q2'18, we continued to support the eight hardware store pilot partners by providing financial incentives in the form of immediate in-store credit for consumers and contractors when they turned in a mercury-added thermostat and rebate form and by conducting check-in calls. Nine hardware stores signed up initially, but one location in Folsom was not able to continue participation due to unrelated internal business issues. The remaining hardware stores were located in Clovis, Crestline, Fresno (two stores), Los Angeles, Sacramento, Stockton and West Hollywood. We chose these locations based on the age of structures, income, population-size and temperature fluctuation in an area. We also had three control stores located in Oakland and San Francisco (two store locations).

Barriers

- Their area doesn't have enough old homes
- Most people have already replaced their thermostats
- Lack of promotion and knowledge of the program
- Few new thermostats sold in store

Motivators

- Having their information on the TRC website (zip code locator)
- Receiving promotional materials from TRC
- Desire to help their community

Results

- Total thermostats collected: Six

- Total bins returned: Two
- Continued to provide support and quarterly check-in calls to partners.

Table 13. Retailer pilot partners: \$5, \$10 incentive immediate in-store credit

Pilot Partner	Address	City
Emigh Ace Hardware (\$10)	3555 El Camino Avenue	Sacramento

Cole Hardware (Control sites - received additional training but not part of incentives)	2254 Polk Street	San Francisco
Cole Hardware (Control sites - received additional training but not part of incentives)	345 9th Street	San Francisco
Cole Hardware (Control sites - received additional training but not part of incentives)	5533 College Avenue	Oakland

HHW

In Q1'17, TRC initiated a pilot with three HHW county programs across the State of California to measure the effectiveness of a \$10 mail-in-rebate incentive to drive residents to recycle mercury-added thermostats. This included San Bernardino County (South), Santa Clara County (Central), and Del Norte County (North). This is in response to the October 7, 2016 Approval with Modification Letter from DTSC:

“2. TRC is to implement a pilot project that provides a \$10 per thermostat incentive payment (using either a mail-in rebate or gift card) to anyone who turns in thermostats at household hazardous waste collection facilities. This type of pilot project was

proposed in TRC's May 10, 2016 draft Pilot Programs Plan but removed from its August, 2016 submittal."

During Q2'18, TRC worked with the participating HHW program managers to continue to reinforce the program and its goals by providing the rebate to HHWs when the incentive forms were turned in and when conducting check-in calls. Out of all the target audiences, HHW program managers have been particularly supportive of TRC's program goals as they align with their goal of effectively collecting hazardous waste from residents.

Barriers

- People are unaware that they can recycle their old thermostats at HHWs
- Difficulty in redeeming the incentive during drop-off process at HHWs
 - People bring all their waste in a bundle and don't point out that they are recycling old thermostats
 - Sometimes there are no staff on the premises when people drop-off
- The delay in receiving the incentive is too long

Motivators

- Shared goals/role of environmental stewardship
- Sandwich board signs are useful visual prompts

Results

- Continued to provide support and quarterly check-in calls to partners

Table 14. HHW pilot partners: \$10 mail-in-rebate incentive for residents

Pilot Partner	Address	City
Del Norte Solid Waste Management Authority	1700 State Street	Crescent City
County of Santa Clara - Household Hazardous Waste Program	1555 Berger Drive, Suite 300	San Jose
San Bernardino County Fire - Household Hazardous Waste Division (in conjunction with City of San Bernardino)	S.B. International Airport 2824 East "W" Street, Bldg. 302	San Bernardino

San Bernardino County Fire - Household Hazardous Waste Division (in conjunction with Hesperia)	Hesperia Fire Station 17443 Lemon Street	Hesperia

HVAC Wholesaler

In Q2'18, TRC continued this pilot with 12 HVAC Wholesalers across the State to measure the effectiveness of monetary incentives on HVAC Wholesalers' return rates. We supported our HVAC Wholesaler pilot partners by providing the incentive when rebate forms were turned in and when conducting check-in calls. This is in response to the October 7, 2016 Approval with Modification Letter from DTSC:

"3. TRC is to implement a pilot project that provides \$100 mail-in rebate for each bin return by HVAC Wholesalers that contain 40 or more thermostats, and for bins with less than 40 thermostats, a prorated amount of \$2.50 for each thermostat in the returned bin. Although a pilot project of this type was not included in the May 10, 2016 or the August 8, 2016 pilot project plans, DTSC notes that the return rate for HVAC Wholesaler return of collection bins has remained around 55%. A return rate this low, in the primary participant group that has been the focus TRC's program, is troubling, and it is important for TRC to explore methods to improve the collections in these bins, and the rate of their return."

We partnered with 12 current HVAC Wholesaler collection sites for the pilot program and used quota sampling to ensure that participating HVAC Wholesalers met the following criteria:

1. Had a combined, baseline return rate of 55% (for a representative sample)
2. At least four who have been in the program for more than two years
3. At least three returned more than three bins in the past year
4. At least four located in Northern California
5. At least four located in Southern California

We sent each participating manager a packet with instructions on how to file the new HVAC Wholesaler invoice form (see appendix) to receive their check rebate after returning their TRC bin and 25 forms to send in with their bins.

Letter sent to Wholesale Managers

Hello!

Thank you for agreeing to participate in Thermostat Recycling Corporation's (TRC) HVAC Wholesaler Incentive Program. For each bin returned with 40 or more thermostats, we will provide a \$100 reimbursement, or \$2.50 per thermostat if the bin contains fewer than 40 thermostats. This incentive program will last until December 31, 2017.

During this year, I will be contacting you once a quarter to follow up with the program. Feel free to contact me with any questions you may have, at this email: ksingh@sga-inc.net or by calling me at 732-485-4589.

Attached you will find the Invoice Form necessary to obtain the reimbursement. These will also be sent to your store's location by mail. Please read the attached instructions, which detail how to properly submit the form to TRC.

Again, thank you for your participation!

Sincerely,

Kendra

Barriers

- HVAC Wholesalers don't believe many mercury thermostats are still in buildings
- Unsure of whose responsibility it is to take care of the bin/incentive

Motivators

- Ease of the process
- The fact that the program brings contractors into their stores

Results

- Total thermostats collected: 191
- Total bins returned: 10
- Continued to provide support and quarterly check-in calls to partners

Summary of Pilot Activities for Audience B

School Districts

Summary

Schools can best support the collection of mercury-added thermostats by being informed of the proper disposal procedures and by having a collection bin at hand. Schools, especially public schools, can be slow to renovate and generally only replace a thermostat if it has ceased functioning. This may anecdotally signal the potential for decades old thermostats in their facilities. Using the average temperature of a region, the age of structure and the population size as parameters, we have prioritized schools in San Bernardino, Fresno and Sacramento for our pilot program (but will address all schools in the outreach program). The pilot program differs from outreach program in that pilot communications are approached as a partnership, where we call schools on a quarterly basis, providing more attention and information. In scientific research, we call this the “extra attention treatment”, testing whether extra attention prompts different results. Whereas the outreach program communications are cold-calls with the purpose of distributing collection bins and to collect and distribute pertinent information.

In Q2‘18, TRC conducted another series of check-in calls with school districts. Of the 15 schools contacted for quarterly check-ins, six schools took or returned our call. Two of the schools returned our call and specified that there has not been a change in the renovation plans nor will there likely be a change in the future and have asked us to exclude them from their list. The four other schools similarly stated that they do not have any planned changes to the renovation schedule and did not request a bin.

Barriers

- Difficulty making contact: There were difficulties in getting in contact with the district facility manager. Both cold calls and calls made during requested time frames resulted in frequently being transferred to a voicemail.

Motivators

N/A

Results

- 106 calls were made to gather new pilot participants
- 42 calls were made to check on existing pilot member schools
- Of the 15 schools, six schools took or returned our calls
- We got in touch with three schools we were previously unable to get in contact with

Table 16. Pilot school calls

Description	Participation Solicitation Calls	Check-in Calls
Number of calls	106	42
Successful contacts	3	6

Note: A call is defined as successful if the target person is reached and the full call script was implemented.

Summary of Pilot Activities for Audience C

Utility Companies

Summary

Utilities are a key audience for TRC as they have mass reach to residents and can be a key stop for residents who are looking to upgrade their homes for energy efficiency. Many of our efforts for utilities piggyback off their existing programs that provide information and rebates for items like thermostats and other appliances. Originally, the pilot was going to run through the utility companies' contractors, who we thought regularly installed and removed thermostats for their customers. However, upon more communication with utility companies, we have not encountered any utility companies that provide this service to their customers or that facilitate the installment of thermostats for their customers. For the pilot we have switched tactics to better fit the goals and structure of the utility companies we engaged with. The utility pilot program now seeks to offer a "collect all" thermostat program to utility customers. Utility customers will be offered a way to recycle any thermostat (hence "collect all") they have, in addition to receiving a \$5 rebate for mercury-added thermostats. We are running this "collect all" program with our pilot utility companies as a way to help us gather more data on whether identifying a mercury thermostat (vs. an electronic thermostat) acts as a barrier to collection, as well as discovering whether the number of electronic thermostats being recycled is comparable to the number of mercury thermostats being recycled. As an added benefit, we will be helping to recycle old electronic thermostats that are currently in circulation.

With this change in tactics for the pilot, we will still be monitoring the number of thermostats collected (mercury and electronic) and incentives returned but will not be able to monitor the number of bins placed as we are no longer placing bins with contractors. Our focus will be to inform utility customers on how and where to recycle their old thermostats themselves, offer an incentive and record data of our "collect-all" findings.

During Q2'18 we chose two new utility pilot partners: Power Enterprise of the San Francisco Public Utilities Commission and Lassen Municipal Utility District, replacing LADWP as we were unable to gain significant participation on their part. These partners were chosen based on available outreach method through that partner, number of residents served, and number of

participating recycling locations in the area. This quarter we established the groundwork for a roll out, finalizing and sending out pilot materials to our partners for approval.

Barriers

- Point of contact at utility company was too busy: Difficult to get ahold of and to follow up with the employees of utility companies.
- Chain of command at utility companies: Point of contact often needs to get approval from higher-ups and this process can be lengthy.

Motivators

- Mercury-added thermostat recycling seen as a worthwhile cause
- The TRC program fits in well with their other energy efficiency and rebate programs

Results

- Confirmation of interest from both the Power Enterprise of the San Francisco Public Utilities Commission and Lassen Municipal Utility District in working with TRC
- Facebook and Twitter posts sent out by the Power Enterprise of the San Francisco Public Utilities Commission

Property Managers

Summary

Property managers (commercial and residential) are the party responsible for ensuring that thermostats are up to date within the buildings they manage. Rather than management conducting periodic checks, thermostats tend to be switched out when tenants make a request. It is notable that often there seems to be no communication between the external contractor and the property management on safe disposal of hazardous material. The potential legal and financial repercussions of improper waste disposal can be a powerful motivator for property management companies. This audience can best support the collection of mercury-added thermostats by being able to properly identify and promote the safe removal and disposal of mercury-added thermostats within their properties. Our tactics will help property managers become more aware of mercury-added thermostats, aid in proper identification, and make them aware of proper disposal via a TRC recycling bin. Unlike other collection programs, the property managers pilot collection program allows both electronic and mercury-added thermostats to be included in the recycling bin. This will provide us with two pieces of information: it will help isolate whether the identification of mercury thermostats vs. electronic thermostats is a barrier to recycling mercury thermostats and also help provide a ratio of mercury thermostats that are being removed and replaced and electronic thermostats that are being removed and replaced.

Our strategy for utilities and property managers emphasizes placing collect-all bins at pilot locations and monitoring their collection progress. In Q1 '18 we made over 500 phone calls trying to place bins with property managers, almost all of which were unanswered with no bins

placed. In Q2'18 we made changes to our strategy to avoid the barrier of unanswered phone calls by incorporating emails. The pilot, as planned, focuses on a specific geographic location where we will test out different strategies and compare results with the general outreach strategy. We began to work on a geographically targeted email campaign that will focus on testing messaging to help understand the reception and response to different non-monetary incentives, while directing email recipients to order a free TRC recycling bin. The geographic locations for the pilot are the San Francisco Bay Area and the Los Angeles area. These two locations will receive different messaging than the outreach emails for property managers.

In Q2'18 we acquired the email database list we will use for the email campaign and drafted the copy we will use in each email, testing different messaging themes. These emails will then be sent throughout Q3'18. Once data collection is complete we will continue our efforts to place bins by going in person to property management offices in the San Francisco Bay Area and Los Angeles area, personally delivering bins to property managers when accepted.

Barriers

- Unsuccessful phone calls: Property managers that we have been calling do not answer the phone, push calls directly to voicemail and do not respond to attempts to communicate.

Motivators

N/A

Results

- Built a database of 837 email names of residential property managers and 138 email names of commercial property managers in the San Francisco Bay Area and Los Angeles area
- Drafted copy for email testing messages

Program Modification Plan

Proposed Modification #1: Provide smaller recycling pails to requesting locations.

- Completed/ongoing
- Provide locations returning 6 or less thermostats in a recycling bin with a pail. Completed quarterly.
- Also offered in person during site visits and trade shows, as well as outreach calls

Proposed Modification #2: Move “miss you” postcards sent from 3 times a year to 6 times a year to current collection locations.

- Ongoing/in process
- In Q2: sent 290 postcards in May

Proposed Modification #3: Send quarterly reminder shipment emails to all collection locations not returning a container in 6 months.

- Ongoing/in process
- In Q2: sent 121 emails in May

Proposed Modification #4: Call all collection locations 4 times a year that haven't shipped a bin in 6 months.

- Made 200 calls in Q2 to these locations

Proposed Modification #5: Begin offering a merchandising display to all wholesale or retail locations visited during store sweeps.

- Completed, most already had displays, keep their bin in the back, or didn't have room for them. We had 67 requests we fulfilled.

Proposed Modification #6: Execute site visit sweeps 2 times a year to clean out locations with a minimum visit of 100 locations each sweep.

- Required to visit every location every year – not what we had proposed
- Q2: 355 current collection site visits | 11 non-compliant visits
- 204 site visits remain for 2018

Proposed Modification #7: Ensure all marketing collateral include a version in Spanish.

- We have Spanish translations for all current marketing material, available on our website and well as printed by request
- Have link for Spanish version on all new advertisements, targeting Spanish speaking homeowners with new brochure and messaging

Proposed Modification #8: Produce a California specific YouTube pop-up advertisement for specific Google AdWords key terms which is informed by the non-monetary message testing from Group A pilot plan.

- Completed

Proposed Modification #9: Change California specific marketing collateral to include messaging which are informed by the non-monetary message testing from Group A pilot plan.

- Ongoing, all new marketing includes family/safety messaging

Proposed Modification #10: Once a year, meet with other Extended Producer Responsibility (EPR) groups which operate in California to discuss best practices and ways to improve outreach.

- Attended by Ryan Kiscaden on 5/16/18
- Summary of meeting in appendix – EPR Executive Director Meeting May 16, 2018

Proposed Modification #11: Reach out to all HVAC wholesale locations across the State that are not currently collecting mercury-added thermostats.

- 11 visits in Q2
- 11 calls in Q2

Proposed Modification #12: Review all collection locations' geographic coverage with GIS mapping software. The findings are to be published in each year's annual report submission. Where gaps in coverage are discovered, TRC will implement a campaign to target placing recycling containers in the region.

- See next section

Geographic Information Systems (GIS)

The following maps show the total number of collection locations throughout the state of California with the location's respective population per county. Size of population helps to depict the number of residents served by our collection sites. These maps will help inform our strategy for gaining partnerships for recycling drop off locations, including new retail partnerships and HHW promotion. By layering the population size against drop off locations and the number of thermostats collected we can better understand which counties need more support and promotion.

Figure 1. Map showing collection bins per county and county population

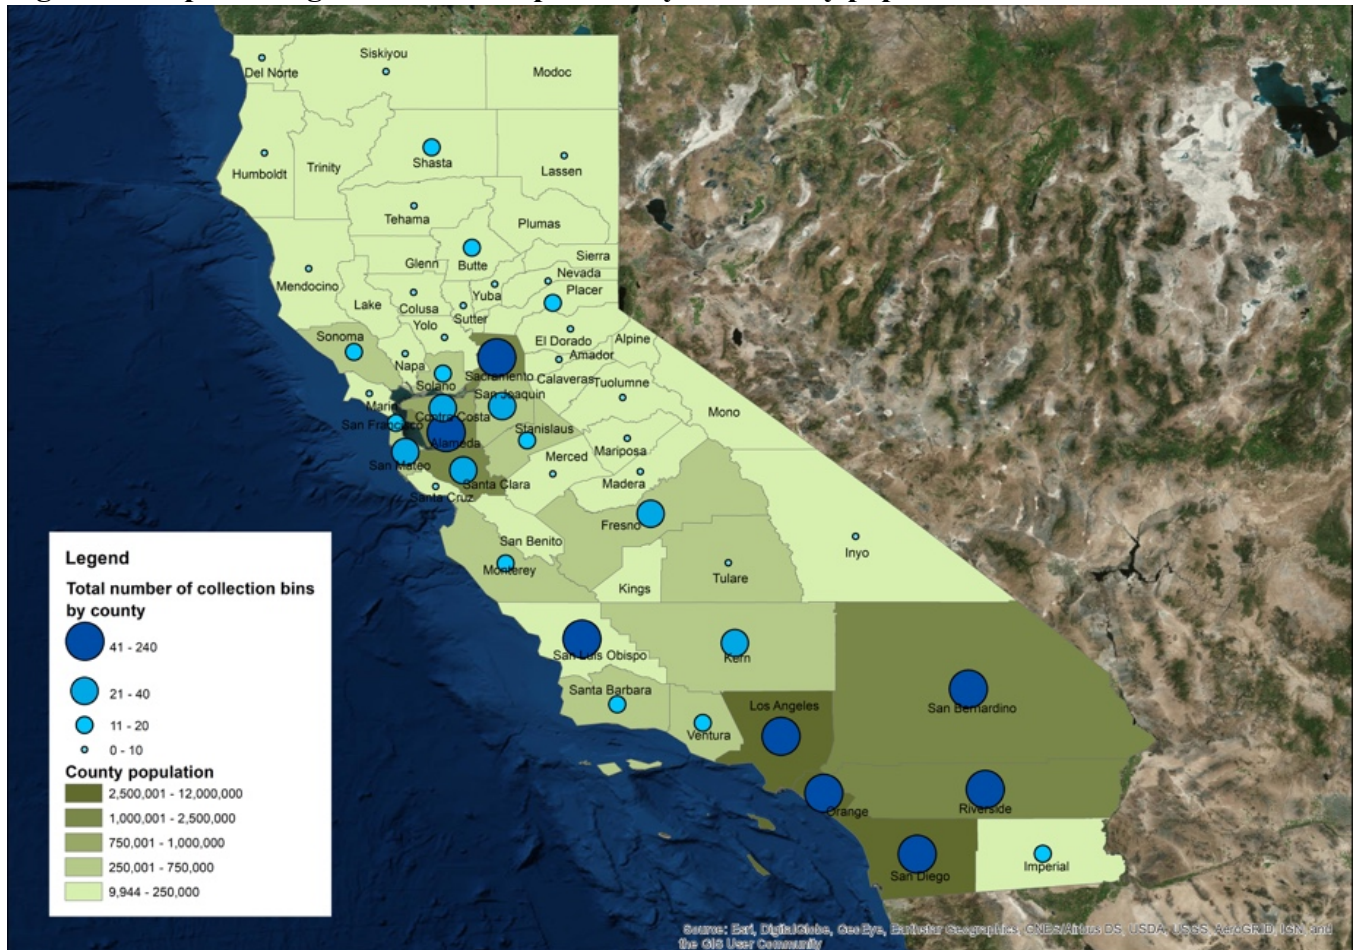

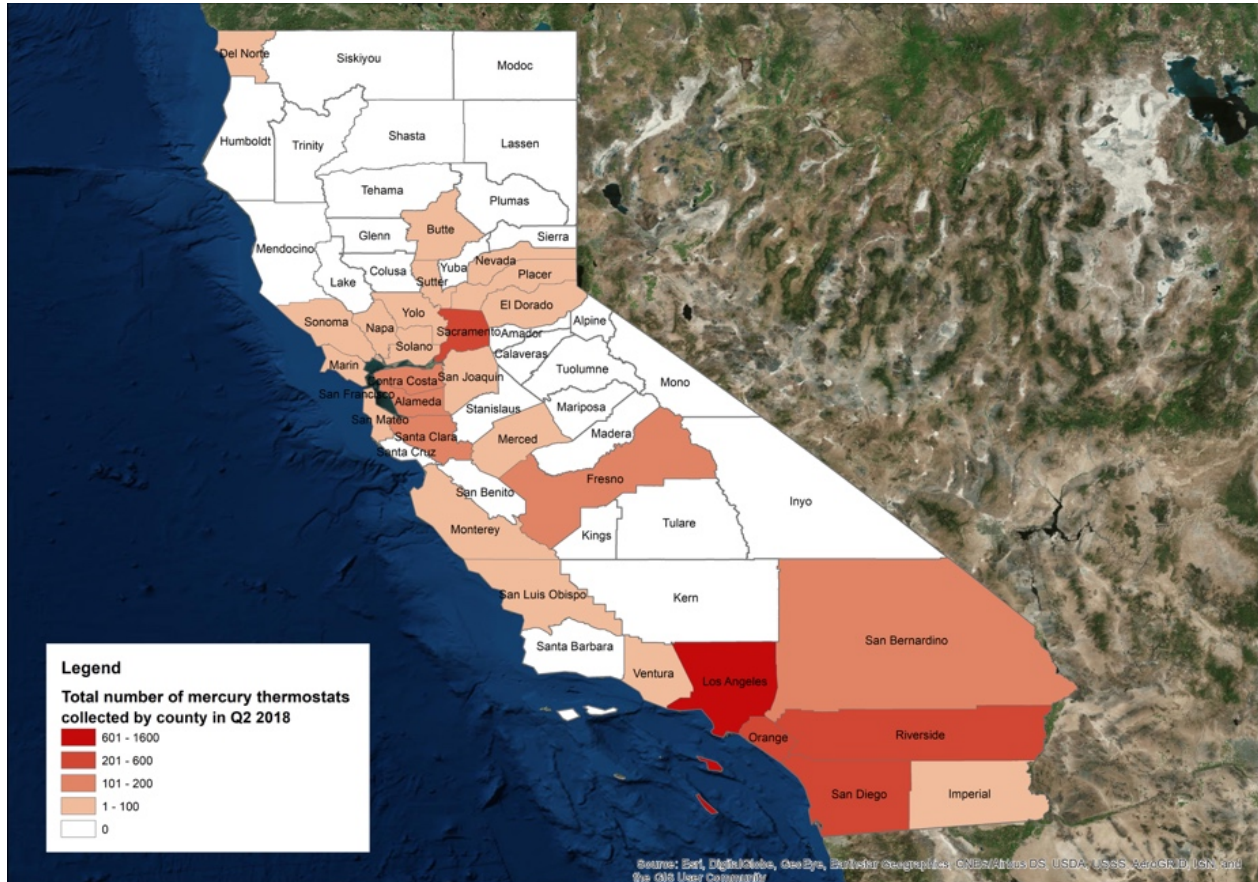

Figure 2. Map showing total thermostats collected by county

Collection Location Summary

A table documenting the collection locations in California with account type, address and collection data is included in the appendix.

CSLB Forms

The Contractor State License Board license number forms, as gathered by HVAC Wholesalers, are included in the appendix.

Incentive Payments

Thus far in 2018 we have paid \$1,102.50 toward contractor and HVAC Wholesaler incentives. We also continue to maintain a rebate website for contractors who recycle at a HVAC Wholesaler and use the loyalty program to purchase products with points. We have spent \$1,696.39 this year for that program.

Table 17. Breakdown of incentive payments in dollars

Contractor/HVAC Wholesaler	Amount Paid
C & G Air Conditioning Inc.	40.00
John Burger Heating & A/C	17.50

Advertising

Summary

TRC completed the first phase of a market-awareness study designed to evaluate the impact of the planned advertising. The survey was distributed online, with a total of 600 completed surveys. Survey respondents were segmented into two groups. The first was a generic “all of California” group and the second was a group comprised of respondents from the following specific markets: Los Angeles, San Bernardino, Sacramento, Fresno and Chula Vista. Results from this pre-advertising survey have been analyzed and will serve as the baseline for comparison when the same survey is distributed after the advertising campaign concludes.

During the Q2’18, TRC launched its state-wide advertising initiative. The creative message continues the “Recycle This” theme launched in January 2018. Creative executions include radio and out-of-home (transit) ads as well as targeted online video. Additional advertising includes a state-wide Google AdWords (now Google Ads) campaign and advertisements appearing in trade publications that focus on the HVAC, construction, facilities management and recycling

industries. We anticipate modifying the digital campaigns as reporting metrics become available. Key points of evaluation are outlined as follows:

Search Engine Optimization (SEO)/Pay-per-click and Digital Ads:

- Overall impressions
- Click through rate
- Cost per conversion

Google Ad Words

As part of our advertising efforts, TRC has increased its investment in Google AdWords to \$10,000 for the state of California. The results are detailed below:

Table 19. Google Ad Words results

	Impressions	Clicks	Cost/Click	Conversions	Cost/ Conversion	Conversion Rate
Q2'18	235,418	1,329	\$1.81	435	\$5.53	32.73%
Q1'18	374,073	1,967	\$1.25	458	\$5.36	23.28%

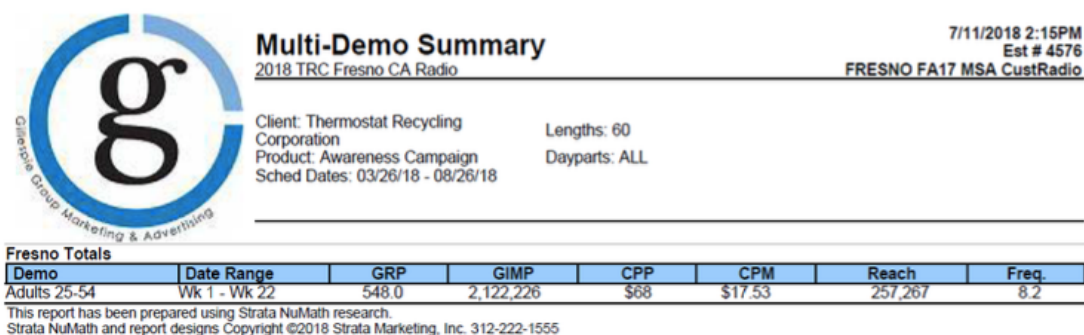

Analysis

The above table reflects a focus on improving the conversion rate, which is a measure of relevance. With far fewer impressions, we naturally see fewer clicks. The cost per click has increased but the cost per conversion and the conversion rate have improved. Paid search campaigns continually optimize with modification to campaigns based on how ad words perform.

Radio

Figure 3 details the delivery of the radio campaign thus far.

Figure 3. Radio campaign delivery

Analysis

- Gross Ratings Points (GRPs) are determined by multiplying the percent of a target audience reached by the number of ads (or frequency). This is a standard measure in advertising.
- Gross Impressions (GIMP) are the total number of impressions potentially achieved by the media schedule, this includes frequency.
- Cost Per Point (CPP) is a measure of the cost of an advertising unit.
- Impressions are the number of people reached by the campaign.
- Frequency is the total potential for the ads to be heard.

Billboards

Digital billboards launched during Q2'18 in California. The below proof of performance image represents the initial posting.

Digital

TRC is serving digital video ads through a behaviorally targeted campaign. Behavioral targeting refers to the process whereby digital ads are served to people who have demonstrated a certain affinity through their online browsing habits, sites visited, terms searched, etc.

The campaign achieved a click through rate two-times that of the national average during Q2. This advertising campaign will optimize to improve performance once results accumulate.

Figure 5. Advertising campaign performance

Barriers

N/A

Motivators

- Mercury relevance: Terms related to “mercury” have garnered the most clicks.

Results

Early indications are that the traditional and digital advertising are garnering positive results. Traditional media is garnering considerable numbers of impressions, meaning that it’s visibility within the population is considerable. Measuring direct traffic to the TRC website, as well as branded searches, will eventually indicate what actions were driven by the advertising.

Bus Advertisements

Bus advertisements were placed on Sacramento and Fresno buses using the “Recycle This” message.

Sacramento bus advertisements

Fresno bus advertisements

Additional Advertising Information

In Q2'18 TRC sent out a press release announcing and publicizing the increase of the fine for hazardous waste disposal under AB-245. The fine was increased from \$25,000 to \$70,000. This fine has anecdotally proven to be the best motivator with our audiences for gaining compliance for proper disposal. The press release was sent out in mid-July and subsequently published by Waste360 on July 24th and the Longview News Journal (see appendix).

Additional public relations include Chase adding "TRC's Recycle Your Mercury Thermostat Day" to their calendar of events and publishing a press release alerting the press about the official day. This press release was then published in Construction and Demolition Recycling on June 20th (see appendix). Media affidavits documenting our purchase of media space are also available in the appendix.

Retail program introduction letter

500 Office Center Drive – Suite 400 | Fort Washington, PA 19034 | thermostat-recycle.org

Dear Retail Partner:

Thank you for participating in the Thermostat Recycling Corporation's (TRC) California Retail Collection Program. As a TRC partner, your efforts will help keep mercury out of our waste stream and increase customer loyalty through demonstrating your store's commitment to a sustainable community.

We will provide you a free collection bin or gallon pail with pre-paid shipping, a shelf-talker to place on your thermostat aisle, and a folder with additional information to share with your employees about our program. We will provide free publication education materials and promote your store through online channels.

Effective immediately, California residents in your geographic region will be eligible for a \$5 mail-in rebate that is provided by their utility company, when they recycle their mercury thermostat at a Thermostat Recycling Corporation (TRC) location. So be aware that some customers may deliver their thermostat in a plastic bag that also includes a rebate form. There is no action required on your part, simply place the thermostat in the bin with the other thermostats. The rebate payment will be sent to the customer directly on behalf of TRC.

Please remember that for your employees' safety, TRC bins must be shipped when the bin is full or within one year of the date the first mercury thermostat was collected. The bin is returned to the store for the collection of additional thermostats.

If you have any questions regarding this incentive program, please call us at **1-888-266-0550** or email us at trc@thermostat-recycle.org for more information.

Thank you,

Ryan L. Kiscaden
Executive Director
Thermostat Recycling Corporation

Retail prepping and shipping instructions sheet

Preparing TRC Collection Container for Shipment

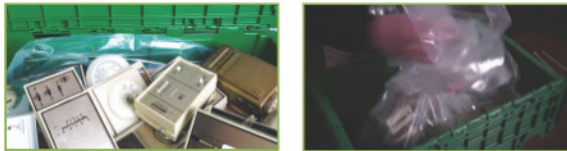

When your collection container is full, or when it has been one year since at least one mercury thermostat has been sitting in it, please use the following steps to prepare your container for shipping:

1. Check to make sure the items in the collection container are mercury-containing thermostats **only**. Remove any unacceptable items. If you find anything besides whole mercury thermostats, please contact TRC for special shipping instructions. Never accept jars or any other containers of liquid mercury as those are hazardous waste and cannot be shipped in our bins.

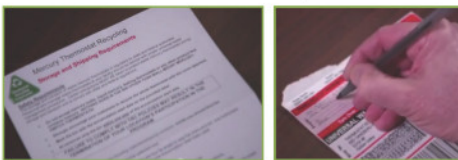

UNACCEPTABLE ITEMS

2. Enclose the thermostats in the liner, use the provided nylon tie to tie the liner. Close the container and secure it by using the remaining nylon ties on the two ends of the lid.

3. Review the instructions that came with your container prior to closing it in preparation for shipping. It is very important to neatly write your return address on the pre-paid shipping label and to use indelible ink if possible. Turn this page over for details.

4. Attach the shipping label to the TRC container and schedule a "Ground Return Pickup" from Fedex (turn this page over for instructions.) Make sure to keep your tracking number to help TRC track the shipment if an issue occurs.

[OVER]

thermostat-recycle.org | 1-888-266-0550 | trc@thermostat-recycle.org

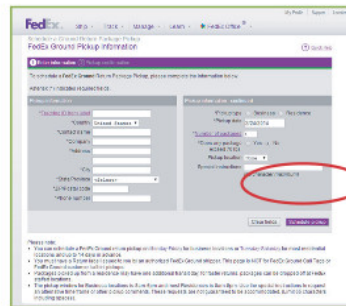

Shipping TRC Collection Container

1. Schedule a FedEx "Ground Return Pickup" by calling 1.800.463.3339 or online at www.fedex.com/returnpickup (username and password are not required)
2. Enter Pickup Information (Note: Tracking ID is found on red label that was delivered with the container)
3. Select "Schedule Pickup." Your confirmation number will appear on the next page. Keep your confirmation number to help TRC track the shipment if an issue occurs.

TRACKING ID:

4. Attach red shipping label to container. Your container will be picked up and then a new collection container will be sent to you.

Thank you for being part of the TRC recycling program.

Retail identifying a mercury thermostat sheet

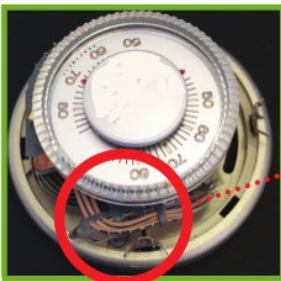

Identifying a Mercury Thermostat

If the thermostat uses a dial or lever, odds are it contains mercury and needs to be recycled. Containing between 3 and 12 grams of mercury, thermostats are likely the device in homes that have the most amount of mercury today.

1. Examples of mercury thermostats include:

2.

Look for the
mercury bulb
inside.

3. If the thermostat has mercury, it needs to be recycled. It's the law.* Just put the entire mercury thermostat in the green TRC collection container.

*Disposal bans apply in the following states: CA, CT, FL, IA, IL, ME, MA, MN, NY, NH, OR, PA, RI and VT.

\$70,000 Fine for Not Recycling a Thermostat! TRC has the Solution.

Who knew that those old thermostats could cost you \$70,000? That's the fine for failing to recycle mercury thermostats. Why such a hefty penalty? When mercury thermostats are discarded with everyday trash, the mercury bulb inside the thermostat will break, spilling mercury everywhere, creating a dangerous hazard.

According to California State law, it's illegal to dispose of mercury thermostats in the trash or leave them at customers' premises. HHWs and residents play an important role. Everyone can comply with the law and avoid the \$70,000 fine by bringing in their mercury thermostats to **your local HHW. Your local HHW** will collect your mercury thermostats in a safe TRC container and send them in to be properly disposed of.

Staying compliant with the law is a good thing, but what's even better is that you may be eligible for a \$5 rebate for every recycled mercury thermostat. Visit this website to see if you qualify: <http://bit.ly/TRCCAReg>.

For questions about the program, contact Sara Bethel at sbethel@sgamarketing.com or 562-597-0205.

Did you know a mercury thermostat contains over 1,000 times more mercury than a CFL bulb?

Help protect the environment by not disposing of mercury thermostats in the trash. In partnership with Thermostat Recycling Corporation (TRC), we're here to **make recycling mercury thermostats easy.**

Simply bring your whole, intact thermostats to drop off on your next visit and we will take care of the rest, **free of charge.**

Visit thermostat-recycle.org to learn more about the program.

Frequently Asked Questions

What is the purpose of the Thermostat Recycling Corporation (TRC) program?

TRC's mission is to promote and facilitate the proper management of waste mercury thermostats.

Is there a cost for CA HHW locations?

Under California law there is no cost to participate in the program.

What thermostats can I include in the bin?

All brands of wall-mounted, mercury-switch thermostats.

Should I take out the mercury switch?

No. Return the entire thermostat. TRC prefers the covers attached but will accept those without.

Do you accept any other mercury containing waste?

No. However, if you have mercury switches removed from thermostats contact TRC for further guidance.

Are there any record keeping requirements for participating in the recycling program?

TRC has no requirements for additional record keeping.

Do I have to participate in the program?

No. Participation is voluntary.

How do I weigh the thermostats? Do I include the weight of the bin?

There is no need to weigh the thermostats and/or the bin. The amount of mercury recycled from each thermostat will be calculated as the bin(s) are processed.

What happens to the thermostats after I ship the bin?

Bins with waste mercury thermostats are received at TRC's processing facility in Golden Valley, MN. The mercury switches are removed and then shipped to Veolia Environmental Services in Port Washington, WI for retort. [Veolia EPA ID #: WIR000130591]

For more detailed information about how the thermostats are processed, please email trc@thermostat-recycle.org.

Our agency works with a subcontractor. Can we still participate in TRC?

Yes.

I need thermostat collection data to complete Form 303. How do I get this information?

Participating HHWs can request data on bin receipts. TRC will provide count of thermostats and mercury switches returned and pounds of mercury recycled.

Have more questions? Call us at **888-266-0550**.

\$70,000 Fine for Not Recycling a Thermostat! TRC has the Solution.

Who knew that your old thermostats could cost you \$70,000? That's the fine for failing to recycle mercury thermostats. Why such a hefty penalty? When mercury thermostats are discarded with everyday trash, the mercury bulb will break, spilling mercury and creating a dangerous hazard for your home and for the community.

According to California law, it's illegal to dispose of mercury thermostats in the trash. That's because it takes only the weight of a paperclip worth of mercury to contaminate a twenty-acre lake. Every drop of mercury counts, so TRC (Thermostat Recycling Corporation) remains committed to providing a convenient, easy-to-use, and lawful ways to dispose of mercury thermostats. To date, 2.1 million mercury thermostats have been collected, which has prevented nearly 10 tons, or 5 elephants' worth of mercury out of our environment!

Staying compliant with the law is a good thing, but what's even better is that by removing, replacing and recycling your mercury thermostat, you can receive a \$5 rebate. That's right! Instead of paying a fine, TRC will pay you! It's a win-win situation. You get rewarded for doing the right thing while keeping your family and your community safe!

California residents can visit recyclehomethermostats.org/california for information on getting your \$5 rebate!

Audience C

Figure 8. Final draft of Email 1 for both residential and commercial property managers

Headline:

- (A) AB 245 and Old Thermostats: Avoid Paying Fines on Your Properties
- (B) How AB 245 Will Affect the Properties You Manage

500 Office Center Drive – Suite 400 | Fort Washington, PA 19034 | thermostat-recycle.org

Hello Valued Customer,

As of 2017, if you have mercury thermostats in the properties that you manage, **you could be fined up to \$70,000 if you don't properly recycle them.** Thermostats that were manufactured prior to 2006 could contain mercury and Thermostat Recycling Corporation is responsible for collecting your old mercury thermostats and will provide you with a free recycling bin to avoid this fine.

To prevent mercury from entering our environment, Assembly Bill 245 has been put in place in the state of California by the Environmental Protection Agency, making it illegal to throw away mercury thermostats. Many thermostats sold prior to 2006 contain mercury and should never be put in the trash. To comply with AB 245, Thermostat Recycling Corporation (TRC) is helping to provide free recycling resources to comply with California State Law. We provide complimentary thermostat recycling bins to property managers in California, and we'd like to send one to SGA Inc.

Why Order a Bin?

1. **Don't be fined \$70,000.** In California, it is illegal to dispose of a mercury thermostat in solid waste. Non-compliance can lead to fines up to \$70,000 per device for improper disposal.
2. **Convenient.** We do all the work. Just drop the thermostats in the bin and call Fedex and they will pick it up! We cover all expenses, including materials and shipping.
3. **No obligations or commitments.** Even if you request a bin, you don't need to meet a minimum number of thermostats. Thermostat Recycling Corporation just wants to collect as many old thermostats across California to keep toxic mercury out of our environment.

Lastly, if you help us to eliminate mercury and prevent contamination, we'll reward you for it.

You're eligible to receive \$5.00 for each mercury thermostat you return back to us.

Order a Bin

Order your bin or get more information at recyclethermostats.org/request or call 562.597.0205 for more information.

Who is Sponsoring the Program?

The California Environmental Protection Agency oversees the program and the Thermostat Recycling Corporation implements the program in an effort to capture all unwanted mercury thermostats

Earn money for recycling unwanted thermostats! Order your bin or get more information at recyclethermostats.org/order or call 562.597.0205 for more information.

No obligations or commitments. Order your bin today to comply with AB 245 and earn money while keeping mercury out of our environment.

Commercial/Residential Property Managers article

\$70,000 Fine for Not Recycling a Thermostat! TRC has the Solution.

Who knew that those old thermostats could cost you \$70,000? That's the fine for failing to recycle mercury thermostats. Why such a hefty penalty? Because when mercury thermostats are discarded with everyday trash, the mercury bulb will break, and the mercury will escape and become a dangerous hazard.

According to California law, it's illegal to dispose of mercury thermostats in the trash or leave them at customers' premises. HVAC, demolition contractors, property managers, and residents are responsible for recycling all mercury thermostats they remove from service. Everyone can comply with the law and avoid the \$70,000 fine by enrolling in the Thermostat Recycling Corporation's (TRC) free and easy recycling program. After receiving collection containers from TRC, property managers and contractors can collect mercury thermostats and then send back the containers (when full or after one year) with an enclosed prepaid shipping form.

Staying compliant with the law is a good thing, but what's even better is that property managers, contractors, or property owners get a \$5 rebate for every recycled mercury thermostat. That's right, instead of paying the fine, TRC will pay you! It's a win-win situation. You get rewarded for doing the right thing, avoid the \$70,000 penalty, and the environment is protected by proper mercury disposal.

If interested, enroll in the program by visiting recyclethermostats.org/request or contact Ashley Jimenez at ajimenez@sgamarketing.com or at 562-597-0205 with any questions.

Hotel-Motel article

\$25,000 Fine for Not Recycling a Thermostat! TRC has the Solution.

Who knew that those old thermostats could cost you \$25,000? That's the fine for failing to recycle mercury thermostats. Why such a hefty penalty? Because when mercury thermostats are discarded with everyday trash, the mercury bulb will break, and the mercury will escape and become a dangerous hazard.

According to California law, it's illegal to dispose of mercury thermostats in the trash. HVAC contractors, lodging managers, and owners are responsible for recycling all mercury thermostats they remove from service. Staying compliant with the law is a good thing, but what's even better is that all participants of the program get a \$5 rebate for every recycled mercury thermostat. That's right, instead of paying the fine, TRC will pay you! It's a win-win situation. You get rewarded for doing the right thing, avoid the \$25,000 penalty, and your community is protected by proper mercury disposal. [Just follow these three easy steps on our website!](#)

Questions? Comments? Contact Audrey Taylor at ataylor@sgamarketing.com or call 562-597-0205.

Pilot Program

Audience C

Utility pilot materials

Website language

- Option 1: Recycle your old thermostat and be in compliance with California law by going to thermostat-recycle.org/collectall. We will give you \$5 for each mercury thermostat!
- Option 2: You can be fined up to \$70,000 for not properly recycling your old thermostat. It's easy to recycle your thermostats, just go to to thermostat-recycle.org/collectall. You may even be eligible for a rebate!

Social media posts

- Option 1: Thermostats should never be placed in the trash. Thermostat Recycling Corporation makes it easy to recycle thermostats Visit thermostat-recycle.org/collectall for information on how to recycle your old thermostats and for information on how you can get \$5 for your old mercury thermostat!
- Option 2: Did you know it's illegal to throw away your old thermostat?! Removing your old thermostat can be dangerous for your home and for the community. Some old thermostats contain mercury which is a safety hazard. Other old thermostats are electronic and are pollutant forming e-waste. California residents can visit thermostat-recycle.org/collectall for information on how to recycle your old thermostats and how to get \$5 for your old mercury thermostat.

Newsletter article

\$70,000 Fine for Not Recycling a Thermostat! TRC has the Solution.

Did you know that it's illegal in the state of California to throw out an old thermostat with your regular trash and that there is a fine of up to \$70,000 for each thermostat that is not recycled? This is true for all make and type of thermostats!

Staying compliant with the law is a good thing, but what's even better is that by removing, replacing and recycling your old thermostats you can receive a \$5 rebate! As a California resident, you are eligible for a \$5 rebate for each mercury thermostat you recycle with the Thermostat Recycling Corporation (TRC). TRC is committed to collecting and providing a convenient, easy-to-use, and lawful way to dispose of old thermostats. That's right! Instead of paying a fine, TRC will pay you! You get rewarded for doing the right thing, avoid the \$70,000 penalty, while keeping your family and your community safe.

Go to thermostat-recycle.org/collectall to obtain your \$5 per mercury thermostat rebate form! If you have any other types of thermostats needing to be disposed, bring them as well and we can recycle it for you!

Program Modification Plan

Meeting summary of EPR Executive Director Meeting May 16, 2018

Attendance:

- Mattress Recycling Council
- Paint care and the ACA
- Pharmaceutical representatives (PPSWG)
- Thermostat Recycling Corporation

Agenda:

1. Convenience analysis tools
2. Modeling and forecasting
3. End markets development (removed from agenda)
4. Legislative update
5. Budgets

Actions:

- Use population standards for jurisdiction specific outreach and "convenience analysis".
- Review Mattress program's California implementation at <http://www.calrecycle.ca.gov/mattresses/MROReports/default.htm>

- Review viability in using TransPerfect which is a language translating service for inbound customer service calls
- Consider specific marketing campaigns in problematic states and regions
- Send pre-awareness survey discussions/comments to the EPR group's marketing
- NAHMMA presentation on cost internalized versus cost externalized...Ask Danielle to reach in and see if they have a copy of this.

Notes:

- PPSWG introduction.... competing with (5) trade groups for pharmaceuticals. Driven by Alameda County, CA ordinance changes. Staffed by association management company, 400 members where they run 12 counties/city in CA, 6 counties in WA with WA just signing a statewide program, state of MA has a limited takeback program for certain product categories. Carrie Hoffman is the Executive Director for the PPSWG.
- Convenience analysis tools. Many of the EPR groups use population standards for jurisdiction specific
- Paint care has a program to spend dollars on a per capita basis instead of a flat 10% for outreach

Next meeting set for August 23rd at 11:30am at the PaintCare

Prospective	Wholesaler	Woodland Windustrial Co.	1214 Harter Avenue	Woodland	95776	Crossroad Services, Inc.	Site Visit	6/1/2018	They only sell pipes valves fittings and metal at this location
Prospective	Wholesaler	Stockton Windustrial Co.	1609 East Miner Ave	Stockton	95205	Crossroad Services, Inc.	Site Visit	6/5/2018	They sell pipe and tubing and valves at this business not thermostats not interested
Prospective	Wholesaler	Hajoca - Culver City	5880 West Adams Blvd	Culver City	90232	Crossroad Services, Inc.	Site Visit	5/30/2018	I was told that they are primarily a plumbing supply store and very rarely do they ever order a thermostat for someone. I was told that they would look into the program if needed.
