## LETTER FROM THE EXECUTIVE DIRECTOR

As we move forward, it becomes increasingly difficult to maintain the same level of mercury thermostat collections because we continue to make strides toward eliminating every last mercury thermostat. We are dedicated to fulfilling TRC's mission to promote the safe collection and proper disposal of mercury-containing thermostats while keeping mercury out of the waste stream in order to protect the environment.

As existing regulations around manufacturer funded mercury thermostat collections sunset, we remain steadfast in our efforts and will continue to collect mercury containing thermostats in all 48 contiguous states. We appreciate that legislators recognize our decades of effort and success.

TRC will continue to target mercury thermostat collections and work with our partners in the HVAC industry, the waste sector, the energy sector, and the regulatory community to achieve positive results. As you might expect, our numbers will decrease because of our previous successes, but our diligence and dedication remain.

We are happy to provide you with this year's annual report. Please do not hesitate to contact us with comments or questions.

Sincerely,

Danielle Myers

Danielle Myers, Executive Director

Ralph Vasami, Executive Vice President

## MAINE

#### **2022 Collections and Evaluation**

The following analytical report details the annual program performance for mercury thermostat collection in the state of Maine in 2022.

A few of the program highlights for 2022 are included below:

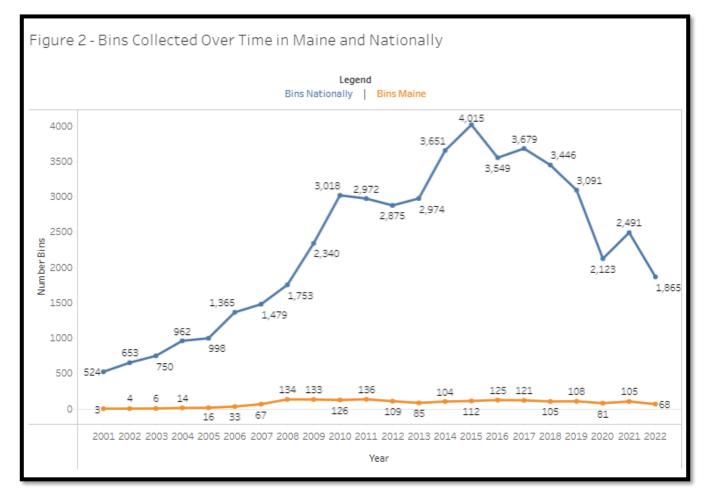

- In 2022 the program **collected 15.6 lbs. of mercury** in Maine. Since 2001, the annual quantity of mercury collected in Maine has been an average of 26.4 lbs.
- The program collected **2,282 whole thermostats in 2022**. This was a 45% decrease over the number of thermostats collected in 2021. Since 2001, the average thermostat count per year is 3,695.
- The number of whole thermostats collected per bin in 2022 was 34 thermostats, a decrease from 40 in 2021.
- The counties with the most bins and thermostats returned in 2022 were Kennebec County (11 bins, 418 thermostats), Penobscot County (11 bins, 399 thermostats), and Androscoggin County (6 bins, 381 thermostats).
- In 2022, **31% of the partner locations returned at least one bin**.
- A total of 173 'Miss You' calls were placed and 36 TRC site visits in 2022 which resulted in a positive relationship of activity to bin returns.
- In addition to 2,282 whole thermostats, 10 loose switches were collected, bringing the total number of "thermostat equivalents" returned in 2022 to 2,291, a decrease of 51% from 2021.

#### Section 1: Program Analytics

Section 1 of this report examines the annual performance of the thermostat collection recycling program in terms of bins, thermostats, and mercury collected as well as the year-over-year progression of the program. On average, the program has collected 26.4 lbs. of mercury and 3,695 whole thermostats per year since 2001. In 2022, the program collected 15.6 lbs. of mercury from 2,282 thermostats and 10 loose switches. Figure 1 displays the total number of bins, the total number of thermostats, and the quantity of mercury collected in Maine since the beginning of the program.

| Figure 1 - Program Performance Over Time |             |                    |              |  |  |

| Average                                  | 82          | 3,695              | 26.4         |  |  |

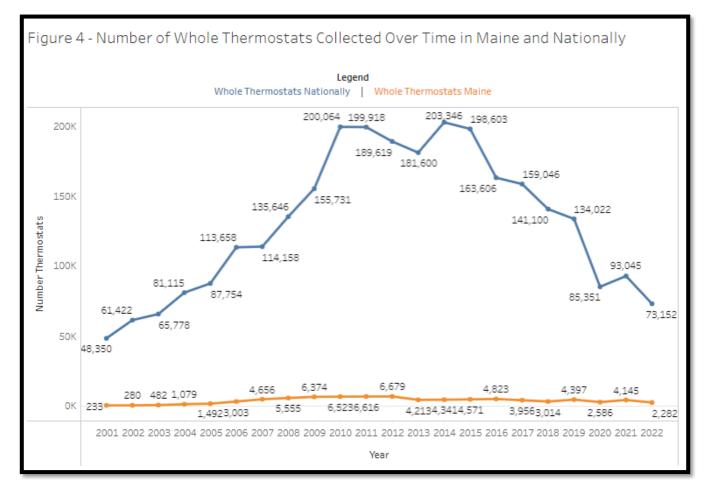

Figure 2 displays the number of bins collected in Maine since the initiation of the collection program, as well as the total number of bins collected in the U.S. over the same period. The number of bins collected in Maine has generally increased from 2001 to 2011. In 2014, bin returns increased again, although they had peaked with the highest number of bins returned in 2011 with 136 bins. The 68 bins returned in 2022 mark the lowest bin returns since 2007, even though more site visits were completed than compared to the previous year.

The 15.6 lbs. of mercury collected in Maine in 2022 was 50% lower than the 30.9 lbs. collected in 2021. Figure 3 displays the quantity of mercury collected in Maine over time as well as the annual percent change in Maine and nationally.

| Figure 3 - Quantity (Lb) of Mercury Collected in Program and Annual Changes to Maine and Nationally |              |                |                     |  |  |  |
|---|--------------|----------------|---------------------|--|--|--|
| Year  | Mercury (Lb) | % Change Maine | % Change Nationally |  |  |  |

Maine collected 2,282 thermostats in 2022. This was a 45% decrease over the number of thermostats collected in 2021. Figure 4 displays the total number of thermostats collected in Maine and nationally, and Figure 5 shares the underlying data as well as the calculated annual percent change.

#### Figure 5 - Whole Thermostats Collected in Maine and Nationally Over Time and Annual Percent Change

| Year    | Number Thermostats Maine | % Change Maine | % Change Nationally |
|---------|--------------------------|----------------|---------------------|
| 2001    | 233                      |                |                     |

| 2022    | 2,282                    | -4596          | -2196               |
| Average | 3,695                    |                |                     |

Figure 6 displays the monthly distribution of bins and thermostats collected in Maine in 2022. The months with the greatest number of thermostats returned were March (457 thermostats each, 12 bins) and July (310 thermostats, 10 bins). The months with the greatest number of bins returned were also March (12 bins) and July (10 bins). Conversely, the months with the least activity in 2022 were May and September.

The highest number of thermostats per bin returned occurred in February (63 thermostats per bin each month). Figure 7 shows the average number of thermostats per bin returned per month for the year.

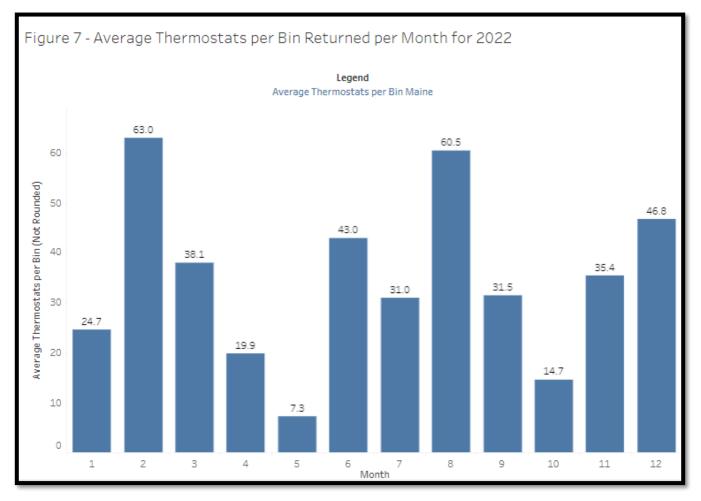

Figure 8 displays the average number of thermostats returned per bin in Maine and in the U.S. since the beginning of the Maine program. Nationally, the number of thermostats per bin has been decreasing annually since 2000. In Maine a similar pattern is observed after 2005, with the exception of a few years. The number of thermostats per bin in 2022 (34 thermostats per bin avg.) decreased from 2021 (40 thermostats per bin avg.) and fell below the national average.

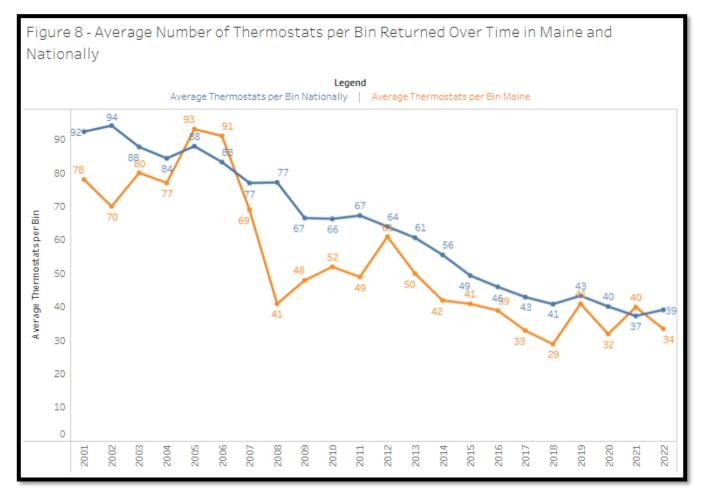

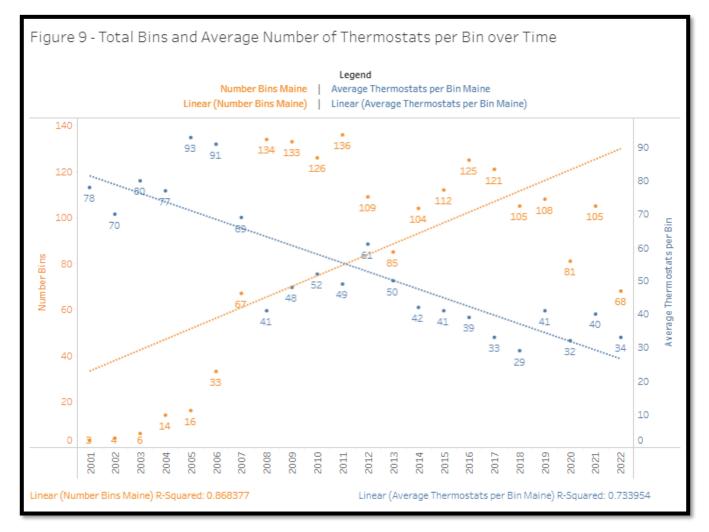

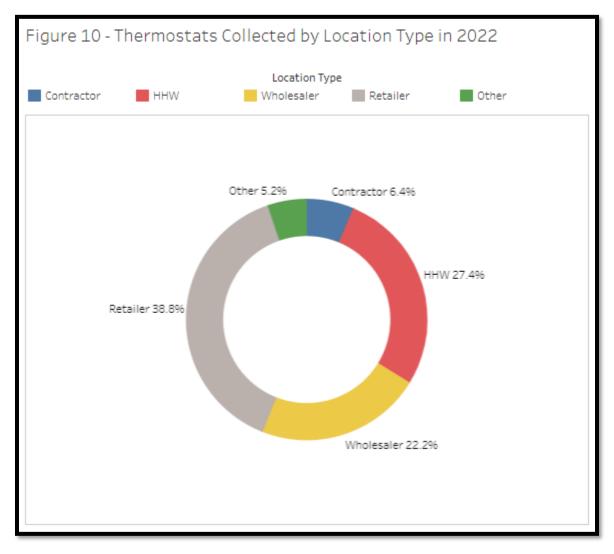

Figure 9 plots the total bins returned over time along with the average number of thermostats per bin over the same period. In general, the number of bins returned in Maine increased steadily from 2001 to 2011 and then again until 2016. A negative correlation has been identified between the number of bins returned and the number of thermostats per bin.

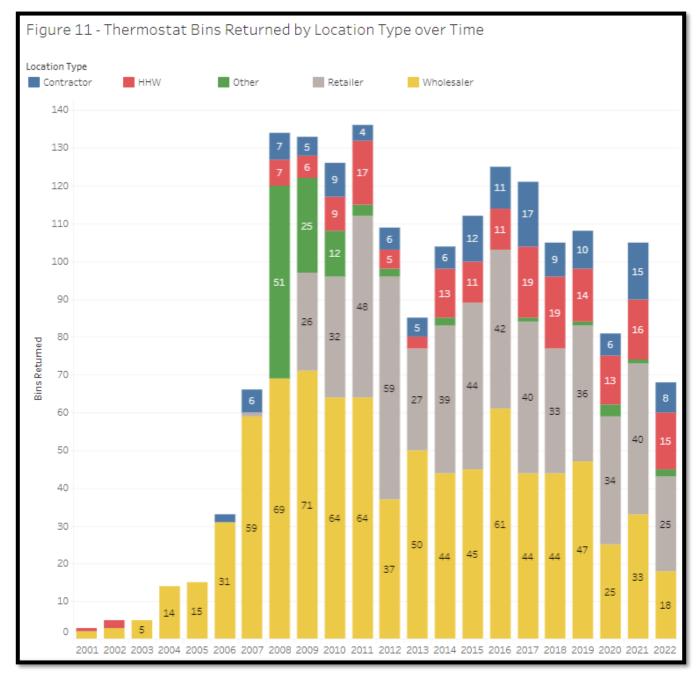

#### SECTION 2: Channel Partner Analysis

Section 2 of the report examines the partner locations in more detail. The majority of thermostats collected in Maine were through retailers (38.8%) and HHWs (27.4%). Figure 10 shows the distribution of thermostats collected by location type in 2022.

The number of bins returned in 2022 decreased across wholesalers, retailers, contractors and HHWs. Figure 11 displays the change in the number of bins returned by thermostat collection type over time in Maine.

In 2022, 31% of Maine locations possessing a collection bin sent back at least one bin for recycling. The distribution is displayed in Figure 12.

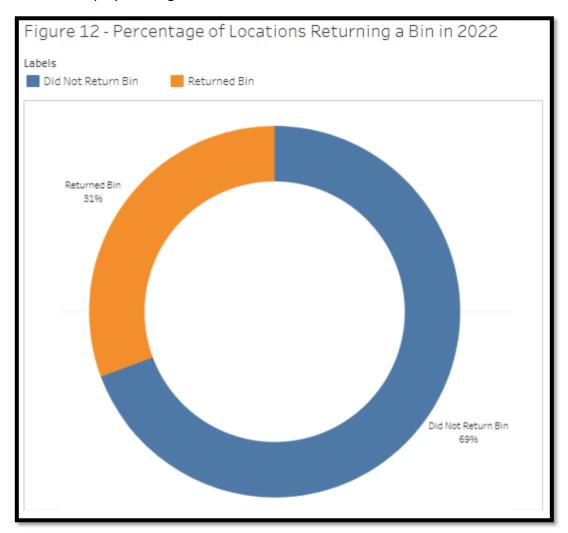

Figure 13 displays the total bins and thermostats returned by county in 2022. An analysis of the top performing counties revealed that Kennebec County (11 bins, 418 thermostats), Penobscot County (11 bins, 399 thermostats), and Androscoggin County (6 bins, 381 thermostats) returned the greatest number of bins and thermostats in 2022.

| Figure 13 - Bins Returned and Total Thermostats Returned 2022<br>by County |                    |             |  |  |

TRC partner Aubuchon Hardware (381 thermostats) returned the highest number of thermostats in Maine in 2022, followed by Environmental Projects Inc. (279 thermostats) and Ames Supply – True Value (259 thermostats). Apart from these locations, two program partners returned more than 200 thermostats each. Figure 14 displays the top performers in terms of total thermostats returned in 2022.

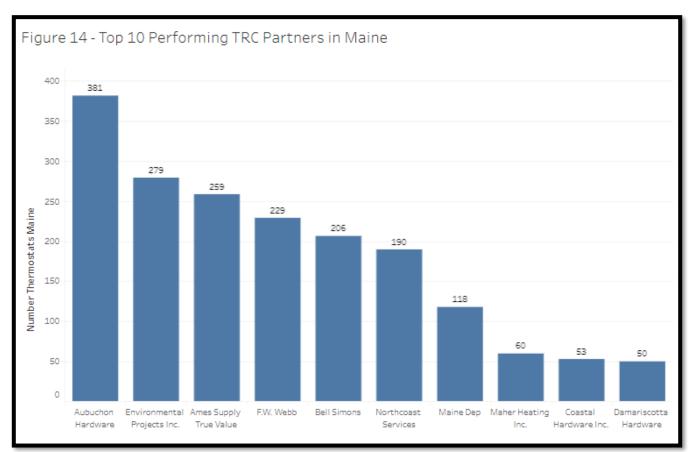

Figure 15 includes the top performers for 2022 by each of the following categories: total bins returned, total thermostats returned, and average number of thermostats per bin.

## Figure 15 - Top 10 Performing Partners by Total Bins, Total Thermostats, and Average Thermostats per Bin

|                                | Number Thermostats | Number Bins | Average Thermostats per Bin |
|--------------------------------|--------------------|-------------|-----------------------------|

| Coastal Hardware Inc.          | 53                 | 1           | 53                          |
| Damariscotta<br>Hardware       | 50                 | 1           | 50                          |

TRC conducted several activities in 2022 to increase the number of bins and thermostats returned in Maine. These activities included site visits and 'miss you' calls to collection locations that may not have returned a bin recently. In 2022, 36 site visits completed by TRC were conducted in Maine, and a total of 173 'miss you' calls were placed. Figure 16 displays the relationship between the number of site visits per month, the bins returned per month, and the number of thermostats (in 100's) returned per month. In 2022, there was a positive correlation between activities performed and the number of bins returned.

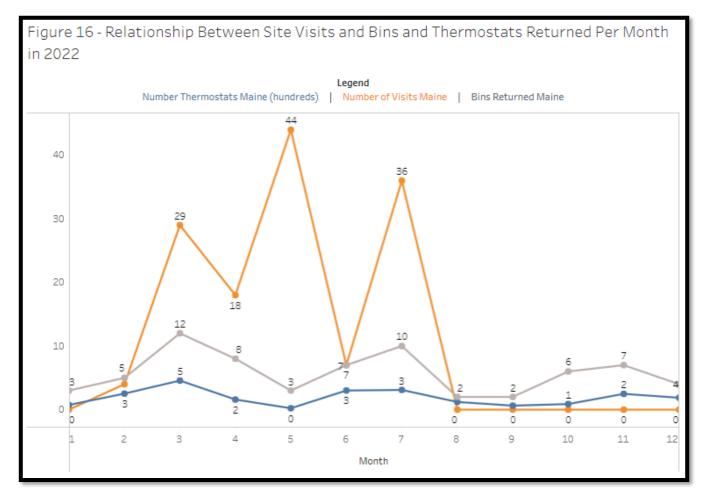

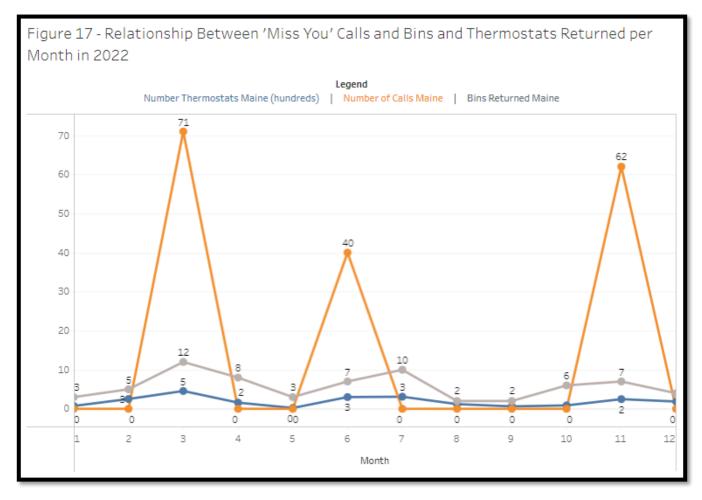

Figure 17 displays the relationship between the number of calls per month, the bins returned per month and the number of thermostats (by 100's) returned per month. Calls were placed in the months of March, June, and November.

#### SECTION 3: Comparisons to National and Other States' Data

To compare how the Maine collection partners performed in 2022, the national average for the number of bins returned per location that returned at least one bin was calculated and compared to the Maine average since 2012. The average number of bins does not include locations that did not return any bins in that year. It should be noted that when making comparisons each state has different regulations, a different mix of housing types, local policies, and incentives that may have a unique impact on returns. Overall, the average number of bins returned per location per year was lower in Maine than the U.S. average.

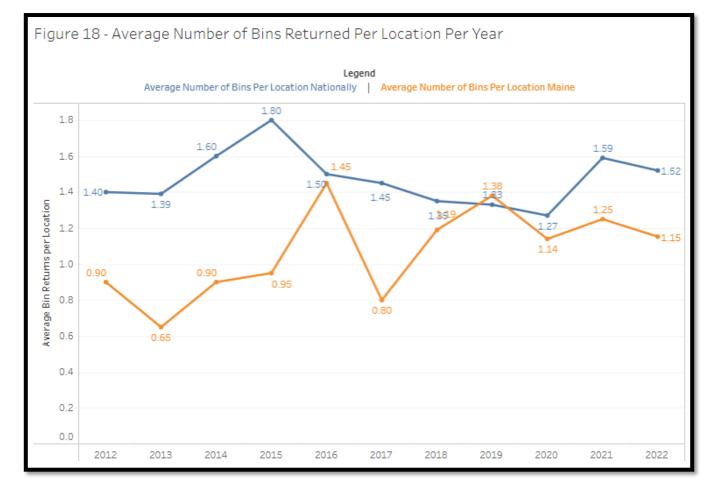

Figure 19 displays the locations in Maine that returned more than one bin in a given year since 2019, and Figure 20 displays the top 10 partners in the U.S. over the same period in terms of the number of bins returned.

| Figure 19 - Partner Locations in | i wane Recurini | ng More than 1 Bin per Last 4 Years    |    |  |

Figure 21 displays total percentage of locations that actively participated in the program (active participation defined as sending back at least one bin) in 2022, for all the states that mandate thermostat returns reporting as well as the U.S. national average for all states (reporting and non-reporting). In 2022, 31% of the locations in Maine returned at least one bin compared to a national average of 34%. The highest percentage of locations returning a bin in 2022 amongst states that mandate thermostat returns reporting was Minnesota (45%).

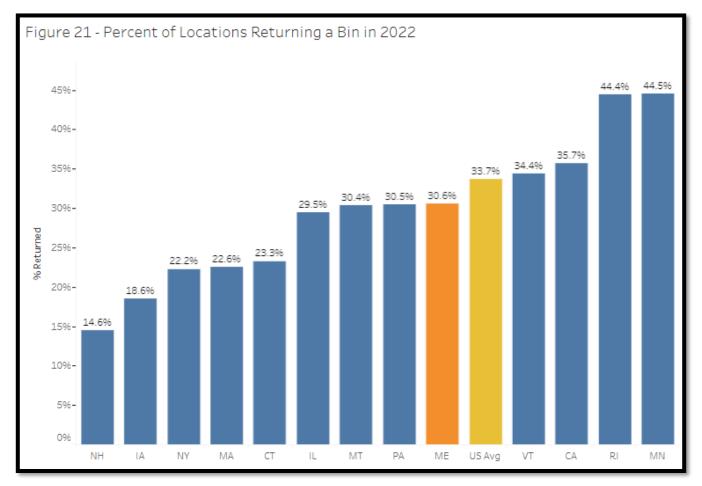

Figure 22 compares the Maine and national rates for several analytics. These include: total whole thermostats, bins, and loose switches collected, number of thermostats collected by total locations and per actively participating locations, number of thermostats per bin returned on average, equivalent average, number of mercury thermostat equivalents returned in 2022, and finally percent change in mercury thermostat conversion from 2021 to 2022. The equivalent average is an average of the number of switches in whole thermostats collected in Maine, and it is used to represent an equivalent number of thermostats from returned loose switches. The thermostat equivalent number includes the totals of whole thermostats returned plus the number of thermostats estimated from loose switches. The states displayed are those that mandate thermostat returns reporting and the U.S. average is for all states that return bins (reporting and non-reporting).

Figure 23 further compares this state and national data by showing how each state ranked in each of these categories, from highest to lowest. The states compared are those that mandate thermostat returns reporting and the U.S. average is for all states that return bins (reporting and non-reporting).

#### **2022 Collections by Brand**

In Maine, Thermostat Recycling Corporation (TRC) recovered the equivalent of 2,291 mercury thermostats from 2,282 whole mercury thermostats plus 10 mercury switches removed from thermostats. A total of 15.6 pounds of mercury was diverted from solid waste. \*Please note the explanation of the converted thermostats or thermostat equivalents below.<sup>1</sup> An example of the mercury ampoule is shown below.

As required by the state statute, a table of thermostat brand holders with their corresponding thermostats, the number of switches and the pounds of mercury recycled is below. It is important to note that there remain non-members whose thermostats the TRC collection program recycles. They are listed in the table as "Non-Member Brands".

<sup>&</sup>lt;sup>1</sup> A mercury thermostat contains a variable amount of mercury ampoules or "switches" attached to the subbase of the thermostat. These glass ampoules often are collected in the recycling container without the intact thermostat attached to them. TRC collects and counts these loose ampoules and recycles them. To derive the converted thermostat or thermostat equivalent, the program takes the following calculations to develop the converted thermostat or thermostat equivalent. First, TRC will count the total whole (intact) thermostats collected in the recycling bins. From these units, there is an intact ampoules count. TRC then takes the intact ampoules divided by the whole (intact) thermostats or otherwise known as the conversion ratio. After the conversion ratio is calculated, TRC will multiple the loose mercury switches by the conversion ratio. Lastly, we add this result to the whole (intact) thermostats to produce the converted thermostats or thermostat equivalents.

#### 2022 Summary of the Program Expenses

Below is a summary of program expenses for the Maine collection program in 2022. 2022 program expenses (reported in the annual report) are unaudited and are for management purposes only. Prior to submittal of this annual report, the expenses were reviewed by Kellen Company.

| Program Component                       | 2021         | 2022         | Difference     |
|---|--------------|--------------|----------------|
| Direct Expense for Marketing & Outreach | \$ 35,480.19 | \$ 32,492.09 | \$ (2,988.10)  |
| Incentive/Promotional Payments          | \$ 15,195.00 | \$ 12,140.52 | \$ (3,054.48)  |
| Legal                                   | \$-          |              | \$-            |
| New Collection Containers               | \$-          |              | \$-            |
| Recycling Costs                         | \$ 18,104.90 | \$ 8,931.56  | \$ (9,173.34)  |
| Travel                                  | \$ 1,658.28  | \$-          | \$ (1,658.28)  |
| TRC Staff & Administration              | \$ 7,297.95  | \$ 7,221.17  | \$ (76.78)     |
| Total Expenses                          | \$ 77,736.32 | \$ 60,785.34 | \$ (16,950.98) |

#### 2022 Education and Outreach

#### Direct Marketing (Email, Mail, Other Communications)

#### **Current Collection Locations**

#### Small Pails and Green Bins

In 2022, TRC shipped 76 small pails to collection points around the country. We also shipped 201 new green bins. In comparison, the program shipped 236 new green bins in 2021 and 47 small pails<sup>2</sup>. Collection locations either requested the new pail when they signed up to participate in the program or chose to switch out their bin with a pail due to decreased collections. The large green bins which have been the staple of the program continued to be replenished as they were returned for processing. Because the containers are reused and bar coded, we anticipate that the request for new containers will decrease as the program continues.

• Of the totals provided, TRC shipped zero new small pails and six new large bins in the state.

#### **Collection Location Outbound Phone Calls**

Our outbound phone calls have been branded internally as the "Miss You Call" process. These calls promote collection container returns and serve as a reminder to locations that have not returned any thermostats. TRC allocates these "miss you calls" to collection sites that have not returned a container in over a year. These calls serve as a friendly customer service check to see if any of the program materials need to be replenished or if missing containers need to be replaced. In total, the program called 1,922 current collection locations in 2022, compared to 3,113 in 2021. The decline in the number of calls completed is a positive sign that more locations were returning a bin without being prompted in 2022, and therefore did not require a "Miss You Call".

• Completed 173 calls to encourage shipping the recycling container compared to 151 a year prior. A copy of the locations called can be found in the Appendix.

<sup>&</sup>lt;sup>2</sup> New bin orders coincide with accounts that open new stores, move or lose their existing containers.

#### Collection Location Postcards

Postcards are sent to all locations that have not returned a container in the past year. These postcards serve as a reminder to locations and assist with updating addresses in the database. In 2022, TRC mailed 12,425 postcards.

• Mailed 498 reminder postcards compared to 404 a year prior.

#### Collection Location Emails

TRC emailed locations three weeks after receiving a postcard to encourage them to directly ship the recycling container. These emails contain step-by-step instructions for shipping and direct contact information for missing shipping labels or further questions. In 2022, TRC emailed 3,682 locations.

• Emailed 95 collection locations three weeks after receiving the reminder postcard to ship their container.

#### Collection Location Site Visits

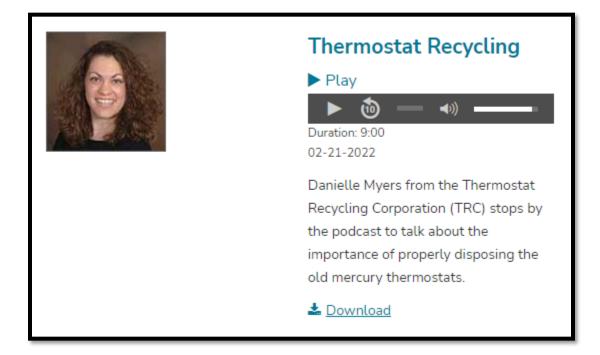

Throughout the year, our team completed 1,042 site visits in numerous states. The purpose of site visits is to inform the location of the requirements of participation, what specifically the statute requires of them, assist with shipment of the recycling container, and to answer any questions they may have. We often gather valuable information during the site visit which is used to enhance TRC's outreach and update the database with current contact details.

 Of the totals provided, TRC and the MEDEP aggregated, visited 138 collection locations compared to 132 in 2021. Of the 138 site visits, MEDEP visited 102 and TRC visited 36. A copy of the sites visited can be found in the Appendix.

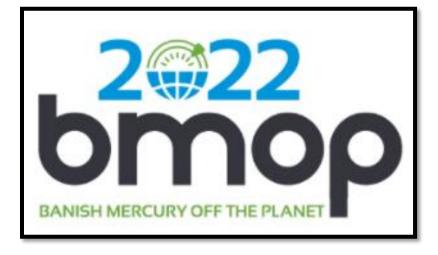

#### HVAC Industry

The HVAC industry is our most productive and most engaged channel for recycling mercury containing thermostats. We consider this industry to be the manufacturers, wholesale distributors, and contractors which are intimately involved with the recovery of mercury thermostats. TRC took the following actions:

 ACHR News Podcast featured TRC on their podcast in February of 2022. <a href="https://www.achrnews.com/media/podcasts/2904-achr-news-podcast/play/488-thermostat-recycling">https://www.achrnews.com/media/podcasts/2904-achr-news-podcast/play/488-thermostat-recycling</a>

- Continued the "Banish Mercury Off the Planet" (BMOP) Competition encouraging all HARDI wholesalers to compete through collections. Included direct marketing to over 17,000 individual HARDI members.
  - The annual competition recovered 211 pounds of mercury from 66 HVAC wholesalers.
     More than 530 branch locations returned collection bins during the contest period.

#### **Property Management Industry**

This year, TRC continued to partner with Progress Residential, one of the largest providers of singlefamily rental homes in the United States, with over 66,000 homes in 29 of the nation's fastest growing metro areas. The property management company is in the process of retrofitting hundreds of homes' thermostats, and we have provided free recycling containers for their use to recycle the mercury thermostats they are replacing.

#### Waste Related Sector and Household Hazardous Waste (HHW) Industry

The waste-related sector remains an important sector for TRC to target individuals and those residents performing DIY thermostat installations. These attempts were to gain new collection locations, form better relationships with the audience and raise overall awareness of the TRC program. As a result of these learnings, TRC took the following actions:

- Scoured google alerts for HHW events to target phone call or email outreach to encourage them to use the program. Sent 34 emails to facilities, offering a free container.
- TRC contributed to a full-page ad in the Program Book for the Maine Resource Recovery Association's Conference in 2022. This conference is a great event to target waste professionals across the state and bring awareness to our program that they can utilize within their facility.

#### Advertising and Awareness

#### **Website**

TRC's redesigned website has now been active for a year. We experience better statistics around website traffic and visitors, which will be detailed below. To keep the website fresh, blogs and press releases are posted monthly and shared with our many stakeholders.

#### Advertisement Samples

This report summarizes all digital efforts in spreading TRC's message to audience members at a national level in 2022 – including search engine optimization (SEO) and digital advertising—including, search engine marketing (SEM) ads through Google Search; social media ads through Facebook and LinkedIn; and programmatic ads through StackAdapt.

#### Search Engine Marketing (SEM)

As part of search engine marketing (SEM), Google Ads is a digital advertising platform where advertisers can bid on search terms (or keywords) to have informational ads displayed, where ads appear alongside search results. This campaign targets people searching for relevant search key terms by driving traffic to various pages on the TRC website. TRC has developed a search campaign to align with terms searched by individuals related to thermostats, mercury, mercury recycling, thermostat replacement, etc.

A quantitative summary of the campaign's delivery at a national level in 2022 is detailed below.

| Metrics                                       | 2022   |
|---|--------|
| Impressions                                   | 13,863 |
| Clicks  | 696    |
| Clickthrough Rate (CTR)                       | 4.07%  |
| Cost per Click (CPC)                          | \$1.15 |
| Conversions (Find a Location, Form Downloads) | 40     |

#### Notes

- Impressions: Number of times ads were served to viewers.
- Clicks: Number of viewers who clicked on ads
- CTR: Click-through-rate, calculated by the number of clicks divided by the number of impressions.
- CPC: Average amount paid for each click.

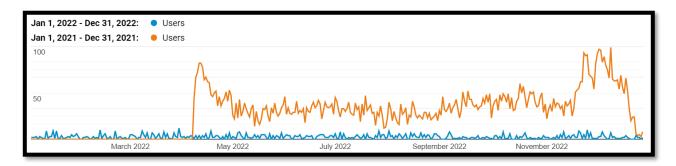

#### Search Engine Optimization (SEO)

Search Engine Optimization (SEO) is the process whereby a website is optimized through original content and on-site coding tactics to increase its chances of appearing near the top of "organic

searches." An organic search is one that appears "naturally" in a search engine like Google or Bing. In other words, an organic listing is not ranked through paid search.

Organic traffic to a website typically brings visitors who stay longer, and visit more pages, on average.

In 2022, organic search traffic for all states brought 806 users to the TRC website. By comparison, there were 9,746 clicks from organic search over the same time period in 2021.

This data was provided by Google Analytics Reporting.

#### Social Media and Programmatic Ads

Through social media and programmatic advertising, advertisers can attract large audiences on the platforms they use for social networking and website browsing. This campaign targets people with relevant interests and drives them to various pages on the TRC website. For these ads, audiences on the various platforms were subdivided into various categories, as shown in the quantitative results table below.

Below is the overall performance at a national level in 2022 for each target audience and platform.

| Audience   | Platform   | Impressions | Clicks | CTR   | Conversions<br>(Find a Location) |
|------------|------------|-------------|--------|-------|----------------------------------|
| Consumer   | Facebook   | 1,121,814   | 4,538  | 0.40% | 23                               |
| Consumer   | StackAdapt | 2,119       | 200    | 0.89% | 5                                |
| Contractor | LinkedIn   | 22,475      | 150    | 0.67% | 1                                |
|            | TOTAL:     | 1,146,408   | 4,888  | 0.43% | 29                               |

## **Digital Qualitative Analysis**

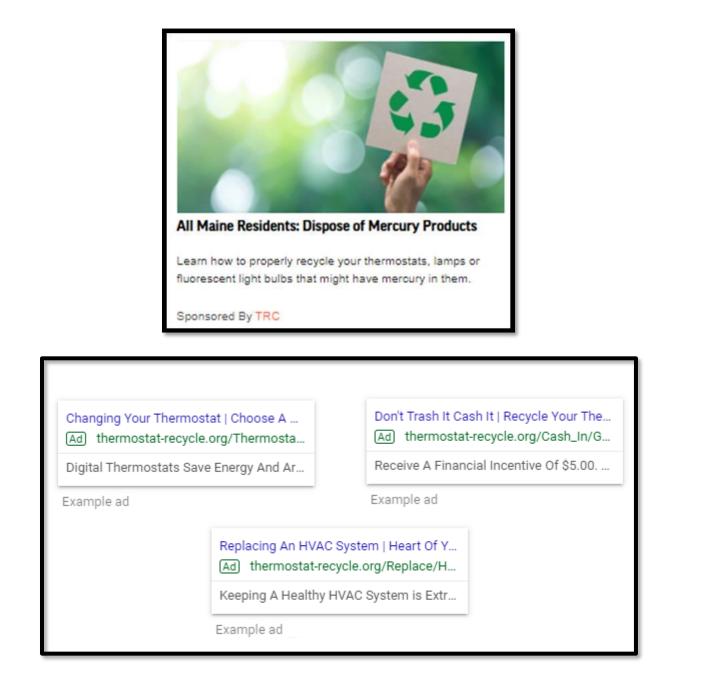

Through paid digital advertising, TRC's various messages at a national level were shown to audience members over 1.1 million times. Of those 1.1 million times, nearly 5,000 users were acquired to the website – where 69 conversions occurred. Audience members most likely to take an action from our ads were consumers through Google Search ads. In terms of search engine optimization, there was a decline in organic website traffic from 2021 to 2022, which may be skewed due to the shift to the new website. Growing website traffic will be a priority in 2023.

#### **Maine Digital Advertising**

Digital Advertising: TRC contributed to joint TRC-NEMA paid digital advertising in Maine on the following platforms. There were 10,659,264 overall impressions with 14,440 clicks.

- Meta (Facebook & Instagram)
  - Run Date: September 2 October 31
  - Impressions: 161,426
  - Clicks: 853
    - Click-Through-Rate (CTR): 0.53%
    - Cost-Per-Click (CPC): \$1.06
- StackAdapt (native, programmatic advertising) has a demand side platform (DSP) with access to an inventory of over two million websites and apps. For example, someone who lives in Maine could see ads appear while playing Words with Friends on their phone, or they could see ads appear within a news story on CNN.
  - Run Date: September 1 October 31
  - o Impressions: 23,750
  - Clicks: 100
    - CTR: 0.65%
    - CPC: \$0.49
- Google Search
  - Run Date: September 2 November 18
  - Total Impressions: 6,659
  - o Total Clicks: 158

- Total Average CTR: 2.06%
- Total Average CPC: \$7.77

Cost-Per-Click (CPC): The average cost per user engaging with the promoted post.

*Click-Through-Rate (CTR): The average rate at which users were click on the link associate with the promoted post.*

# 2023 Program Modifications

# Thermostat Recycling Corporation's 2023 Goals

TRC continues to set high-level annual goals for the organization. These goals assist in decision making and prioritization of activities. For the calendar year 2023, TRC plans to focus on:

- Continuing to fulfill state statutory requirements, agreements, and other arrangements for regulatory compliance.
- Focusing on education and awareness tactics geared toward homeowners and HVAC industry professionals.

# Thermostat Recycling Corporation's Planned Tasks

In addition to the above goals, TRC set specific tasks on which we plan to focus. Completion of these tasks aid in the organization's overall goals.

- Roll-out public releases throughout the year.
- Grow website traffic through SEO.
- Create co-branded mailing with Maine DEP to send to collection locations that includes general program instructions and rebate/store credit overview.
- Continue the program's operational activities such as outbound phone calls, mailing reminder postcards, and visiting sites. Use collection data trends to target these initiatives.
- Attend trade shows and conferences when applicable. Look for speaking opportunities at attended events.
- Utilize cross-advertising with NEMA to promote both thermostats and lamps as mercury items that consumers need to recycle properly.

# HOW MERCURY THERMOSTAT WASTE IS HANDLED

WASTE MERCURY-ADDED THERMOSTAT MANAGEMENT THROUGH VEOLIA ES TECHNICAL SOLUTIONS, LLC.

TRC containers with waste mercury-switch thermostats are received at a fulfillment/ inventory center in Port Washington, Wisconsin (WIR000130591). The facility is owned and operated by Veolia ES Technical Solutions, L.L.C. (Veolia) under contract with TRC.

All recycling containers, including pails and bins are received at the loading dock and sent to the TRC inventory room. The container and plastic liner are opened and the contents are identified, sorted, and tallied. The following data is recorded for each bin returned and processed: bin number, business name (location name), city, state, zip code, date returned, number of thermostats and mercury switches by manufacturer and any non-conforming material.

The containers are returned to the location that sent it in with a new prepaid address label within 3 weeks of receipt. The thermostats are stored and staged in a plastic lined carton in a storage area for final processing. The containers are dated and processed in order received, first in-first out.

The thermostats and any loose bulbs collected from the containers are consolidated into a special 55-gallon drum which is labeled and dated according to regulations. The drum is sealed with a band and is only opened when contents are being added to it. Special negative pressure venting assures any fumes are captured and vented when the drum is opened.

The 55-gallon drum is then shipped to Veolia's mercury recovery facility (WID988566543) for final processing of the mercury ampules (switches). Veolia Environmental Services meets or exceeds all local, state, federal and EPA regulations for the management of the product.

The containers are returned from the storage area to the mercury recovery processing area to have the mercury bulbs removed from the plastic housing. Universal Waste Regulations require the recycling and disposal of waste within 12 months of acceptance at the processing facility.

Small quantities of thermostats are removed from the container, which is then closed again. The bulbs are removed from the thermostats and placed into processing vessel at the work station. Once the processing vessel is full, the vessel is loaded into the mercury recovery retort oven.

If a bulb breaks and the mercury spills, the work area is designed to contain the spillage and the operators are trained in the clean-up and disposal of mercury. The TRC inventory

and processing areas are equipped with special mercury vacuum cleaners and the work area is vacuumed at the end of the work day to ensure that any spillage is cleaned up and not left to evaporate.

Veolia meets or exceeds all local, state, federal and EPA regulations for the management of the product. The mercury recovery facility and process are permitted by the Wisconsin Department of Natural Resources. Veolia's approvals for mercury recovery/recycling include:

- EPA identification WID988566543
- Hazardous Waste Storage License #6008
- Hazardous Waste Treatment License (Mercury Recovery Operations) #4585
- Air Operation Permit #246076050-S01
- Storm Water General Permit #WI-S067857-4

In addition to the regulatory permits, both Veolia Port Washington facilities have developed and maintain management systems in accordance with ISO 14001-2004, OHSAS 18001-2007, and Responsible Recycling (R2:2013) Practice. All persons who handle mercury thermostats as part of the TRC operation receive training in the handling of Hazardous Waste and Universal Waste.

The mercury containing ampules are retorted at Veolia's Port Washington Mineral Springs facility. The mercury is removed during the retort process. The post retort debris consists of broken glass ampules. The debris is tested for residual mercury to document the removal of the mercury to levels below the US EPA Land Disposal Restriction (LDR) levels. The debris is then disposal of as a non-hazardous solid waste at Advanced Disposal Glacier Ridge Landfill, LLC in Horicon, Wisconsin.

| Part VII C                             | Compensation of Officers, Directors, Trustees, Key Employees, Highest Compe  | nsated     |        |  |  |  |  |
| Employees, and Independent Contractors |  |            |        |  |  |  |  |
| C                                      | Check if Schedule O contains a response or note to any line in this Part VII   |            |        |  |  |  |  |
| Section A.                             | Officers, Directors, Trustees, Key Employees, and Highest Compensated Employees  |            |        |  |  |  |  |
|  | e this table for all persons required to be listed. Report compensation for the calendar year ending with or<br>of the organization's <b>current</b> officers, directors, trustees (whether individuals or organizations), regardles | e e        | 2      |  |  |  |  |

Enter -0- in columns (D), (E), and (F) if no compensation was paid.

• List all of the organization's current key employees, if any. See the instructions for definition of "key employee."

• List the organization's five current highest compensated employees (other than an officer, director, trustee, or key employee) who received reportable compensation (box 5 of Form W-2, Form 1099-MISC, and/or box 1 of Form 1099-NEC) of more than \$100,000 from the organization and any related organizations.

• List all of the organization's **former** officers, key employees, and highest compensated employees who received more than \$100,000 of reportable compensation from the organization and any related organizations.

• List all of the organization's **former directors or trustees** that received, in the capacity as a former director or trustee of the organization, more than \$10,000 of reportable compensation from the organization and any related organizations.

See the instructions for the order in which to list the persons above.

X Check this box if neither the organization nor any related organization compensated any current officer, director, or trustee.

# TRC Annual Report on Mercury-Added Thermostat Collection and Recycling in Maine – Calendar Year 2022 Activities

In accordance with 38 M.R.S.A. §1665-B(2)(G), the State of Maine is providing this form to the Thermostat Recycling Corporation (TRC) for reporting on behalf of the manufacturers of mercury-added thermostats on their 2022 collection and recycling program performance in Maine. Please complete this form electronically, attach information as necessary, and submit a signed copy with all attachments, no later than April 1, 2023, to: <u>megan.mansfieldpryor@maine.gov</u>.

- I. Thermostat Collection and Incentive Data. Provide the following collection information:
  - A. <u>Current list of sites participating in TRC recycling program</u>. Include facility name, address, contact, phone number, and type of facility (wholesaler, contractor, retailer, municipal, other).
     See annual report Appendices, 2022 Collection Location Summary Report
  - B. <u>Mercury switches collected</u>. Attach a spreadsheet that lists the number of mercury thermostats and switches collected from each brand owner and the weight of mercury collected from Maine in the following format:
    - See annual report, page 30 2022 Maine Collections by Brand
  - C. <u>Thermostats returned by collection location</u>. Include the following information for each collection site in Maine registered with TRC to collect mercury-added thermostats in 2022:
    - Location type (wholesaler, contractor, retailer, municipal, other)
    - Location name
    - Location address
    - Site contact name
    - Contact phone number and e-mail (as available)
    - Collection bin number(s)
    - Date of last bin return (include for all sites, even if last return date is prior to 2022)

## See annual report - Appendices, 2022 Collection Location Summary Report

D. <u>Summary of incentive payments</u>. List a count of each \$5 incentive payment made (not a summary of unique transactions) in the following format:

|   | Retail | Mail-back* | Wholesale | Contractor | Municipal/Other |
|---|--------|------------|-----------|------------|-----------------|
| Number of Hg t-stats received in 2022   | 885    | 0          | 507       | 146        | 744             |
| Number of \$5 incentives paid in 2022   | 942    | 0          | 856       | 274        | 805             |
| Hg t-stats received with no incentive sticker or claim form in 2022                           | 202    | 0          | 82        | 12         | 57              |
| Hg t-stats received w/ illegible,<br>damaged, or incomplete<br>coupons or claim forms in 2022 | 0      | 0          | 0         | 0          | 0               |
| Checks disbursed in 2022,<br>returned as undeliverable and no<br>alternative delivery         | 0      | 0          | 0         | 0          | 0               |
| Hg t-stats received with incentive sticker and no remittance coupon on file as of 12/31/22    | 0      | 0          | 0         | 0          | 0               |

# TRC Annual Report on Mercury-Added Thermostat Collection and Recycling in Maine – Calendar Year 2022 Activities

\*List towns from which TRC received mercury-added thermostats through the mail-back program. In 2022, there were 0 thermostats received from mail-back.

- III. <u>Education and Outreach</u>. Describe all education and outreach efforts undertaken in 2022 to promote the TRC program in Maine. For each activity, describe the strategy employed to target Maine residents, and whether the effort specifically conveyed information on the \$5 incentive. Provide copies of materials utilized to promote thermostat recycling and the return incentive. Do not include national or industry-based outreach efforts unless Maine businesses, residents, or municipalities were specifically targeted, contacted, or otherwise the recipients (e.g. Google location-specific advertising tracking data that reached Maine residents) of the education and outreach efforts.
  - A. Print media ads distributed in Maine: Include ad copy, publication name, and dates published.
    - a. Page 39-44 of annual report
  - B. Radio and TV PSAs/ads: Include a copy of each PSA and ad, a description of its distribution, the channels on which the ad was run, the time slots, and number of times the ad was run.
    a. Page 39 of annual report
  - C. Online ads: Describe the online advertising strategy to target Maine residents and include screen shots of ads, websites where they appeared, date range during which they appeared, and click-through rate.
    - a. Page 45-48 of annual report
  - D. Direct outreach to current collection sites in Maine: include copies of fliers, postcards, letters, and other print outreach; dates of distribution; number sent out; responses from participants, if any; and dates and locations of site visits.
    - a. Page 32-33 of annual report and appendices
  - E. Outreach to recruit new collection sites in Maine: describe format and frequency of efforts to recruit new collection sites, including copies of materials distributed, number and types of facilities targeted; and number and names of new collection sites signed up as a result.
     a. Page 33-35 of annual report
  - F. Other: describe any additional education and outreach activities specific to the Maine program that were conducted in 2022; include intended audience and geographic distribution.
     a. Page 32-35 of annual report
  - G. Measures of success: describe methods of measuring success of outreach efforts in Maine, including: the results of surveys of general public and targeted audience (e.g., contractors) awareness of mercury thermostat collection programs and financial incentive; increases in thermostat recycling program participation; improved quality of bin contents and incentive vouchers; greater frequency of bin returns; increased usage of incentive vouchers; increases in the number of participating collection sites.
    - a. This is explained throughout the report in its correlating sections.

# TRC Annual Report on Mercury-Added Thermostat Collection and Recycling in Maine – Calendar Year 2022 Activities

**IV.** <u>**Program effectiveness.**</u> Provide an evaluation of the effectiveness of the collection program in Maine. Include information on any changes in the number of collection sites by type from the previous year, and any data available on the number of mercury thermostats remaining in Maine buildings.

Page 5-28 of annual report

- V. <u>Program modifications</u>. Describe proposed modifications to increase the efficiency and effectiveness of the Maine mercury thermostat recycling incentive program. Page 50 of annual report
- VI. <u>Participating manufacturers</u>. Attach a spreadsheet with the following information on the TRC members that are participating in the Maine mercury thermostat recycling incentive program.

See appendices - List of Participating Manufacturers

VII. <u>Additional information</u> – Provide other comments and recommendations germane to the Maine mercury thermostat recycling program.

# SIGNATURE OF RESPONSIBLE OFFICER

I certify under penalty of law that I have personally examined the information submitted in this document and all attachments thereto and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe the information is true, accurate, and complete. I am aware there are significant penalties for submitting false information, including the possibility of fine and imprisonment.
