LETTER FROM THE EXECUTIVE DIRECTOR

2020 has been a very difficult year for many in our country. The COVID-19 pandemic and its impact on all aspects of our personal and professional lives is hard to calculate. As we reflect on the accomplishments that were achieved in 2020, we must also understand that the pandemic's effects will continue to be felt well into 2021 as well. However, despite the difficulties experienced during this most unusual year it is important to consider how much activity TRC was able to execute in the last year. The program continued to work in new and interesting ways to keep collecting mercury-containing thermostats and recycling every mercury thermostat every time.

While overall 2020 collections are down, data shows that the replacement of HVACR equipment continues to be the leading indicator to mercury thermostat replacement. The accelerated adoption of "smart-home" controls and the array of utility programs which encourage early thermostat replacements continue to be major drivers of collections. Looking ahead, TRC anticipates that the program will experience a rebound in 2021 collections as site visits can be utilized in a greater capacity to encourage the return of mercury containing thermostats. However, it is important to remember that TRC collects and recycles a product that has not been sold in the marketplace since 2007; and as there is a decreasing number of mercury-containing thermostats in use, our collections will continue to decline.

TRC was able to fulfill state statutory requirements, agreements and other arrangements for regulatory and legislative compliance, despite the strain our country experienced in 2020. In 2021, TRC will continue to target mercury thermostat collections with utility energy efficiency programs while simultaneously maintaining the HVAC industry collections. TRC plans to work with its partners in industry, the waste sector, the energy sector and the regulatory community to achieve positive results.

The message around the importance of the proper disposal of mercury-containing devices is really a familiar message. As with any recycling program, our goal is to maintain awareness of the issue without becoming background noise lost in the constant stream of marketing information broadcast

each day. One exciting change coming to TRC in 2021 will be a redesigned website, built to better target individual recyclers and homeowners as well as expanded mobility functions.

For a program such as TRC's to be successful year after year, the coordinated effort of many parties is required. TRC is fortunate to have exceptional support from its industry members, collection partners, marketers, allied industries, regulatory agencies and staff. These strategic partnerships allow TRC's effectiveness to grow as it continues to move forward successfully in the collection and proper disposal of mercury-containing thermostats.

We are happy to provide you with this year's annual report. Please do not hesitate to contact us with comments or questions.

Executive Director

NEW YORK

2020 Collections and Evaluation

The following analytical report details the annual program performance for mercury thermostat collection in the state of New York in 2020. It is important to note that collections were most likely affected by the pandemic, whether it be fewer in-home replacements, a delay of dropping thermostats off for recycling or collection locations returning less recycling containers due to limited personnel. A few of the program highlights for 2020 are included below:

- In 2020 the program **collected 30.3 lbs. of mercury** in New York. Since 2000, the annual quantity of mercury collected in New York has averaged 34.2 lbs.
- The program collected **3,384 whole thermostats in 2020**. This was a 32% decrease over the number of thermostats collected in 2019. Since 2000, the average thermostat count per year is 3,557.
- The **number of whole thermostats collected per bin in 2020 was 30 thermostats**, a decrease from 31 in 2019.
- The counties with the most bins and thermostats returned in 2020 were **Monroe County (10 bins, 509 thermostats)**, **Queens County (4 bins, 427 thermostats)**, and **Onondaga County (10 bins, 326 thermostats)**.
- In 2020, **69% of the partner locations returned at least one bin**.
- **A total of 308 'Miss You' calls were placed and 181 site visits were conducted in 2020** which resulted in a positive relationship of activity to bin returns.
- In addition to 3,384 whole thermostats, **814 loose switches were collected, bringing the total number of "thermostat equivalents" returned in 2020 to 4,061**, a decrease of 19% from 2019.

Section 1: Program Analytics

Section 1 of this report examines the annual performance of the thermostat collection recycling program in terms of bins, thermostats, and mercury collected as well as the year-over-year progression of the program. On average, the program has collected 34.2 lbs. of mercury and 3,557 whole thermostats per year since 2000. In 2020, the program collected 30.3 lbs. of mercury from 3,384 thermostats and 814 loose switches. Figure 1 below displays the total number of bins, the total number of thermostats, and the quantity of mercury collected in New York since the beginning of the program.

Figure 1 - Program Performance Over Time

Year	Number Bins	Number Thermostats	Mercury (Lb)
2000	5	468	7.9
2001	22	1,334	15.7
2002	21	1,145	10.4
2003	32	1,829	16.2
2004	35	2,473	21.0
2005	32	2,211	20.6
2006	53	3,915	34.1
2007	34	2,396	21.0
2008	52	3,774	31.5
2009	44	3,306	28.0
2010	57	3,871	37.8
2011	47	3,422	31.9
2012	49	3,473	29.2
2013	38	2,297	22.4
2014	78	4,786	40.1
2015	201	6,466	83.8
2016	165	5,857	59.8
2017	204	7,703	84.9
2018	191	5,619	51.8
2019	160	4,963	39.2
2020	114	3,384	30.3
Total	1,634	74,692	717.6
Average	78	3,557	34.2

Figure 2 displays the number of bins collected in New York since the initiation of the collection program, as well as the total number of bins collected in the U.S. over the same period. The number of bins collected in New York has generally increased from 2000 to 2010. In 2014, bin returns increased again, peaking with the highest number of bins returned in 2017 with 204 bins. In 2020, the number of bins returned was 114 bins.

The 30.3 lbs. of mercury collected in New York in 2020 was 23% lower than the 39.2 lbs. collected in 2019. Figure 3 displays the quantity of mercury collected in New York over time as well as the annual percent change in New York and nationally.

Figure 3 - Quantity (Lb) of Mercury Collected in Program and Annual Changes to New York and Nationally

Year	Mercury (Lb)	% Change New York	% Change Nationally
2000	7.9		-81%
2001	15.7	100%	89%
2002	10.4	-34%	14%
2003	16.2	56%	11%
2004	21.0	29%	17%
2005	20.6	-2%	11%
2006	34.1	65%	32%
2007	21.0	-39%	2%
2008	31.5	50%	16%
2009	28.0	-11%	16%
2010	37.8	35%	26%
2011	31.9	-16%	4%
2012	29.2	-8%	-5%
2013	22.4	-24%	-5%
2014	40.1	79%	13%
2015	83.8	109%	-1%
2016	59.8	-29%	-15%
2017	84.9	42%	-7%
2018	51.8	-39%	-42%
2019	39.2	-24%	5%
2020	30.3	-23%	-71%
Average	34.2		

New York collected 3,384 thermostats in 2020. This was a 32% decrease over the number of thermostats collected in 2019. Figure 4 displays the total number of thermostats collected in New York and nationally, and Figure 5 shares the underlying data as well as the calculated annual percent change.

Figure 5 - Whole Thermostats Collected in New York and Nationally Over Time and Annual Percent Change

Year	Number Thermostats New York	% Change New York	% Change Nationally
2000	468		
2001	1,334	185%	63%
2002	1,145	-14%	27%
2003	1,829	60%	7%
2004	2,473	35%	23%
2005	2,211	-11%	8%
2006	3,915	77%	30%
2007	2,396	-39%	0%
2008	3,774	58%	19%
2009	3,306	-12%	15%
2010	3,871	17%	28%
2011	3,422	-12%	0%
2012	3,473	1%	-5%
2013	2,297	-34%	-4%
2014	4,786	108%	12%
2015	6,466	35%	-2%
2016	5,857	-9%	-18%
2017	7,703	32%	-3%
2018	5,619	-27%	-11%
2019	4,963	-12%	-5%
2020	3,384	-32%	-36%
Average	3,557		

Figure 6 displays the monthly distribution of bins and thermostats collected in New York in 2020. The months with the greatest number of thermostats returned were June (461 thermostats, 20 bins), and August (780 thermostats, 26 bins). The months with the greatest number of bins returned were also June (20 bins), and August (26 bins). Conversely, the months with the least activity in 2020 were July and December.

The highest number of thermostats per bin returned occurred in January and April (58 and 65 thermostats per bin each month, respectively). Figure 7 shows the average number of thermostats per bin returned per month for the year.

Figure 8 displays the average number of thermostats returned per bin in New York and in the U.S. since the beginning of the New York program. Nationally, the number of thermostats per bin has been decreasing annually since 2000. In New York a similar pattern is observed after 2009, with the exception of a few years. The number of thermostats per bin in 2020 (30 thermostats per bin avg.) decreased from 2019 (31 thermostats per bin avg.).

Figure 9 plots the total bins returned over time along with the average number of thermostats per bin over the same period. In general, the number of bins returned in New York increased steadily from 2000 to 2017, and since has seen a slight drop. At the same time, thermostats per bin remained consistent until 2012, after which the trend in thermostats per bin dropped. A negative correlation has been identified between the number of bins returned since 2009 and the number of thermostats per bin.

SECTION 2: Channel Partner Analysis

Section 2 of the report examines the partner locations in more detail. Most thermostats collected in New York were through wholesalers (61.3%) with the majority of remaining thermostats collected by contractors (31.5%) and HHWs (6.8%). Figure 10 shows the distribution of thermostats collected by location type in 2020.

The number of bins returned in 2020 decreased across wholesalers compared to 2019. Figure 11 displays the change in the number of bins returned by thermostat collection type over time in New York.

In 2020, 21% of New York locations possessing a collection bin sent back at least one bin for recycling. The distribution is displayed in Figure 12.

Figure 13 displays the total bins and thermostats returned by county in 2020. An analysis of the top performing counties revealed that Monroe County (10 bins, 509 thermostats), Queens County (4 bins, 427 thermostats), and Onondaga County (10 bins, 326 thermostats) returned the greatest number of bins and thermostats in 2020.

Figure 13 - Bins Returned and Total Thermostats Returned 2020 by County

	Number Thermostats	Number Bins
Monroe	509	10
Queens	427	4

TRC partner R. E. Michel Co. (544 thermostats) returned the highest number of thermostats in New York in 2020, followed by Irr Supply (430 thermostats) and Johnstone Supply (379 thermostats). Apart from these locations, 3 program partners returned more than 100 thermostats each. Figure 14 displays the top performers in terms of total thermostats returned in 2020.

Figure 15 includes the top performers for 2020 by each of the following categories: total bins returned, total thermostats returned, and average number of thermostats per bin.

Figure 15 - Top 10 Performing Partners by Total Bins, Total Thermostats, and Average Thermostats per Bin

	Number Thermostats	Number Bins	Average Thermostats per Bin
R. E. Michel Co.	544	11	49
Irr Supply	430	14	31
Johnstone Supply	379	5	76

Charles Heating & Air	123	1	123
Crossfield Htg. & A/C	95	1	95
F.W. Webb	93	2	47
Broome County Dswm	82	1	82
Sid Harvey	81	6	14

TRC conducted several activities in 2020 to increase the number of bins and thermostats returned in New York. These activities included site visits and 'miss you' calls to collection locations that may not have returned a bin recently. In 2020, 181 site visits were conducted in New York, and a total of 308 'miss you' calls were placed. Figure 16 displays the relationship between the number of site visits per month, the bins returned per month, and the number of thermostats (in 100's) returned per month. In 2020, there was a positive correlation between activities performed and the number of bins returned.

Figure 17 displays the relationship between the number of calls per month, the bins returned per month and the number of thermostats (by 100's) returned per month. Calls were placed in the months of February, September and November.

SECTION 3: Comparisons to National and Other States' Data

To compare how the New York collection partners performed in 2020, the national average for the number of bins returned per location that returned at least one bin was calculated and compared to the New York average since 2012. The average number of bins does not include locations that did not return any bins in that year. It should be noted that when making comparisons each state has different regulations, a different mix of housing types, local policies, and incentives that may have a unique impact on returns. Overall, the average number of bins returned per location per year was lower in New York than the U.S. average, as shown in Figure 19.

Figure 19 - Average Number of Bins Returned Per Location Per Year

Figure 20 displays the locations in New York that returned more than one bin in a given year since 2017, and Figure 21 displays the top 10 partners in the U.S. over the same period in terms of the number of bins returned.

Figure 22 displays total percentage of locations that actively participated in the program (active participation defined as sending back at least one bin) in 2020, for all the states that mandate thermostat returns reporting as well as the U.S. national average for all states (reporting and non-reporting). In 2020, 69% of the locations in New York returned at least one bin compared to a national average of 77%. The highest percentage of locations returning a bin in 2020 among states that mandate thermostat returns reporting was New Hampshire (82%).

Figure 23 compares the New York and national rates for several analytics. These include: total whole thermostats, bins, and loose switches collected, number of thermostats collected by total locations and per actively participating locations, number of thermostats per bin returned on average, equivalent average, number of mercury thermostat equivalents returned in 2020, and finally percent change in mercury thermostat conversion from 2019 to 2020. The equivalent average is an average of the number of switches in whole thermostats collected in New York, and it is used to represent an equivalent number of thermostats from returned loose switches. The thermostat equivalent number includes the totals of whole thermostats returned plus the number of thermostats estimated from loose switches. The states displayed are those that mandate thermostat returns reporting and the U.S. average is for all states that return bins (reporting and non-reporting).

Figure 23: Comparison of States and US Average Among Several Categories

State	Whole Thermostats	Bins	Loose Switches	Thermostats returned per total # of locations with bin	Average thermostats per bin	Avg thermostats collected per location that returned at least one bin in 2020	Equivalent Average	Thermostat equivalents in 2020	% change over previous year

2020 Collections by Brand

In New York, Thermostat Recycling Corporation (TRC) recovered the equivalent of 4,061 mercury thermostats from 3,384 whole mercury thermostats plus 814 mercury switches removed from thermostats. A total of 30.3 pounds of mercury was diverted from solid waste. *Please note the explanation of the converted thermostats or thermostat equivalents below.¹ An example of the mercury ampoule is shown below.

As required by the state statute, a table of thermostat brand holders with their corresponding thermostats, the number of switches and the pounds of mercury recycled is below. It is important to note that there remain non-members whose thermostats the TRC collection program recycles. They are listed in the table as “Non-Member Brands”.

¹ A mercury thermostat contains a variable amount of mercury ampoules or “switches” attached to the subbase of the thermostat. These glass ampoules often are collected in the recycling container without the intact thermostat attached to them. TRC collects and counts these loose ampoules and recycles them. To derive the converted thermostat or thermostat equivalent, the program takes the following calculations to develop the converted thermostat or thermostat equivalent. First, TRC will count the total whole (intact) thermostats collected in the recycling bins. From these units, there is an intact ampoules count. TRC then takes the intact ampoules divided by the whole (intact) thermostats or otherwise known as the conversion ratio. After the conversion ratio is calculated, TRC will multiply the loose mercury switches by the conversion ratio. Lastly, we add this result to the whole (intact) thermostats to produce the converted thermostats or thermostat equivalents.

2020 Summary of the Program Expenses

Below is a summary of program expenses for the New York collection program in 2020. 2020 program expenses (reported in the annual report) are unaudited and are for management purposes only. Prior to submittal of this annual report, the expenses were reviewed by Kellen Company.

Program Component	2019	2020	Difference
Direct Expense for Marketing & Outreach	\$ 25,302.93	\$ 25,430.00	\$ 127.07
Incentive/Promotional Payments	\$ -		\$ -
Legal	\$ 38,750.00	\$ 8,291.93	\$ (30,458.07)
New Collection Containers	\$ -		\$ -
Recycling Costs	\$ 21,336.06	\$ 14,407.49	\$ (6,928.57)
Travel	\$ 1,728.21	\$ 35.00	\$ (1,693.21)
TRC Staff & Administration	\$ 17,576.34	\$ 1,610.82	\$ (15,965.52)
Total Expenses	\$ 104,693.54	\$ 49,775.24	\$ (54,918.30)

2020 Education and Outreach

Direct Marketing (Email, Mail, Other Communications)

Current Collection Locations

Small Pails and Green Bins

In 2020, TRC shipped 25 small pails to collection points around the country. We also shipped 159 new green bins. In comparison, the program shipped 291 new green bins in 2019 and 55 small pails². Collection locations either requested the new pail when they signed up to participate in the program or chose to switch out their bin with a pail due to decreased collections. The large green bins which have been the staple of the program continued to be replenished as they were returned for processing. Because the containers are reused and bar coded, we anticipate that the request for new containers will continue to decrease as the program operates.

- Of the totals provided, TRC shipped one new small pail and six new large bins in the state.

Collection Location Outbound Phone Calls

Our outbound phone calls have been branded internally as the “Miss You Call” process. These calls promote collection container returns and serve as a reminder to locations that have not returned any thermostats. TRC allocates these “miss you calls” to collection sites that have not returned a container in over a year. These calls serve as a friendly customer service check to see if any of the program materials need to be replenished or if missing containers need to be replaced. In total, the program called 4,175 current collection locations in 2020, compared to 3,557 in 2019.

- Completed 308 calls to encourage shipping the recycling container compared to 263 a year prior. A copy of the locations called can be found in the Appendix.

Collection Location Postcards

TRC updated the reminder postcard design mid-2019 to encourage locations to heed the message. The postcards are sent to all locations that have not returned a container in the past year. In 2020,

² New bin orders coincide with accounts that open new stores, move or lose their existing containers.

TRC mailed 12,963 postcards. By updating the look of these postcards, TRC hoped to engage locations that were familiar with the old design and may have disregarded it in the past.

- Mailed 1,085 reminder postcards compared to 984 a year prior.

Collection Location Emails

TRC emailed locations three weeks after receiving a postcard to encourage them to directly ship the recycling container. These emails contain step-by-step instructions for shipping and direct contact information for missing shipping labels or further questions.

- Emailed 455 collection locations three weeks after receiving the reminder postcard to ship their container.

Collection Location Site Visits

Throughout the year, 1,781 site visits were completed in numerous states. The purpose of site visits is to inform the location of their requirements in participation, what the statute requires of them, shipment of the recycling container, and to answer any questions they may have. Often, valuable information is gathered during the site visit which is used to enhance TRC's outreach and update the database with current contact details. With the pandemic, TRC refrained from visiting locations in-person for a few months. For locations scheduled to receive a visit between March and August we "virtually visited" those locations via phone or meeting, rather than cancelling the visit altogether.

- Visited 181 collection locations compared to 120 in 2019. A copy of the sites visited can be found in the Appendix.

HVAC Industry

The HVAC industry is arguably still the best, most productive and most engaged channel for recycling mercury containing thermostats. We consider this industry to be the manufacturers, wholesale distributors, and contractors which are intimately involved with the recovery of mercury thermostats.

TRC took the following actions:

- TRC was spotlighted in HVAC Refrigeration Daily, a print magazine distributed at the International Air-Conditioning, Heating, Refrigerating Expo.
- Continued the “Banish Mercury Off the Planet” (BMOP) Competition encouraging all HARDI wholesalers to compete through collections. Included direct marketing to 2,714 HARDI HVAC members.
 - The annual competition recovered 222.95 pounds of mercury from 166 HVAC wholesalers. More than 350 branch locations returned collection bins during the contest period.

- TRC appeared on radio shows to promote the program and National Recycle Your Mercury Thermostat Day. Both Hammertime Radio in Buffalo, NY and The Future of Real Estate in Tulsa, OK featured TRC and our mission in October of 2020.
- TRC was featured on Season 2, episode 43 of the HVAC Jerks Podcast titled “Mercury in the Green Box, Please”. The episode focused on TRC’s history, program and what the future holds.

Utility Industry

In 2020, TRC continued its approach to engage the utility sector, specifically targeting actions toward the utility companies themselves and the installer/implementer. Each of these audiences have distinct messaging requirements and informational needs.

- Exhibited at two conferences targeting the utility industry before the pandemic halted in-person events.

- Sent 424 informational emails to known utility implementers on the program.

Waste Related Sector and Household Hazardous Waste (HHW) Industry

The waste-related sector remains an important sector for TRC to target individuals and those residents performing DIY thermostat installations. These attempts were to gain new collection locations, form better relationships with the audience and raise overall awareness of the TRC program. As a result of these learnings, TRC took the following actions:

- Scoured google alerts for HHW events to target phone call or email outreach to encourage them to use program. Sent 16 emails to facilities, offering a free container.
- Advertised in the national North American Hazardous Materials Management Association (NAHMMA) News Brief, reallocating funds planned for the conference.

PRODUCT SHOWCASE

Recycle Mercury Thermostats for Free

Thermostat Recycling Corporation (TRC) is a non-profit stewardship organization that manages the collection and proper disposal of mercury-containing thermostats. We accept all brands of wall-mount mercury thermostats and assume all recurring shipping and processing costs for the thermostats collected through the program. Sign up for a recycling container at www.thermostat-recycle.org/signup.

[LEARN MORE](#)

Advertising and Awareness

Website

In 2020, TRC updated the zip code locator on the website to provide information regarding pandemic protocols. While most collection locations remained open, certain operations were most likely adjusted to accommodate for social distancing. Therefore, we recommended all recyclers should contact the collection location beforehand.

In the fall of 2020, TRC began a website redesign project that will enhance mobile accessibility and better navigation for website users. TRC expects to launch the updated website in the spring of 2021.

Google Ads

TRC invested in a Google Ads campaign in New York from January 1 – May 15 of 2020. The results are detailed below.

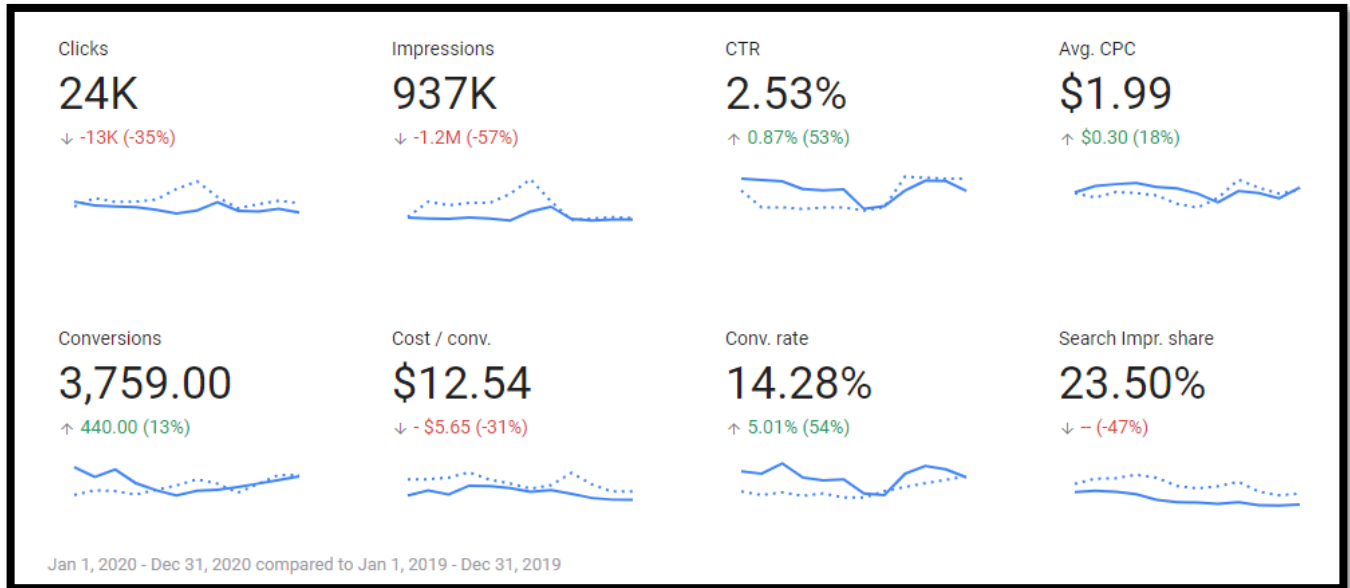

Search Engine Marketing (SEM)

Search Engine Marketing (also SEM or pay per click—PPC) is the process of buying a paid position on the search engine results page. TRC refined its strategy for SEM in 2020 with very promising results.

Impressions and clicks went down when compared to 2019, but the overall click-through-rate went up, which means a higher percentage of people are engaging with TRC's ads and that TRC is reaching the right audience.

The focus for TRC's SEM strategy is conversions, which are counted when someone navigates to the Find a Thermostat Collection Site page on the TRC website. In this area, there was very positive improvement for 2020 in the number of conversions, the cost per conversion, and the conversion rate.

In summary, overall, more qualified leads came to the TRC website in 2020.

Search Engine Optimization (SEO)

Search Engine Optimization (SEO) is the process whereby a website is optimized through original content and on-site coding tactics to increase its chances of appearing near the top of “organic searches.” An organic search is one that appears “naturally” in a search engine like Google or Bing. In other words, an organic listing is not ranked through paid search.

Organic traffic to a website typically brings visitors who stay longer, and visit more pages, on average.

Two key measures were identified as a baseline for growth. They are:

- Clicks from organic search
- Page-one organic terms

In 2020, organic search traffic yielded 7,460 clicks to the TRC website. By comparison, there were 6,427 clicks from organic search over the same time period in 2019.

In 2020 TRC had 298 organic search terms ranked on page one of a Google search, a small decrease compared to 334 page-one keywords in 2019. As TRC goes through a website redesign in Q1 of 2021, SEO is being refreshed for enhanced performance moving forward.

This data was provided by *Google Analytics Reporting*.

2021 Program Modifications

Thermostat Recycling Corporation's 2021 Goals

TRC continues to set high-level annual goals for the organization. These goals assist in decision making and prioritization of activities. For the calendar year 2021, TRC plans to focus on:

- Continuing to fulfill state statutory requirements, agreements and other arrangements for regulatory compliance.
- Targeting mercury thermostat collections from utility programs. Maintain the HVAC industry collections. Other key audiences vary by state and requirements.
- Focusing on education and awareness tactics geared toward homeowners and HVAC industry professionals.

Thermostat Recycling Corporation's Planned Tasks

In addition to the above goals, TRC set specific tasks which we plan to focus on. Completion of these tasks aid in the overall organization's goals.

- Attend and integrate learnings from other EPR products after the biannual Product Stewardship in-person meetings.
- Roll-out public releases throughout the year.
- Continue the program's operational activities such as outbound phone calls, mailing reminder postcards, and visiting sites. Use collection data trends to target these initiatives.
- Attend trade shows and conferences³. Look for speaking opportunities at attended events.
- Review Google AdWords funding and reallocate funds to other platforms where it makes sense.
- Launch redesigned TRC website in Spring 2021.

³ Due to COVID-19, many tradeshow have continued to be postponed or cancelled. When events can resume in-person, TRC plans to take part and in the meantime attends virtually if applicable.

2020 Collection Location Bin Receipt

HOW MERCURY THERMOSTAT WASTE IS HANDLED

WASTE MERCURY-ADDED THERMOSTAT MANAGEMENT THROUGH VEOLIA ES TECHNICAL SOLUTIONS, LLC.

TRC containers with waste mercury-switch thermostats are received at a fulfillment/inventory center in Port Washington, Wisconsin (WIR000130591). The facility is owned and operated by Veolia ES Technical Solutions, L.L.C. (Veolia) under contract with TRC.

All recycling containers, including pails and bins are received at the loading dock and sent to the TRC inventory room. The container and plastic liner are opened and the contents are identified, sorted, and tallied. The following data is recorded for each bin returned and processed: bin number, business name (location name), city, state, zip code, date returned, number of thermostats and mercury switches by manufacturer and any non-conforming material.

The containers are returned to the location that sent it in with a new prepaid address label within 3 weeks of receipt. The thermostats are stored and staged in a plastic lined carton in a storage area for final processing. The containers are dated and processed in order received, first in-first out.

The thermostats and any loose bulbs collected from the containers are consolidated into a special 55-gallon drum which is labeled and dated according to regulations. The drum is sealed with a band and is only opened when contents are being added to it. Special negative pressure venting assures any fumes are captured and vented when the drum is opened.

The 55-gallon drum is then shipped to Veolia's mercury recovery facility (WID988566543) for final processing of the mercury ampules (switches). Veolia Environmental Services meets or exceeds all local, state, federal and EPA regulations for the management of the product.

The containers are returned from the storage area to the mercury recovery processing area to have the mercury bulbs removed from the plastic housing. Universal Waste Regulations require the recycling and disposal of waste within 12 months of acceptance at the processing facility.

Small quantities of thermostats are removed from the container, which is then closed again. The bulbs are removed from the thermostats and placed into processing vessel at the work station. Once the processing vessel is full, the vessel is loaded into the mercury recovery retort oven.

If a bulb breaks and the mercury spills, the work area is designed to contain the spillage and the operators are trained in the clean-up and disposal of mercury. The TRC inventory

and processing areas are equipped with special mercury vacuum cleaners and the work area is vacuumed at the end of the work day to ensure that any spillage is cleaned up and not left to evaporate.

Veolia meets or exceeds all local, state, federal and EPA regulations for the management of the product. The mercury recovery facility and process are permitted by the Wisconsin Department of Natural Resources. Veolia's approvals for mercury recovery/recycling include:

- EPA - identification WID988566543
- Hazardous Waste Storage License #6008
- Hazardous Waste Treatment License (Mercury Recovery Operations) #4585
- Air Operation Permit #246076050-S01
- Storm Water General Permit #WI-S067857-4

In addition to the regulatory permits, both Veolia Port Washington facilities have developed and maintain management systems in accordance with ISO 14001-2004, OHSAS 18001-2007, and Responsible Recycling (R2:2013) Practice. All persons who handle mercury thermostats as part of the TRC operation receive training in the handling of Hazardous Waste and Universal Waste.

The mercury containing ampules are retorted at Veolia's Port Washington Mineral Springs facility. The mercury is removed during the retort process. The post retort debris consists of broken glass ampules. The debris is tested for residual mercury to document the removal of the mercury to levels below the US EPA Land Disposal Restriction (LDR) levels. The debris is then disposal of as a non-hazardous solid waste at Advanced Disposal Glacier Ridge Landfill, LLC in Horicon, Wisconsin.

A site evaluation of the Veolia Processing Center in Port Washington, WI was conducted by TRC's operations and compliance manager, Danielle Myers, in late October 2019. An audit is scheduled to be completed every two years.

Part II Declaration and Signature Authorization of Officer

Under penalties of perjury, I declare that I am an officer of the above organization and that I have examined a copy of the organization's 2019 electronic return and accompanying schedules and statements and to the best of my knowledge and belief, they are true, correct, and complete. I further declare that the amount in Part I above is the amount shown on the copy of the organization's electronic return. I consent to allow my intermediate service provider, transmitter, or electronic return originator (ERO) to send the organization's return to the IRS and to receive from the IRS (a) an acknowledgement of receipt or reason for rejection of the transmission, (b) the reason for any delay in processing the return or refund, and (c) the date of any refund. If applicable, I authorize the U.S. Treasury and its designated Financial Agent to initiate an electronic funds withdrawal (direct debit) entry to the financial institution account indicated in the tax preparation software for payment of the organization's federal taxes owed on this return, and the financial institution to debit the entry to this account. To revoke a payment, I must contact the U.S. Treasury Financial Agent at 1-888-353-4537 no later than 2 business days prior to the payment (settlement) date. I also authorize the financial institutions involved in the processing of the electronic payment of taxes to receive confidential information necessary to answer inquiries and resolve issues related to the payment. I have selected a personal identification number (PIN) as my signature for the organization's electronic return and, if applicable, the organization's consent to electronic funds withdrawal.

Officer's PIN: check one box only

I authorize **BURDETTE SMITH & BISH LLC** to enter my PIN **22314**
ERO firm name Enter five numbers, but do not enter all zeros

as my signature on the organization's tax year 2019 electronically filed return. If I have indicated within this return that a copy of the return is being filed with a state agency(ies) regulating charities as part of the IRS Fed/State program, I also authorize the aforementioned ERO to enter my PIN on the return's disclosure consent screen.

As an officer of the organization, I will enter my PIN as my signature on the organization's tax year 2019 electronically filed return. If I have indicated within this return that a copy of the return is being filed with a state agency(ies) regulating charities as part of the IRS Fed/State program, I will enter my PIN on the return's disclosure consent screen.

Officer's signature ▶ _____ Date ▶ _____

Part III Certification and Authentication

ERO's EFIN/PIN. Enter your six-digit electronic filing identification number (EFIN) followed by your five-digit self-selected PIN.

54409522030
Do not enter all zeros

I certify that the above numeric entry is my PIN, which is my signature on the 2019 electronically filed return for the organization indicated above. I confirm that I am submitting this return in accordance with the requirements of **Pub. 4163**, Modernized e-File (MeF) Information for Authorized IRS e-file Providers for Business Returns.
