2024 Collections and Evaluation

The following analytical report details the annual program performance for mercury thermostat collection in the state of Maine in 2024.

A few of the program highlights for 2024 are included below:

- In 2024 the program **collected 18.5 lbs. of mercury** in Maine. Since 2001, the annual quantity of mercury collected in Maine has been an average of 25.7 lbs.
- The program collected **2,867 whole thermostats in 2024**. This was an 13% increase over the number of thermostats collected in 2023. Since 2001, the average thermostat count per year is 3,613.
- The **number of whole thermostats collected per bin in 2024 was 33 thermostats**, remaining level from 2023.
- The counties with the most bins and thermostats returned in 2024 were **Cumberland County (29 bins, 971 thermostats), Penobscot County (10 bins, 529 thermostats), and Kennebec County (14 bins, 381 thermostats)**.
- In 2024, **39% of the partner locations returned at least one bin**.
- **A total of 60 ‘Miss You’ calls were placed and 63 TRC site visits in 2024** which resulted in a positive relationship of activity to bin returns.
- In addition to 2,867 whole thermostats, **16 loose switches were collected**, bringing the total number of **“thermostat equivalents” returned in 2024 to 2,882, an increase of 14% from 2023**.

Section 1: Program Analytics

Section 1 of this report examines the annual performance of the thermostat collection recycling program in terms of bins, thermostats, and mercury collected as well as the year-over-year progression of the program. On average, the program has collected 25.7 lbs. of mercury and 3,613 whole thermostats per year since 2001. In 2024, the program collected 18.5 lbs. of mercury from 2,867 thermostats and one loose switch. Figure 1 displays the total number of bins, the total number of thermostats, and the quantity of mercury collected in Maine since the beginning of the program.

Figure 2 displays the number of bins collected in Maine since the initiation of the collection program, as well as the total number of bins collected in the U.S. over the same period. The number of bins collected in Maine has generally increased from 2001 to 2011. In 2014, bin returns increased again, although they had peaked with the highest number of bins returned in 2011 with 136 bins. The 88 bins returned in 2024 mark an increase over the previous year's bins.

Figure 2 - Bins Collected Over Time in Maine and Nationally

The 18.5 lbs. of mercury collected in Maine in 2024 was 13% higher than the 16.4 lbs. collected in 2023. Figure 3 displays the quantity of mercury collected in Maine over time as well as the annual percent change in Maine and nationally.

Figure 6 displays the monthly distribution of bins and thermostats collected in Maine in 2024. The months with the greatest number of thermostats returned were July (455 thermostats) and August (486 thermostats). Conversely, the months with the least activity in 2024 were September and November.

The highest number of thermostats per bin returned occurred in October (48.7 thermostats per bin each month). Figure 7 shows the average number of thermostats per bin returned per month for the year.

Figure 7 - Average Thermostats per Bin Returned per Month for 2024

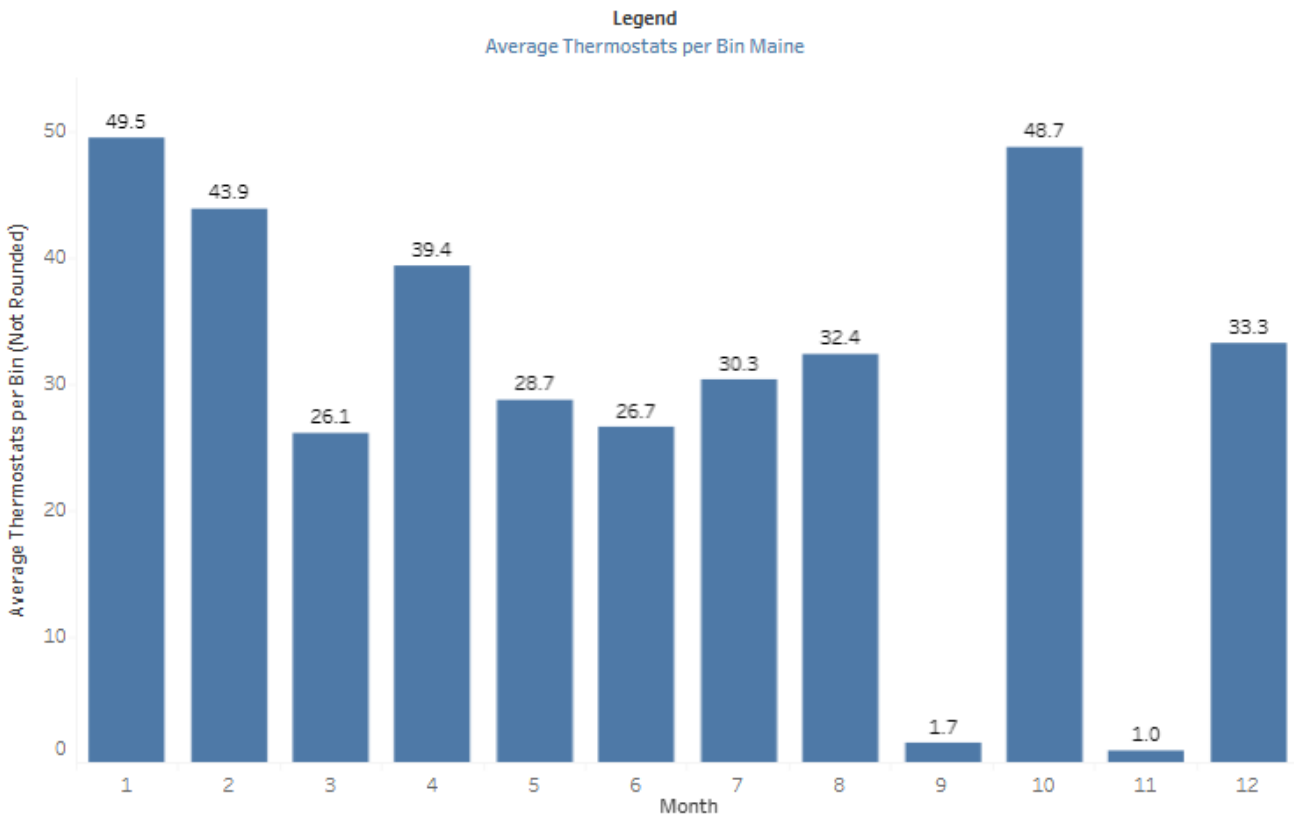

Figure 8 displays the average number of thermostats returned per bin in Maine and in the U.S. since the beginning of the Maine program. Nationally, the number of thermostats per bin has been decreasing annually since 2000. In Maine a similar pattern is observed after 2005, with the exception of a few years. The number of thermostats per bin in 2024 (33 thermostats per bin avg.) remained level from 2023 (33 thermostats per bin avg.) and fell below the national average.

Figure 8 - Average Number of Thermostats per Bin Returned Over Time in Maine and Nationally

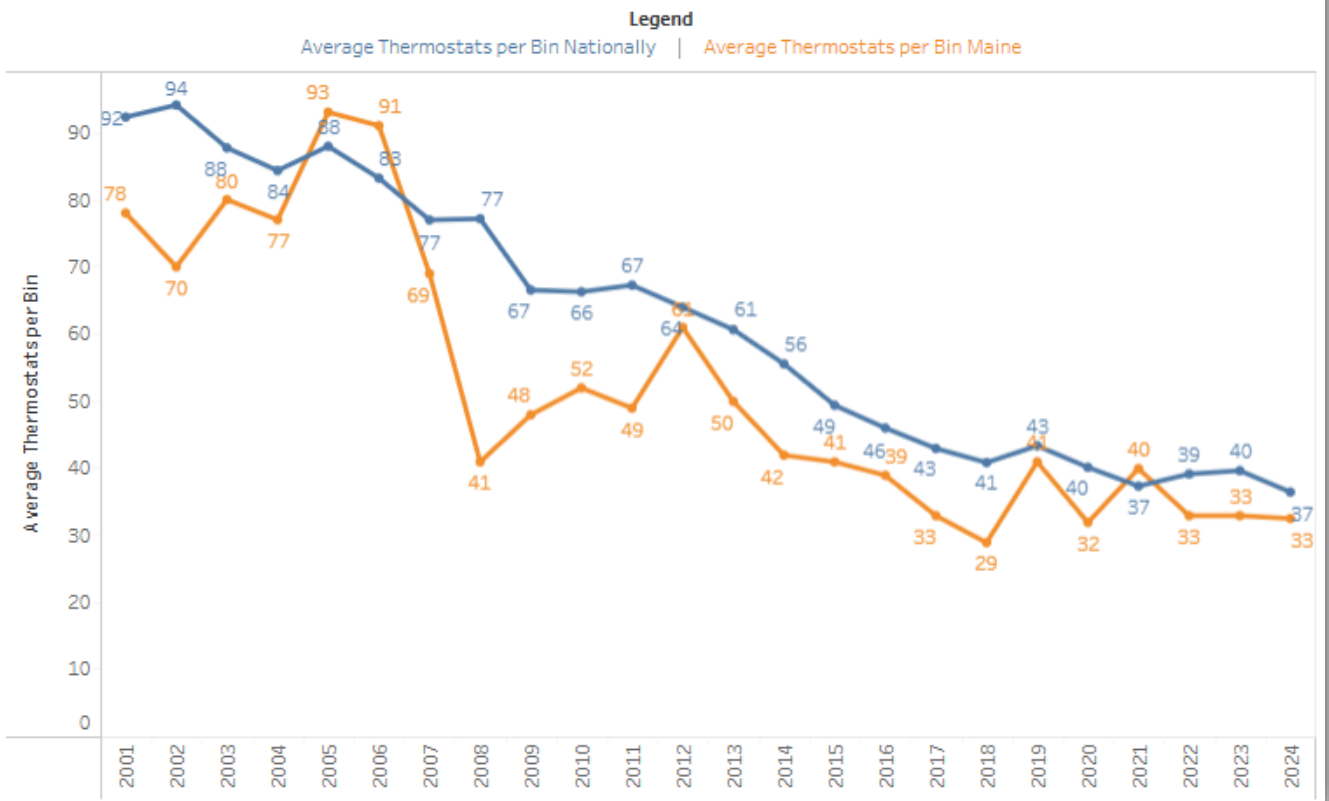

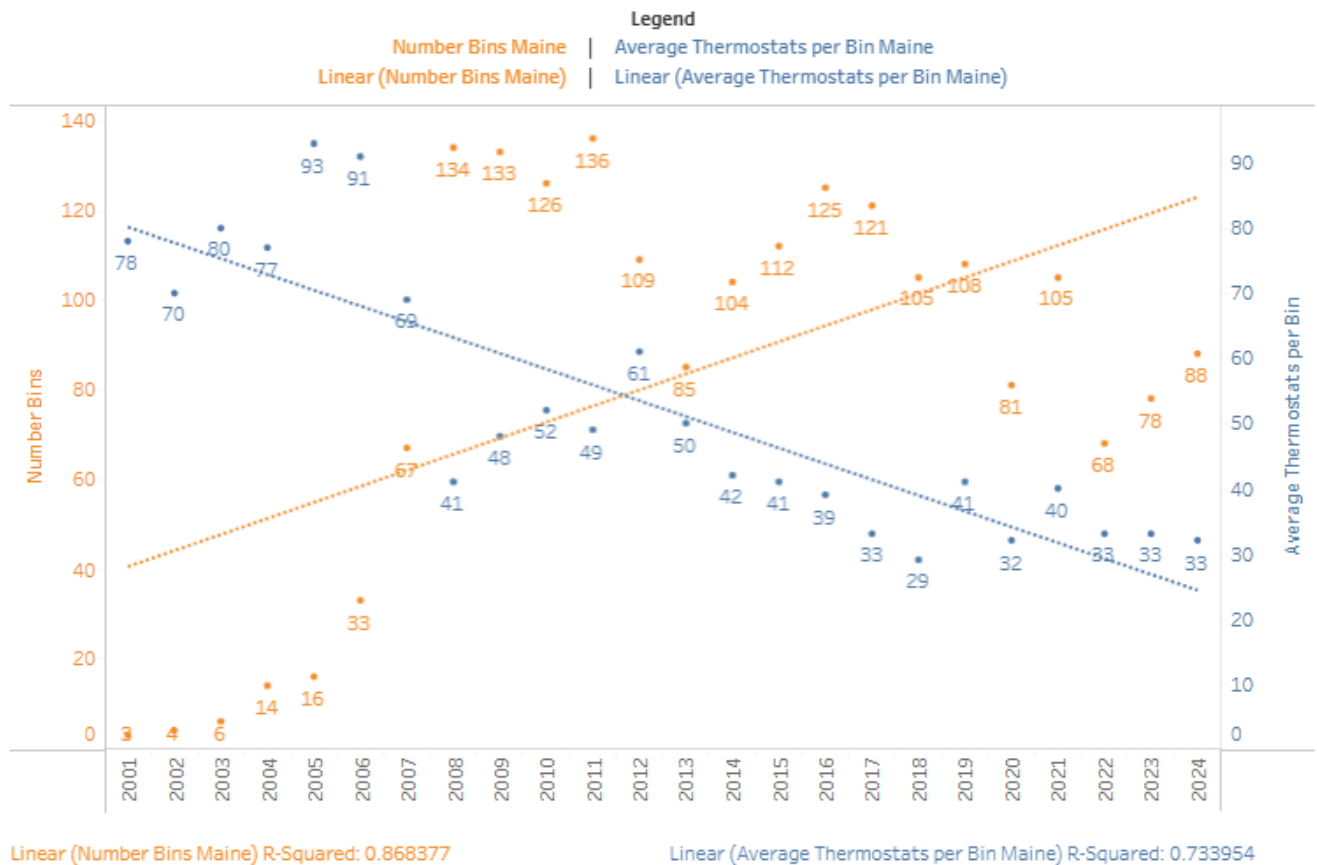

Figure 9 plots the total bins returned over time along with the average number of thermostats per bin over the same period. In general, the number of bins returned in Maine increased steadily from 2001 to 2011 and then again until 2016. A negative correlation has been identified between the number of bins returned and the number of thermostats per bin.

SECTION 2: Channel Partner Analysis

Section 2 of the report examines the partner locations in more detail. The majority of thermostats collected in Maine were through retailers (41.8%) and HHWs (29.3%). Figure 10 shows the distribution of thermostats collected by location type in 2024.

Figure 10 - Thermostats Collected by Location Type in 2024

The number of bins returned in 2024 increased across contractors, retailers, and HHWs and decreased across wholesalers. Figure 11 displays the change in the number of bins returned by thermostat collection type over time in Maine.

Figure 11 - Thermostat Bins Returned by Location Type over Time

In 2024, 39% of Maine locations possessing a collection bin sent back at least one bin for recycling. The distribution is displayed in Figure 12.

Figure 13 displays the total bins and thermostats returned by county in 2024. An analysis of the top performing counties revealed that Cumberland County (29 bins, 971 thermostats), Penobscot County (10 bins, 529 thermostats), and Kennebec County (14 bins, 381 thermostats) returned the greatest number of bins and thermostats in 2024.

TRC partner Northcoast Services (493 thermostats) returned the highest number of thermostats in Maine in 2024, followed by Aubuchon Hardware (429 thermostats) and Ecomaine (258 thermostats). Apart from these locations, three program partners returned more than 100 thermostats each. Figure 14 displays the top performers in terms of total thermostats returned in 2024.

TRC conducted several activities in 2024 to increase the number of bins and thermostats returned in Maine. These activities included site visits and ‘miss you’ calls to collection locations that may not have returned a bin recently. In 2024, 63 site visits completed by TRC were conducted in Maine, and a total of 60 ‘miss you’ calls were placed. Figure 16 displays the relationship between the number of site visits per month, the bins returned per month, and the number of thermostats (in 100's) returned per month. In 2024, there was a positive correlation between activities performed and the number of bins returned.

SECTION 3: Comparisons to National and Other States' Data

To compare how the Maine collection partners performed in 2024, the national average for the number of bins returned per location that returned at least one bin was calculated and compared to the Maine average since 2012. The average number of bins does not include locations that did not return any bins in that year. It should be noted that when making comparisons each state has different regulations, a different mix of housing types, local policies, and incentives that may have a unique impact on returns. Overall, the average number of bins returned per location per year was lower in Maine than the U.S. average.

Figure 21 displays total percentage of locations that actively participated in the program (active participation defined as sending back at least one bin) in 2024, for all the states that mandate thermostat returns reporting as well as the U.S. national average for all states (reporting and non-reporting). In 2024, 39% of the locations in Maine returned at least one bin compared to a national average of 17%. The highest percentage of locations returning a bin in 2024 amongst states that mandate thermostat returns reporting was Rhode Island (75%).

Figure 21 - Percent of Locations Returning a Bin in 2024

Figure 22 compares the Maine and national rates for several analytics. These include: total whole thermostats, bins, and loose switches collected, number of thermostats collected by total locations and per actively participating locations, number of thermostats per bin returned on average, equivalent average, number of mercury thermostat equivalents returned in 2024, and finally percent change in mercury thermostat conversion from 2023 to 2024. The equivalent average is an average of the number of switches in whole thermostats collected in Maine, and it is used to represent an equivalent number of thermostats from returned loose switches. The thermostat equivalent number includes the totals of whole thermostats returned plus the number of thermostats estimated from loose switches. The states displayed are those that mandate thermostat returns reporting and the U.S. average is for all states that return bins (reporting and non-reporting).

2024 Collections by Brand

In Maine, Thermostat Recycling Corporation (TRC) recovered the equivalent of 2,882 mercury thermostats from 2,867 whole mercury thermostats plus 16 mercury switches removed from thermostats. A total of 18.5 pounds of mercury was diverted from solid waste. *Please note the explanation of the converted thermostats or thermostat equivalents below.¹ An example of the mercury ampoule is shown below.

As required by the state statute, a table of thermostat brand holders with their corresponding thermostats, the number of switches and the pounds of mercury recycled is below. It is important to note that there remain non-members whose thermostats the TRC collection program recycles. They are listed in the table as “Non-Member Brands”.

¹ A mercury thermostat contains a variable amount of mercury ampoules or “switches” attached to the subbase of the thermostat. These glass ampoules often are collected in the recycling container without the intact thermostat attached to them. TRC collects and counts these loose ampoules and recycles them. To derive the converted thermostat or thermostat equivalent, the program takes the following calculations to develop the converted thermostat or thermostat equivalent. First, TRC will count the total whole (intact) thermostats collected in the recycling bins. From these units, there is an intact ampoules count. TRC then takes the intact ampoules divided by the whole (intact) thermostats or otherwise known as the conversion ratio. After the conversion ratio is calculated, TRC will multiply the loose mercury switches by the conversion ratio. Lastly, we add this result to the whole (intact) thermostats to produce the converted thermostats or thermostat equivalents.

Current Collection Locations

Small Pails and Green Bins

In 2024, TRC shipped 73 small pails to collection points around the country. We also shipped 208 new green bins. In comparison, the program shipped 374 new green bins in 2023 and 58 small pails². Collection locations either requested the new pail when they signed up to participate in the program or chose to switch out their bin with a pail due to decreased collections. The large green bins which have been the staple of the program continued to be replenished as they were returned for processing. Because the containers are reused and bar coded, we anticipate that the request for new containers will decrease as the program continues.

- Of the totals provided, TRC shipped zero new small pails and 11 new large bins in the state.

Collection Location Outbound Phone Calls

Our outbound phone calls have been branded internally as the “Miss You Call” process. These calls promote collection container returns and serve as a reminder to locations that have not returned any thermostats. TRC allocates these “miss you calls” to collection sites that have not returned a container in over a year. These calls serve as a friendly customer service check to see if any of the program materials need to be replenished or if missing containers need to be replaced. In total, the program called 1,302 current collection locations in 2024, compared to 1,432 in 2023. The decline in the number of calls completed is a positive sign that more locations were returning a bin without being prompted in 2024, and therefore did not require a “Miss You Call”.

- Completed 60 calls to encourage shipping the recycling container compared to 195 a year prior. A copy of the locations called can be found in the Appendix.

² New bin orders coincide with accounts that open new stores, move or lose their existing containers.

Collection Location Postcards

Postcards are sent to all locations that have not returned a container in the past year. These postcards serve as a reminder to locations and assist with updating addresses in the database. In 2024, TRC mailed 9,147 postcards.

- Mailed 489 reminder postcards compared to 512 a year prior.

Collection Location Emails

TRC emailed locations three weeks after receiving a postcard to encourage them to directly ship the recycling container. These emails contain step-by-step instructions for shipping and direct contact information for missing shipping labels or further questions. In 2024, TRC emailed 2,380 locations.

- Emailed 76 collection locations three weeks after receiving the reminder postcard to ship their container.

Collection Location Site Visits

Throughout the year, our team completed 387 site visits in numerous states, compared to 426 in 2023. The purpose of site visits is to inform the location of the requirements of participation, what specifically the statute requires of them, assist with shipment of the recycling container, and to answer any questions they may have. We often gather valuable information during the site visit which is used to enhance TRC's outreach and update the database with current contact details.

- TRC visited 63 collection locations compared to 51 in 2023. A copy of the sites visited can be found in the Appendix.

HVAC Industry

The HVAC industry is comprised of manufacturers, wholesale distributors, and contractors which are intimately involved with the recovery of mercury thermostats. Throughout the year, we engaged with this industry in the following ways.

- Our Banish Mercury Off the Planet (BMOP) Competition, encouraging all HARDI wholesalers to compete through collections, ran May 1 through October 31. Throughout the competition we sent direct marketing to over 16,500 individual HARDI members.
 - 2024's competition recovered 150 pounds of mercury from more than 300 wholesale branch locations during the contest period.
 - This year's winners were Johnstone Supply, G.W. Berkheimer, and Design Air.
 - Our top three branches for recycling in the competition:
 - G.W. Berkheimer Co., Inc., Crown Point, IN – 4.64 pounds
 - G.W. Berkheimer Co., Inc., Arlington Heights, IL – 4.19 pounds
 - South Side Control Supply Co., Morton Grove, IL – 4.02 pounds

Waste Related Sector and Household Hazardous Waste (HHW) Industry

The waste-related sector remains an important sector for TRC to target individuals and those residents performing DIY thermostat installations. These attempts were to gain new collection locations, form better relationships with the audience and raise overall awareness of the TRC program. As a result of these learnings, TRC took the following actions:

- Used google alerts for HHW events to target phone call or email outreach to encourage them to use the program.
- Presented at the Sustainability in Motion Conference on March 7th in Atlantic City, NJ
- Exhibited at the Maine Resource Recovery Association's Conference, April 29-30

Digital Summary

This report summarizes all digital advertising efforts in spreading TRC’s message to audience members in Maine in 2024 – including search engine optimization (SEO) and digital advertising. Digital advertising included search engine marketing (SEM) ads targeting consumers through Google Performance Max; social media ads targeting consumers through LinkedIn; and programmatic ads targeting consumers through StackAdapt.

Search Engine Optimization

Search Engine Optimization (SEO) is the process whereby a website is optimized through original content and on-site coding tactics to increase its chances of appearing near the top of “organic searches.” An organic search is one that appears “naturally” in a search engine like Google or Bing. In other words, an organic listing is not ranked through paid search.

Organic traffic to a website typically brings visitors who stay longer, and visit more pages, on average.

In 2024, organic search traffic for all states (not specific to Maine) brought 4,103 users to the TRC website. By comparison, 2,069 users were attributed to organic search over the same time period in 2023.

Search Engine Marketing Ads

As part of search engine marketing (SEM), Google Ads is a digital advertising platform where advertisers can bid on search terms (or keywords) to have informational ads displayed, where ads appear alongside search results. This campaign targets people most likely to be interested in relevant content by driving traffic to various pages on the TRC website. TRC has developed a search campaign to align with terms searched by individuals related to thermostats, mercury, mercury recycling, thermostat replacement, etc.

Quantitative Results

A quantitative summary of SEM ad performance for Maine in 2024 is detailed below, with a comparison to 2023.

Metric	2024	2023
Impressions	563,907	353,169
Clicks	10,592	5,986
Clickthrough Rate (CTR)	1.67%	1.69%
Cost per Click (CPC)	\$1.44	\$0.09
Conversions (Find a Location)	444	15

Notes

- Impressions: Number of times ads were served to viewers.
- Clicks: Number of viewers who clicked on ads
- CTR: Click-through-rate, calculated by the number of clicks divided by the number of impressions.
- CPC: Average amount paid for each click.

Social Media and Programmatic Ads

Through social media and programmatic advertising, advertisers can attract large audiences on the platforms they use for social networking and website browsing. This campaign targets people with relevant interests and drives them to various pages on the TRC website. For these ads, audiences on the various platforms were subdivided into various categories, as shown in the quantitative results table below.

Below is the overall performance for Maine in 2024 for each target audience and platform.

Audience	Platform	Impressions	Clicks	CTR	Conversions (Find a Location)
Consumer	StackAdapt	140,346	4,483	3.19%	1
Contractor	LinkedIn	183,934	1,372	0.75%	-
TOTAL:		324,280	5,855	1.97%	1

Digital Qualitative Analysis

Through paid digital advertising, TRC's various messages were shown nearly over 560,000 times to audience members in Maine. Of those over 560,000 times, over 7,000 users were acquired to the website – where 444 conversions occurred. Audience members most likely to take an action from our ads were consumers through Google Performance Max ads. In terms of search engine optimization, organic website traffic doubled from 2023 to 2024.

2025 Program Modifications

Thermostat Recycling Corporation's 2025 Goals

TRC has set annual goals for the organization. These goals assist in decision making and prioritization of activities. For the calendar year 2025, TRC plans to focus on:

- Fulfilling state statutory requirements, agreements, and other arrangements for regulatory compliance.
- Focusing on education and awareness tactics geared toward homeowners and HVAC industry professionals.
- Utilize advertising budget efficiently.

Thermostat Recycling Corporation's Planned Tasks

In addition to the above goals, TRC set specific tasks on which we plan to focus. Completion of these tasks aid in the organization's overall goals.

- Roll-out press releases throughout the year.
- Survey national HVAC professionals, as well as geographically targeted contractors.
- Continue the program's operational activities such as outbound phone calls, mailing reminder postcards, and visiting sites. Use collection data trends to target these initiatives.
- Evaluate print advertising and look to online sources.
- Create a public service announcement (PSA) and offer to local municipalities to utilize in their outreach efforts.

HOW MERCURY THERMOSTAT WASTE IS HANDLED

WASTE MERCURY-ADDED THERMOSTAT MANAGEMENT THROUGH VEOLIA ES TECHNICAL SOLUTIONS, LLC.

TRC containers with waste mercury-switch thermostats are received at a fulfillment/inventory center in Port Washington, Wisconsin (WIR000130591). The facility is owned and operated by Veolia ES Technical Solutions, L.L.C. (Veolia) under contract with TRC.

All recycling containers, including pails and bins are received at the loading dock and sent to the TRC inventory room. The container and plastic liner are opened and the contents are identified, sorted, and tallied. The following data is recorded for each bin returned and processed: bin number, business name (location name), city, state, zip code, date returned, number of thermostats and mercury switches by manufacturer and any non-conforming material.

The containers are returned to the location that sent it in with a new prepaid address label within 3 weeks of receipt. The thermostats are stored and staged in a plastic lined carton in a storage area for final processing. The containers are dated and processed in order received, first in-first out.

The thermostats and any loose bulbs collected from the containers are consolidated into a special 55-gallon drum which is labeled and dated according to regulations. The drum is sealed with a band and is only opened when contents are being added to it. Special negative pressure venting assures any fumes are captured and vented when the drum is opened.

The 55-gallon drum is then shipped to Veolia's mercury recovery facility (WID988566543) for final processing of the mercury ampules (switches). Veolia Environmental Services meets or exceeds all local, state, federal and EPA regulations for the management of the product.

The containers are returned from the storage area to the mercury recovery processing area to have the mercury bulbs removed from the plastic housing. Universal Waste Regulations require the recycling and disposal of waste within 12 months of acceptance at the processing facility.

Small quantities of thermostats are removed from the container, which is then closed again. The bulbs are removed from the thermostats and placed into processing vessel at the work station. Once the processing vessel is full, the vessel is loaded into the mercury recovery retort oven.

If a bulb breaks and the mercury spills, the work area is designed to contain the spillage and the operators are trained in the clean-up and disposal of mercury. The TRC inventory

and processing areas are equipped with special mercury vacuum cleaners and the work area is vacuumed at the end of the work day to ensure that any spillage is cleaned up and not left to evaporate.

Veolia meets or exceeds all local, state, federal and EPA regulations for the management of the product. The mercury recovery facility and process are permitted by the Wisconsin Department of Natural Resources. Veolia's approvals for mercury recovery/recycling include:

- EPA - identification WID988566543
- Hazardous Waste Storage License #6008
- Hazardous Waste Treatment License (Mercury Recovery Operations) #4585
- Air Operation Permit #246076050-S01
- Storm Water General Permit #WI-S067857-4

In addition to the regulatory permits, both Veolia Port Washington facilities have developed and maintain management systems in accordance with ISO 14001-2004, OHSAS 18001-2007, and Responsible Recycling (R2:2013) Practice. All persons who handle mercury thermostats as part of the TRC operation receive training in the handling of Hazardous Waste and Universal Waste.

The mercury containing ampules are retorted at Veolia's Port Washington Mineral Springs facility. The mercury is removed during the retort process. The post retort debris consists of broken glass ampules. The debris is tested for residual mercury to document the removal of the mercury to levels below the US EPA Land Disposal Restriction (LDR) levels. The debris is then disposal of as a non-hazardous solid waste at Advanced Disposal Glacier Ridge Landfill, LLC in Horicon, Wisconsin.

TRC Annual Report on Mercury-Added Thermostat Collection and Recycling in Maine – Calendar Year 2024 Activities

In accordance with 38 M.R.S.A. §1665-B(2)(G), the State of Maine is providing this form to the Thermostat Recycling Corporation (TRC) for reporting on behalf of the manufacturers of mercury-added thermostats on their 2024 collection and recycling program performance in Maine. Please complete this form electronically, attach information as necessary, and submit a signed copy with all attachments, no later than April 1, 2025, to: courtney.hafner@maine.gov.

I. Thermostat Collection and Incentive Data. Provide the following collection information:

A. Current list of sites participating in TRC recycling program. Include facility name, address, contact, phone number, and type of facility (wholesaler, contractor, retailer, municipal, other).

- See annual report - Appendices, 2024 Collection Location Summary Report

B. Mercury switches collected. Attach a spreadsheet that lists the number of mercury thermostats and switches collected from each brand owner and the weight of mercury collected from Maine in the following format:

- See annual report, page 29 – 2024 Maine Collections by Brand

C. Thermostats returned by collection location. Include the following information for each collection site in Maine registered with TRC to collect mercury-added thermostats in 2023:

- Location type (wholesaler, contractor, retailer, municipal, other)
- Location name
- Location address
- Site contact name
- Contact phone number and e-mail (as available)
- Collection bin number(s)
- Date of last bin return (include for all sites, even if last return date is prior to 2023)

See annual report - Appendices, 2024 Collection Location Summary Report

D. Summary of incentive payments. List a count of each \$5 incentive payment made (not a summary of unique transactions) in the following format:

	Retail	Mail-back*	Wholesale	Contractor	Municipal/Other
Number of Hg t-stats received in 2024	1199	0	595	231	841
Number of \$5 incentives paid in 2024	696	0	821	158	285
Hg t-stats received with no incentive sticker or claim form in 2024	477	0	16	62	571
Hg t-stats received w/ illegible, damaged, or incomplete coupons or claim forms in 2024	0	0	0	0	0
Checks disbursed in 2024, returned as undeliverable and no alternative delivery	0	0	0	0	0
Hg t-stats received with incentive sticker and no remittance coupon on file as of 12/31/22	0	0	0	0	0

TRC Annual Report on Mercury-Added Thermostat Collection and Recycling in Maine – Calendar Year 2024 Activities

*List towns from which TRC received mercury-added thermostats through the mail-back program.

In 2024, there were 0 thermostats received from mail-back.

III. Education and Outreach. Describe all education and outreach efforts undertaken in 2024 to promote the TRC program in Maine. For each activity, describe the strategy employed to target Maine residents, and whether the effort specifically conveyed information on the \$5 incentive. Provide copies of materials utilized to promote thermostat recycling and the return incentive. Do not include national or industry-based outreach efforts unless Maine businesses, residents, or municipalities were specifically targeted, contacted, or otherwise the recipients (e.g. Google location-specific advertising tracking data that reached Maine residents) of the education and outreach efforts.

A. Print media ads distributed in Maine: Include ad copy, publication name, and dates published.

a. Page 37-38 of annual report

B. Radio and TV PSAs/ads: Include a copy of each PSA and ad, a description of its distribution, the channels on which the ad was run, the time slots, and number of times the ad was run.

a. Page 38 of annual report

C. Online ads: Describe the online advertising strategy to target Maine residents and include screen shots of ads, websites where they appeared, date range during which they appeared, and click-through rate.

a. Page 41-43 of annual report

D. Direct outreach to current collection sites in Maine: include copies of fliers, postcards, letters, and other print outreach; dates of distribution; number sent out; responses from participants, if any; and dates and locations of site visits.

a. Page 31-33 of annual report and appendices

E. Outreach to recruit new collection sites in Maine: describe format and frequency of efforts to recruit new collection sites, including copies of materials distributed, number and types of facilities targeted; and number and names of new collection sites signed up as a result.

a. Page 33 of annual report

F. Other: describe any additional education and outreach activities specific to the Maine program that were conducted in 2024; include intended audience and geographic distribution.

a. Page 31-35 of annual report

G. Measures of success: describe methods of measuring success of outreach efforts in Maine, including: the results of surveys of general public and targeted audience (e.g., contractors) awareness of mercury thermostat collection programs and financial incentive; increases in thermostat recycling program participation; improved quality of bin contents and incentive vouchers; greater frequency of bin returns; increased usage of incentive vouchers; increases in the number of participating collection sites.

a. This is explained throughout the report in its correlating sections.

IV. Program effectiveness. Provide an evaluation of the effectiveness of the collection program in Maine. Include information on any changes in the number of collection sites by type from the previous year, and any data available on the number of mercury thermostats remaining in Maine
