Sacramento, California 95812-0806

SUBMISSION OF QUARTERLY REPORT; Consent Order Item B-1.6

Dear Mr. Greenlee,

The following quarterly report for the third quarter of 2018 (Q3'18) outlines the Thermostat Recycling Corporation's (TRC) most recent outreach and pilot project activities. With this submission, S. Groner Associates, Inc. (SGA) is fulfilling its obligations on behalf of the 24 signatories of the Consent Order listed below. If you have any questions regarding this submission, please feel free to contact me at (562) 597-0205 or the address below.

Regards,

A handwritten signature in black ink, appearing to read "Stephen Groner", with a long horizontal flourish extending to the right.

Stephen Groner
California Program Manager, TRC
100 W. Broadway, Suite 290
Long Beach, CA 90802

Ryan Kiscaden
Executive Director
Thermostat Recycling Corporation
500 Office Center Drive, Suite 400
Fort Washington, PA 19034

(24) Company's signatures representing:

White-Rodgers

Introduction

During the third quarter (July-September) of 2018, S. Groner Associates (SGA) worked on behalf of the Thermostat Recycling Corporation (TRC) to implement the following tasks from the DTSC-approved Outreach Plan and Pilot Plan as a part of the California TRC Program. The following report outlines those efforts undertaken during this quarter, broken into audiences.

Summary of Results

1. Mercury-added thermostats collected this quarter: 2,437
2. New collection containers (bins and pails) this quarter: 64
 - Number and location (by street address) of new collection bins assigned (see appendices).
3. Mercury-added thermostats collected this year: 10,223
4. Program element/participants to whom the collected thermostats are attributed:
Information not attributed due to overlapping tactical elements

Table 1. Number of bins in circulation in California (cumulative)

Outreach Program

Summary of Outreach Activities for Audience A

Retail/ Consumer

Summary

Historically, retailers have been a small component of the mercury thermostat take-back recycling initiative. In an effort to increase the collection of mercury thermostats throughout the State of California and provide more accessible and public facing recycling locations for consumers, we have targeted hardware stores throughout the state to become new collection site partners. Having solidified 52 retail partnerships in 2016-2017, we have been working to expand that number in 2018. In Q1'18, we reviewed the geographic locations of current partnerships and targeted areas that would benefit from increased levels of promotion and thermostat drop-off locations. An example of this is mapping out locations in which the program has been promoted by the local utility company and then working to ensure that there are sufficient collection site retailers in that area. Using this information, we created a list of locations to recruit as drop-off locations in Q2'18, approached retailers at these locations with the goal of signing them up as TRC partner collection sites, and updated and ordered the materials included in our retail partner toolkit. Continuing our outreach efforts from Q2'18, in Q3'18, we placed a total of 268 outreach calls and secured 13 partnerships with retailers. As part of these partnerships, the retail locations agreed to host a TRC recycling bin or pail in their facility, display promotional materials in their store and be in communication with us regarding the progress, barriers and motivators they observed with their customers. TRC sent a bin to each of these 13 locations and we prepared and mailed 13 toolkits to each of them. The retail toolkits include a folder with a TRC program introduction letter, prepping and shipping instructions sheet, a sheet helping users to identify a mercury thermostat, English and Spanish shelf talkers, and English and Spanish window clings. In summary, since the implementation of this effort in Q1'18, we have secured 18 additional retail partnerships.

Barriers

- Contacting the right person: Difficulty reaching decision maker on the phone and lack of response after sending information via email upon request.
- Delays due to approval process: Corporate offices often times must approve the partnership prior to placing a bin in a local store.
- Enrolled in another program: They are already participating in a thermostat recycling program and do not want to participate in two programs.
- Low frequency: They do not feel that their customers encounter mercury thermostats frequently enough to host a bin.
- No value: They do not feel having a bin would be of value to them.
- Space restrictions: They do not have enough space for the bin and promotional materials.
- Concern about liability.

Motivators

- Minimum effort is required to participate.
- Their customers have brought mercury thermostats into the store.
- Many other stores are already participating in the program.

Results

- 13 partnerships were formed with retail locations.
 - 13 bins were placed within these locations.
 - 13 toolkits were sent to these locations.

The following is a list of the retail locations with whom we entered into partnership in Q3'18:

1. Laurel Ace Hardware - Oakland, CA
2. Grand Lake Ace Hardware - Piedmont, CA
3. Merrit's Hardware - La Puente, CA
4. Anawalt True Value Lumber - Los Angeles, CA
5. Hoyt's Ace Hardware - Rancho Cucamonga, CA
6. Saratoga Hardware - Saratoga, CA
7. Pastime Hardware - El Cerrito, CA
8. Encinal True Value Hardware, Alameda, CA
9. Oakley Ace Hardware - Oakley, CA
10. Pittsburg Ace Hardware - Pittsburg, CA
11. Antioch Ace Hardware - Antioch, CA
12. McKinleyville Ace Hardware - McKinleyville, CA
13. Ace Hardware Store - Gridley, CA

The following is a list of materials that were sent to the above retail locations (see Figure 3 in appendices):

- TRC Program Introduction Letter
- Prepping and Shipping Instructions Sheet
- Identifying a Mercury Thermostat Sheet
- English Shelf Talkers
- Spanish Shelf Talkers
- English Window Clings
- Spanish Window Clings

Household Hazardous Waste (HHW)

Summary

In Q3'18, we continued our partnership with the California Product Stewardship Council (CPSC) to coordinate with Household Hazardous Waste (HHW) facilities throughout the state to help promote the TRC program with advertising or promotion. Using a database of 43 HHW locations that expressed willingness to promote the TRC program, we began to send promotional materials to HHWs to publish in their newsletters, bill inserts, social media, and any other form of media they produce. In Q3'18, we also worked with CPSC to follow up with HHWs to gather

information on which materials they promoted, the metrics (impressions) of the promotions and the type of media used. After receiving feedback from CPSC and HHW facilities that many HHWs did not feel comfortable promoting a message that emphasized a \$70,000 fine, a second round of promotional materials were created and sent to HHWs in order to increase the likelihood that they would promote the program. The copy included one new newsletter, four social media posts, four utility bill inserts, and four website options (see Website Copy in appendices). The copy for these new materials emphasized environmental, health, or public safety themes and omitted any mention of the \$70,000 fine. This new set of materials was sent in a second email to all 43 HHW contacts, along with the first set of promotional materials sent previously in Q3'18. We continued to follow up with HHWs to gather information on promotion throughout Q3'18 and will continue to collect the results in Q4'18. Customized materials were also created and sent when requested by HHWs. During Q3'18, 25 total entities promoted the materials in at least one form, providing a total of 2,347,271 impressions.

Barriers

- Disapproval of message emphasizing fine: HHWs reported not wanting to promote messaging about the \$70,000 fine.
- Lack of HHW follow-through: Some HHWs that originally stated they would promote the materials chose not to do so.
- Difficulty in collecting accurate impressions number: Some HHWs did not provide metrics on impressions or information on what they promoted.
- Mixed messages: Some HHWs that reported they advertise via a certain medium later stated they could not actually advertise with that medium when contacted again but suggested another medium in its place.

Motivators

- HHWs are generally receptive to promoting the program in some form.
- HHWs are generally receptive to promoting environmental and public health themes to residents.

Results

The following new materials were created and sent to 43 HHWs in a second round of outreach:

- One newsletter
- Four utility bill insert options
- Four social media post options
- Four website advertisement options

The following metrics on HHW promotion were gathered:

- 22 confirmed entities that promoted at least one promotional material.
- 2,347,271 total confirmed impressions.
- 5 entities expressed their intention to promote materials in the future.

The following is a list of HHWs/ Partners who shared the promotional materials:

1. City of Banning

2. City of Elk Grove
3. City of Huntington Beach
4. City of Stockton
5. City of Sunnyvale
6. City of Torrance - Public Works
7. City of San Jose
8. City of Covina
9. City of Indio
10. County of Butte
11. County of Mono - Public Works- Solid Waste
12. County of Riverside - Waste Resources Department
13. County of San Benito - Integrated Waste Management
14. County of San Mateo - Environmental Health
15. County of Santa Clara - Recycling & Waste Reduction Division
16. County of Tuolumne
17. Sanitation Districts of Los Angeles County
18. County of Sacramento
19. California Product Stewardship Council
20. Napa Recycling & Waste Services
21. South San Francisco Scavenger Co. & Blue Line Transfer Inc.
22. StopWaste

HHW Conference

Summary

In addition to our HHW promotion outreach, TRC also hosted an information booth at the 2018 CalRecycle Used Oil & HHW Training & Conference in Garden Grove, CA. Attendees of the conference included nonprofit agencies, state agencies, private businesses (i.e., environmental contractors), and other organizations involved in used oil recycling and household hazardous waste programs. Extensive in-person outreach about the TRC program was conducted over the course of the three-day conference to the HHW representatives attending to promote bin/pail sign-ups and HHW promotional materials. Attending this conference allowed us to network with relevant individuals and provide education, information, and appropriate tools to promote our program.

Results

- Placed 14 total bins/pails.
- Connected personally with 20 potential contacts who specifically expressed interest in participating in the program in some way.
- Created a database of 51 business contacts made during the Used Oil & HHW Training & Conference for future outreach potential.
- Sent emails with information about our program and asking them to participate to 51 contacts made at the conference.

- Encouraged conference attendees to include mercury thermostat recycling information on their online channels.
- Encouraged conference attendees to sign up to receive a bin or pail and serve as a collection site.

2018 CalRecycle Used Oil & HHW Training & Conference

Environmental Contractors

Summary

Environmental contractors have emerged as a potentially important audience for TRC. In our outreach to other audiences such as schools and universities, it has been reported that those organizations have hired environmental contractors to manage waste disposal during renovations. In Q3'18, we continued to implement our strategy based on the supposition that these contractors specialize in removing and properly disposing of hazardous waste and would

be a prime target to receive a TRC recycling bin to streamline their activities. We continued to collect contact information for these contractors and to reach out to those contacts. During Q3'18, we placed 266 outreach calls to the 163 contacts in our database, with the primary goal of providing them with bins or pails and offering them a \$2.50 incentive rebate per mercury thermostat. We also continued collecting information from this audience to inform our campaign strategy and documented that information. During outreach calls, we collected data on how often environmental contractors encountered mercury thermostats; how frequently they disposed of those items; if they are interested in a bin; and reasons they are or are not interested. Additionally, new environmental contractor connections and recommendations from the 2018 CalRecycle Used Oil & HHW Training & Conference were added to the database and contacted.

Barriers

- Delays due to internal approval process: The corporate office must approve the partnership prior to placing a bin.
- Contacting the right person: Difficulty reaching decision maker on the phone.
- Lack of a facility for bin: Some contacts do not have a physical facility to which we can send a bin.

Motivators

- \$70,000 fine for improper disposal
- \$2.50 incentive payment for each returned thermostat
- Option for pail: Many environmental contractors operate out of their vehicles rather than a facility, so they were generally receptive to receiving a small pail instead of a large bin.

Results

- Conducted 266 outreach calls to contacts.
- Placed 15 bins/pails.
- Expanded database with the contact information of 163 environmental contractors.
- Collected and documented information about how often environmental contractors encountered mercury thermostats; how frequently they disposed of those items; if they are interested in a bin; and reasons they are or are not interested.

General Contractors

Summary

Outreach to this audience was coordinated by TRC staff directly. During this outreach, TRC staff continues to complete outreach to this audience with hopes of gaining greater participation in thermostat recycling via the TRC program. Our outreach efforts aim to inform general contractors of our program. If the contractor is not already aware of the program we then attempt to place a bin or pail with them for thermostat collection.

Barriers

- During our contractor outreach, we still find that we are contacting contractors who don't want to be contacted for this purpose.
- The responses of many general contractors indicate that they either "do not work with thermostats" or that they "hardly ever encounter mercury thermostats" and, as a result, do not want to work with the program.
- A majority of calls result in voicemail messages that are not returned.

Motivators

- N/A

Results

- A total of 267 phone calls were made to general contractors.

HVAC Contractors

Summary

Outreach to this audience was coordinated by TRC staff directly. During this outreach, TRC staff continues to complete outreach to this audience with hopes of gaining greater participation in thermostat recycling via the TRC program. Our outreach includes phone calls meant to inform HVAC contractors about the TRC program. After introducing them to the program, we then work to sign the contractor up for a TRC recycling bin or pail.

Barriers

- During our contractor outreach, we still find that we are contacting contractors who don't want to be contacted for this purpose.
- Many HVAC contractors respond that they hardly ever encounter mercury thermostats.
- Many HVAC contractors prefer to recycle through their wholesaler.
- A majority of our phone calls result in voicemail messages that are not returned.

Motivators

- Incentive: A majority of our sign-ups this quarter were from contractors who already recycled through their wholesaler. The incentive allowed us to convince them to recycle directly with TRC.

Results

- TRC called 164 HVAC contractors.
- During the third quarter, we had 12 sign-ups from HVAC contractors.

Demolition Contractors

Summary

Outreach to this audience was coordinated by TRC staff directly. During this outreach, TRC staff continues to complete outreach to this audience with hopes of gaining greater participation in thermostat recycling via the TRC program. Our calls aim to inform the contractor about the program and have them sign up for recycling through a TRC bin or pail.

Barriers

- During our contractor outreach, we still find that we are contacting contractors who don't want to be contacted for this purpose.
- Many contractors respond that they either do not work with thermostats or that they hardly ever encounter mercury thermostats.
- A majority of calls result in voicemail messages that are not returned.

Motivators

- N/A

Results

- TRC made 204 calls to demolition contractors.
- One sign-up from a demolition contractor.

Wholesalers

Summary

Mercury thermostat collections during the third quarter were down compared to the same period last year. While we are completing a larger number of site visits and calls than ever before, the number of thermostats collected has declined. During the third quarter, there was an average of 28 thermostats per bin. TRC also completed outreach phone calls to prospective wholesaler collection sites and store visits to non-compliant wholesalers.

Barriers

- Non-compliant wholesalers continue to state they are only plumbing supplies or fabrication locations, and therefore will not accept a recycling container.
- Participating wholesalers are seeing a decline in collections and have sent some of their recycling bins back to us, stating that they "do not need them anymore."

Motivators

- We have received positive feedback on the ease of the program.

Results

- TRC completed 74 calls to wholesalers who had failed to return a container for the past 6 months.

- TRC called 22 wholesaler locations that do not currently participate.
- TRC performed 26 site visits to current wholesale collection locations.
- 21 wholesaler locations requested a new bin display.

Summary of Outreach Activities for Audience B

Building Departments

Summary

Building departments can best support the collection of mercury-added thermostats by informing contractors, inspectors and other professionals with whom they are in contact about the importance of proper disposal of mercury thermostats. Based on our scoping calls, we believe that employees of building departments have little contact with thermostats. However, the professionals who seek the services of the building department frequently come upon thermostats in their line of work. Therefore, building departments can serve as a conduit for outreach. As part of our outreach efforts in Q3'18, promotional flyers were placed at the front desks at building department offices.

Utilizing the database of county building departments created in Q4'17 and the call script created in Q1'18, 53 calls were made to county departments in Q3'18. We have collectively been able to distribute flyers to 47 of the 57 county building departments. A minority of ten county building departments either declined to take the flyers or we were unable to contact them. 12 of the 47 county departments requested restocks of the flyers when contacted. In Q4'18, we will continue to reach out to the remaining building departments to see if they need their materials restocked and to send the materials to those departments.

Barriers

- Building department employees who did not accept our flyers have offered a number of reasons for their refusal. Their answers varied from “not enough space” to “we don’t display flyers” to “the person who oversees office materials is not in.”

Motivators

- Smaller building departments that are resistant to hosting our flyers in their offices have been persuaded to take the flyers by mentioning the cooperativeness of larger county building departments.

Results

- Of the 57 county-level building departments that we have targeted, 47 building departments have agreed to distribute flyers on our behalf.
- 12 building departments have requested restocks of materials to continue promoting the program.

Table 6. Outreach building department calls

Description	July	August	September
Number of calls	0	12	41
Numbers of flyers distributed	0	150	0
Number of depts requesting flyer placements/restocks	0	2	12

Utility Companies

Summary

As part of our outreach plan, our strategy was to reach out to utility companies who performed thermostat installations via contractors for their customers but, upon further communication with utility companies, it has proven challenging to find one that does employ contractors. We are actively performing outreach to determine if we are able to find a utility company that employs or has influence over contractors who perform thermostat installation. As such, our current area of focus is geared towards reaching out to utility companies to create partnerships in which utilities perform outreach directly to their customers to promote the TRC recycling program.

Utility companies are mandated by federal and state governments to reduce energy usage per resident over time. Many utility companies have taken the strategy of promoting smart thermostats in order to meet their mandate. These rebate programs are frequently utilized by their large customer base, to whom we are now performing outreach. We are currently working to place outreach materials concerning mercury thermostat recycling alongside related rebate programs and other active outreach initiatives. These efforts may include: posting information and links to the TRC website on their own websites, distributing bill inserts, posting on their social media accounts, sending out a TRC article in their newsletters, and/or performing point of purchase (POP) outreach with TRC materials at stores such as BestBuy, Lowe's, Home Depot and Sears.

In Q3'18, we made an extensive effort to continue forging relationships with four large utility companies and 23 small utility companies (see appendices). While these efforts had initially focused on determining if these utility companies hosted energy efficiency programs, performed POP, and offered advertising opportunities, our efforts in Q3'18 focused on working with the utility companies to disseminate information about the TRC program to their customers. Our goal was to communicate to utility customers how and where to recycle their mercury thermostats and how to redeem the incentive. To help communicate this information effectively, we created website copy, a newsletter article, social media posts and point-of-purchase tear pads for utility companies to use to disseminate (see appendices).

Barriers

- Keeping utility companies interested: It's been difficult to connect with the relevant staff within their organizations and to keep their attention on our issue.

- Not a priority: We have little leverage over utility companies. Any agreements or partnerships that may have been established are subject to being put on hold or delayed by the utility companies, and contacts may be unresponsive for long periods of time.
- Small utility companies' lack of similar programs: Some of the small utility companies do not offer smart thermostat rebates specifically, so, in some cases, we have been unable to piggyback off this resource.

Motivators

- Large utilities host similar programs: Adding the mercury thermostat rebate program as a helpful tool to aid their existing energy-saving initiative has proven to be effective.
- Leveraging current partners: Mentioning the participation of larger utility companies such as PG&E and SMUD in our outreach program has been an effective discussion point.
- Convenient materials: Providing multiple mediums for promotion and “ready-to-go” materials has made the process easier for utility companies.

Results

- Continued to provide support and quarterly check-in calls to partners.
- Total calls placed: 42
- Emails sent & received: 48
- Website links to the TRC program were placed on the websites of the following two utility companies:
 - City of Healdsburg, Electric Department
 - City of Corona, Department of Water & Power
- TRC point-of-purchase outreach materials were sent to, and/or co-branded with the following utility company:
 - Southern California Gas Company

POP materials distributed by utility companies at retail locations

**For more images of POP materials, please see the appendices.*

Low-Income Home Energy Assistance Program (Utility Audience)

Summary

As a part of this quarter's utility outreach, we contacted organizations reaching out to low income residents regarding energy assistance programs. The list is largely comprised of contractors and non-profit organizations (NGOs) that are a part of LIHEAP (low-income home energy assistance program), which helps low-income individuals get certain energy efficiency upgrades and discounts on their utility bills. Contractors and NGOs have been tasked with raising the awareness of low-income communities about programs like LIHEAP. As they are not responsible for actual installations, our goal with this group was to see if they would partner with us to promote our outreach program. Contractors (general, electrical, HVAC) assist the State and low-income areas by helping to make homes more energy efficient. Our goal with this group was to provide them with a TRC mercury thermostat collection bin.

Barriers

- Difficult to get in touch with the right people.
 - Some of the organizations on the call list were not connected to LIHEAP. Some organizations with "Conservation Corps" in their name were actually job training programs for young adults.
 - Many organizations would direct us elsewhere, such as the weatherization department, instead of helping us directly.
- Some contacts already had contractors that do the removal and installation of thermostats and were not interested in hearing about our program.

Motivators

- When we were able to reach a LIHEAP manager, they were usually interested in receiving more information about our program.

Results

- In Q3' 18, TRC made 168 calls to this audience and was able to make contact with 49 individuals who were in charge of their respective LIHEAP program. No bins were placed this quarter.

Table 7. Outreach LIHEAP utility calls

Description	July	August	September
Number of calls	44	124	0
Numbers of bins placed	0	0	0

School Districts

Summary

Schools can best support the collection of mercury-added thermostats by being informed of the proper disposal procedures and by having a collection bin at hand. Schools, especially public schools, can be slow to renovate and generally only replace a thermostat if it has ceased functioning. This may anecdotally signal the potential existence of decades-old thermostats in their facilities. Using the average temperature of a region, the age of the structure and the population size as parameters, we prioritized schools in areas that have the best combination of these factors and would be more likely to require a TRC bin. Our outreach will ultimately include all California schools. The outreach program communications at this point consist of cold calls with the purpose of distributing collection bins and to collect and distribute pertinent information regarding construction, the requirement to recycle mercury thermostats and their processes for hazardous waste disposal.

In Q4'17, TRC made repeated phone calls to schools, prioritizing 39 school districts that had received Prop 39 grant funds. Prop 39 grant recipients pose a significant advantage, as we can identify schools that are actively renovating and modernizing their facilities with environmental impact in mind. Given the importance of outreach to schools, TRC took Q1'18 to examine our call efforts to inform successive outreach and/or pilot programs for schools in Q2. After deliberation, it was decided that we would reach out to individual schools that are part of the aforementioned school districts. It was hypothesized that the facility managers of the individual schools might have more capacity to be able to speak with us as well as feel more ownership of the safety of the school, so these managers were our main focus when calling the individual schools. In Q3'18, we continued these efforts, calling the schools in our database.

Barriers

- Some of the schools that we have spoken to have specifically requested that we speak to the school district instead. They have claimed that it is school policy to redirect external organizations to speak with the district concerning such matters.
- There were difficulties getting in contact with many of the district facility managers. Both cold calls and calls made during requested time frames frequently resulted in being transferred to a voicemail.
- Many schools to whom we spoke stated that they had transitioned to digital thermostats years ago and no longer had mercury thermostats.

Motivators

- N/A

Results

- In Q3'18, TRC made a total of 135 calls to the individual schools and were able to have a successful contact with 34 individual schools in our database. None of the 34 schools have requested a collection bin.

Table 8. Outreach School calls

Description	July	August	September
Number of calls	63	33	39
Successful contacts	11	1	22
Numbers of bins placed	0	0	0

**Note: A call is defined as successful if the target person was reached and the full call script was implemented.*

Universities/Colleges

Summary

Universities and colleges can best support the collection of mercury-added thermostats by serving as a conduit to the waste haulers or contracting companies that service their facility. While most universities and colleges have a facility manager, they do not usually work on HVAC-related repairs or replacements. Our initial interviews showed that facility managers were aware that mercury-added thermostats should not be thrown in the trash, but they did not understand where or how to properly dispose of them; this responsibility is typically left to the contractor working on the project. Our outreach will focus on educating facility managers about recycling mercury-added thermostats and supplying them with a bin if their facility does have mercury-added thermostats on-site. The managers can then provide their contractors with the bin or have the contractor leave the thermostats with the manager to properly recycle.

In Q4'17 and Q1'18, TRC made phone calls to 79 universities, which were chosen due to the large size of their student bodies, which exceeded 10,000 students. Based on the limited success of Q1'18 calls, the Q2'18 database was changed to be comprised of just small universities (under 10,000 students) and community colleges that have received Prop 39 grants. This change was made to test if smaller schools would be more responsive due to less bureaucracy.

Barriers

- There were difficulties in getting in contact with many of the district facility managers. Both cold calls and calls made during requested time frames frequently resulted in being transferred to a voicemail.
- A few of the community colleges that are part of a community college district have requested us to contact the district instead of them directly.
- Many schools with whom we spoke stated that they had transitioned to digital thermostats years ago and no longer had mercury thermostats.

Motivators

- N/A

Results

- In Q3'18, a total of 142 calls were made to such schools, with successful contacts to 36 schools. None of the universities or community colleges requested a collection bin.

Table 9. Outreach University calls

Facility Manager Associations (Universities/Schools)

Summary

Facility managers are individuals who are responsible for ensuring that the building is up to standard and that it is best serving those within. During our outreach to both schools and universities, we found that we were constantly being directed to the facilities manager since they are also in charge of renovations and would know of any mercury thermostats on location. With this information, we moved forward with researching facility manager associations within the State of California to gauge if there was an opportunity to partner. These associations would be contacted and asked to help promote the TRC program to their members, and to emphasize the way in which utilizing the TRC program helps protect the safety of the school's students, employees and protects the environment.

In Q3'18, we began conducting research to see if these associations existed in number throughout California. At first glance, it seemed that the number of associations in California was not large enough to garner the type of promotion we are seeking. Many associations had district office divisions and coalitions that provided resources for school facilities rather than an association specifically for facility managers. Further research uncovered the International Facility Management Association, which has eight different chapters in the State of California. In addition to these eight associations, our research also uncovered resources for facility managers where we could also place our promotion and program information. Associations and resource sites that serve as useful partners are listed below:

- School Facilities and Transportation Services Division
- Building Educational Success Together
- California for Adequate School Housing
- National Clearinghouse for Educational Facilities
- California Counties Facilities Services Association
- International Facility Management Association

- Central Coastal California Chapter International Facility Management Association
- East Bay Chapter International Facility Management Association
- Los Angeles Chapter International Facility Management Association
- Sacramento Valley Chapter International Facility Management Association
- San Diego Chapter International Facility Management Association
- San Fernando Valley Chapter International Facility Management Association
- San Francisco Chapter International Facility Management Association
- Orange County Chapter International Facility Management Association

Future efforts will look into strategies for disseminating information through these organizations to reach University and School facility managers.

Summary of Outreach Activities for Audience C

Commercial Property Managers

Summary

Property management associations are a valuable audience as property management companies look to them for advice and policy updates. By working with property management associations, we can disseminate our mercury thermostat recycling message to their members. The associations will want to provide their members with this information as it will help property management companies avoid the potential legal or financial repercussions incurred by improper waste disposal.

Commercial Property Manager Associations

In Q3'18, we continued our outreach to commercial property management associations. Our goal was to place promotional materials in their publications (i.e., blog, newsletter, email, etc.) and/or on their websites. Commercial property management associations were very difficult to communicate with as they're often occupied with other tasks when we call or email. Calls we made were often transferred to voicemails or to sales representatives, resulting in a small number of successful contacts. Below is a list of the commercial property management associations with whom we are currently in contact:

- California Association of Realtors (CAR)
- NAIOP Socal
- Building Owners and Managers Association of California (BOMACal)
- Association of Commercial Real Estate (ACRE)
- AIR Commercial Real Estate Association
- International Council of Shopping Centers (ICSC)

Barriers

- Difficult to reach/unresponsive: staff are often occupied with other tasks when we call and are unresponsive to voicemails and emails
- Lack of interest: the employees with whom we spoke are often not interested in the subject matter

- Relevance: many of them feel that the information is not relevant, stating that many of their members are up-to-date in regard to regulations.

Motivators

- Ease of the process: we provide the article, graphics and any other information they need to move forward with promoting the program.

Results

Table 10. Calls to commercial property managers

Description	Frequency
Number of Calls	16
Successful Contact	0

Note: A call is defined as successful if the target personnel was reached and the full call script was implemented.

Commercial Property Manager Email Campaign

To reiterate insights gleaned from previous quarters, California phone calls were conducted to engage this audience but almost no contact was made (due to unanswered and unreturned phone calls). Therefore, a total of 600 emails for commercial property managers across California were acquired to see if digital communications would be more effective than phone calls when performing outreach to this audience. Our focus was on A/B test email messaging and headlines across the 600 purchased emails, which were then separated into 300 emails for the outreach and 300 for the pilot email group.

The email campaign focused on three messages for motivation: the potential \$70,000 fine associated with improper disposal hazardous waste (i.e., mercury thermostats); a \$5 incentive per mercury thermostat recycled; and the convenience/ease of using the program. Email copy was developed to reflect the chief objectives of placing TRC recycling bins with property managers and raise awareness about the \$5 incentive for mercury thermostat recycling.

The headlines for each e-newsletter were A/B tested with the goal of developing an effective message for the third and final email.

Barriers and Motivators

Table 12. Email 1: Barrier Messaging

Headline	Open Rate	Click through Rate
AB 245 and Old Thermostats: Avoid Paying Fines on Your Properties	4.9%	0%

Reminder: Get Rewarded for Returning Old Thermostats from Your Properties	8.91%	0.42%

**Results of the email campaign for residential and commercial property managers are reported cumulatively and appear in the section below for residential property managers.*

Results

- Three emails were deployed.
- 600 email addresses in total received the three emails.

Residential Property Managers

Summary

Property managers are responsible for ensuring that thermostats are functioning properly in the buildings they manage. Rather than management conducting periodic checks, thermostats tend to be switched out when tenants make a request. It is notable that, more often than not, there seems to be no communication between the external contractor and the property management on safe disposal of hazardous material. The potential legal and financial repercussions of improper waste disposal can be a powerful motivator for property management companies. This audience can best support the collection of mercury-added thermostats by being able to properly identify and promote the safe removal and disposal of mercury-added thermostats within their properties. Our tactics will help property managers become more aware of mercury-added thermostats, aid in proper identification, and educate them as to proper disposal via a TRC recycling bin.

Residential Property Manager Associations

In Q3'18, in addition to other outreach efforts, we began making calls to the updated residential property management association database. Our goal was to place an article in their publications (i.e., blog, newsletter, email, etc.) and/or on their websites. After follow-up calls and emails, the property management associations showed initial interest in Q2'18, but it was difficult to successfully publish the promotional material. Below is a list of the residential property management associations with whom we are currently in contact:

- California: The National Association of Residential Property Managers (CALNARPM)
 - Alameda/ Contra Costa
 - Long Beach/ Orange County
 - Los Angeles
 - Marin/ Sonoma
 - Monterey Bay
 - Northern California Central Valley
 - Sacramento
 - San Diego
 - Santa Clara
- California Apartment Association (CAA)
 - Central Valley
 - Contra Costa
 - Greater Fresno
 - Greater Inland Empire
 - Income Property Assn. of Kern
 - Los Angeles
 - Marin Income Property Association
 - North Bay
 - Orange County
 - Rental Housing Assn. of Sacramento Valley
 - San Diego
 - San Francisco Apartment Association
 - Solano
 - Tri-County
- International Realty & Investments
- Apartment Association of Greater Los Angeles (AAGLA)
- Building Owners and Managers Association (BOMA)
 - Silicon Valley
 - San Francisco
 - San Diego
 - Sacramento
 - Oakland-East Bay
 - Orange County
 - Greater Los Angeles
 - Inland Empire

- Apartment Owners Association of California, Inc
 - San Fernando Valley
 - Orange County
 - Los Angeles
 - San Diego
 - Long Beach
 - Northern California
- FirstService Residential California
 - Bay Area
 - Inland Empire
 - Los Angeles
 - Orange County
 - Palm Desert
 - Sacramento
 - San Diego
 - Santa Clarita
 - San Francisco
- California Residential Services Association
- California Association of Realtors (NAR)

Barriers

- Difficult to contact/unresponsive: staff is often occupied with other tasks when we call and are unresponsive to voicemails and emails
- Lack of interest: the employees with whom we speak are often not interested in the subject matter.
- Lack of follow up: in addition to an initial lack of interest, there is minimal to no follow-up on the placement of content.
- Uncertainty: staff is hesitant to post such content and have at times questioned its relevance.

Motivators

- Ease of the process: we provide the article, graphics and any other information they need to move forward with promoting the program.

Results

Table 11. Calls to residential property managers

Description	Frequency
Number of Calls	52
Successful Contact	2

Residential Property Manager Email Campaign

Issues arose that were similar to those that were experienced with commercial property managers; after several unsuccessful quarters of attempting outreach by phone, we changed our outreach to this audience to see if email communications would garner a higher contact rate. A total of 600 emails for residential property manager across California were acquired to begin an email campaign. Our campaign used A/B testing of the headlines across the 600 purchased emails, which were then separated into 300 emails for the outreach and 300 for the pilot email group.

The email campaign focused on three messages for motivation: the \$70,000 fine associated with improper disposal of the mercury thermostats; a \$5 incentive per mercury thermostat recycled; and the convenience/ease of using the program. Email copy was developed to reflect the chief objectives of placing TRC recycling bins with property managers and raise awareness about the \$5 incentive for mercury thermostat recycling. The headlines for each e-newsletter were A/B tested with the goal of developing an effective message for the third and final email.

Hotel/Motel

Summary

Hotels and motels can best support the collection of mercury-added thermostats by being informed of the proper disposal procedures. Given that hotels and, to a lesser extent, motels, need to regularly renovate their establishments to meet the standards of their brand, we do not see the majority of them as a fruitful audience for individual outreach. Based on our scoping calls, we believe that hotels/motels/inns/bed & breakfasts with lower revenues will have the greatest likelihood of having mercury-containing thermostats. Given the difficulty in identifying these lower-revenue lodging businesses, we have focused on contacting and partnering with lodging associations to place an article or e-newsletter containing information on the need to recycle mercury-containing thermostats. The potential legal and financial repercussions of improper waste disposal will be emphasized as it is likely to be a powerful motivator for these establishment's management.

We continued outreach to these associations this quarter, with the goal of placing an article (see appendices) in their publications (i.e., blog, newsletter, email, etc.) and/or on their websites. After preliminary calls to establish contact, the hotel-motel associations showed significant interest, but were busy and follow-up was difficult. Below is a list of the hotel-motel associations with whom we are in contact with:

- California Hotel & Lodging Association
- San Diego County Hotel Motel Association
- Anaheim/Orange County Hotel Lodging Association
- Sonoma County Lodging Association
- Sacramento Hotel Association
- Hotel Council of San Francisco
- Taiwan Hotel Motel Association of Southern California
- Hotel Association of Los Angeles
- Boutique and Lifestyle Lodging Association

Barriers

Thermostat Recycling Corporation

Quarterly Report 2018 Q3

SGA | 29

- No clear point of contact: Constantly passed along to different members of the organization.
- Associations are understaffed and short on time: Difficult to connect with and /unresponsive.
-

Motivators

- Desire to help their members.
- Ease of the process – we provide the article.

Results

- Continued to provide support and quarterly check-in calls to partners
- Total calls placed: 18
- Emails sent & received: 4
- Hotel Council of San Francisco shared TRC article in their Sustainability Meeting agenda on 9/12/18.

Pilot Program

Retail/Consumer Pilot

Summary

In this pilot program, we tested immediate monetary incentives in six retailers throughout the State of California. The goal of the retail pilot was to initiate and maintain a robust program that: engaged participating retailers, increased overall collection rates and provided conclusive evidence to indicate the most effective financial incentive amount per recycled mercury-added thermostat for TRC's California program.

Nine hardware stores initially signed up for the program, but one location in Folsom was unable to continue participation due to unrelated internal business issues, and two stores — one in Crestline, CA (Q2'18), and another in Stockton, CA (Q3'18) — requested removal from the program due to the lack of participation by their customers. The remaining hardware stores were located in Clovis, Fresno (two stores) offering a \$5 incentive, Los Angeles (two stores) offering a \$5 and \$10 incentive, and Sacramento offering a \$10 incentive. We also have three control stores which we are observing for comparison purposes one in Oakland and two in San Francisco. We identified store locations based on the average age of area structures in the area, income and size of population, and the potential for temperature fluctuation.

During Q3'18, we continued to support these six retail pilot partners by providing financial incentives in the form of immediate in-store credits for consumers and contractors who turned in mercury-added thermostats with the corresponding rebate forms, and by continuing to conduct check-in calls, asking them if they needed any new materials or other support.

Barriers

- When employees turned over, new employees weren't trained on the specifics of the recycling program.
- Misplacement of materials (customer logs and promotional materials).
- Lack of thermostats sold in store.

Motivators

- Having store location information on the TRC website (zip code locator).
- Receiving promotional materials from TRC reminded employees about the program.
- Desire to help their community.

Results

- Continued to provide support and quarterly check-in calls to partners.
- Total calls placed: 18
- Bins returned for incentive payments: 0

HHW Pilot

Summary

In Q1'17, TRC initiated a pilot with three HHW county programs across the State of California to measure the effectiveness of a \$10 mail-in-rebate incentive to drive residents to recycle mercury-added thermostats. This included San Bernardino County (South), Santa Clara County (Central), and Del Norte County (North). This was in response to the October 7, 2016 Approval with Modification Letter from DTSC:

“2. TRC is to implement a pilot project that provides a \$10 per thermostat incentive payment (using either a mail-in rebate or gift card) to anyone who turns in thermostats at household hazardous waste collection facilities. This type of pilot project was proposed in TRC's May 10, 2016 draft Pilot Programs Plan but removed from its August, 2016 submittal.”

During Q3'18, TRC worked with the participating HHW program managers to continue to reinforce the program and its goals by providing the rebate to HHWs when the incentive forms were turned in and when conducting check-in calls. Out of all the target audiences, HHW program managers have been particularly supportive of TRC's program goals as they align with their goal of effectively collecting hazardous waste from residents. During Q3'18 check-in calls, none of TRC's points of contact had suggestions for improvements to the program, but every contact detailed barriers they believed were keeping residents' participation in the program low (see below).

Barriers

- Because of the small size of thermostats, people don't realize the importance of correct disposal and mix them in with other waste materials.
- Difficulty in redeeming incentive during the drop-off process at HHWs (sometimes, there are no TRC-trained staff on premises when people drop off).

- The length of time it can take to receive a rebate once thermostats have been turned in may deter people from participation.

Motivators

- Shared goals/role of environmental stewardship.
- Sandwich board signs/fliers advertising the TRC program are useful visual prompts for residents.

Results

- Continued to provide support and quarterly check-in calls to partners
- Total calls placed: 7
- Emails sent & received: 2
- Bins returned for incentive payments: 0

Wholesaler Pilot

Summary

In Q1'17, TRC initiated a pilot with 12 HVAC wholesalers across the State to measure the effectiveness of monetary incentives on HVAC wholesalers' return rates. \$100 rebates were offered for the return of bins containing 40 (or more) mercury thermostats, while \$2.50 was offered per thermostat for bins containing less than forty thermostats. This was in response to the October 7, 2016 Approval with Modification Letter from DTSC:

"3. TRC is to implement a pilot project that provides \$100 mail-in rebate for each bin return by HVAC Wholesalers that contain 40 or more thermostats, and for bins with less than 40 thermostats, a prorated amount of \$2.50 for each thermostat in the returned bin. Although a pilot project of this type was not included in the May 10, 2016 or the August 8, 2016 pilot project plans, DTSC notes that the return rate for HVAC Wholesaler return of collection bins has remained around 55%. A return rate this low, in the primary participant group that has been the focus TRC's program, is troubling, and it is important for TRC to explore methods to improve the collections in these bins, and the rate of their return."

The 12 HVAC wholesaler collection sites were chosen for the pilot program using quota sampling to ensure they met the following criteria:

1. Had a combined, baseline return rate of 55% (for a representative sample)
2. At least four who have been in the program for more than two years
3. At least three returned more than three bins in the past year.
4. At least four located in Northern California
5. At least four located in Southern California

We sent each participating manager a packet with instructions on how to file the new HVAC Wholesaler invoice form (see appendices) to receive their rebate check after returning their TRC bin and 25 forms to send in with their bins.

Letter sent to Wholesale Managers

Hello!

Thank you for agreeing to participate in Thermostat Recycling Corporation's (TRC) HVAC Wholesaler Incentive Program. For each bin returned with 40 or more thermostats, we will provide a \$100 reimbursement, or \$2.50 per thermostat if the bin contains fewer than 40 thermostats. This incentive program will last until December 31, 2017.

During this year, I will be contacting you once a quarter to follow up with the program. Feel free to contact me with any questions you may have, at this email: ksingh@sga-inc.net or by calling me at 732-485-4589.

Attached you will find the Invoice Form necessary to obtain the reimbursement. These will also be sent to your store's location by mail. Please read the attached instructions, which detail how to properly submit the form to TRC.

Again, thank you for your participation!

Sincerely,

Kendra

The program was extended in December 31, 2017 and continues to honor incentives.

In Q3'18, TRC continued this pilot with 12 HVAC wholesalers across the state to measure the effectiveness of monetary incentives on HVAC wholesalers' return rates. We supported our HVAC wholesaler pilot partners by providing the incentive when rebate forms were turned in and when conducting check-in calls. While conducting Q3'18 check-in calls, several wholesalers made mention of the fact that they were not able to record contractor license numbers when thermostats were dropped off — most contractors were either unwilling to volunteer that information, or too busy to communicate it. This does not impede the collection of mercury thermostats, but it does have a bearing on our ability to execute the contract as originally dictated.

Qualitative quarterly check-in calls revealed wholesaler managers' perceived barriers and motivators for participation in the program.

Barriers

- Contractors either unwilling or too busy to provide their contractor license number with thermostat drop-off.
- Seeing fewer thermostats returned — some HVAC wholesalers don't believe many mercury thermostats are still in buildings.
- Period of time with no bin between when a full bin is sent to TRC and when an empty bin is returned to the wholesaler.

- Employee turnover and lack of training.
- Loss of materials that describe the program.

Motivators

- Ease of the process.
- The fact that the program brings contractors into their stores.
- Store employees know about the program and are actively engaged.
- Increased concern for the environment and embrace of the positive benefit the program delivers.

Results

- Continued to provide support and quarterly check-in calls to partners
- Total calls placed: 20
- Emails sent & received: 4
- Bins returned for incentive payments: 4

School Districts Pilot

Summary

Schools can best support the collection of mercury-added thermostats by being informed of the proper disposal procedures and by having a collection bin at hand. Given their limited funding, we believe that public schools may be slow to renovate and could have decades-old thermostats in their facilities. Using the average temperature of a region, the age of the area structures, and the population size as parameters, we have prioritized schools that are most likely to have mercury thermostats.

The pilot program differs from the outreach program in that pilot communications are approached as a partnership. Schools in the pilot program are called on a quarterly basis and provided with more attention and information than their counterparts in the outreach program, in which communications are cold calls with the purpose of distributing collection bins, and collecting/distributing pertinent information. In scientific research, testing whether extra attention prompts different results is called the “extra attention treatment.”

In Q3’18, SGA conducted another series of check-in calls with school districts. Of the 33 districts contacted, 10 took or returned our calls. Eight of the 10 districts that returned our calls had already replaced all mercury thermostats, and two districts (Center Unified Joint School District & Coalinga-Huron Unified) were in the process of replacing them. A few of our contacts mentioned that thermostats had been replaced years ago due to Proposition 39, which went into effect in FY13-14 and was slated to last five years.

Barriers

- Thermostats already replaced: All schools in which connection to the correct contact was successful had already replaced their mercury thermostats (many due to Proposition 39), or were in the process of doing so.

- Difficulty in contacting the appropriate point of contact: Both cold calls and calls made during requested time frames were frequently transferred to a voicemail, and not returned.

Motivators

- Legal repercussions of not maintaining a safe environment for school children.

Results

- Continued to provide support and quarterly check-in calls to partners.
- Total calls placed: 51
- Emails sent & received: 1
- Bins placed: 0
- Bins returned for incentive payments: 0

Utility Companies Pilot

Summary

Utilities are a key audience for TRC as they have mass reach to residents and can be a key stop for residents who are looking to upgrade their homes for energy efficiency. Many of our efforts involving utilities piggyback off their existing programs, which provide information and rebates for items like thermostats and other appliances. Originally, the pilot was going to run through the utility companies' contractors, whom we thought regularly installed and removed thermostats for their customers; however, upon further communication with utility companies, employing contractors does not seem to be common practice. For the pilot, we have switched tactics to better fit the goals and structure of the utility companies with which we are engaged. The utility pilot program now seeks to offer a "collect all" thermostat program to utility customers. Utility customers will be offered a way to recycle any thermostat they have (hence, "collect all"), in addition to receiving a \$5 rebate for mercury-added thermostats. We are running this "collect all" program with our pilot utility companies as a way to help us gather more data on whether identifying a mercury thermostat (vs. an electronic thermostat) acts as a barrier to collection, as well as to discover whether the number of electronic thermostats being recycled is comparable to the number of mercury thermostats being recycled. As an added benefit, we will be helping to recycle old electronic thermostats that are currently in circulation.

With this change in tactics for the pilot, we will still be monitoring the number of thermostats collected (mercury and electronic) and incentives returned but will not be able to control the number of bins placed as we are no longer placing bins with contractors. Our focus will be on informing utility customers about how and where to recycle their old thermostats, offering an incentive, and recording data from our "collect-all" findings.

During Q3'18, we continued to work with our two utility pilot partners: San Francisco Public Utilities Commission and Lassen Municipal Utility District. These partners were chosen based on their ability to communicate with their residents, number of residents served, and number of participating recycling locations in the area. TRC called and sent collect-all bins to all 11 San

Francisco-based collection locations to support the pilot, and is in the process of finalizing the same with pilot locations in Lassen, CA.

Barriers

- Point of contact at utility company was too busy: Difficult to contact and to follow up with the employees of utility companies.
- Chain of command at utility companies: Point of contact often needs to get approval from higher-ups and this process can be lengthy.
- External factors: Fires in northern California affected the availability of our point of contact in Lassen for over a month this quarter.

Motivators

- Mercury-added thermostat recycling seen as a worthwhile cause.
- The TRC program fits well with their other energy efficiency and rebate programs.

Results

- Continued to provide support and quarterly check-in calls to partners.
- Total calls placed: 30
- Emails sent & received: 11
- Tear pads were sent to San Francisco Public Utilities Commission, and a clickable link to TRC's website was added to their website.
- Collect-all bins were sent to 11 hardware stores in San Francisco.
- Lassen Municipal Utilities District agreed to post about TRC program on Facebook, to place a link on their website, and to place fliers in their lobby.

Property Managers Pilot

Summary

The potential legal and financial repercussions of improper thermostat disposal can be a powerful motivator for commercial and residential property managers. This audience can best support the collection of mercury-added thermostats by being able to properly identify and promote the safe removal and disposal of mercury-added thermostats within their properties. Our property manager pilot includes both residential and commercial managers located in Los Angeles, Long Beach, Oakland, and San Francisco. Our tactics will help commercial and residential property managers within the four cities to become more aware of the TRC incentive program.

Commercial and residential property managers within the four aforementioned cities are a focus for our pilot because, as property managers, their purview allows them to assess their organizational needs for mercury recycling, as well as have the occupational incentives to promote mercury recycling within their properties. Commercial and residential property managers will want to be aware of the details of AB 245 to avoid the \$70,000 penalty for not recycling thermostats properly.

Therefore, a total of 900 emails from property managers across California were acquired to determine if digital communications would be more effective than phone calls when performing outreach to this audience. Our campaign's focus was to A/B test messaging and headlines across the 900 purchased emails, which were then separated into 450 emails for the outreach and 450 for the pilot email group. The emails sent focused on four messages: health/safety, legal/social norm, incentive/convenience, and environmental/aspirational. Email copy was developed to reflect the chief objectives of placing TRC recycling bins with commercial and residential property managers and raise awareness about the \$5 incentive for mercury thermostat recycling. The headlines for each email were also A/B tested.

Barriers

- N/A

Motivators

- Please see Table 15 and 16

Results

- Three emails were deployed, with a fourth and final email to be sent the next quarter.
- 900 email contacts in total received the three emails across property managers in San Francisco, Oakland, Los Angeles, and Long Beach.

Program Modification Plan

Proposed Modification #1: Provide smaller recycling pails to requesting locations.

- Completed/ongoing
- Offered in person during site visits and trade shows, as well as outreach calls

Proposed Modification #2: Move “miss you” postcards sent from 3 to 6 times a year to current collection locations.

- Ongoing/in process
- In Q3: sent 492 postcards throughout July and September

Proposed Modification #3: Send quarterly reminder shipment emails to all collection locations not returning a container in 6 months.

- Ongoing/in process
- In Q3: sent 113 emails in September

Proposed Modification #4: Call all collection locations that haven't shipped a bin in 6 months 4 times a year.

- Made 149 calls in Q3 to these locations

Proposed Modification #5: Begin offering a merchandising display to all wholesale or retail locations visited during store sweeps.

- Completed; most already had displays, keep their bin in the back, or didn't have room for them. We fulfilled 21 requests.

Proposed Modification #6: Execute site visit sweeps 2 times a year to clean out locations, with a minimum visit of 100 locations each sweep.

- Required to visit every location every year
- Q3: 71 current collection site visits | 1 non-compliant visits

Proposed Modification #7: Ensure all marketing collateral include a version in Spanish.

- We have Spanish translations for all current marketing material available on our website and well as printed by request.
- Have link for Spanish version on all new advertisements, targeting Spanish-speaking homeowners with new brochure and messaging

Proposed Modification #8: Produce a California-specific YouTube pop-up advertisement for specific Google AdWords key terms which is informed by the non-monetary message testing from Group A pilot plan.

- Completed

Proposed Modification #9: Change California specific marketing collateral to include messaging which are informed by the non-monetary message testing from Group A pilot plan.

- Ongoing, all new marketing includes family/safety messaging

Proposed Modification #10: Once a year, meet with other Extended Producer Responsibility (EPR) groups which operate in California to discuss best practices and ways to improve outreach.

- Attended by Ryan on 8/23/2018
- Summary of meeting in document – EPR Executive Director Meeting

Proposed Modification #11: Reach out to all HVAC wholesale locations across the state that are not currently collecting mercury-added thermostats.

- One visit in Q3
- 22 calls in Q3

Proposed Modification #12: Review all collection locations' geographic coverage with GIS mapping software. The findings are to be published in each year's annual report submission. When gaps in coverage are discovered, TRC will implement a campaign to target placing recycling containers in the region.

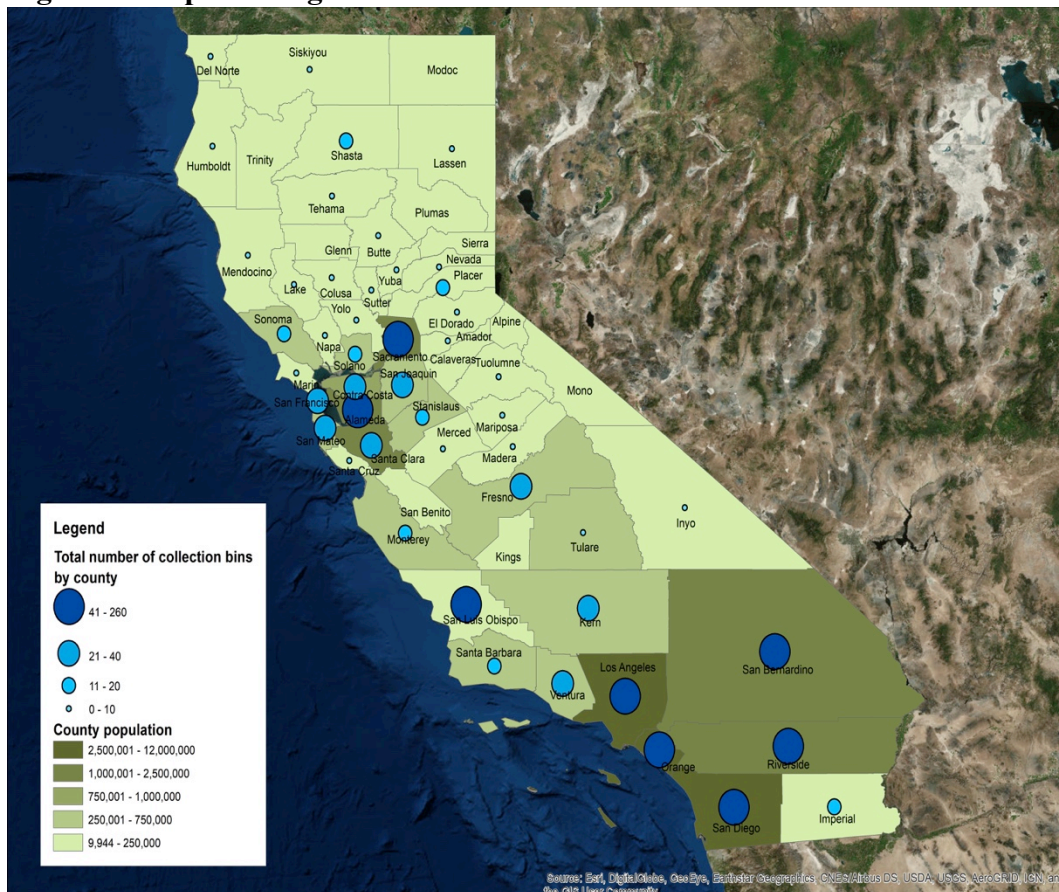

- To be completed by SGA

Geographic Information Systems (GIS)

The following maps show the total number of collection locations throughout the State of California with the location's respective population per county. Size of the population helps to depict the number of residents served by our collection sites. In Q4'18, we will utilize these data to help us target counties that could benefit from having more collection locations. We will perform outreach to HHW's and retail stores in those counties in an effort to place new bins.

Figure 1. Map showing active bins

Legend

Total number of mercury thermostats collected by county in Q3 2018

- 801 - 3300
- 201 - 800
- 101 - 200
- 1 - 100
- 0

Site Visits

A table documenting site visits conducted in Q3'18 is included in the appendices. These site visits include documentation for non-compliant locations.

Advertising

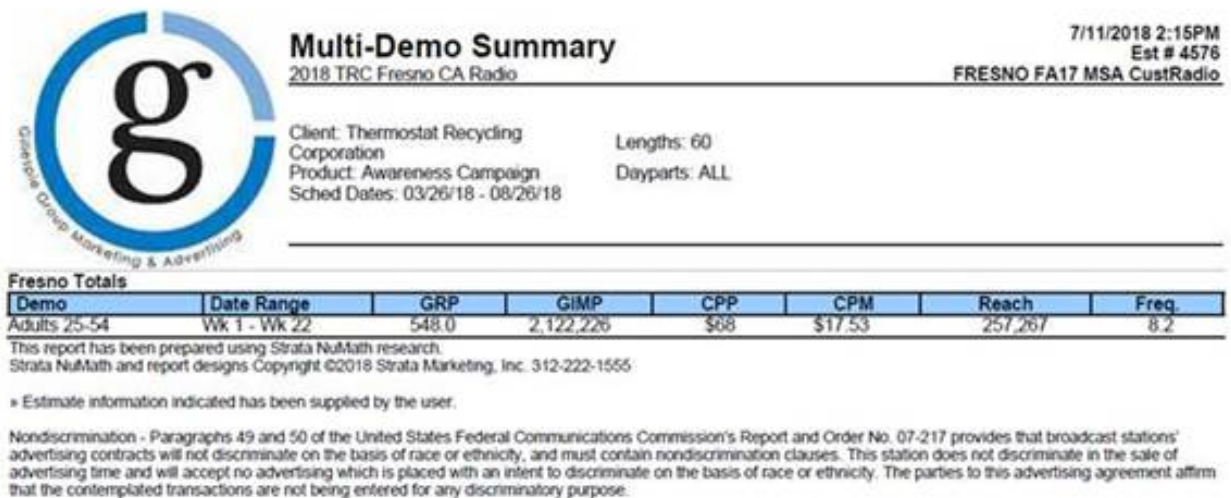

Summary

In Q3'18, advertising efforts in California were implemented, including: out-of-home (transit and billboards), radio, Google Ads (formerly Google AdWords) and Search Engine Optimization (SEO) efforts. In addition, TRC ran print ads in national trade/professional publications which include circulation in California.

The creative message for California draws from the “Recycle This” theme also used nationally. This has the net effect of creating synergy between the state-wide and national efforts. TRC also placed ads in trade publications that specialize in the HVAC, construction, facilities management and recycling industries. The radio, digital and out-of-home advertising launched in the second quarter continued in the third quarter. In subsequent quarters, we will optimize our media campaigns based on data collected, shifting our focus to the better performing ads.

Radio

In Q3'18, radio advertising was conducted in Fresno, CA. You can find a detailed summary of the radio advertising results below.

- GRP (Gross Ratings Points): GRPs are determined by multiplying the percent of a target audience reached by the number of ads (or frequency). This is a standard measure in advertising.

- GIMP (Gross Impressions): This is the total number of impressions potentially achieved by the media schedule.
- CPP (Cost Per Point): A measure of the cost of an advertising unit.
- Impressions: The number of people reached by the campaign.
- Frequency: The total number of times an ad was seen/heard by an individual.

Out-of-Home Advertising

In the third quarter, transit advertising ran in the Fresno, San Bernardino and Sacramento markets. Digital billboards were also placed in the Fresno, Sacramento and Los Angeles markets. Please find proof of performance sheets in the appendices.

Digital Advertising

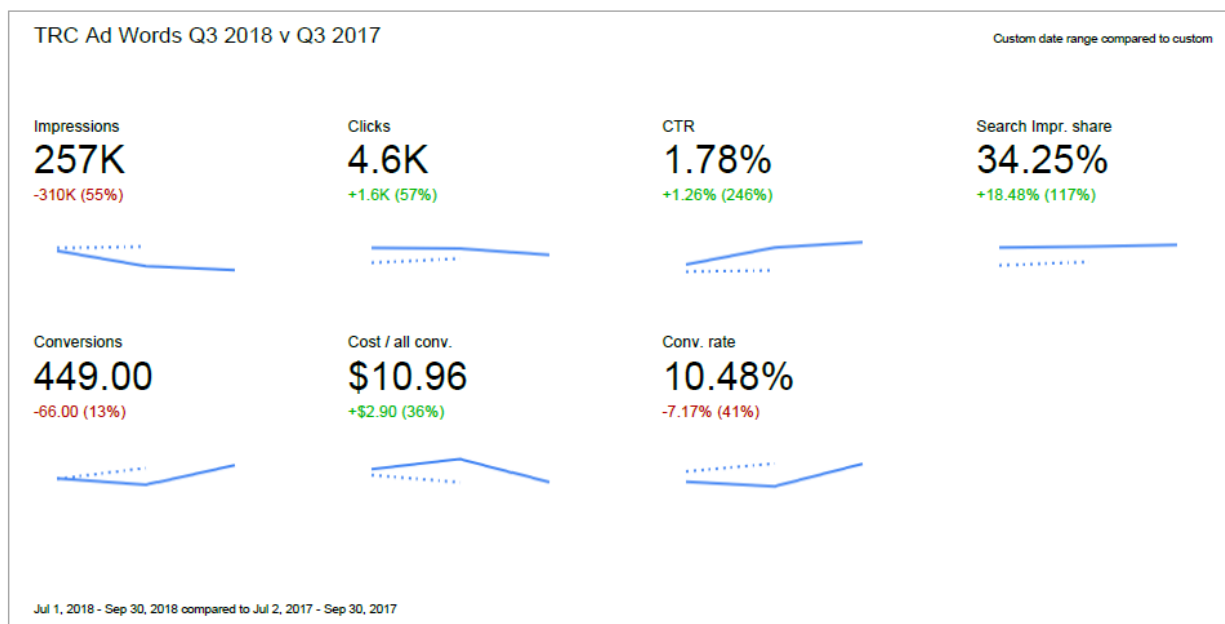

Gillespie views Google Analytics measurements of the website activity as key indicators for overall advertising performance. Advertising in the California market is driving more website traffic and interaction with the website.

City	Acquisition			Behavior			Conversions Goal 1: Find a location		
	Users	New Users	Sessions	Bounce Rate	Pages / Session	Avg. Session Duration	Find a location (Goal 1 Conversion Rate)	Find a location (Goal 1 Completions)	Find a location (Goal 1 Value)
All Users	142.95% 3,445 vs 1,418 ▲	142.58% 3,384 vs 1,395 ▲	134.09% 4,127 vs 1,763 ▲	30.35% 41.68% vs 59.84% ▼	74.31% 3.34 vs 1.92 ▲	3.30% 00:01:06 vs 00:01:04 ▲	24.13% 31.11% vs 41.01% ▼	77.59% 1,284 vs 723 ▲	0.00% \$0.00 vs \$0.00
Direct Traffic	295.00% 1,106 vs 280 ▲	296.67% 1,071 vs 270 ▲	297.35% 1,347 vs 339 ▲	36.74% 34.15% vs 53.98% ▼	91.67% 3.90 vs 2.04 ▲	53.11% 00:01:36 vs 00:01:03 ▲	9.31% 46.55% vs 51.33% ▼	260.34% 627 vs 174 ▲	0.00% \$0.00 vs \$0.00
California CPC	73.79% 789 vs 454 ▲	73.45% 784 vs 452 ▲	74.71% 891 vs 510 ▲	6.43% 74.86% vs 80.00% ▼	39.95% 2.07 vs 1.48 ▲	27.50% 00:00:30 vs 00:00:41 ▼	4.12% 15.04% vs 15.69% ▼	67.50% 134 vs 80 ▲	0.00% \$0.00 vs \$0.00

It is worth noting that the “find a location” page goal conversion rate is lower year-over-year but the raw number of conversions is up compared to the same period. This is due to the fact that we have increased the number of sessions across the board. A session is the total number of times the website was visited. Users making multiple visits to the website will only go to the “find a location” page once. Therefore, the conversion rate has dropped, even though both sessions and the raw number of conversions have increased. Anecdotally, data show a correlation between the advertising markets and increased site visits. You can find these data in the appendices.

In Q3’18 Google AdWords advertising budget increased \$10,000 for the State of California alone. The results are detailed below.

Analysis

In the third quarter, TRC optimized the Google Ads campaign, which resulted in improved efficiencies. Although the total number of impressions is lower, the total number of clicks and the click through rate (CTR) have both increased. Additionally, our share of available impressions has increased. The overall conversions and conversion rate have gone down while the cost per conversion has gone up.

TRC is serving digital video ads through a behaviorally targeted campaign. Behavioral targeting refers to the process whereby digital ads are served to people who have demonstrated a certain affinity through their online browsing habits, sites visited, terms searched, etc. Results through September are detailed below.

On Air Dates	Impressions Ordered	Impressions Delivered	Clicks	CTR
June	312,000	311,420	523	0.17%
July	312,000	314,999	242	0.08%
August	312,000	402,284	433	0.11%
September	468,000	484,088	594	0.12%
October	468,000			#DIV/0!
	1,872,000	1,512,791	1,792	

Below, please find details related to the display networks selected and how each performed for the campaign.

July

On Air Dates	Impressions Delivered	Clicks	CTR

HVAC / Construction / Maintenance	75,528	117	0.15%
	484,088	594	0.12%

Barriers

N/A

Motivators

- We can anecdotally surmise that advertising has increased site traffic.
- Traffic visiting the site is engaged as evidenced by the overall increase in clicks to our “find a location” page.

Results

- Increased site traffic and traffic to the “find a location” page indicate a rise in awareness of recycling mercury thermostats through the TRC program.

Retail: Program introduction letter

500 Office Center Drive – Suite 400 | Fort Washington, PA 19034 | thermostat-recycle.org

Dear Retail Partner:

Thank you for participating in the Thermostat Recycling Corporation's (TRC) California Retail Collection Program. As a TRC partner, your efforts will help keep mercury out of our waste stream and increase customer loyalty through demonstrating your store's commitment to a sustainable community.

We will provide you a free collection bin or gallon pail with pre-paid shipping, a shelf-talker to place on your thermostat aisle, and a folder with additional information to share with your employees about our program. We will provide free publication education materials and promote your store through online channels.

Effective immediately, California residents in your geographic region will be eligible for a \$5 mail-in rebate that is provided by their utility company, when they recycle their mercury thermostat at a Thermostat Recycling Corporation (TRC) location. So be aware that some customers may deliver their thermostat in a plastic bag that also includes a rebate form. There is no action required on your part, simply place the thermostat in the bin with the other thermostats. The rebate payment will be sent to the customer directly on behalf of TRC.

Please remember that for your employees' safety, TRC bins must be shipped when the bin is full or within one year of the date the first mercury thermostat was collected. The bin is returned to the store for the collection of additional thermostats.

If you have any questions regarding this incentive program, please call us at **1-888-266-0550** or email us at trc@thermostat-recycle.org for more information.

Thank you,

A handwritten signature in black ink, appearing to read "Ryan L. Kiscaden".

Retail: Prepping and shipping instructions sheet

Preparing TRC Collection Container for Shipment

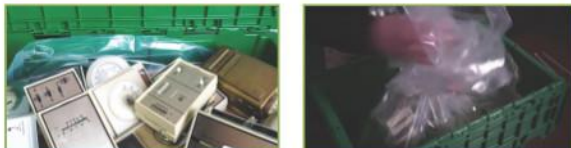

When your collection container is full, or when it has been one year since at least one mercury thermostat has been sitting in it, please use the following steps to prepare your container for shipping:

1. Check to make sure the items in the collection container are mercury-containing thermostats **only**. Remove any unacceptable items. If you find anything besides whole mercury thermostats, please contact TRC for special shipping instructions. Never accept jars or any other containers of liquid mercury as those are hazardous waste and cannot be shipped in our bins.

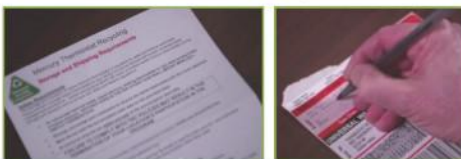

UNACCEPTABLE ITEMS

2. Enclose the thermostats in the liner, use the provided nylon tie to tie the liner. Close the container and secure it by using the remaining nylon ties on the two ends of the lid.

3. Review the instructions that came with your container prior to closing it in preparation for shipping. It is very important to neatly write your return address on the pre-paid shipping label and to use indelible ink if possible. Turn this page over for details.

4. Attach the shipping label to the TRC container and schedule a "Ground Return Pickup" from Fedex (turn this page over for instructions.) Make sure to keep your tracking number to help TRC track the shipment if an issue occurs.

[OVER]

thermostat-recycle.org | 1-888-266-0550 | trc@thermostat-recycle.org

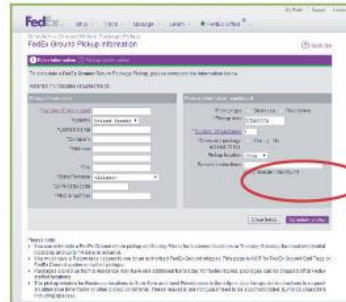

Shipping TRC Collection Container

1. Schedule a FedEx “Ground Return Pickup” by calling 1.800.463.3339 or online at www.fedex.com/returnpickup (username and password are not required)
2. Enter Pickup Information (Note: Tracking ID is found on red label that was delivered with the container)
3. Select “Schedule Pickup.” Your confirmation number will appear on the next page. Keep your confirmation number to help TRC track the shipment if an issue occurs.

TRACKING ID:

4. Attach red shipping label to container. Your container will be picked up and then a new collection container will be sent to you.

Thank you for being part of the TRC recycling program.

Retail: Identifying a mercury thermostat sheet

Identifying a Mercury Thermostat

If the thermostat uses a dial or lever, odds are it contains mercury and needs to be recycled. Containing between 3 and 12 grams of mercury, thermostats are likely the device in homes that have the most amount of mercury today.

1. Examples of mercury thermostats include:

2.

Look for the
mercury bulb
inside.

3. If the thermostat has mercury, it needs to be recycled. It's the law.* Just put the entire mercury thermostat in the green TRC collection container.

*Disposal bans apply in the following states: CA, CT, FL, IA, IL, ME, MA, MN, NY, NH, OR, PA, RI and VT.

thermostat-recycle.org | 1-888-266-0550 | trc@thermostat-recycle.org

Still have a mercury thermostat?

Protect your health and the health of others.

**Recycle it

Newsletter 1: Environment & Health Theme (No Fine):

500 Office Center Drive – Suite 400 | Fort Washington, PA 19034 | thermostat-recycle.org

Protecting the health of your community and environment from mercury contamination is easy with help from your HHW.

When mercury thermostats are improperly discarded with everyday trash, mercury is left to leak into the environment. This mercury gets into our waterways, builds-up in fish, and contributes to the widespread fish consumption advisories throughout the country issued to protect people from the harmful health and development effects of mercury.

HHWs and residents play an important role in preventing mercury from contaminating our environment and contributing to health and safety issues. Everyone can protect the environment and community by bringing in their mercury thermostats to **your local HHW**. **Your local HHW** will collect your mercury thermostats in a safe TRC container and send them in to be properly disposed of.

Protecting the health of your family, community, and environment is important. You may even be eligible for a \$5 rebate for every recycled mercury thermostat. Visit this website to see if you qualify: <http://bit.ly/TRCCAReg>.

For questions about the program, contact Sara Bethel at sbethel@sgamarketing.com or 562-597-0205.

500 Office Center Drive – Suite 400 | Fort Washington, PA 19034 | thermostat-recycle.org

\$70,000 Fine for Not Recycling a Thermostat! TRC has the Solution.

Who knew that those old thermostats could cost you \$70,000? That's the fine for failing to recycle mercury thermostats. Why such a hefty penalty? When mercury thermostats are discarded with everyday trash, the mercury bulb inside the thermostat will break, spilling mercury everywhere, creating a dangerous hazard.

According to California State law, it's illegal to dispose of mercury thermostats in the trash or leave them at customers' premises. HHWs and residents play an important role. Everyone can comply with the law and avoid the \$70,000 fine by bringing in their mercury thermostats to **your local HHW**. **Your local HHW** will collect your mercury thermostats in a safe TRC container and send them in to be properly disposed of.

Staying compliant with the law is a good thing, but what's even better is that you may be eligible for a \$5 rebate for every recycled mercury thermostat. Visit this website to see if you qualify: <http://bit.ly/TRCCAReg>.

For questions about the program, contact Sara Bethel at sbethel@sgamarketing.com or 562-597-0205.

How to Recycle Old Mercury Thermostats: Remove, Replace, Recycle

Dispose of Old Mercury Thermostats Properly with Thermostat Recycling!

It is **ILLEGAL** to throw away mercury thermostats! Remember the Three R's: **Remove, Replace, Recycle!**

Most modern buildings built in the past twenty years use programmable, LED-display thermostats, but you've undoubtedly seen the old school mercury thermostats at plenty of homes and businesses. Like any item containing mercury, thermostats are classified as a universal waste, and must be recycled. Mercury is a bio-toxin hazardous to our health and can cause serious environmental damage if improperly disposed of in landfills.

To encourage the proper dispose of mercury thermostats, [Thermostat Recycling Corporation \(TRC\)](#), a non-profit made up of thermostat manufacturers, has developed a product stewardship program. TRC has partnered with Heating and Air Conditioning (HVAC) wholesalers, thermostat retailers, and Household Hazardous Waste (HHW) collection sites, to collect old mercury thermostats from the public in a drop-off program. Now, proper recycling of old thermostats is easier than ever!

Examples of mercury thermostats:

In 2017, nearly 18,000 mercury thermostats were recycled under this program in California alone.

Since the Thermostat Recycling Corporation launched in 1998, they have collected more than **2.4 MILLION thermostats**; that's more than **11 TONS of mercury** diverted from the waste stream.

You can recycle your old mercury thermostats at the following locations:

Figure 5. Property Managers

Final Draft of Email 1 for Property Managers

Headline:

(A) AB 245 and Old Thermostats: Avoid Paying Fines on Your Properties

(B) How AB 245 Will Affect the Properties You Manage

500 Office Center Drive – Suite 400 | Fort Washington, PA 19034 | thermostat-recycle.org

Hello Valued Customer,

As of 2017, if you have mercury thermostats in the properties that you manage, **you could be fined up to \$70,000 if you don't properly recycle them.** Thermostats that were manufactured prior to 2006 could contain mercury and Thermostat Recycling Corporation is responsible for collecting your old mercury thermostats and will provide you with a free recycling bin to avoid this fine.

To prevent mercury from entering our environment, Assembly Bill 245 has been put in place in the state of California by the Environmental Protection Agency, making it illegal to throw away mercury thermostats. Many thermostats sold prior to 2006 contain mercury and should never be put in the trash. To comply with AB 245, Thermostat Recycling Corporation (TRC) is helping to provide free recycling resources to comply with California State Law. We provide complimentary thermostat recycling bins to property managers in California, and we'd like to send one to SGA Inc.

Why Order a Bin?

- Don't be fined \$70,000.** In California, it is illegal to dispose of a mercury thermostat in solid waste. Non-compliance can lead to fines up to \$70,000 per device for improper disposal.
- Convenient.** We do all the work. Just drop the thermostats in the bin and call Fedex and they will pick it up! We cover all expenses, including materials and shipping.
- No obligations or commitments.** Even if you request a bin, you don't need to meet a minimum number of thermostats. Thermostat Recycling Corporation just wants to collect as many old thermostats across California to keep toxic mercury out of our environment.

Lastly, if you help us to eliminate mercury and prevent contamination, we'll reward you for it.

You're eligible to receive \$5.00 for each mercury thermostat you return back to us.

Order a Bin

Order your bin or get more information at recyclethermostats.org/request or call 562.597.0205 for more information.

Who is Sponsoring the Program?
The California Environmental Protection Agency oversees the program and the Thermostat Recycling Corporation implements the program in an effort to capture all unwanted mercury thermostats

Earn money for recycling unwanted thermostats! Order your bin or get more information at recyclethermostats.org/order or call 562.597.0205 for more information.

No obligations or commitments. Order your bin today to comply with AB 245 and earn money while keeping mercury out of our environment.

(B) Get Money Back for Legally Disposing of Thermostats from Your Properties

500 Office Center Drive - Suite 400 | Fort Washington, PA 19034 | thermostat-recycle.org

Hello Valued Customer,

If you have mercury thermostats in the properties that you manage, you could easily be earning money for recycling them while avoiding a \$70,000 penalty enforced by the California Environmental Protection Agency. The Thermostat Recycling Corporation (TRC) is a free recycling program for mercury-containing thermostats. Production of these devices ceased in 2007 and it is now illegal to dispose of mercury thermostats in the trash.

Therefore, TRC remains committed to providing a convenient, easy-to-use, and lawful way to dispose of thermostats. When it takes only the weight of a paperclip of mercury to contaminate a twenty-acre lake, every drop of mercury counts. To date, 2.1 million units have been collected, which has prevented nearly 11 tons, or 5 elephants worth of mercury out of our environment!

To incentivize property managers across California to legally dispose of thermostats, you are eligible to receive \$5.00 for each mercury thermostat you recycle.

In order to be eligible for the incentive, simply order a free thermostat recycling bin. Our records indicate that Valued Business does not currently have a bin, but the good news is that these recycling bins are easy to order with all shipping fees paid.

Order a Bin

Why Order a Bin?

1. **Get paid.** Earn \$5 for each mercury thermostat you return. Collect 100 from your properties and it's an easy \$500 reward in your pockets. There is no limit on how many you can return.
2. **No cost to you.** Just drop the thermostats in the bin, and call FedEx to pick it up. We cover all expenses, including materials and shipping.
3. **Don't be left out.** Today, more than 3,600 businesses and communities in 48 states are enrolled in our program. Since our founding, we have collected over 2.1 million mercury-containing thermostats – that's kept 11 tons of mercury out of the waste stream.

No obligations or commitments. Order your bin today to comply with AB 245 and earn money while keeping mercury out of our environment.

Who is Sponsoring the Program?

(B) Reminder: Get Rewarded for Returning Old Thermostats from Your Properties

500 Office Center Drive – Suite 400 | Fort Washington, PA 19034 | thermostat-recycle.org

Hello Jackie,

FINAL REMINDER: According to our records, Thermostat Recycling Corp does not have a mercury thermostat recycling bin. Thermostats that were manufactured prior to 2006 could contain mercury and in accordance with Assembly Bill 245, it is illegal to throw them away. Mercury is extremely toxic to our environment and you could easily avoid a [\\$70,000 fine](#) for illegally throwing them in the trash by requesting a free recycling bin from the Thermostat Recycling Corporation.

The Thermostat Recycling Corporation is responsible for helping property managers such as yourself in properly disposing of mercury thermostats. TRC is the easiest and cheapest way to comply with California State law. We provide complimentary thermostat recycling bins to property managers in California, and we'd like to send one to Thermostat Recycling Corp.

Order a Bin

Why Order a Bin?

- (1) **Don't be fined \$70,000.** In California, it is illegal to dispose of a mercury thermostat in solid waste. Non-compliance can lead to fines up to \$70,000 per device for improper disposal.

\$70,000 Fine for Not Recycling a Thermostat! TRC has the Solution.

Who knew that those old thermostats could cost you \$70,000? That's the fine for failing to recycle mercury thermostats. Why such a hefty penalty? Because when mercury thermostats are discarded with everyday trash, the mercury bulb will break, and the mercury will escape and become a dangerous hazard.

According to California law, it's illegal to dispose of mercury thermostats in the trash or leave them at customers' premises. HVAC, demolition contractors, property managers, and residents are responsible for recycling all mercury thermostats they remove from service. Everyone can comply with the law and avoid the \$70,000 fine by enrolling in the Thermostat Recycling Corporation's (TRC) free and easy recycling program. After receiving collection containers from TRC, property managers and contractors can collect mercury thermostats and then send back the containers (when full or after one year) with an enclosed prepaid shipping form.

Staying compliant with the law is a good thing, but what's even better is that property managers, contractors, or property owners get a \$5 rebate for every recycled mercury thermostat. That's right, instead of paying the fine, TRC will pay you! It's a win-win situation. You get rewarded for doing the right thing, avoid the \$70,000 penalty, and the environment is protected by proper mercury disposal.

If interested, enroll in the program by visiting <https://www.thermostat-recycle.org/statelaws/california> or contact Ashley Jimenez at ajimenez@sgamarketing.com or at 562-597-0205 with any questions.

Recirculating Pump Rebate

The City of Corona Department of Water and Power is offering a **\$50 rebate on newly installed recirculating hot water systems.**

What is a recirculating hot water system?
A recirculating hot water system uses a by-pass valve that connects the cold and hot water supply lines at the fixture that is farthest away from the water heater. The by-pass valve uses the cold water line as the return loop back to the water heater, continuously recirculating hot water.

1. **Get paid.** Earn \$5 for each mercury thermostat you return. Collect 100 from your properties and it's an easy \$500 reward in your pockets. There is no limit on how many you can return.
2. **No cost to you.** Just drop the thermostats in the bin, and call FedEx to pick it up. We cover all expenses, including materials and shipping.
3. **Don't be left out.** Today, more than 3,600 businesses and communities in 48 states are enrolled in our program. Since our founding, we have collected over 2.1 million mercury-containing thermostats – that's kept 11 tons of mercury out of the waste stream.

No obligations or commitments. Order your bin today to comply with AB 245 and earn money while keeping mercury out of our environment.

Who is Sponsoring the Program?
The California Environmental Protection Agency oversees the program and the Thermostat Recycling Corporation implements the program in an effort to capture all unwanted mercury thermostats

Order your bin or get more information at
thermostat-recycle.org/collectall
order or call 562.597.0205 for more information.

Thermostat Recycling Corporation

Quarterly Report 2018 Q3

SGA | 80

Final Draft of Email 4 for Pilot Property Managers

Headline:

- (A) Property managers across CA are properly disposing of their thermostats. Are you?
- (B) The right way to safely dispose of thermostats from your properties

500 Office Center Drive – Suite 400 | Fort Washington, PA 19034 | thermostat-recycle.org

Hello Jackie,

All across Los Angeles and the Bay Area, property managers are following best management practices by recycling thermostats and reducing the amount of mercury entering our environment. When it takes only the weight of a paperclip of mercury to contaminate a twenty-acre lake, every drop of mercury counts. To date, 2.1 million units have been collected, which has prevented nearly 11 tons, or 5 elephants worth of mercury out of our environment!

Whenever a mercury thermostat has to be replaced, don't throw it away! Join the hundreds of other property managers across the state of California and recycle it through the Thermostat Recycling Corporation's complimentary bin program.

Order a Bin

Here are the top 3 reasons why you should order a bin for your properties:

1. Avoiding paying a [\\$70,000 penalty](#) enforced by the California Environmental Protection Agency.
2. Get paid. Earn \$5 for each mercury thermostat you return. There is no limit on how many you can return.
3. According to the [U.S. Environmental Protection Agency](#), mercury is a neurotoxin, that can cause irreparable harm to humans and animals. Therefore, old thermostats should never be thrown away in the trash. Safely and easily remove old thermostats to avoid mercury contamination on your properties and our environment. We do all the work. Just drop the thermostats in the bin, and call FedEx to pick it up! We cover all expenses, including materials and shipping.

Order a Bin

Order your bin or get more information at thermostat-recycle.org/collectall or call 562.597.0205 for more information.
