SUBMISSION OF QUARTERLY REPORT; Consent Order Item B-1.6

Dear Mr. Greenlee,

The following quarterly report for the fourth quarter of 2018 (Q4'18) outlines the Thermostat Recycling Corporation's (TRC) most recent outreach and pilot project activities. By this submission, S. Groner Associates, Inc., or SGA, is fulfilling obligations on behalf of the 24 signatories of the Consent Order listed below. If you have any questions regarding this submission, please feel free to contact me at (562) 597-0205 or the address below.

Regards,

A handwritten signature in black ink, appearing to read "Stephen Groner", with a long horizontal flourish extending to the right.

Introduction

During the fourth quarter (October-December) of 2018, S. Groner Associates (SGA) worked on behalf of the Thermostat Recycling Corporation (TRC) to implement the following tasks from the DTSC-approved Outreach Plan and Pilot Plan, as part of the California TRC Program. The following report outlines those efforts undertaken during this quarter, broken into audiences.

Summary of Results

1. Mercury-added thermostats collected this quarter: 2,934
2. New collection containers this quarter: 32
 - Number and location (by street address) of new collection bins assigned (see Appendix).
3. Mercury-added thermostats collected this year: 13,157
4. Program element/participants to which the collected thermostats are attributed:
Information not attributed due to overlapping tactical elements

Outreach Program

Summary of Outreach Activities for Audience A

Retail/ Consumer

Summary

Historically, retailers have been a small component of the mercury thermostat take-back recycling effort. In an effort to increase the collection of mercury thermostats throughout the state of California, as well as provide more accessible and public-facing recycling locations for consumers, we have targeted hardware stores throughout the state as new collection site partners. Having solidified 52 retail partnerships in 2016-2017, we have been working to expand the number of retail partnerships secured in 2018. In Q1'18, we reviewed the geographic locations of current partnerships and targeted areas that would benefit from increased levels of promotion and thermostat drop-off locations.

An example of this is mapping out locations where we have had promotion through the local utility company and then working to ensure that there are sufficient collection site retailers in the area. Using this information, we created a list of locations to recruit as drop-off locations in Q2'18, began conducting outreach to these locations in an effort to sign them up as TRC partner collection sites, and updated and ordered the materials in our retail partner toolkit. We continued our outreach efforts in Q2'18 and Q3'18. In Q4'18 we placed a total of 249 outreach calls and secured 10 more partnerships with retailers. As part of our partnership, these retail locations agreed to host a TRC recycling bin or pail in their facility, display promotional materials in their store, and communicate with us regarding the progress, barriers, and motivators they observe with their customers.

TRC sent a bin to each of these 10 locations and we prepared and mailed out 10 toolkits to each of these retail locations. The retail toolkits include a folder with a TRC program introduction letter, a prepping and shipping instructions sheet, a sheet informing users how to identify a mercury thermostat, English and Spanish shelf talkers, and English and Spanish window clings. In 2018, we've secured 27 additional retail partnerships.

Barriers

- Contacting the right person: Difficulty reaching decision maker on the phone and lack of response after sending information via email upon request.
- Busy schedule of retailers: Prevents decision maker from being reachable and contacting caller back after receiving information from an employee.
- Delays due to bureaucracy: The corporate office must approve the partnership prior to placing a bin at the location.
- Enrolled in another program: They are already participating in a recycling program that may or may not accept mercury thermostats and do not want to participate in an additional program even with TRC's perks.

- Low frequency: They do not feel that their customers encounter mercury thermostats frequently enough to host a bin.
- No value: They do not feel that having a bin would be of value to them.
- Space restrictions: They do not have enough space for the bin and promotional materials.
- Concern about liability: They did not feel comfortable hosting a bin at their location due to the legal responsibility involved on their part.

Motivators

- Chief motivator: They will receive potential customers for free by being promoted online as a collection site.
- Smaller-sized pail overrides their concern of space restriction.
- Minimum effort is required to participate.
- Their customers have brought mercury thermostats into the store.
- Their customers have left mercury thermostats on their property after hours.
- Many other stores throughout California, in their area, or within their retail chain, participate in the program.

Results

- 10 partnerships were formed with retail locations in Q4'18
 - 10 bins were placed at these locations
 - 10 toolkits were sent to these locations

The following is a list of the retail locations that we entered into partnerships with in Q4'18:

1. Seventh and Union Hardware Inc. - Los Angeles, CA
2. Rodeo True Value Hardware - Contra Costa, CA
3. L B Johnson Ace Hardware - Los Angeles, CA
4. Alamo Hardware - Contra Costa, CA
5. Richland Ace Hardware - Stanislaus, CA
6. Wyckoff's Plumbing Hardware & Electrical - Humboldt, CA
7. Whale Point Marine & Hardware - Contra Costa, CA
8. Bayshore Supply - Alameda, CA
9. Carl Johnson True Value Hardware - Humboldt, CA
10. Wyckoff's Plumbing & Electrical - Humboldt, CA

The following is a list of materials that were sent to the above retail locations (see appendix):

- TRC Program Introduction Letter
- Prepping and Shipping Instructions Sheet
- Identifying a Mercury Thermostat Sheet
- English Shelf Talkers
- Spanish Shelf Talkers
- English Window Clings
- Spanish Window Clings

Household Hazardous Waste (HHW)

Summary

In Q4'18 we continued to conduct outreach to place bins, which serve as collection sites, with HHWs, as well as ask HHWs to promote our program. Outreach took the form of phone calls and email correspondence. Outreach to place new bins with HHWs was conducted in locations where stakeholders in that city or county expressed interest in promoting our materials but did not have a collection site in the area. Outreach was then conducted with HHWs in those locations to place a bin at their site. A total of two bins were placed with HHWs in Q4'18.

Barriers

- N/A

Motivators

- HHWs are motivated to help because they are aware of the environmental hazards of mercury

Results

- Two bins were placed with HHWs

The following is a list of HHWs where bins were placed:

1. County of Fresno HHW - Fresno, CA
2. Vallejo Materials Recovery Facility & Office - Vallejo, CA

Environmental Contractors

Summary

Environmental contractors have emerged as a potentially important audience for TRC. From our outreach to other audiences, such as schools and universities, it has been reported that environmental contractors are hired to manage waste disposal during renovations. In Q4'18 we continued to implement our strategy based on the supposition that these contractors specialize in removing and properly disposing of hazardous waste. We found that environmental contractors would be a prime target because receiving a TRC recycling bin would streamline their activities. We continued to collect names of environmental contractors mentioned in outreach and reach out to these contacts. During Q4'18, we placed 121 outreach calls to the 243 contacts on our database.

Our primary goal was to place bins or pails with environmental contractors and offer them a \$2.50 incentive rebate per mercury thermostat. From this audience, we also continued collecting information that informed our campaign strategy, and we documented that information. During Q4'18, we placed one new pail with an environmental contractor. Additionally, during these outreach calls we collected data on how often environmental contractors encountered mercury thermostats, and if they are interested in receiving a bin, how often they disposed of mercury

thermostats. We also looked into why or why not contractors were interested in having a bin or pail.

Barriers

- Delays due to bureaucracy: The corporate office must approve the partnership prior to placing a bin.
- Contacting the right person: Difficulty reaching decision maker on the phone because they were often busy or out in the field, and their response was received by way of a voicemail or an email.
- Lack of a facility for a bin: Some contacts do not have a physical facility where we can send a bin.
- Perspective: Their demeanor towards the program is generally one of disinterest and skepticism, seemingly due to their knowledge in the industry as environmental contractors and the low frequency of mercury thermostats' presence in circulation.
- Some stated that the \$2.50 incentive was not enough to motivate them.

Motivators

- \$70,000 fine for improper disposal
- Some stated that the \$2.50 incentive for each returned thermostat was a motivator
- Social norms: Mentioning number of bins environmental contractors have received throughout California and/or naming those companies.
- Option for pail: Many environmental contractors operate out of their vehicle instead of a facility, so they were generally receptive to receiving a small pail instead of a large bin.

Results

- Conducted 121 outreach calls to contacts
- Placed one pail
- Expanded database with the contact information of 243 environmental contractors
- Collected and documented information about how often environmental contractors encounter mercury thermostats, how often they dispose of them if they are interested in a bin, and why they were or were not interested

General Contractors

Summary

TRC continues to complete outreach to this audience with the hopes of gaining greater participation. Our outreach efforts are intended to inform the contractor of our program if they are not already aware, and to sign the contractor up for recycling through a bin or pail.

Barriers

- In terms of contractor outreach, we continue to contact locations who don't want to be contacted.

- A majority of contractors respond, saying that they either do not work with thermostats or they hardly ever encounter mercury thermostats.
- A majority of calls result in voicemail messages that are not returned.

Motivators

- N/A

Results

- TRC called 340 general contractors. These efforts yielded zero bin placements.

HVAC Contractors

Summary

TRC continues to complete outreach to this audience in hopes of gaining greater participation. Our calls are made to inform the contractor of our program if they are not already aware, and to sign the contractor up for recycling through a bin or pail.

Barriers

- In terms of contractor outreach, we continue to contact locations who don't want to be contacted.
- A majority of contractors respond that they hardly ever encounter mercury thermostats. Another frequent response is that they already recycle through their wholesaler.
- A majority of calls result in voicemail messages that are not returned.

Motivators

- Although the majority of our sign-ups this quarter were from contractors who already recycled at the wholesaler, we were able to get them to directly participate and order a container with the incentive offer.

Results

- TRC called 121 HVAC contractors. During the fourth quarter we had one sign-up from an HVAC contractor.

Demolition Contractors

Summary

TRC continues to complete outreach to this audience with the hope of gaining greater participation. Our calls are made to inform the contractor of our program if they are not already aware, and sign the contractor up for recycling through a bin or pail.

Barriers

- In terms of contractor outreach, we continue to contact locations who don't want to be contacted.
- A majority of contractors respond that they either do not work with thermostats or that they hardly ever encounter mercury thermostats.
- A majority of calls result in voicemail messages that are not returned.

Motivators

- During this quarter, almost all of the demolition contractor calls resulted in responses that indicated these contractors never, or vary rarely, see mercury thermostats. Therefore, we had no motivators.

Results

- TRC made 237 calls to demolition contractors. During the quarter we had no sign-ups from demolition contractors.

Wholesalers

Summary

Our collections during the fourth quarter were significantly less compared to the same time last year. While we are completing greater site visits and calls, there are not as many thermostats in the bins. During the fourth quarter, an average of 31 thermostats were returned to the bins.

Barriers

- Non-compliant wholesalers continue to state that they are only plumbing supplies or fabrication locations, and therefore will not accept a recycling container.
- Participating wholesalers are seeing a decline in collections and sending some of their recycling bins back to us because they do not need them anymore.

Motivators

- We get positive feedback on the ease of the program from current collection locations.

Results

- We completed 64 calls to wholesalers who hadn't returned a container in the past 6 months.
- TRC performed 51 site visits to wholesale collection locations in the program, and nine additional visits to non-compliant wholesalers between October and December of 2018.
- During site visits, 36 wholesale locations that did not currently have a bin display requested one.
- We were unsuccessful in recruiting any non-compliant wholesalers into our program during site visits.

Summary of Outreach Activities for Audience B

Building Departments

Summary

Building Departments can best support the collection of mercury-added thermostats by informing contractors, inspectors and other professionals who come to the department about the importance of proper disposal of mercury thermostats. Based on our scoping calls, we believe that employees of building departments have little contact with thermostats. However, the professionals who seek the services of the building department frequently come in contact with thermostats in their line of work. Therefore, building departments will serve as a conduit for outreach.

Prior to Q4'18, we have collectively been able to distribute promotional flyers to 47 of the 57 county building departments, which are then placed at the front desks of building department offices. The flyers serve to inform the audience that mercury thermostats need to be recycled, that there is a fine imposed for improper disposal, and how they can recycle their thermostats through the TRC program. As part of our outreach efforts in Q4'18, these building departments were contacted so that we could restock their flyers. When contacted, 29 of the 47 county departments requested more flyers. Flyers were sent out to the respective building department for their display.

Barriers

- Building department employees who did not accept our flyers gave a variety of reasons for the refusal. Their answers varied from “not enough space” to “we don’t display flyers” and “the person who oversees office materials is not in.”

Motivators

- Smaller building departments that were originally hesitant were persuaded to take the flyers when we mentioned the cooperativeness of larger county building departments.

Results

- 47 building departments agreed to distribute flyers.
- A minority of 10 county building departments either declined to take the flyers or were unable to be contacted.
- 29 building departments requested restocks of materials to continue promoting the program.

Table 6. Outreach building department calls

Description	October '18	November '18	December '18
Number of calls	50	0	10
Number of flyers distributed	0	1,500	467
Number of depts requesting flyer placements/restocks	13	0	1

Utility Companies

Summary

In our outreach plan, we strategized to reach out to the utility companies that employed contractors to perform thermostat installations for their customers, but upon further communication with utility companies, finding companies that directly employ contractors has proven challenging. We are actively performing outreach in an attempt to find this type of relationship, but our primary area of focus in Q4'18 is geared towards creating partnerships with utility companies where we encourage them to promote TRC programs directly with their customers.

Utility companies are also mandated by the federal and state government to reduce energy usage per resident over time. Many utility companies have implemented the strategy of promoting smart thermostats in order to comply with this mandate. These rebate programs are frequently utilized by their large customer base, who we are now performing outreach to. We are currently working to place outreach materials concerning mercury thermostat recycling alongside related rebate programs and other active outreach initiatives. These efforts may include: posting information and links to the TRC website on their own websites, distributing bill inserts, posting on their social media accounts, sending out a TRC article in their newsletters, and/or performing point of purchase outreach with TRC materials at stores like BestBuy, Lowe's, Home Depot, and Sears.

In Q4'18, we continued forging relationships with four large utility companies and twenty-three small utility companies. While these efforts initially focused on determining if these companies hosted energy efficiency programs, performed point-of-purchase (POP) promotion, and offered advertising opportunities, our efforts in Q4'18 continued our work in regards to getting companies to disseminate information about the TRC program to their customers. Our goal was to communicate with utility customers and tell them how and where to recycle their mercury thermostats, as well as how to redeem the incentive. To communicate this information effectively, we created website copy, a newsletter article, social media posts and point-of-purchase tear pads for utility companies to disseminate.

Barriers

- Keeping utility companies interested: It's been difficult to connect with the correct staff within their organizations and to keep their attention on the issue at hand.
- Not a priority: We have little leverage over utility companies. Any agreements or partnerships that we forge are subject to being put on hold or delayed by the utility companies, and contacts may become unresponsive for long periods of time.
- Some of the small utility companies do not have smart thermostat rebates, so in some cases it has not been possible to piggyback off this resource and carry out our strategy.

Motivators

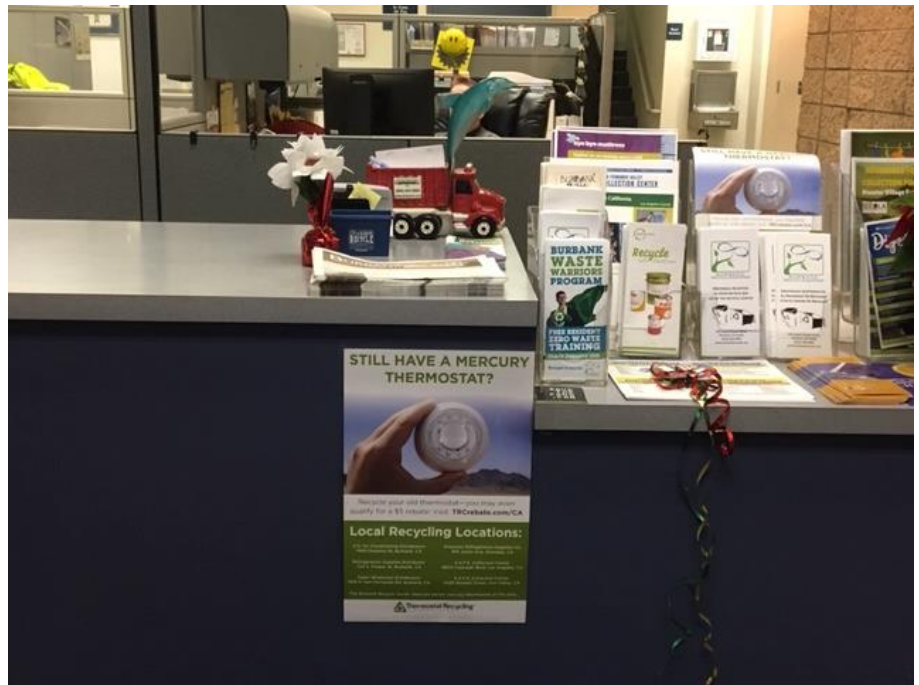

- Large utilities host similar programs: Adding the mercury thermostat rebate program as a helpful tool to aid their existing energy saving initiative has proven to be effective.
- Leveraging current partners: Mentioning the participation of larger utility companies such as PG&E and SMUD in our outreach program has been an effective discussion point.
- Convenient materials: Providing multiple mediums for promotion and "ready to go" materials has made the process easier for utility companies.

Results

- Total calls placed: 16
- Emails sent & received: 81
- POP materials were printed and distributed at the following locations:
 - Sacramento Municipal Utilities District (SMUD)
 - SoCal Gas (To date, materials have been distributed at 243 Home Depot, Lowe's, and Best Buy locations. For a list of store locations where distribution has occurred, see the appendix.)
- TRC flyers were sent to, and distributed at, Burbank Water and Power (see below).
- TRC's article was added to the newsletter sent out by the City of Corona Department of Water and Power (see below).

Is Your Water Bill Over-Budget?

Remember, now with cooler weather, your landscaping doesn't need as much water as it did in the summer. You can turn your irrigation timer down or even turn it off this time of year. Depending on the type of plant material you have, you can cut your watering times in half!

When the rainy season starts, remember to turn your irrigation timer off for at least 48 hours after the rain stops. Don't have time to turn it off or think you'll forget? Purchase a weather based irrigation controller (WBIC) that automatically adjusts based on the weather. A rebate of up to \$200 is available when you purchase a qualifying brand and model.

To find out more about this rebate and more, visit www.SoCalWaterSmart.com.

For more information, contact the Water Resources Team at (951) 736-2234 or by e-mail at StopTheDrop@CoronaCA.gov.

Recycle THIS!

Recycle your old thermostat and get a \$5 rebate! Improper disposal of your old thermostat can be dangerous for your home and for the environment. Old thermostats contain mercury and need to be properly recycled. Visit recyclehomethermostats.org/california to receive \$5 for each mercury thermostat that you recycle! For more information, contact the Thermostat Recycling Corporation at 1-888-266-0550 or by email at info@recycle-thermostats.org.

How often do you replace your refrigerator water filter?

Does the water or ice from your refrigerator have a bad taste or smell? The water filter could likely be the cause; it should be replaced every 6 months. Don't forget to replace it regularly to keep your drinking water healthy and fresh.

School Districts

Summary

Schools can best support the collection of mercury-added thermostats by being informed of the proper disposal procedures and having a collection bin at hand. Schools, especially public schools can be slow to renovate and generally only replace a thermostat if it has ceased to function. This may anecdotally signal the potential for decades-old thermostats in their facilities.

S.GRONER ASSOCIATES, INC.

Using the average temperature of a region, the age of the structure and the population size as parameters we prioritized schools in areas that have the best combination of these factors and would therefore be more likely to require a TRC bin. Our outreach will include all California schools in the outreach program. We structured our outreach to address the schools fitting these criteria first. At this point, the primary communication method of the outreach program is cold-calls with the purpose of distributing collection bins, as well as collecting and distributing pertinent information regarding construction. We also educate recipients of collection bins about the requirements of recycling mercury thermostats and the processes for hazardous waste disposal.

In Q4'17, TRC made repeated phone calls to schools, prioritizing 39 school districts that had received Prop 39 grant funds. Prop 39 grant recipients pose a significant advantage, as they are actively renovating and modernizing their facilities with environmental impact in mind. Given the importance of outreach to schools, TRC took Q1'18 to examine our call efforts and identify successive outreach and/or pilot programs for schools in Q2. After deliberation, it was decided that we would reach out to individual schools that are part of the aforementioned school districts. It was hypothesized that the facility managers of the individual schools might have more time to speak with us as well as feel more responsibility for the safety of the school, so these managers were our main focus when calling individual schools. In Q4'18, we continued these efforts by calling the remaining schools in our database. A total of 69 calls to the individual schools were made. However, none of these calls resulted in a successful conversation. Many voicemails were left and followed up with, but none of the contacted schools have requested a collection bin.

Barriers

- Some of the schools that we have spoken to have specifically requested that we speak to the school district instead. They have claimed that it is school policy to redirect external organizations to speak with the district concerning such matters.
- There were difficulties getting in contact with many of the district facility managers. Both cold calls and calls made during requested time frames frequently resulted in being transferred to voicemail.
- Many schools that we spoke with stated that they had transitioned to digital thermostats years ago and no longer had mercury thermostats.

Motivators

- N/A

Results

- Total of 69 calls made

Table 7. Outreach School calls

Description	October '18	November '18	December '18
Number of calls	11	32	26
Successful contacts made	0	3	2
Number of bins placed	0	0	0

Note: A call is defined as successful if the target person is reached and the full call script was implemented.

Universities/Colleges

Summary

Universities and colleges can best support the collection of mercury-added thermostats by serving as a conduit to the waste haulers or contracted companies that service their facility. While most universities and colleges have a facility manager, they do not usually work on HVAC-related repairs or replacements. Our initial interviews showed that facility managers knew that mercury-added thermostats should not be thrown in the trash, but they did not understand where or how to properly dispose of them. This responsibility is typically left to the contractor working on the project. Our outreach will focus on educating facility managers about recycling mercury-added thermostats and supplying them with a bin if their facility has mercury-added thermostats on-site. The managers can then supply their contractors with the bin or have the contractor leave the thermostats with the manager, who can then properly recycle them.

In Q4'17 and Q1'18, TRC made repeated phone calls to 79 universities. The 79 universities were chosen due to the size of their large student body, each of which exceeded 10,000 students. Based on the limited success of Q1'18 calls, the Q2'18 database was changed. This time, the population was comprised of only small universities and community colleges with less than 10,000 students. These schools also received Prop 39 grants. This change was made to test if smaller schools would be more responsive due to less bureaucracy. In Q4'18, a total of 107 calls were made to such schools, with successful contacts to 29 schools. Although we received fewer responses about contacting the district with the updated database, facility departments and managers have been proven difficult to reach on the phone and we end up leaving many voicemails that do not get returned. None of the universities or community colleges requested a collection bin.

Barriers

- There were difficulties when it came to getting in contact with many of the district facility managers. Both cold calls and calls made during requested time frames frequently resulted in being transferred to a voicemail.
- A few of the community colleges that are part of a community college district have requested that we contact the district instead of them directly.

- Many schools that we spoke with stated that they had transitioned to digital thermostats years ago and no longer had mercury thermostats.

Motivators

- N/A

Results

- A total of 107 calls were made
- 29 successful contacts were made

Table 8. Outreach University calls

Summary of Outreach Activities for Audience C

Property Managers

Commercial Property Managers

Summary

This audience can best support the collection of mercury-added thermostats by being able to properly identify and promote the safe removal and disposal of mercury-added thermostats within their properties. Our tactics will help commercial property managers become more aware of rebate incentives and bin placement as effective ways of encouraging the proper disposal of mercury thermostats via a TRC recycling bin.

Our strategy for getting our messaging across to property managers was to have property manager associations serve as the messenger. Property management associations serve as a conduit of information to property management companies regarding best practices and policy updates. They are already in communication with property managers, therefore they can serve as a messenger for the TRC program. The associations are motivated to provide their members with up-to-date information, like how to avoid a significant fine by recycling mercury thermostats.

S. GRONER ASSOCIATES, INC.

In Q4'18, we continued our outreach to commercial property management associations. Our goal was to place articles (see appendix) in their publications (i.e. blog, newsletter, email, etc.) and/or on their websites. During initial calls the associations seemed interested often asking for more information or a copy of the article. When it came time to follow up there was an issue getting in contact with the original person. We were consistently transferred to voicemails or advertisement departments that gave us no direction. When we got individuals on the phone, they were either not who we needed to speak to, or they did not feel such information was relevant. Due to the lack of response, we decided to check in quarterly with the associations to see if they were still interested, were able to place the article we had sent them, or if they needed more information. Below is a list of the commercial property management associations we are currently in contact with:

1. California Association of Realtors (CAR)
2. NAIOP SoCal
3. Building Owners and Managers Association of California (BOMACal)
 - a. Silicon Valley
 - b. San Francisco
 - c. San Diego
 - d. Sacramento
 - e. Oakland-East Bay
 - f. Orange County
 - g. Greater Los Angeles
 - h. Inland Empire
4. Association of Commercial Real Estate (ACRE)
5. AIR Commercial Real Estate Association
6. International Council of Shopping Centers (ICSC)

Barriers

- Difficult to get ahold of/unresponsive: Staff is often occupied with other tasks when we call. Staff is also unresponsive to voicemails and emails.
- Lack of interest: The employees we speak with are often not interested in the subject matter.

Motivators

- Ease of the process: We provide articles, graphics, and any other information they need to move forward with promoting the program.

Results

- 10 calls were made to commercial property management associations
- None of our calls were successful in making contact

Table 9. Calls to commercial property managers

Note: A call is defined as successful if the target person is reached and the full call script was implemented.

Residential Property Managers

Summary

This audience can best support the collection of mercury-added thermostats by being able to properly identify and promote the safe removal and disposal of mercury-added thermostats within their properties. Our tactics will help residential property managers become more aware of rebate incentives and bin placement to encourage proper disposal via a TRC recycling bin. Residential property managers are an outreach target because their purview allows them to assess their organizational needs for mercury recycling, as well as have the occupational incentives to promote mercury recycling within their properties. Residential property managers need to be aware of AB-245 to avoid the costly penalty of not recycling thermostats properly. Because of how challenging it has been to make contact with this audience, we have focused our efforts on partnering with property manager associations that act as the messenger.

Property management associations serve as a conduit of information to property management companies regarding best practices and policy updates. They are also in communication with property managers and will therefore serve as a messenger for the TRC program. The associations want to provide their members with mercury recycling information as it will help property management companies avoid potential legal or financial repercussions of improper waste disposal.

In Q4'18, we continued making calls to the updated residential property management association database. Our goal is to place an article (see appendix) in their publications (i.e. blog, newsletter, email, etc.) and/or on their websites. We aimed to have an article placed as a blog, on their website, or however the association saw fit for their audience and to inform them of the program and associated fee. During the initial calls, the associations seemed interested, often asking for more information or a copy of the article. When it came time to follow up, we had an issue getting in contact with the original person, resulting in us being transferred to voicemails or advertisement departments that gave us no direction. When we were able to get individuals on the phone, they were either not the right person, or they stated that they did not feel such information was relevant. Due to the lack of response, we decided to check in quarterly with the associations to see if they were still interested, were able to place the article we had sent them, or needed more information.

Below is a list of the residential property management associations we are currently in contact with:

1. California The National Association of Residential Property Managers (CALNARPM)
 - Alameda/ Contra Costa
 - Long Beach/ Orange County
 - Los Angeles
 - Marin/ Sonoma
 - Monterey Bay
 - Northern California Central Valley
 - Sacramento
 - San Diego
 - Santa Clara
2. California Apartment Association (CAA)
 - Central Valley
 - Contra Costa
 - Greater Fresno
 - Greater Inland Empire
 - Income Property Assn. of Kern
 - Los Angeles
 - Marin Income Property Association
 - North Bay
 - Orange County
 - Rental Housing Assn. of Sacramento Valley
 - San Diego
 - San Francisco Apartment Association
 - Solano
 - Tri-County
3. International Realty & Investments
4. Apartment Association of Greater Los Angeles (AAGLA)
5. Apartment Owners Association of California, Inc
 - San Fernando Valley
 - Orange County
 - Los Angeles
 - San Diego
 - Long Beach
 - Northern California
6. FirstService Residential California
 - Bay Area
 - Inland Empire
 - Los Angeles
 - Orange County
 - Palm Desert
 - Sacramento

- San Diego
- Santa Clarita
- San Francisco
- 7. California Residential Services Association
- 8. California Association of Realtors (NAR)

Barriers

- Difficult to get ahold of/unresponsive: Staff is often occupied with other tasks when we call, and staff members are unresponsive to voicemails and emails.
- Lack of interest: The employees we speak with are often not interested in the subject matter.

Motivators

- Ease of the process: We provide the article, graphics and any other information they need to move forward with promoting the program.

Results

- 15 calls were made to residential property management associations.
- Two successful points of contact were made.

Table 10. Calls to residential property managers

Hotel/Motel

Summary

Hotels and motels can best support the collection of mercury-added thermostats by being informed of proper disposal procedures. Given that larger hotels and motels need to consistently renovate their buildings to meet the standards of their brand, we do not see the majority of these establishments as being a fruitful audience for individual outreach. Based on our scoping calls, we believe that hotels, motels, inns, and bed & breakfasts of lower revenue will have the greatest likelihood of having mercury-containing thermostats. However, given the difficulty of identifying these lower revenue lodging businesses, we will be contacting and partnering with lodging associations and working to place an article about mercury thermostats in their e-newsletters. The potential legal and financial repercussions of improper waste disposal will be

emphasized because we believe them to be a powerful motivator for hotel and motel management.

We continued outreach to hotels and motels in Q4'18 with the goal of placing an article (see appendix) in their publications (i.e. blog, newsletter, email, etc.) and/or on their websites. Below is a list of the hotel-motel associations we are in contact with:

1. California Hotel & Lodging Association
2. San Diego County Hotel Motel Association
3. Anaheim/Orange County Hotel Lodging Association
4. Sonoma County Lodging Association
5. Sacramento Hotel Association
6. Hotel Council of San Francisco
7. Taiwan Hotel Motel Association of Southern California
8. Hotel Association of Los Angeles
9. Boutique and Lifestyle Lodging Association

Barriers

- Difficult to get ahold of/unresponsive.
- Constantly passed along to different members of the organization.
- Some associations are understaffed and tight on time.

Motivators

- Desire to help their members.
- Ease of the process – we provide the article.

Results

- Total calls placed: 17

Pilot Program

Summary of Pilot Activities for Audience A

Retail/Consumer

Summary

In this pilot program, we tested immediate monetary incentives with six retailers throughout the state of California. The goal of the retail pilot was to initiate and maintain a robust program that: engaged participating retailers, increased overall collection rates, and provided conclusive evidence to indicate what the most effective financial incentive amount per recycled mercury-added thermostat should be for TRC's California program.

S.GRONER ASSOCIATES, INC.

Nine hardware stores initially signed up for the program, but one location in Folsom was not able to continue participation due to unrelated internal business issues. Two other stores — one in Crestline, CA (Q2'18), and another in Stockton, CA (Q3'18) — requested removal from the program due to the lack of participation by their customers. The remaining hardware stores were located in Clovis, Los Angeles, Sacramento, West Hollywood, and Fresno, which had two stores. We also have three control stores where no incentive is offered for the return of mercury thermostats. One of these controls is located in Oakland, and the other two are located in San Francisco. We identified store locations based on the average age of structures in the area, the income level of the city, the size of the population, and the potential for temperature fluctuation.

During Q4'18, we continued to support these six retail pilot partners by providing financial incentives in the form of an immediate in-store credit for consumers and contractors who turned in mercury-added thermostats with the corresponding rebate forms. We also supported the stores by continuing to conduct check-in calls in order to determine whether stores needed any new materials or support.

Barriers

- The surrounding communities were built after mercury thermostats stopped being sold.
- The type of hardware store: one store indicated that they were an industrial hardware store and seldom saw homeowners.
- New employees sometimes weren't trained on the specifics of the recycling program.
- Misplacement of materials: customer logs and promotional materials.
- Not enough materials and/or a need to develop more impactful advertisements.

Motivators

- Store location information was placed on the TRC website via a zip code locator.
- Received promotional materials from TRC reminding employees about the program.
- The desire to help their community.

Results

- Total calls placed: 28

HHW

Summary

In Q1'17, TRC initiated a pilot with three HHW county programs across the state of California. The goal was to measure the effectiveness of a \$10 mail-in-rebate incentive intended to drive residents to recycle mercury-added thermostats. This included San Bernardino County (South), Santa Clara County (Central), and Del Norte County (North). This was in response to the Approval with Modification Letter from DTSC on October 7, 2016:

"2. TRC is to implement a pilot project that provides a \$10 per thermostat incentive payment (using either a mail-in rebate or gift card) to anyone who turns in thermostats at household hazardous waste collection facilities. This type of pilot project was

Thermostat Recycling Corporation

Quarterly Report 2018 Q4

SGA | 26

S.GRONER ASSOCIATES, INC.

proposed in TRC's May 10, 2016 draft Pilot Programs Plan but removed from its August, 2016 submittal."

During Q4'18, TRC worked with the participating HHW program managers to continue to reinforce the program and its goals. The rebate was provided to HHWs when the incentive forms were turned in, and check-in calls were conducted. Out of all the target audiences, HHW program managers have been particularly supportive of TRC's program goals, as they align with their goal of effectively collecting hazardous waste from residents. During Q4'18 check-in calls, HHW locations were keen to provide us with program suggestions and insights into how we could improve performance.

Barriers

- The length of time it can take to receive a relatively small rebate deters people from participation because people feel as though it is a waste of their time.

Motivators

- Shared goals/role of environmental stewardship.
- Sandwich board sign and fliers advertising the TRC program are useful visual prompts for residents.

Results

- Total calls placed: 7

Wholesaler

Summary

In Q1'17, TRC initiated a pilot with 12 HVAC wholesalers across the state to measure the effectiveness of monetary incentives on HVAC wholesalers' return rates. \$100 rebates were offered for the return of bins containing 40 or more mercury thermostats, while \$2.50 was offered per thermostat for bins containing less than forty thermostats. This is in response to the Approval with Modification Letter from DTSC on October 7, 2016:

"3. TRC is to implement a pilot project that provides \$100 mail-in rebate for each bin return by HVAC Wholesalers that contain 40 or more thermostats, and for bins with less than 40 thermostats, a prorated amount of \$2.50 for each thermostat in the returned bin. Although a pilot project of this type was not included in the May 10, 2016 or the August 8, 2016 pilot project plans, DTSC notes that the return rate for HVAC Wholesaler return of collection bins has remained around 55%. A return rate this low, in the primary participant group that has been the focus TRC's program, is troubling, and it is important for TRC to explore methods to improve the collections in these bins, and the rate of their return."

The 12 HVAC wholesaler collection sites were chosen for the pilot program using quota sampling to ensure that they met the following criteria:

Thermostat Recycling Corporation

Quarterly Report 2018 Q4

SGA | 27

1. All had a combined, baseline return rate of 55% (for a representative sample).
2. At least four had been in the program for more than two years.
3. At least three returned more than three bins in the past year.
4. At least four were located in Northern California.
5. At least four were located in Southern California.

We sent each participating manager a packet with instructions on how to file the new HVAC Wholesaler invoice form (see appendix) in order to receive their rebate check after returning their TRC bin. We also included 25 forms with their bins.

Letter Sent to Wholesale Managers

Hello!

Thank you for agreeing to participate in Thermostat Recycling Corporation's (TRC) HVAC Wholesaler Incentive Program. For each bin returned with 40 or more thermostats, we will provide a \$100 reimbursement, or \$2.50 per thermostat if the bin contains fewer than 40 thermostats. This incentive program will last until December 31, 2017.

During this year, I will be contacting you once a quarter to follow up with the program. Feel free to contact me with any questions you may have, at this email: ksingh@sga-inc.net or by calling me at 732-485-4589.

Attached you will find the Invoice Form necessary to obtain the reimbursement. These will also be sent to your store's location by mail. Please read the attached instructions, which detail how to properly submit the form to TRC.

Again, thank you for your participation!

Sincerely,
Kendra

The program was extended past December 31, 2017 to honor incentives occurring through 2018.

In Q4'18, TRC continued this pilot with 12 HVAC wholesalers across the state of California to measure the effectiveness of monetary incentives on HVAC wholesalers' return rates. We supported our HVAC Wholesaler pilot partners by providing the incentive when rebate forms were turned in and when conducting check-in calls. While conducting Q4'18 check-in calls, several wholesalers made mention of the fact that they were not able to record contractor license numbers when thermostats were dropped off. Most contractors were either unwilling to volunteer that information, or too busy to communicate it. This does not impede the collection of mercury thermostats, but it does have bearing on our ability to execute the contract as originally dictated. Qualitative quarterly check-in calls revealed wholesaler managers' perceived barriers and motivators for participation in the program.

Barriers

- Contractors are often either unwilling or too busy to provide their contractor license number with thermostat drop-off.
- Period of time with no bin between the moment a full bin is sent to TRC and when an empty bin is returned to the wholesaler.
- Employee turnover creates a lack of training for the new employee.
- Loss of materials that describe the program.

Motivators

- Ease of the process.
- The program brings contractors into their stores.
- Increased concern for the environment and embrace of the positive benefit the program delivers.

Results

- Total calls placed: 20
- Emails sent & received: 2

Summary of Pilot Activities for Audience B

School Districts

Summary

Schools can best support the collection of mercury-added thermostats by being informed of proper disposal procedures and having a collection bin on site. Given their limited funding, we believe that public schools may be slow to renovate and could have decades old thermostats in their facilities. Using the average temperature of a region, the age of the area's structures, and the population size as parameters, we have prioritized schools that are most likely to have mercury thermostats.

The pilot program differs from the outreach program in that pilot communications are approached as a partnership. Schools in the pilot program are called on a quarterly basis and provided with more attention and information than their counterparts in the outreach program. The outreach program consists of cold-call communications with the purpose of distributing collection bins, as well as collecting and distributing pertinent information. In scientific research, testing whether extra attention prompts different results is called the "extra attention treatment."

In Q4'18, we conducted another series of check-in calls with school districts. Of the 24 districts contacted, nine indicated that all mercury thermostats had already been replaced, one district -- Alta Loma School District -- expressed interest in a bin, and 14 districts either could not give us an answer or did not respond to voicemails and/or emails. A few of our contacts mentioned that

thermostats had been replaced years ago through Proposition 39, which came into effect in the fiscal year of 2013-2014 and remained in effect for five years.

Barriers

- Thermostats already replaced: all schools, where connection to the correct contact was successful, had already replaced their mercury thermostats (many under Proposition 39).
- Difficulty in connecting with the appropriate point of contact. Both cold calls and calls made during requested time frames were frequently transferred to voicemail and not returned.

Motivators

- Legal repercussions of not maintaining a safe environment for school children.

Results

- Total calls placed: 43
- Emails sent & received: 4

Summary of Pilot Activities for Audience C

Utility Companies

Summary

Utilities are a key audience for TRC as they have mass reaches to residents and can be a key stop for residents who are looking to upgrade their homes with better energy efficiency. Many of our efforts piggyback off existing programs that provide information and rebates for items like thermostats. Originally, the pilot was going to run through the utility companies' contractors, who we thought regularly installed and removed thermostats for their customers. However, upon further investigation we determined that it is not common practice for utility companies to employ contractors. As such, we switched tactics to better fit the goals and structure of the utility companies we engage with.

The utility pilot seeks to offer a "collect-all" thermostat recycling program to utility customers. Utility customers will be offered a way to recycle any thermostat they have, hence the "collect all" part of the program's name. In addition, customers will be able to receive a \$5 rebate for mercury-added thermostats. We are running the "collect-all" program with our utility pilot partners as a way of determining whether the identification of mercury thermostats (vs. electronic thermostats) acts as a barrier to collection, as well as determining whether the number of electronic thermostats being recycled is comparable to the number of mercury thermostats being recycled. The recycling of old electronic thermostats is an added benefit of this program.

With this change in tactics for the pilot, we will still be monitoring the number of thermostats collected (mercury and electronic) and incentives returned, but we will not be able to monitor the number of bins placed as we are no longer placing bins with contractors. Our focus will be to

inform utility customers about how and where to recycle their old thermostats, offer an incentive, and record data from our “collect-all” findings.

During Q4’18 we continued to work with our two utility pilot partners: San Francisco Public Utilities Commission and Lassen Municipal Utility District. These partners were chosen based on their ability to communicate with their residents, the number of residents served, and the number of participating recycling locations in the area. In Q3’18, TRC sent collect-all bins to all 11 San Francisco-based collection locations, and in Q4’18, TRC was able to place a collect-all bin at an HHW facility in Lassen.

Barriers

- Difficult to get ahold of and to follow up with the employees of utility companies.
- Point of contact often needs to get approval from higher-ups and this process can be lengthy.
- External factors: fires in northern California affected the availability of our point of contact in Lassen for over a month this quarter.

Motivators

- Utility companies saw mercury-added thermostat recycling as a worthwhile cause.
- The TRC program fits well with the existing energy efficiency and rebate programs that utilities offer.

Results

- Total calls placed: 3
- Emails sent & received: 9
- Bins placed: 1
- San Francisco Public Utilities Commission began distributing TRC fliers at outreach events (e.g. “Sunday Streets”).

Property Managers

Summary

Property managers are a valuable audience for TRC because they can best support the collection of mercury-added thermostats by understanding that thermostats need to be recycled and practicing the safe removal and disposal of mercury-added thermostats within their properties. This is because property managers are often the party responsible for ensuring that thermostats are up to date within the buildings they manage. Typically, tenants will request thermostat replacements when a thermostat breaks rather than having management conduct periodic checks. It is notable that there is no discussion, training, or agreement on a policy pertaining to waste disposal between the external contractor and the property management.

All property managers we spoke with in our scoping calls stated that contractors are trusted to dispose of the thermostats properly. The lack of awareness of the legal repercussions from the

S. GRONER ASSOCIATES, INC.

manager's standpoints provided an opportunity for outreach and engagement. In-person outreach was conducted for this pilot as it has been extensively proven that this audience does not respond to phone calls or emails. In previous quarters we had attempted to place bins with property managers via phone calls and emails but we had an overwhelming lack of response. As such, we changed our outreach method to exclusively in-person visits.

Our property manager pilot includes both residential and commercial managers located in Long Beach and Oakland. The pilot is a collect-all program, in which property managers collect both electronic and mercury thermostats for recycling. The goal of this pilot is to observe whether or not identification of mercury thermostats is a barrier for the collection and recycling of mercury thermostats. The collect-all strategy will allow us to compare results from mercury only collection and collect-all collection. From there, we can gather data that will help us understand if the identification of mercury thermostats is a barrier. We will also have a general understanding of the ratio of mercury vs. electronic thermostats being disposed. Our tactics will also help commercial and residential property managers within the two cities become more aware of the TRC Incentive Program.

In Q4'18, we created a database of 22 property manager companies in Oakland and Los Angeles where we could visit in-person and place a TRC collection bin. We also created a script based on results of previous outreach efforts that used effective message framing, and addressed barriers and motivators from previous outreach efforts. In-person outreach began in Q4'18. We visited 11 property managers in Oakland and placed a total of 7 bins. In-person outreach to the remaining property managers in Los Angeles will be completed in Q1'19.

Barriers

- Frequency: They do not think they have mercury thermostats in their properties or they do not come across them enough to host a bin.

Motivators

- In-Person Outreach: Having the bin in person at the location appeared to make property managers more inclined to accept the bin.
- Official Materials Visible: Having TRC materials that detailed the \$70,000 fine and showing it to property managers in-person appeared to make property managers less skeptical about the program and more willing to accept a bin.
- Minimum Effort to Participate: Telling property managers that they did not have to print the rebate form for residents appeared to make them more willing to accept the bin.

Results

- Conducted in-person outreach to 11 total property management companies.
- Placed seven total collect-all bins: two residential businesses, two commercial businesses, and three that were both commercial and residential businesses.
- Created a database of 22 property management locations in Oakland and Los Angeles to conduct outreach to during Q4'18 and Q1'19.

The following lists the property manager businesses where bins were placed:

1. Balco Properties - Oakland, CA (Commercial)
2. Western Management Properties & Valva Realty - Oakland, CA (Commercial and Residential)
3. Openworld Properties - Oakland, CA (Commercial and Residential)
4. Advent Properties - Oakland, CA (Commercial and Residential)
5. Vision Property Management - Oakland, CA (Residential)
6. Maisel Property Management - Oakland, CA (Residential)
7. JLL - Oakland, CA (Commercial)

Program Modification Plan

Proposed Modification #1: Provide smaller recycling pails to requesting locations.

- Completed/ongoing
- Offered in person during site visits and trade shows, as well as outreach calls

Proposed Modification #2: Move “miss you” postcards sent from 3 times a year to 6 times a year to current collection locations.

- Ongoing/in process
- In Q4: sent 212 postcards in November

Proposed Modification #3: Send quarterly reminder shipment emails to all collection locations not returning a container in 6 months.

- Ongoing/in process
- In Q4: sent 109 emails in December

Proposed Modification #4: Call all collection locations 4 times a year that haven’t shipped a bin in 6 months.

- Made 104 calls in Q4 to these locations

Proposed Modification #5: Begin offering a merchandising display to all wholesale or retail locations visited during store sweeps.

- Completed, most already had displays, keep their bin in the back, or didn’t have room for them. We had 36 requests we fulfilled.

Proposed Modification #6: Execute site visit sweeps 2 times a year to clean out locations with a minimum visit of 100 locations each sweep.

- Required to visit every location every year – not what we had proposed
- Q4: 101 current collection site visits | 9 non-compliant visits

S. GRONER ASSOCIATES, INC.

Proposed Modification #7: Ensure all marketing collateral include a version in Spanish.

- We have Spanish translations for all current marketing material, available on our website and well as printed by request
- Have link for Spanish version on all new advertisements, targeting Spanish speaking homeowners with new brochure and messaging

Proposed Modification #8: Produce a California specific YouTube pop-up advertisement for specific Google AdWords key terms which is informed by the non-monetary message testing from Group A pilot plan.

- Completed

Proposed Modification #9: Change California specific marketing collateral to include messaging which are informed by the non-monetary message testing from Group A pilot plan.

- Ongoing, all new marketing includes family/safety messaging

Proposed Modification #10: Once a year, meet with other Extended Producer Responsibility (EPR) groups which operate in California to discuss best practices and ways to improve outreach.

- Attended by Ryan in the third quarter

Proposed Modification #11: Reach out to all HVAC wholesale locations across the State that are not currently collecting mercury-added thermostats.

- 9 visits in Q4

Proposed Modification #12: Review all collection locations' geographic coverage with GIS mapping software. The findings are to be published in each year's annual report submission. Where gaps in coverage are discovered, TRC will implement a campaign to target placing recycling containers in the region.

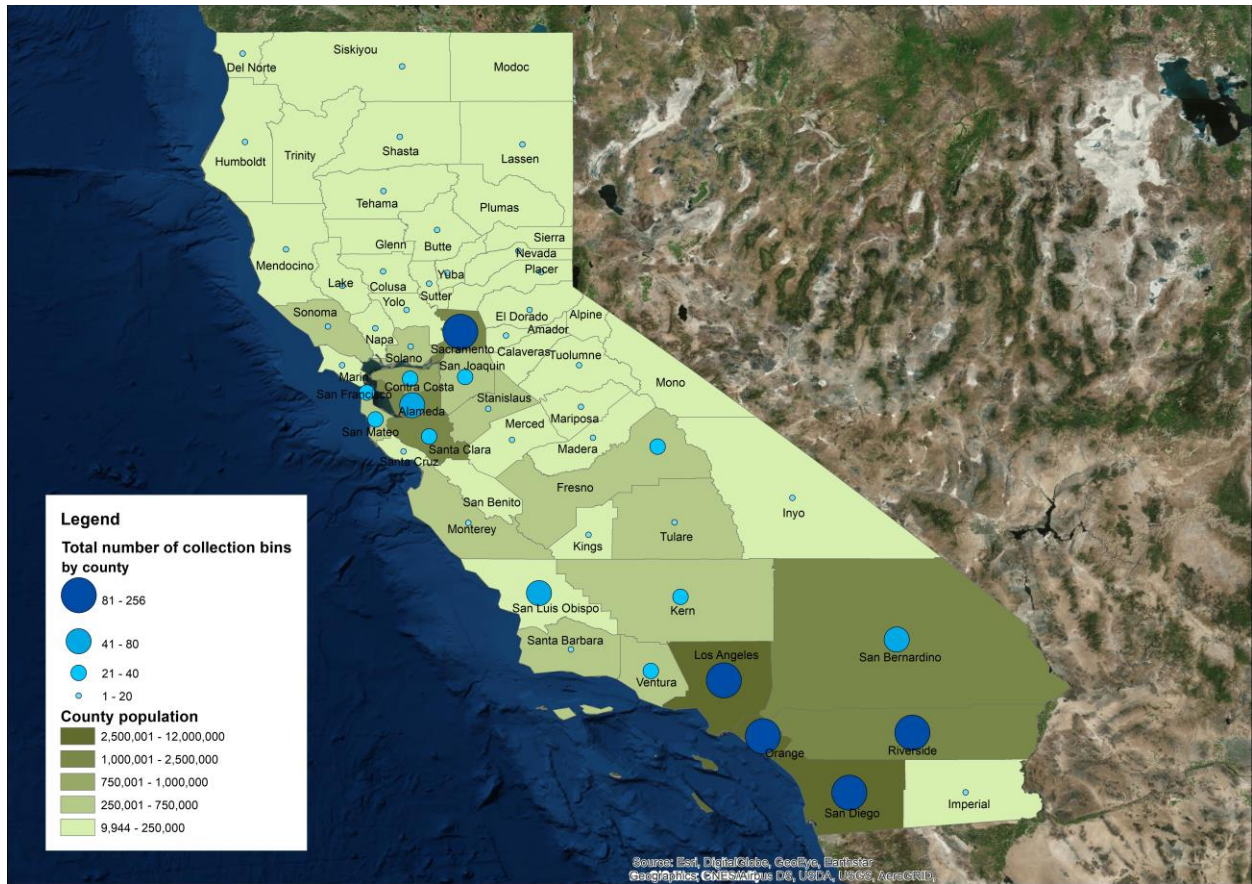

- To be completed by SGA

Geographic Information Systems (GIS)

The following maps show the total number of collection locations throughout the state of California with the location's respective population per county. Size of population helps to depict the number of residents served by our collection sites. Both maps will help inform our strategy for outreach to HHWs and retail outlets alike by showing us the counties that require more bin coverage based on the number of residents.

Figure I. Map showing active bins

12/18/2018	RSD - Livermore	California	100.00
			960.00

Site Visits

A table documenting site visits conducted in Q/Y is included in the appendix. These site visits include documentation for non-compliant locations.

Advertising

Summary

Radio and out-of-home advertising, such as those on billboards and transit, were concluded in the 4th quarter. Previous quarterly reports included buying summaries and flight verifications. The creative message for California draws from the “Recycle This” theme, which was also used nationally. This has the net effect of creating synergy between the state-wide and national efforts. Paid media continues to consist of the state-wide Google AdWords (now Google Ads) campaign. Additionally, TRC places paid ads in trade publications that focus on the HVAC, construction, facilities management and recycling industries.

Market Research

TRC completed the post ad campaign market analysis in November 2018. The results indicated that, despite a substantial investment program, awareness and related issues were not affected by

S. GRONER ASSOCIATES, INC.

the campaign. Overall program awareness increased by only 3%. With a margin of error of +/- 4%, this change is statistically insignificant. Additionally, TRC did not see any impact on the number of thermostats recycled during the period in which the advertising was in market. A complete report will be provided upon final analysis.

Google Analytics

Google Analytics measures are a key indicator for overall advertising performance. The advertising in market this year is driving positive results as indicated by Google Analytics.

	Acquisition			Behavior			Conversions		
	Users	New Users	Sessions	Bounce Rate	Pages / Session	Avg. Session Duration	Goal 1 Conversion Rate	Goal 1 Completion	Goal 1 Value
All Users	45.91% ↓	46.14% ↓	50.27% ↓	70.96% ↓	220.74% ↑	44.62% ↑	96.65% ↑	2.21% ↓	0.00%
California CPC	185.79% ↑	185.58% ↑	187.13% ↑	17.58% ↓	62.74% ↑	85.45% ↑	43.69% ↓	61.68% ↑	0.00%
Direct Traffic	74.50% ↓	74.81% ↓	77.59% ↓	92.56% ↓	304.89% ↑	59.51% ↑	413.93% ↑	15.19% ↑	0.00%

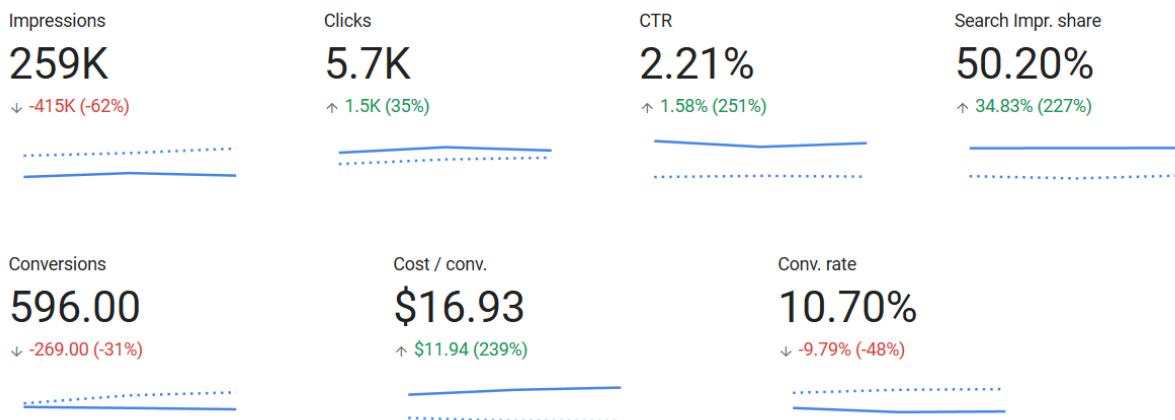

The above summary compares Q4'18 vs. Q4'17. It is worth noting that although the number of users, new users, and sessions is down period over period, engagement metrics indicate that the quality of the traffic has improved. Specifically, we see that the pages/session rate has increased dramatically. Similarly, the average session duration has increased and the bounce rate has decreased.

Google Ads

As part of our overall advertising, TRC has increased its investment in Google Ads to \$10,000 for the state of California alone. The results are detailed below.

Q4 2018 vs Q4 2017

Custom compared to previous year

Oct 1, 2018 - Dec 31, 2018 compared to Oct 1, 2017 - Dec 31, 2017

Thermostat Recycling Corporation

Quarterly Report 2018 Q4

SGA | 38

Analysis

In the 3rd quarter, Gillespie modified the Google Ads campaign. As a result, we continue to see some improved efficiencies. Although the total number of impressions is down, the total number of clicks and the click through rate (CTR) have both increased. Additionally, we've noted that our share of available impressions has increased. The overall conversions and conversion rate have gone down while the cost per conversion has gone up.

Digital Display

TRC is serving digital video ads through a behaviorally targeted campaign. Behavioral targeting refers to the process whereby digital ads are served to people who have demonstrated a certain affinity through their online browsing habits, sites visited, terms searched, etc. The final month of the campaign was October 2018. Results are detailed below.

463,860	513	0.11%	1.58	0.11%
IMPRESSIONS	CLICKS	CTR	X THE NATIONAL AVG (.07%)	TOTAL ENGAGEMENT RATE

Barriers

- N/A

Motivators

- Advertising has increased site traffic. Moreover, people who visit the site are engaged, as evidenced by the overall increase in clicks to our “find a location” page.

Results

- Traditional and digital advertising is working. As noted above, we have witnessed an increase in site traffic to the “find a location” page. While site traffic is up significantly and the site engagement is also increasing, overall collections in California have not increased.

Retail toolkit materials

Retail: Program introduction letter

500 Office Center Drive – Suite 400 | Fort Washington, PA 19034 | thermostat-recycle.org

Dear Retail Partner:

Thank you for participating in the Thermostat Recycling Corporation's (TRC) California Retail Collection Program. As a TRC partner, your efforts will help keep mercury out of our waste stream and increase customer loyalty through demonstrating your store's commitment to a sustainable community.

We will provide you a free collection bin or gallon pail with pre-paid shipping, a shelf-talker to place on your thermostat aisle, and a folder with additional information to share with your employees about our program. We will provide free publication education materials and promote your store through online channels.

Effective immediately, California residents in your geographic region will be eligible for a \$5 mail-in rebate that is provided by their utility company, when they recycle their mercury thermostat at a Thermostat Recycling Corporation (TRC) location. So be aware that some customers may deliver their thermostat in a plastic bag that also includes a rebate form. There is no action required on your part, simply place the thermostat in the bin with the other thermostats. The rebate payment will be sent to the customer directly on behalf of TRC.

Please remember that for your employees' safety, TRC bins must be shipped when the bin is full or within one year of the date the first mercury thermostat was collected. The bin is returned to the store for the collection of additional thermostats.

If you have any questions regarding this incentive program, please call us at **1-888-266-0550** or email us at trc@thermostat-recycle.org for more information.

Thank you,

Ryan L. Kiscaden
Executive Director
Thermostat Recycling Corporation

S. GRONER ASSOCIATES, INC.

Retail: Prepping and shipping instructions sheet

Preparing TRC Collection Container for Shipment

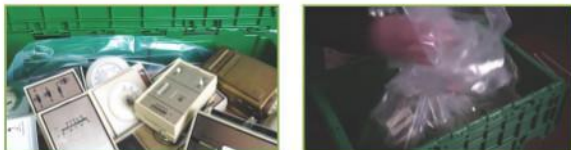

When your collection container is full, or when it has been one year since at least one mercury thermostat has been sitting in it, please use the following steps to prepare your container for shipping:

1. Check to make sure the items in the collection container are mercury-containing thermostats **only**. Remove any unacceptable items. If you find anything besides whole mercury thermostats, please contact TRC for special shipping instructions. Never accept jars or any other containers of liquid mercury as those are hazardous waste and cannot be shipped in our bins.

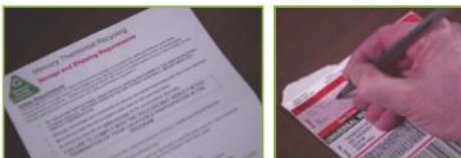

UNACCEPTABLE ITEMS

2. Enclose the thermostats in the liner, use the provided nylon tie to tie the liner. Close the container and secure it by using the remaining nylon ties on the two ends of the lid.

3. Review the instructions that came with your container prior to closing it in preparation for shipping. It is very important to neatly write your return address on the pre-paid shipping label and to use indelible ink if possible. Turn this page over for details.

4. Attach the shipping label to the TRC container and schedule a "Ground Return Pickup" from Fedex (turn this page over for instructions.) Make sure to keep your tracking number to help TRC track the shipment if an issue occurs.

[OVER]

thermostat-recycle.org | 1-888-266-0550 | trc@thermostat-recycle.org

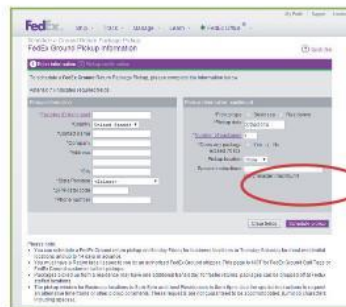

Shipping TRC Collection Container

1. Schedule a FedEx "Ground Return Pickup" by calling 1.800.463.3339 or online at www.fedex.com/returnpickup (username and password are not required)
2. Enter Pickup Information (Note: Tracking ID is found on red label that was delivered with the container)
3. Select "Schedule Pickup." Your confirmation number will appear on the next page. Keep your confirmation number to help TRC track the shipment if an issue occurs.

TRACKING ID:

4. Attach red shipping label to container. Your container will be picked up and then a new collection container will be sent to you.

Thank you for being part of the TRC recycling program.

Retail: Identifying a mercury thermostat sheet

Identifying a Mercury Thermostat

If the thermostat uses a dial or lever, odds are it contains mercury and needs to be recycled. Containing between 3 and 12 grams of mercury, thermostats are likely the device in homes that have the most amount of mercury today.

1. Examples of mercury thermostats include:

2.

Look for the
mercury bulb
inside.

**3. If the thermostat has mercury, it needs to be recycled. It's the law.*
Just put the entire mercury thermostat in the green TRC collection container.**

*Disposal bans apply in the following states: CA, CT, FL, IA, IL, ME, MA, MN, NY, NH, OR, PA, RI and VT.

Property Manager Article

\$70,000 Fine for Not Recycling a Thermostat! TRC has the Solution.

Who knew that those old thermostats could cost you \$70,000? That's the fine for failing to recycle mercury thermostats. Why such a hefty penalty? Because when mercury thermostats are discarded with everyday trash, the mercury bulb will break, and the mercury will escape and become a dangerous hazard.

According to California law, it's illegal to dispose of mercury thermostats in the trash or leave them at customers' premises. HVAC, demolition contractors, property managers, and residents are responsible for recycling all mercury thermostats they remove from service. Everyone can comply with the law and avoid the \$70,000 fine by enrolling in the Thermostat Recycling Corporation's (TRC) free and easy recycling program. After receiving collection containers from TRC, property managers and contractors can collect mercury thermostats and then send back the containers (when full or after one year) with an enclosed prepaid shipping form.

Staying compliant with the law is a good thing, but what's even better is that property managers, contractors, or property owners get a \$5 rebate for every recycled mercury thermostat. That's right, instead of paying the fine, TRC will pay you! It's a win-win situation. You get rewarded for doing the right thing, avoid the \$70,000 penalty, and the environment is protected by proper mercury disposal.

If interested, enroll in the program by visiting <https://www.thermostat-recycle.org/statelaws/california> or contact Ashley Jimenez at ajimenez@sgamarketing.com or at 562-597-0205 with any questions.

Methodology

TARGET AUDIENCE

This research was conducted among a professionally managed panel of consumers* ages 22 and older living in the state of California whose current primary housing was built prior to 1998. Respondents who rent/leased their home and were not a building manager, contractor, facility manager or HVAC technician or professional were terminated. Throughout the report, these respondents are referred to as California residents. The methodology is the same as Wave 1.

SAMPLE

A total of 600 respondents were interviewed for this study, which provided for a maximum margin of error of +/-4.0% at a 95% confidence interval. For more information on margin of error, please see the Appendix.

Among the 600, respondents lived in the following MSA: Chula Vista (25), Fresno (50), Stockton (50), Sacramento (50), San Bernardino (50), Los Angeles (75)—plus a mix of those living throughout the rest of the state of California (300).

*For more information regarding the panel of consumers, the panel company and survey process, please see the Appendix.

Executive Summary

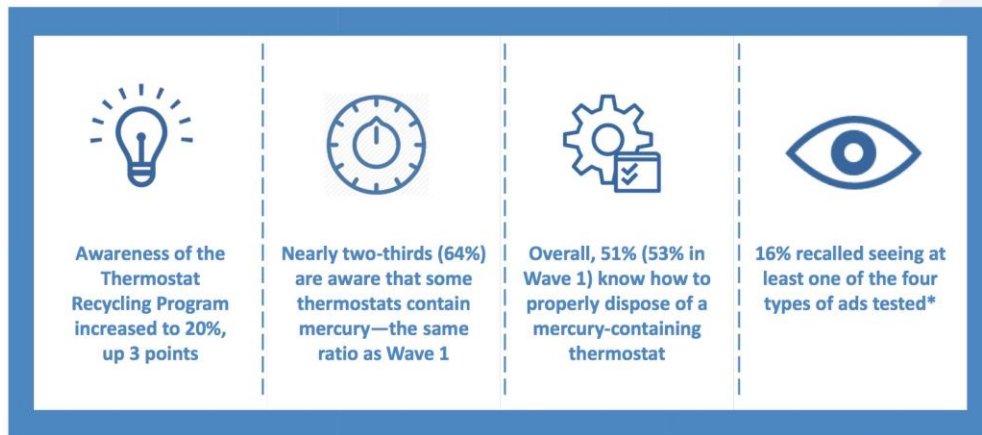

Project Overview

Mercury thermostats are banned from being installed and sold in the state of California and the Thermostat Recycling Corporation (TRC) has been charged with helping consumers recycle their old mercury thermostats. With a low rate of rebates, the TRC ran an advertising campaign in the summer of 2018 to increase awareness of the recycling programs available.

The purpose of this wave of research is to measure the impact the campaign had, comparing the post-campaign results to Wave 1 which was conducted in May 2018.

TRC POST-ADVERTISING KEY METRICS

*See Slide 34 to view the ads that were tested in this study.

6

Program Awareness Increases

- One in five (20%) California residents are aware that the Thermostat Recycling Corporation program exists, up three points from the 17% aware in Wave 1. Awareness among those in the targeted geographies increased three points, while awareness among those living throughout the rest of the state increased two points.
- The biggest increases in awareness came from males (+9 points), adults ages 35-54 (+9 points) and families with children at home (+13 points).
- Among those aware of the program, 57% said they have taken advantage of this program by dropping off a mercury-containing thermostat to a collection site, up three points from Wave 1.
- Two-thirds (64%) of California residents are aware that some thermostats contain mercury, the same ratio recorded in Wave 1. However, the ratio of those unsure if they have a mercury-containing thermostat dropped from 40% in Wave 1 to 36% in Wave 2.

7

Ads Deliver Incremental Awareness

- Nearly one-fifth (16%) recalled seeing or hearing at least one of the ads tested. California residents were slightly more likely to recall hearing the radio ad (13%) compared to the billboards, bus kings and digital video (all at 10%).
- Aided ad awareness* is slightly higher among those living in the targeted geographies (17%) compared to the rest of the state (15%).
- Those who saw at least one ad are far more likely to be male, younger adults under age 34 and have children at home. Those who made home upgrades and those aware that some thermostats contain mercury were also far more likely to have seen ads compared to their counterparts.
- The marketing campaign delivered incremental program awareness. That is, those who saw ads were significantly more likely to be aware of the program compared to those who did not recall seeing any ad (+46 points).

*Aided ad awareness is those who recall seeing an ad after viewing it in the survey.

To learn about the laws in your state or to find a collection site near you go to:

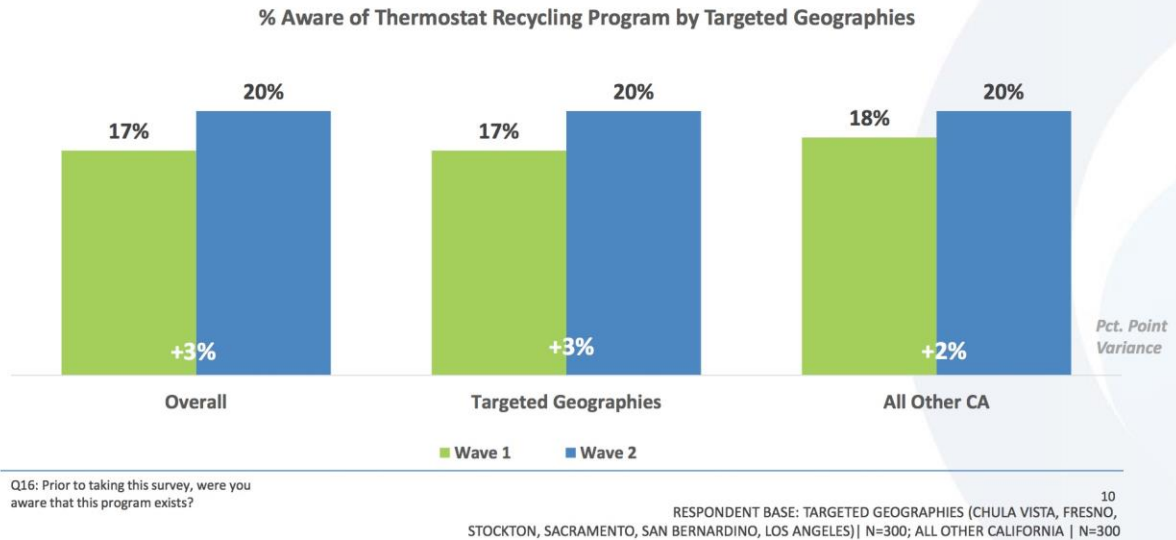

www.Thermostat-Recycle.org

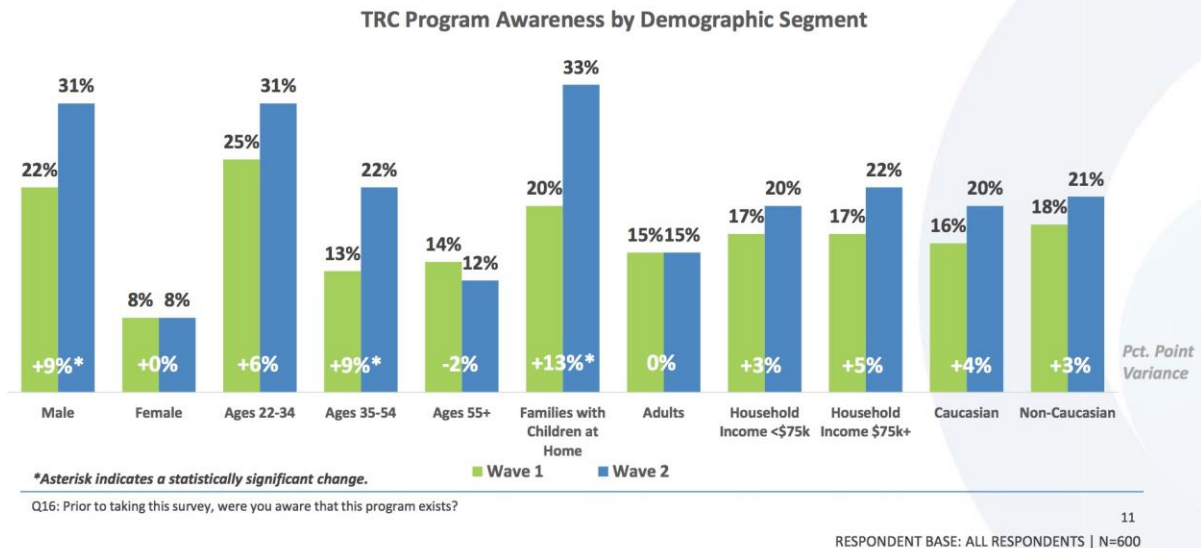

Program Awareness & Usage

01

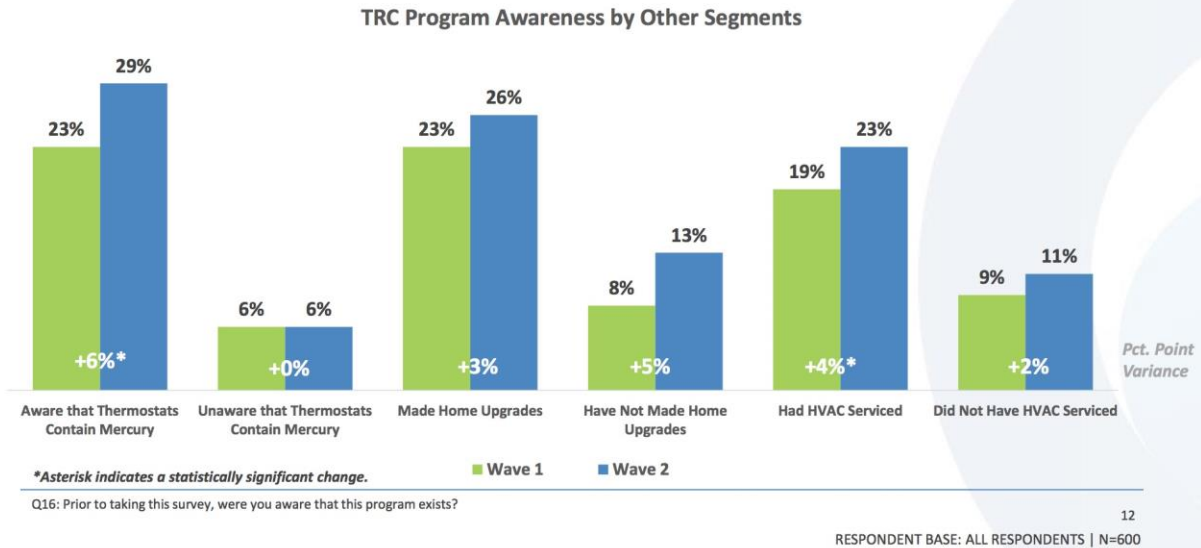

Awareness of the TRC Program increased three points overall compared to Wave 1.

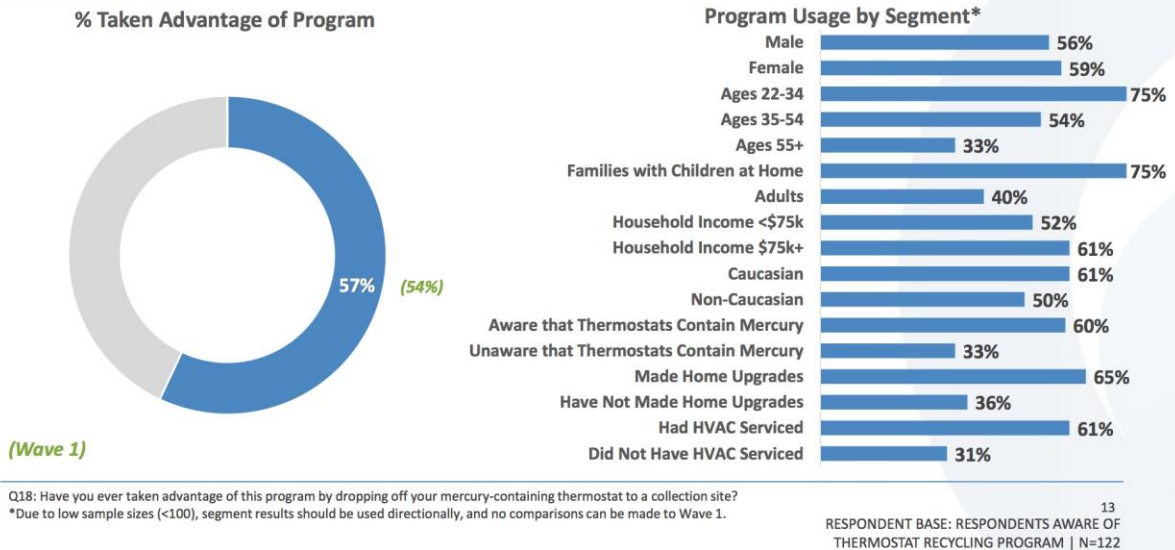

Males, adults ages 34-54 and families with children under age 18 at home each reported a significant increase in program awareness.

Most of the other segments also earned increased awareness compared to Wave 1 results.

Among those aware of the program, 57% have taken advantage of the program, with young adults and families being far more likely to have used the program.

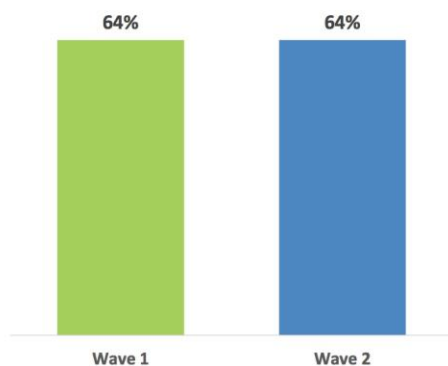

Mercury Awareness & Other Behavior

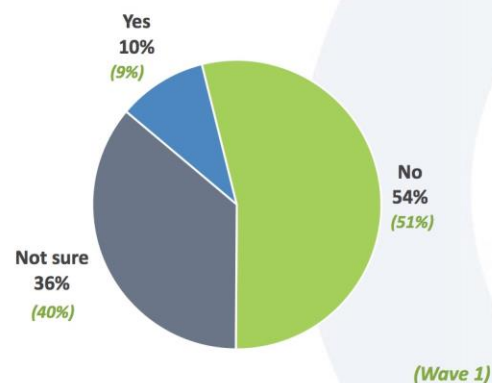

02

Awareness that some thermostats contain mercury stayed consistent with Wave 1 results, but those unsure if they have a mercury-containing thermostat decreased by four points.

% Aware that Some Thermostats Contain Mercury

Currently Have a Mercury-Containing Thermostat

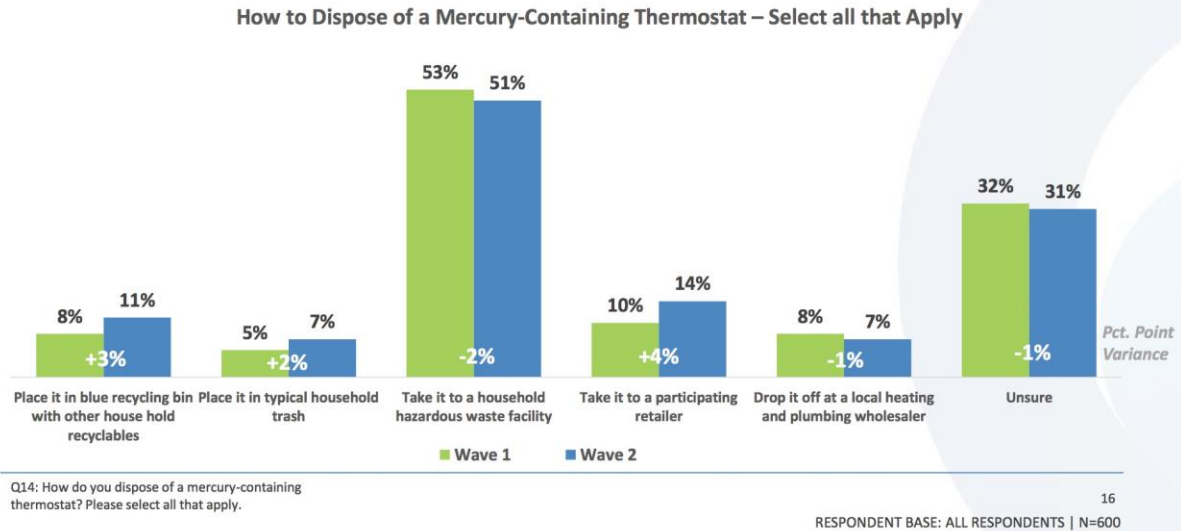

Q12: Are you aware that some thermostats contain mercury?
Q13: Do you currently have a mercury-containing thermostat in your home?

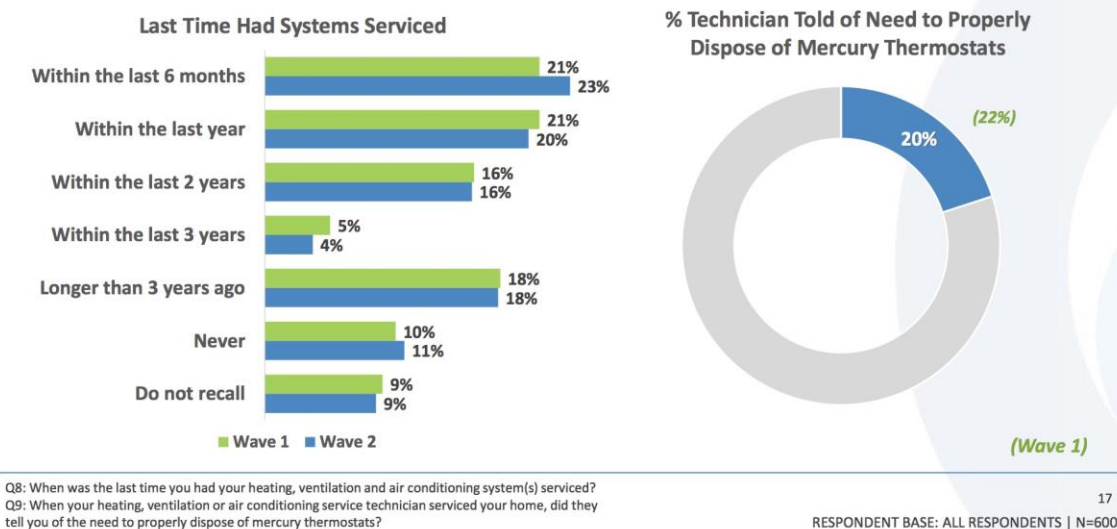

15
RESPONDENT BASE: ALL RESPONDENTS | N=600

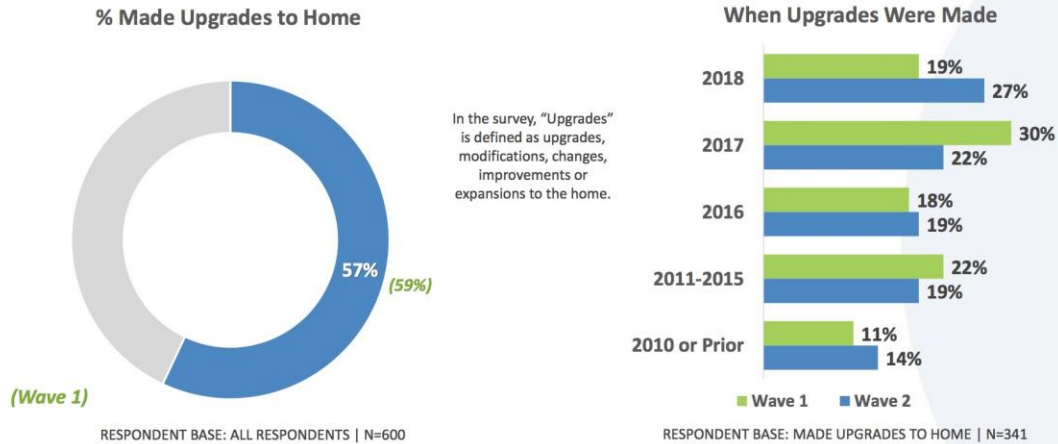

Once again, half of California residents believe they can dispose of a mercury-containing thermostat at a household hazardous waste facility.

Four in ten (43%) have had their heating, ventilation or A/C system serviced in the past year or more recently—similar to Wave 1.

Six in ten have made upgrades to their home, and half of those (48%) were made this year or last.

Q6: Have you recently made any upgrades, modifications, changes, improvements or expansions to your home?
Q7: If yes, when?

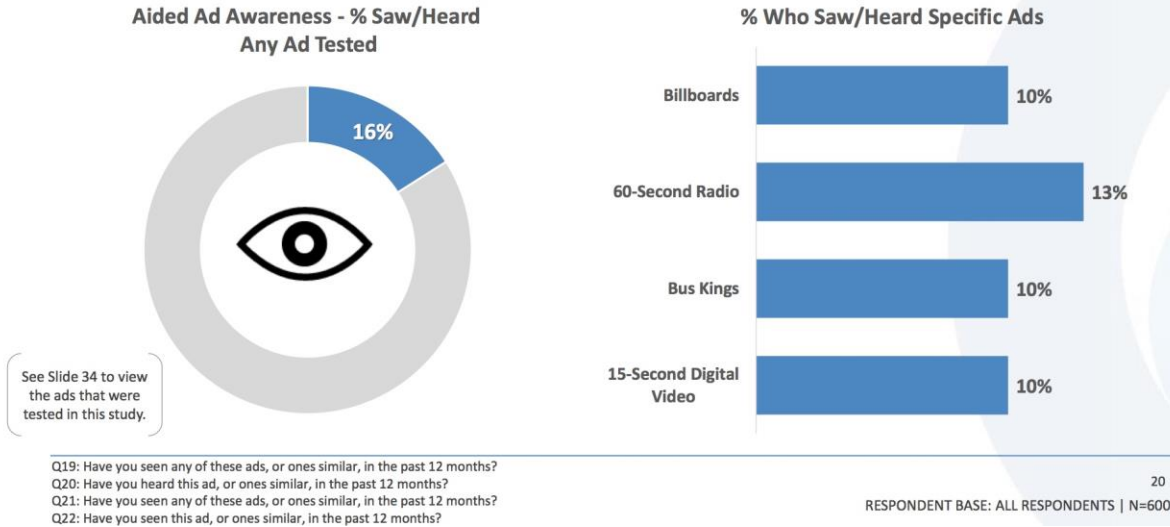

18

Advertising Awareness

03

**Overall, 16% recalled seeing or hearing at least one of the ads tested.
California residents were slightly more likely to recall hearing the radio ad.**

Aided ad awareness is slightly higher among those living in the targeted geographies compared to the rest of the state.

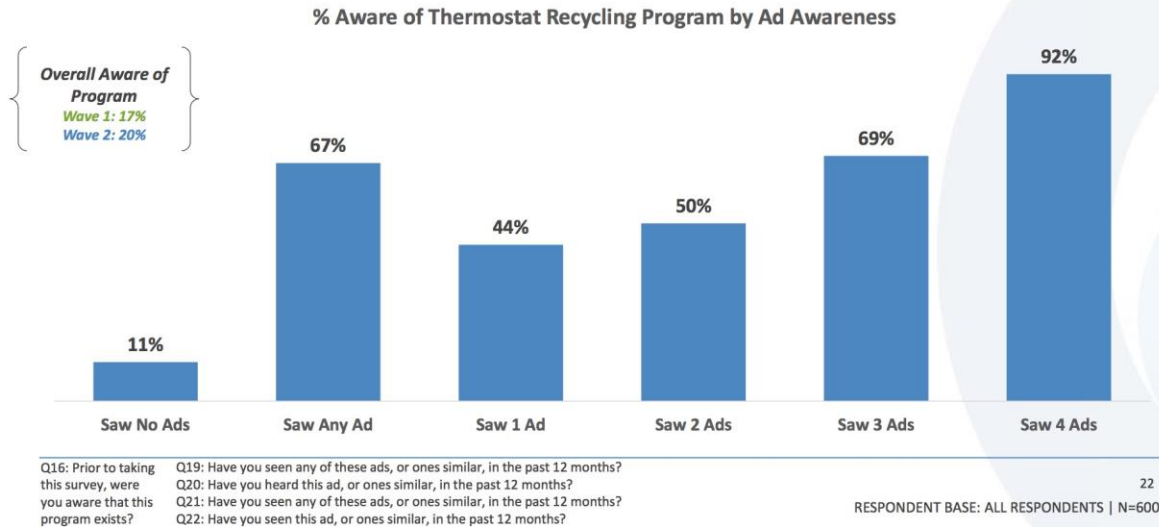

Aided Ad Awareness by Segment	Saw Any Ad	Saw Billboards	Heard 60-Second Radio	Saw Bus Kings	Saw 15-Second Digital Video
Overall	16%	10%	13%	10%	10%
Targeted Geographies	17%	10%	14%	11%	10%
All Other California	15%	10%	12%	9%	10%

Q19: Have you seen any of these ads, or ones similar, in the past 12 months?
Q20: Have you heard this ad, or ones similar, in the past 12 months?
Q21: Have you seen any of these ads, or ones similar, in the past 12 months?
Q22: Have you seen this ad, or ones similar, in the past 12 months?

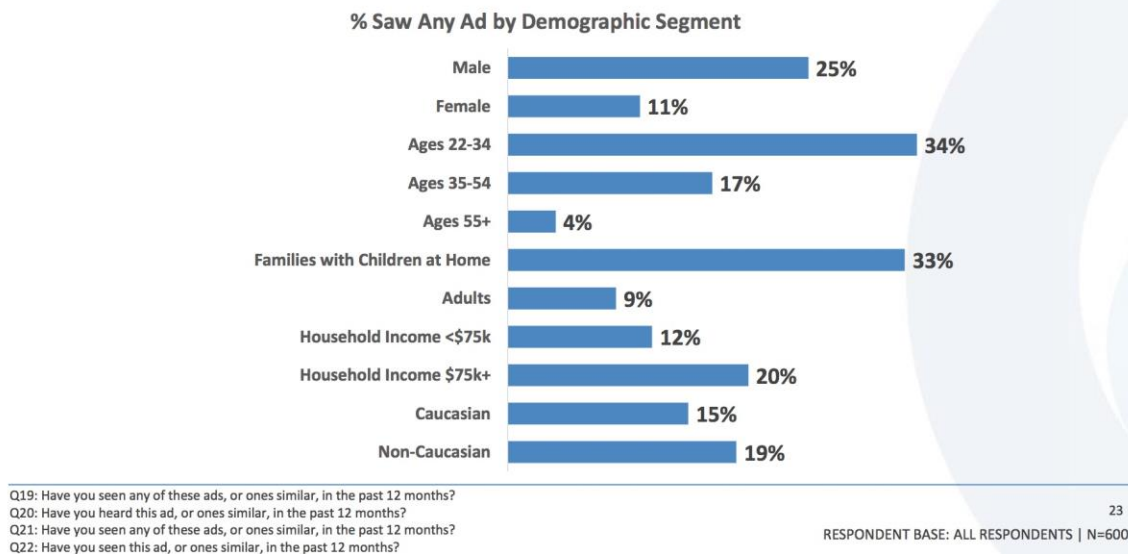

21
RESPONDENT BASE: ALL RESPONDENTS | N=600

Those who saw ads are significantly more likely to be aware of the Program compared to those who did not recall seeing any ads.

Those who saw at least one ad are far more likely to be male, younger adults under age 34 and have children at home.

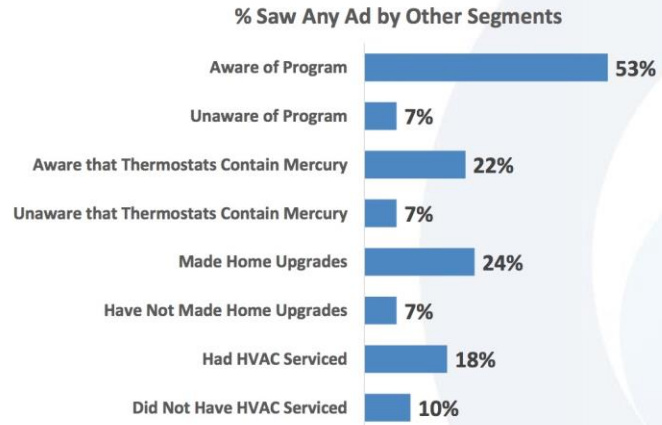

Prior exposure to mercury-containing thermostats yields higher aided ad awareness.

There appears to be a degree of “priming” which affected aided ad awareness among some California resident segments.

Priming is a simple phenomena in marketing that says exposure to something influences future behavior.

In this study’s case, those with some sort of prior exposure to mercury-containing thermostats—whether from home upgrades to HVAC servicing—are much more likely to recall seeing any of the ads tested.

Q19: Have you seen any of these ads, or ones similar, in the past 12 months?
 Q20: Have you heard this ad, or ones similar, in the past 12 months?
 Q21: Have you seen any of these ads, or ones similar, in the past 12 months?
 Q22: Have you seen this ad, or ones similar, in the past 12 months?

24
 RESPONDENT BASE: ALL RESPONDENTS | N=600

RESPONDENT BASE: ALL RESPONDENTS | N=600

Appendix

Description Used for TRC Program

Many older thermostats contain small amounts of mercury. In 1998, the heating, ventilation and air conditioning (HVAC) industry formed Thermostat Recycling Corporation (TRC), which is a non-profit that safely collects and properly disposes of these mercury-containing thermostats. TRC has collection programs throughout the county. TRC partners with retailers, utility companies, HVAC wholesalers, HVAC manufacturers and others to provide collection points where contractors, technicians, HVAC professionals and the general public can drop off mercury-containing thermostats and ensure that they are properly handled.

Q15: Please take a moment to review the following information about the Thermostat Recycling Corporation.
Q16: Prior to taking this survey, were you aware that this program exists?

33

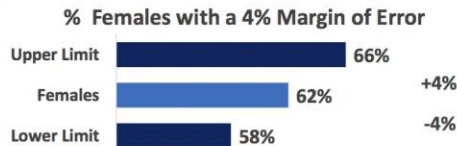

Margin of Error and Statistical Significance

- Since it is typically impossible to survey every person in a target market, a sample of the market is interviewed. **Margin of Error** refers to a range that the reported number is estimated to fall between, had you interviewed every person. It is calculated based on the sample size and confidence interval. For example:

$$\sqrt{\frac{0.9604 \text{ (for 95\% Confidence Interval)}}{600 \text{ (Sample Size)}}} = +/-4\%$$

- The range is calculated by adding and subtracting the margin of error percentage to the percentage of people who answered the question:

- At a 95% confidence interval, the margin of error range will include the "true" value 95% of the time (the value you would get by surveying the entire population). A variance in scores is statistically significant when the difference between the two is greater than the margin of error.

Why Online Research

- There are many reasons why H2R recommended online surveys as opposed to telephone or intercept studies. The benefits to online surveying include increased sample sizes and the ability to implement longer surveys; as well as a decrease in halo effect and decreases in target bias and time bias. Online surveys allow respondents to answer on their own time and allows residents from all over the state to respond at a fraction of the cost.
- H2R is very specific in where we find survey respondents. For this study and in Wave 1, we used our trusted provider Research Now/SSI, a professionally managed online market research panel. Online market research panels provide more than just access to people who take surveys. Panels are about building a large, reliable, trusted and engaged group of people who will share their opinions with you and allow you to mine information about them and their habits to improve your decision making.
- In the past decade, online quantitative research using a professionally managed panel has become the industry standard because it is more effective (time, cost, accuracy, etc.) than traditional in person or phone interviews.
- **It is important to note that the Post-Advertising Phase was conducted using the exact same methodology as the Pre-Advertising Phase. This methodology ensures an apples-to-apples comparison between reports.**

36

About Research Now/SSI

- With over 11 million panelists in more than 40 countries, Research Now/SSI is the leading global provider of the world's largest and most diversely-represented global panel in the industry. Since 1999, the company has invested in their panel members to ensure highly-engaged respondents and provide clients like TRC with the highest-quality research sample in the industry.
- Through rigorous quality checks, Research Now/SSI ensures respondents are representative of the population being sampled from. The company has proven high-quality panel enrollment through unique recruitment methodologies with ongoing verification checks to prevent fraud and bias and has an industry-leading incentive model for panel members and continuous profile monitoring ensures highly-engaged respondents and the ability to collect more desirable data.
- To learn more, visit www.ResearchNow.com.

37

Survey Invitation, Screeners & Questionnaire

- For this project, Research Now/SSI sent a generic survey invitation to panel respondents living throughout the state of California (both in the targeted markets and non-targeted markets). Respondents did not know what the survey was about prior to taking it.
- Once choosing to click on the link to take the survey, respondents were screened based on their geography, age (22+), home ownership and primary occupation. Among those respondents who qualified (made it past the survey screeners), the quantitative survey took respondents less than 10 minutes to complete.
- H2R pre-tests all quantitative studies using a live sampling from the respective target market prior to launching each project among the full target audience. This step ensures that all information is being collected and recorded as intended.
