NEW YORK

2024 Collections and Evaluation

The following analytical report details the annual program performance for mercury thermostat collection in the state of New York in 2024.

A few of the program highlights for 2024 are included below:

- In 2024 the program collected 22.3 lbs. of mercury in New York. Since 2000, the annual
 quantity of mercury collected in New York has averaged 33.1 lbs.
- The program collected **2,670 whole thermostats in 2024**. This was a 26% increase over the number of thermostats collected in 2023. Since 2000, the average thermostat count per year is 3,458.
- The number of **whole thermostats** collected **per bin** in 2024 **was 28 thermostats,** a slight increase from 27 in 2023.
- The counties with the most bins and thermostats returned in 2024 were Monroe County
 (15 bins, 572 thermostats), Suffolk County (8 bins, 272 thermostats), and Onondaga
 County (10 bins, 250 thermostats).
- In 2024, 33% of the partner locations returned at least one bin.
- A total of 419 'Miss You' calls were placed, and 140 site visits were conducted in 2024
 which resulted in a positive relationship of activity to bin returns.
- In addition to 2,670 whole thermostats, 406 loose switches were collected, bringing
 the total number of "thermostat equivalents" returned in 2024 to 3,010, an increase of
 23% from 2023.

Section 1: Program Analytics

Section 1 of this report examines the annual performance of the thermostat collection recycling program in terms of bins, thermostats, and mercury collected as well as the year-over-year progression of the program. On average, the program has collected 33.1 lbs. of mercury and 3,458 whole thermostats per year since 2001. In 2024, the program collected 22.3 lbs. of mercury from 2,670 thermostats and 406 loose switches. Figure 1 below displays the total number of bins, the total number of thermostats, and the quantity of mercury collected in New York since the beginning of the program.

Figure 1 - Pro	ogram Performano	e Over Time	
Year	Number Bins	Number Thermostats	Mercury (Lb)
2001	22	1,334	15.7
2002	21	1,145	10.4
2003	32	1,829	16.2
2004	35	2,473	21.0
2005	32	2,211	20.6
2006	53	3,915	34.1
2007	34	2,396	21.0
2008	52	3,774	31.5
2009	44	3,306	28.0
2010	57	3,871	37.8
2011	47	3,422	31.9
2012	49	3,473	29.2
2013	38	2,297	22.4
2014	78	4,786	40.1
2015	201	6,466	83.8
2016	165	5,857	59.8
2017	204	7,703	84.9
2018	191	5,619	51.8
2019	160	4,963	39.2
2020	114	3,384	30.3
2021	111	3,639	34.5
2022	121	3,327	34.8
2023	80	2,118	18.5
2024	94	2,670	22.3
Total	2,040	86,446	827.7
Average	82	3,458	33.1

Figure 2 displays the number of bins collected in New York since the initiation of the collection program, as well as the total number of bins collected in the U.S. over the same period. The number of bins collected in New York has generally increased from 2000 to 2010. In 2014, bin returns increased again, peaking with the highest number of bins returned in 2017 with 204 bins. In 2024, the number of bins returned increased to 94 bins.

The 22.3 lbs. of mercury collected in New York in 2024 was 21% higher than the 18.5 lbs. collected in 2023. Figure 3 displays the quantity of mercury collected in New York over time as well as the annual percent change in New York and nationally.

Year	Mercury (Lb)	% Change New York	% Change National
2001	15.7	10096	89
2002	10.4	-3496	14
2003	16.2	5696	11
2004	21.0	29%	17
2005	20.6	-296	11
2006	34.1	65%	32
2007	21.0	-39%	2
2008	31.5	5096	16
2009	28.0	-1196	16
2010	37.8	3596	26
2011	31.9	-1696	4
2012	29.2	-896	-5
2013	22.4	-2496	-5
2014	40.1	7996	13
2015	83.8	10996	-1
2016	59.8	-29%	-15
2017	84.9	4296	-7
2018	51.8	-3996	-42
2019	39.2	-2496	5
2020	30.3	-2396	-35
2021	34.5	1496	5
2022	34.8	196	-28
2023	18.5	-4796	10
2024	22.3	2196	-22

Figure 4 displays the total number of thermostats collected in New York and nationally, and Figure 5 shares the underlying data as well as the calculated annual percent change. New York collected 2,670 thermostats in 2024. This was a 26% increase over the number of thermostats collected in 2023.

Figure 5 - Whole Thermostats Collected in New York and Nationally Over Time and Annual Percent Change

Year	Number Thermostats New York	% Change New York	% Change Nationally
2001	1,334	185%	
2002	1,145	-1496	2796
2003	1,829	6096	796
2004	2,473	3596	23%
2005	2,211	-1196	896
2006	3,915	7796	3096
2007	2,396	-39%	096
2008	3,774	58%	1996
2009	3,306	-1296	1596
2010	3,871	1796	28%
2011	3,422	-1296	O96
2012	3,473	196	-596
2013	2,297	-3496	-496
2014	4,786	10896	1296
2015	6,466	3596	-296
2016	5,857	-996	-1896
2017	7,703	3296	-396
2018	5,619	-2796	-1196
2019	4,963	-1296	-596
2020	3,384	-3296	-3696
2021	3,639	896	996
2022	3,327	-996	-2196
2023	2,118	-3696	-996
2024	2,670	26%	-15%
Average	3,458		

Figure 6 displays the monthly distribution of bins and thermostats collected in New York in 2024. The months with the greatest number of thermostats returned were April (515 thermostats, 18 bins), and May (623 thermostats, 26 bins).

The highest number of thermostats per bin returned occurred in January and September (75.5 and 52.7 thermostats per bin each month, respectively). Figure 7 shows the average number of thermostats per bin returned per month for the year.

Figure 8 displays the average number of thermostats returned per bin in New York and in the U.S. since the beginning of the New York program. Nationally, the number of thermostats per bin has been decreasing annually since 2000. In New York a similar pattern is observed after 2009, with the exception of a few years. The number of thermostats per bin in 2024 (28 thermostats per bin avg.) increase from 2023 (27 thermostats per bin avg.).

Figure 9 plots the total bins returned over time along with the average number of thermostats per bin over the same period. In general, the number of bins returned in New York increased steadily from 2000 to 2017 and has since seen a slight drop. At the same time, thermostats per bin remained consistent until 2012, after which the trend in thermostats per bin dropped. A negative correlation has been identified between the number of bins returned since 2009 and the number of thermostats per bin.

SECTION 2: Channel Partner Analysis

Section 2 of the report examines the partner locations in more detail. The majority of thermostats collected in New York were through wholesalers (72.4%) with the majority of the remaining thermostats collected by contractors (20.8%) and HHWs (5.3%). Figure 10 shows the distribution of thermostats collected by location type in 2024.

The number of bins returned in 2024 increased across contractors compared to 2023. Figure 11 displays the change in the number of bins returned by thermostat collection type over time in New York.

In 2024, 33% of New York locations possessing a collection bin sent back at least one bin for recycling. The distribution is displayed in Figure 12.

Figure 13 displays the total bins and thermostats returned by county in 2024. An analysis of the top performing counties revealed that Monroe County (15 bins, 572 thermostats), Suffolk County (8 bins, 272 thermostats), and Onondaga County (10 bins, 250 thermostats) returned the greatest number of bins and thermostats in 2024.

	Number Thermostats	Number Bin
Monroe	572	1
Suffolk	272	_
Onondaga	250	1
Broome	249

TRC partner Johnstone Supply (466 thermostats) returned the highest number of thermostats in New York in 2024, followed by R. E. Michel (454 thermostats) and Irr Supply (254 thermostats). Apart from these locations, three other program partners returned more than 100 thermostats. Figure 14 displays the top performers in terms of total thermostats returned in 2024.

Figure 15 includes the top performers for 2024 by each of the following categories: total bins returned, total thermostats returned, and average number of thermostats per bin.

Figure 15 - Top 10 Performing Partners by Total Bins, Total Thermostats,
and Average Thermostats per Bin

	Number Thermostats	Number Bins	Average Thermostats per Bin
Johnstone Supply	466	8	58
R. E. Michel Co.	454	10	45

Onondaga County Resource Recovery Ag	79	2	40
F.W. Webb	78	1	78
Sid Harvey	72	4	18

TRC conducted several activities in 2024 to increase the number of bins and thermostats returned in New York. These activities included site visits and 'miss you' calls to collection locations that may not have returned a bin recently. In 2024, 140 site visits were conducted in New York, and a total of 419 'miss you' calls were placed. Figure 16 displays the relationship between the number of site visits per month, the bins returned per month, and the number of thermostats (in 100's) returned per month. In 2024, there was a positive correlation between activities performed and the number of bins returned.

Figure 17 displays the relationship between the number of calls per month, the bins returned per month and the number of thermostats (by 100's) returned per month. Calls were placed in the months of February and October.

SECTION 3: Comparisons to National and Other States' Data

To compare how the New York collection partners performed in 2024, the national average for the number of bins returned per location that returned at least one bin was calculated and compared to the New York average since 2012. The average number of bins does not include locations that did not return any bins in that year. It should be noted that when making comparisons each state has different regulations, a different mix of housing types, local policies, and incentives that may have a unique impact on returns. Overall, the average number of bins returned per location per year was lower in New York than the U.S. average, as shown in Figure 18.

Figure 19 displays the locations in New York that returned more than one bin in a given year, and Figure 20 displays the top 10 partners in the U.S. in terms of the number of bins returned.

Figure 21 displays total percentage of locations that actively participated in the program (active participation defined as sending back at least one bin) in 2024, for all the states that mandate thermostat returns reporting as well as the U.S. national average for all states (reporting and non-reporting). In 2024, 33% of the locations in New York returned at least one bin compared to a national average of 17%. The highest percentage of locations returning a bin in 2024 among states that mandate thermostat returns reporting was Rhode Island (75%).

Figure 22 compares the New York and national rates for several analytics. These include total whole thermostats, bins, and loose switches collected, number of thermostats collected by total locations and per actively participating locations, number of thermostats per bin returned on average, equivalent average, number of mercury thermostat equivalents returned in 2024, and finally percent change in mercury thermostat conversion from 2023 to 2024. The equivalent average is an average of the number of switches in whole thermostats collected in New York, and it is used to represent an equivalent number of thermostats from returned loose switches. The thermostat equivalent number includes the totals of whole thermostats returned plus the number of thermostats estimated from loose switches. The states displayed are those that mandate thermostat returns reporting and the U.S. average is for all states that return bins (reporting and non-reporting).

_	Figure 22 - Comparison of States and US Average Among Several Categories

2024 Collections by Brand

In New York, Thermostat Recycling Corporation (TRC) recovered the equivalent of 3,010 mercury thermostats from 2,670 whole mercury thermostats plus 406 mercury switches removed from thermostats. A total of 22.3 pounds of mercury was diverted from solid waste. *Please note the explanation of the converted thermostats or thermostat equivalents below.¹ An example of the mercury ampoule is shown below.

As required by the state statute, a table of thermostat brand holders with their corresponding thermostats, the number of switches and the pounds of mercury recycled is below. It is important to note that there remain non-members whose thermostats the TRC collection program recycles. They are listed in the table as "Non-Member Brands".

^{1 1}

¹ A mercury thermostat contains a variable amount of mercury ampoules or "switches" attached to the subbase of the thermostat. These glass ampoules often are collected in the recycling container without the intact thermostat attached to them. TRC collects and counts these loose ampoules and recycles them. To derive the converted thermostat or thermostat equivalent, the program takes the following calculations to develop the converted thermostat or thermostat equivalent. First, TRC will count the total whole (intact) thermostats collected in the recycling bins. From these units, there is an intact ampoules count. TRC then takes the intact ampoules divided by the whole (intact) thermostats or otherwise known as the conversion ratio. After the conversion ratio is calculated, TRC will multiple the loose mercury switches by the conversion ratio. Lastly, we add this result to the whole (intact) thermostats to produce the converted thermostats or thermostat equivalents.

2024 Summary of the Program Expenses

Below is a summary of program expenses for the New York collection program in 2024. 2024 program expenses (reported in the annual report) are unaudited and are for management purposes only. Prior to submittal of this annual report, the expenses were reviewed by Kellen Company.

Program Component	2023	2024	Difference
Direct Expense for Marketing & Outreach	\$ 50,756.91	\$ 47,385.32	\$ (3,371.59)
Incentive/Promotional Payments	\$ -	\$ -	\$ -
Legal	\$ -	\$ -	\$ -
New Collection Containers	\$ -	\$ -	\$ -
Recycling Costs	\$ 6,776.97	\$ 8,165.97	\$ 1,389.00
Travel			\$ -
TRC Staff & Administration	\$ 2,401.71	\$ 2,905.71	\$ 504.00
Total Expenses	\$ 59,935.59	\$ 58,457.00	\$ (1,478.59)

2024 Education and Outreach

Direct Marketing (Email, Mail, Other Communications)

Current Collection Locations

Small Pails and Green Bins

In 2024, TRC shipped 73 small pails to collection points around the country. We also shipped 208 new green bins. In comparison, the program shipped 374 new green bins in 2023 and 58 small pails². Collection locations either requested the new pail when they signed up to participate in the program or chose to switch out their bin with a pail due to decreased collections. The large green bins which have been the staple of the program continued to be replenished as they were returned for processing. Because the containers are reused and bar coded, we anticipate that the request for new containers will decrease as the program continues.

 Of the totals provided, TRC shipped three new small pails and five new large bins in the state.

Collection Location Outbound Phone Calls

Our outbound phone calls have been branded internally as the "Miss You Call" process. These calls promote collection container returns and serve as a reminder to locations that have not returned any thermostats. TRC allocates these "miss you calls" to collection sites that have not returned a container in over a year. These calls serve as a friendly customer service check to see if any of the program materials need to be replenished or if missing containers need to be replaced. In total, the program called 1,302 current collection locations in 2024, compared to 1,432 in 2023. The decline in the number of calls completed is a positive sign that more locations were returning a bin without being prompted in 2024, and therefore did not require a "Miss You Call".

 Completed 419 calls to encourage shipping the recycling container compared to 392 a year prior. A copy of the locations called can be found in the Appendix.

² New bin orders coincide with accounts that open new stores, move or lose their existing containers.

Collection Location Postcards

Postcards are sent to all locations that have not returned a container in the past year. These postcards serve as a reminder to locations and assist with updating addresses in the database. In 2024, TRC mailed 9,147 postcards.

• Mailed 1,146 reminder postcards compared to 1,245 a year prior.

Collection Location Emails

TRC emailed locations three weeks after receiving a postcard to encourage them to directly ship the recycling container. These emails contain step-by-step instructions for shipping and direct contact information for missing shipping labels or further questions. In 2024, TRC emailed 2,380 locations.

 Emailed 314 collection locations three weeks after receiving the reminder postcard to ship their container.

Collection Location Site Visits

Throughout the year, our team completed 387 site visits in numerous states, compared to 426 in 2023. The purpose of site visits is to inform the location of the requirements of participation, what specifically the statute requires of them, assist with shipment of the recycling container, and to answer any questions they may have. We often gather valuable information during the site visit which is used to enhance TRC's outreach and update the database with current contact details.

- Visited 140 collection locations compared to 74 in 2023. A copy of the sites visited can be found in the Appendix, site visit outcomes are listed in the last column.
 - o Of the 140 site visits:
 - 61 locations had an empty bin, most with visible signage
 - 33 locations had a bin that was prepared and scheduled for a FedEx pickup
 - 15 locations were missing the bin and needed a replacement
 - 8 locations had recently shipped their bin back for recycling
 - 23 locations were closed or had another update

HVAC Industry

The HVAC industry is comprised of manufacturers, wholesale distributors, and contractors which are intimately involved with the recovery of mercury thermostats. Throughout the year, we engaged with this industry in the following ways.

- Our Banish Mercury Off the Planet (BMOP) Competition, encouraging all HARDI
 wholesalers to compete through collections, ran May 1 through October 31. Throughout
 the competition we sent direct marketing to over 16,500 individual HARDI members.
 - 2024's competition recovered 150 pounds of mercury from more than 300 wholesale branch locations during the contest period.
 - o This year's winners were Johnstone Supply, G.W. Berkheimer, and Design Air.
 - Our top three branches for recycling in the competition:
 - G.W. Berkheimer Co., Inc., Crown Point, IN 4.64 pounds
 - G.W. Berkheimer Co., Inc., Arlington Heights, IL 4.19 pounds
 - South Side Control Supply Co., Morton Grove, IL 4.02 pounds

The waste-related sector remains an important sector for TRC to target individuals and those residents performing DIY thermostat installations. These attempts were to gain new collection locations, form better relationships with the audience and raise overall awareness of the TRC program. As a result of these learnings, TRC took the following actions:

- Used google alerts for HHW events to target phone call or email outreach to encourage them to use the program.
- Presented at the Sustainability in Motion Conference on March 7th in Atlantic City, NJ

Advertising and Awareness

Website

This past year, we experienced better statistics around website traffic and visitors, which will be detailed below. To keep the website fresh, blogs and press releases are posted monthly and shared with our many stakeholders.

Press Releases

MONTH	RELEASE
January	Thermostat Recycling Corp. Records Marginal Increase in Pounds of Mercury Collection for 2023

Recycle Every Mercury Thermostat

Recycle Mercury Thermostats for Free

Promoted by TRC

Help preserve the environment by properly disposing your mercury thermostats. The Thermostat Recycling Corporation (TRC) is a non-profit stewardship organization that maintains 3,400+ collection locations nationwide. We accept all brands of wall-mount mercury thermostats and assume all recurring shipping and processing costs. Click below to get your free container. Learn More

Digital Summary

This report summarizes all digital advertising efforts in spreading TRC's message to audience members in New York in 2024 – including search engine optimization (SEO) and digital advertising. Digital advertising included search engine marketing (SEM) ads targeting consumers through Google Performance Max; social media ads targeting consumers through LinkedIn; and programmatic ads targeting consumers through StackAdapt.

Search Engine Optimization

Search Engine Optimization (SEO) is the process whereby a website is optimized through original content and on-site coding tactics to increase its chances of appearing near the top of "organic searches." An organic search is one that appears "naturally" in a search engine like Google or Bing. In other words, an organic listing is not ranked through paid search.

Organic traffic to a website typically brings visitors who stay longer, and visit more pages, on average.

In 2024, organic search traffic for all states (not specific to New York) brought 4,103 users to the TRC website. By comparison, 2,069 users were attributed to organic search over the same time period in 2023.

Search Engine Marketing Ads

As part of search engine marketing (SEM), Google Ads is a digital advertising platform where advertisers can bid on search terms (or keywords) to have informational ads displayed, where ads appear alongside search results. This campaign targets people most likely to be interested in relevant content by driving traffic to various pages on the TRC website. TRC has developed a search campaign to align with terms searched by individuals related to thermostats, mercury, mercury recycling, thermostat replacement, etc.

Quantitative Results

A quantitative summary of SEM ad performance for New York in 2024 is detailed below, with a comparison to 2023.

Metric	2024	2023
Impressions	501,886	114,370
Clicks	10,835	3,311
Clickthrough Rate (CTR)	2.01%	2.85%
Cost per Click (CPC)	\$0.93	\$0.09
Conversions (Find a Location)	603	42

Notes

- Impressions: Number of times ads were served to viewers.
- Clicks: Number of viewers who clicked on ads
- CTR: Click-through-rate, calculated by the number of clicks divided by the number of impressions.
- CPC: Average amount paid for each click.

Social Media and Programmatic Ads

Through social media and programmatic advertising, advertisers can attract large audiences on the platforms they use for social networking and website browsing. This campaign targets people with relevant interests and drives them to various pages on the TRC website. For these ads, audiences on the various platforms were subdivided into various categories, as shown in the quantitative results table below.

Below is the overall performance for New York in 2024 for each target audience and platform.

Audience	Platform	Impressions	Clicks	CTR	Conversions (Find a Location)
Consumer	StackAdapt	140,684	3,696	2.63%	2
Contractor	LinkedIn	214,111	2,118	0.99%	3
	TOTAL:	354,795	5,814	1.81%	5

Digital Qualitative Analysis

Through paid digital advertising, TRC's various messages were shown nearly over 500,000 times to audience members in New York. Of those over 500,000 times, over 10,000 users were acquired to the website – where 603 conversions occurred. Audience members most likely to take an action from our ads were consumers through Google Performance Max ads. In terms of search engine optimization, organic website traffic doubled from 2023 to 2024.

2025 Program Modifications

Thermostat Recycling Corporation's 2025 Goals

TRC has set annual goals for the organization. These goals assist in decision making and prioritization of activities. For the calendar year 2025, TRC plans to focus on:

- Fulfilling state statutory requirements, agreements, and other arrangements for regulatory compliance.
- Focusing on education and awareness tactics geared toward homeowners and HVAC industry professionals.
- Utilize advertising budget efficiently.

Thermostat Recycling Corporation's Planned Tasks

In addition to the above goals, TRC set specific tasks on which we plan to focus. Completion of these tasks aid in the organization's overall goals.

- Roll-out press releases throughout the year.
- Survey national HVAC professionals, as well as geographically targeted contractors.
- Continue the program's operational activities such as outbound phone calls, mailing reminder postcards, and visiting sites. Use collection data trends to target these initiatives.
- Evaluate print advertising and look to online sources.

HOW MERCURY THERMOSTAT WASTE IS HANDLED

WASTE MERCURY-ADDED THERMOSTAT MANAGEMENT THROUGH VEOLIA ES TECHNICAL SOLUTIONS, LLC.

TRC containers with waste mercury-switch thermostats are received at a fulfillment/inventory center in Port Washington, Wisconsin (WIR000130591). The facility is owned and operated by Veolia ES Technical Solutions, L.L.C. (Veolia) under contract with TRC.

All recycling containers, including pails and bins are received at the loading dock and sent to the TRC inventory room. The container and plastic liner are opened and the contents are identified, sorted, and tallied. The following data is recorded for each bin returned and processed: bin number, business name (location name), city, state, zip code, date returned, number of thermostats and mercury switches by manufacturer and any non-conforming material.

The containers are returned to the location that sent it in with a new prepaid address label within 3 weeks of receipt. The thermostats are stored and staged in a plastic lined carton in a storage area for final processing. The containers are dated and processed in order received, first in-first out.

The thermostats and any loose bulbs collected from the containers are consolidated into a special 55-gallon drum which is labeled and dated according to regulations. The drum is sealed with a band and is only opened when contents are being added to it. Special negative pressure venting assures any fumes are captured and vented when the drum is opened.

The 55-gallon drum is then shipped to Veolia's mercury recovery facility (WID988566543) for final processing of the mercury ampules (switches). Veolia Environmental Services meets or exceeds all local, state, federal and EPA regulations for the management of the product.

The containers are returned from the storage area to the mercury recovery processing area to have the mercury bulbs removed from the plastic housing. Universal Waste Regulations require the recycling and disposal of waste within 12 months of acceptance at the processing facility.

Small quantities of thermostats are removed from the container, which is then closed again. The bulbs are removed from the thermostats and placed into processing vessel at the work station. Once the processing vessel is full, the vessel is loaded into the mercury recovery retort oven.

If a bulb breaks and the mercury spills, the work area is designed to contain the spillage and the operators are trained in the clean-up and disposal of mercury. The TRC inventory

and processing areas are equipped with special mercury vacuum cleaners and the work area is vacuumed at the end of the work day to ensure that any spillage is cleaned up and not left to evaporate.

Veolia meets or exceeds all local, state, federal and EPA regulations for the management of the product. The mercury recovery facility and process are permitted by the Wisconsin Department of Natural Resources. Veolia's approvals for mercury recovery/recycling include:

- EPA identification WID988566543
- Hazardous Waste Storage License #6008
- Hazardous Waste Treatment License (Mercury Recovery Operations) #4585
- Air Operation Permit #246076050-S01
- Storm Water General Permit #WI-S067857-4

In addition to the regulatory permits, both Veolia Port Washington facilities have developed and maintain management systems in accordance with ISO 14001-2004, OHSAS 18001-2007, and Responsible Recycling (R2:2013) Practice. All persons who handle mercury thermostats as part of the TRC operation receive training in the handling of Hazardous Waste and Universal Waste.

The mercury containing ampules are retorted at Veolia's Port Washington Mineral Springs facility. The mercury is removed during the retort process. The post retort debris consists of broken glass ampules. The debris is tested for residual mercury to document the removal of the mercury to levels below the US EPA Land Disposal Restriction (LDR) levels. The debris is then disposal of as a non-hazardous solid waste at Advanced Disposal Glacier Ridge Landfill, LLC in Horicon, Wisconsin.

SCHEDULE C (Form 990)

Political Campaign and Lobbying Activities For Organizations Exempt From Income Tax Under Section 501(c) and Section 527

OMB No. 1545-0047

Open to Public Inspection

Department of the Treasury Internal Revenue Service

Complete if the organization is described below. Attach to Form 990 or Form 990-EZ. Go to www.irs.gov/Form990 for instructions and the latest information.

If the organization answered "Yes" on Form 990, Part IV, line 3, or Form 990-EZ, Part V, line 46 (Political Campaign Activities), then:

- Section 501(c)(3) organizations: Complete Parts I-A and B. Do not complete Part I-C.
- Section 501(c) (other than section 501(c)(3)) organizations: Complete Parts I-A and C below. Do not complete Part I-B.
- Section 527 organizations: Complete Part I-A only.

If the organization answered "Yes" on Form 990, Part IV, line 4, or Form 990-EZ, Part VI, line 47 (Lobbying Activities), then:

- Section 501(c)(3) organizations that have filed Form 5768 (election under section 501(h)): Complete Part II-A. Do not complete Part II-B.
- Section 501(c)(3) organizations that have NOT filed Form 5768 (election under section 501(h)): Complete Part II-B. Do not complete Part II-A.

If the organization answered "Yes" on Form 990, Part IV, line 5 (Proxy Tax) (see separate instructions) or Form 990-EZ, Part V, line 35c (Proxy Tax) (see separate instructions), then:

			tions: Complete Part III.
